Module Comprehensive Traineeship / Summer School: Language
06SM278-505 / Module

Description:

General description:
This core elective approves the completion of a traineeship or summer school that helps students to improve practical communication skills or linguistic competence in one of the languages of Modern Asia or the Middle East. Students need to consult with the MAMES study advisor and then obtain approval from the respective department's study advisor within the IAOS before booking the module as to confirm that the traineeship, summer school or workshop is offered by an accredited institution and can be counted towards their degree.

ECTS: 6

Notes:
Zur Buchung des Moduls beachten Sie bitte die Hinweise auf unserer Homepage: https://www.aoi.uzh.ch/de/studies/studyorganization/courseofstudies/booking.html

Learning Outcome:
Completion of a Traineeship/Summer School/Workshop can help students to improve their communication skills or linguistic competences in grammar, writing, reading, or academic use of one of the languages of Asia or the Middle East.

Languages of Instruction:
gemäss Anbieter

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Nicolas Martin David Chiavacci

Requirements:

Prerequisites:	Students must identify potential host institutions and organize their enrolment. Host institutions can either be other institutes of the UZH, external institutions in Switzerland or an overseas institution, including in the country of the language studied.
Assessment:	dokumentierte praktische Arbeit ---
Grading Scale:	Pass/Fail
Repeatability:	repeatable once, book again

Organisation:

Module MAT 733DP Dynamical Systems and Ergodic Theory
07SMMAT733DP / Course

Description:

General description:
Dynamical systems is an exciting and very active field in pure (and applied) mathematics, that involves tools and techniques from many areas such as analysis, geometry and number theory. This introductory course will focus on discrete time dynamical systems, which can be obtained by iterating a function. Even if the rule of evolution is deterministic, the long term behavior of the system is often chaotic. Different branches of dynamical systems, in particular ergodic theory, provide tools to quantify this chaotic behaviour and predict it in average. We will give a strong emphasis on presenting many fundamental examples of dynamical systems. Driven by the examples, we will first introduce some of the phenomena and main concepts which one is interested in studying. We will then formalize these concepts and cover the basic definitions and some fundamental theorems and results in topological dynamics, in symbolic dynamics and in particular in ergodic theory. During the course we will also mention some applications for example to number theory, information theory and Internet search engines. Topics which will be covered include:

-Basic examples of dynamical systems (e.g. rotations and doubling map; baker's map, CAT map and hyperbolic toral automorphisms; the Gauss map and continued fractions);
-Elements of topological dynamics (minimality; topological conjugacy; topological mixing; topological entropy);
-Elements of symbolic dynamics (shifts and subshifts spaces; topological Markov chains and their topological dynamical properties; symbolic coding);
-Introduction to ergodic theory: invariant measures; Poincare' recurrence; ergodicity; mixing; the Birkhoff Ergodic Theorem and applications; Markov measures; the ergodic theorem for Markov chains and applications to Internet Search; measure theoretic entropy;
-Selected topics (time permitting): Shannon-McMillan-Breiman theorem; Lyapunov exponents and multiplicative ergodic theorem; continuous time dynamical systems and some mathematical billiards.

ECTS: 3

Notes:
Graduate course: Bachelor- and Masterstudents have to book the module MAT733

Learning Outcome:
By the end of the unit the student: will have developed a good background in the area of dynamical systems; will be familiar with the basic concepts, results, and techniques relevant to the area; will have detailed knowledge of a number of fundamental examples that help clarify and motivate the main concepts in the theory; will understand the proofs of the fundamental theorems in the area; will have mastered the application of dynamical systems techniques for solving a range of standard problems; will have a firm foundation for further study in the area.

Target Groups:
Advanced BSc students, MSc, and PhD students. This here is the module for PhD Students, BSc and MSc students please book MAT733

Languages of Instruction:
English

Course Materials:

Lecture notes for several of the topics covered will be provided.
Textbooks which can be used as additional reference for some of the topics include:

-B. Hasselblatt and A. Katok, Dynamics: A first course. (Cambdirge University Press, 2003) - Chapters 7,8,10 and 15
-M. Brin and G. Stuck, Introduction to Dynamical Systems. (Cambridge University Press, 2002) - Chapters 1-4
-Omri Sarig, Lectures Notes on Ergodic Theory (Available Online), Topics from Chapter 1 and 2

Merkmale:

Responsible instructor: Corinna Ulcigrai

Requirements:

Prior Knowledge: Basic knowledge of measure theory and integration.

Assessment: Written exam

Grading Scale: Pass/Fail

Repeatability: Can be repeated once

Module BIO 347 Concepts in Developmental Biology: From Cells to Animals
07SMBIO347 / Course

Description:

General description:
This concept lecture focuses on the control of fundamental cellular processes during animal development. The topics to be discussed include the regulation of cell division and cell growth, the establishment and maintenance of cellular polarity, specification of germ cells, determination of body axes and segmentation, as well as various processes occurring during organ morphogenesis. The relevance of these processes to the origin of human diseases will be discussed. Participants will read selected primary research articles and participate in the journal clubs.

ECTS: 3

Learning Outcome:
By the end of this module students should be able to:

- summarize the basic concepts in cellular and developmental biology
- explain to their colleagues cell biological and molecular processes during animal development
- critically analyze and discuss selected scientific papers in order to strengthen their knowledge in the field of cellular and developmental biology
Key skills By the end of this module students should be able to:
- formulate specific questions after reading and analyzing scientific articles

Languages of Instruction:
English

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Alex Hajnal

Requirements:

Prerequisites:	BIO 111 and BIO 112 or equivalent knowledge of basic molecular and cellular Biology, BIO 142, BIO 125 or equivalent knowledge of basic developmental biology.
Assessment:	Graded participation in journal clubs (English). Before each of the 5 to 6 journal clubs, the participants need to submit written answers to questions about the articles they are reading.
Grading Scale:	1-6, Half Grades Given
Repeatability:	Can be repeated once

Module GGP.S440 Basics in Geography II
07SMGEO901 / PHZH SEK I Module

Description:

General description:
Various scientific principles and approaches are presented and practised on the basis of learning objectives from the subject areas of physical geography and human geography (focus in inequalities and sustainability). We will discuss fundamental methods and techniques of scientific work on the basis of relevant content and research topics in geography. All topics will be treated at different scales. It is important that these scales are not seen as static and clearly separate units, but that we are aware that there are many connections between these levels. Another important concern for us is to establish links between the thematic priorities.

ECTS: 3

Notes:
The course takes place on site.

The Sustainable Development Goals (SDGs (https://sdgs.un.org/goals)) are a collection of 17 global goals interacting with each other, which are designed to be the blueprint to achieve a better and more sustainable future for all. The 2030 Agenda for SDGs is adopted by all United Nations Member States.

These SDGs are covered in this module: 5; 6; 8; 10 & 13

Learning Outcome:
Ability to critically refelct on selected topics in human geography, physical geography and integrative geography

Target Groups:
Specialist lectures for students enrolled at the PHZH, secondary school level I with the subject GGP/Geography

Languages of Instruction:
German

Course Materials:	Provided via Ilias
Merkmale:	
Responsible instructor:	Sara Landolt

Requirements:

Assessment:	Written examination (the two modules GGP.S420 Basics in Geography I (07SMGEO900) & GGP.S440 Basics in Geography II (07SMGEO901) will be examined in a joint written examination in summer 2025). The language of examination is German. Written examination, graded in half marks, can be repeated once, examination date: 3 June 2026, 10 a.m., repeat date: January 2027
Grading Scale:	1-6, Half Grades Given
Repeatability:	Can be repeated once

Module Case Studies in Public Law I
02SM60FB1ÖR / Hausarbeit

Description:

General description:
Fallbearbeitung im Öffentlichen Recht I in der Assessmentstufe.

ECTS: 3

Notes:
In der Assessmentstufe müssen die Studierenden eine schriftliche Fallbearbeitung bestehen. Es kann gewählt werden zwischen: Fallbearbeitung im Römischen Privatrecht, Fallbearbeitung im Personenrecht, Fallbearbeitung im Strafrecht I und Fallbearbeitung im Öffentlichen Recht I. Die Teilnehmerzahl je Fallbearbeitung ist beschränkt. Die genaue Anzahl ist noch nicht abschliessend festgelegt.

Die Anmeldung zur Fallbearbeitung im Assessment erfolgt jeweils bereits Ende November/Anfang Dezember des Herbstsemesters über das Studierendenportal. Bei der Fallbearbeitung im Assessment handelt es sich um ein Anfragemodul. Um mit Sicherheit eine Zuteilung zu erhalten, ist es wichtig, für alle vier Fallbearbeitungen eine Anfrage zu stellen und eine Priorität (1 bis 4) zu vergeben.

Jede Studentin bzw. jeder Student kann nur eine schriftliche Fallbearbeitung einreichen.

Der zu bearbeitende Sachverhalt für die Fallbearbeitung im Öffentlichen Recht I wird zur gegebenen Zeit auf der Webseite des Lehrstuhls Moeckli veröffentlicht.

Module Case Studies in Public Law II
02SM120FB1ÖR / Hausarbeit

Description:

General description:
Fallbearbeitung im Rahmen der Übungen im Öffentlichen Recht II.
Fallsammlung und Fälle zur schriftlichen Bearbeitung auf der Webseite der jeweiligen Dozierenden der Übungen im Öffentlichen Recht II.

ECTS: 3

Notes:
Die Anmeldung zu den Fallbearbeitungen im Frühjahrssemester erfolgt jeweils bereits Ende November/Anfang Dezember des Herbstsemesters über das Studierendenportal. Die Teilnehmerzahl je Fallbearbeitung ist beschränkt. Die genaue Anzahl ist noch nicht abschliessend festgelegt.

Merkmale:

Responsible instructor:	Johannes Reich

Requirements:

Assessment:	Schriftliche Fallbearbeitung
Grading Scale:	Pass/Fail
Repeatability:	Can be repeated twice

Organisation:

Offer pattern:	2 Semesters (Begins in Fall Semester)
Request period:	not bookable
Place allocation at the latest:	
Waiting list progression period:	not bookable
Cancellation period:	not cancelable
Organisation:	Faculty of Law
Offered in:	Spring Semester 2027 Fall Semester 2026 Spring Semester 2026 Fall Semester 2025 Spring Semester 2025 Fall Semester 2024 Spring Semester 2024 Fall Semester 2023 Spring Semester 2023 Fall Semester 2022

Module Case Studies in Public International Law / European Law
02SM120FB2ÖR / Hausarbeit

Description:

General description:
Fallbearbeitung im Rahmen der Übungen Völker- und Europarecht.
Fallsammlung und Fall zur schriftlichen Bearbeitung werden zu gegebener Zeit aufgeschaltet.

ECTS: 3

Notes:
Die Anmeldung zu den Fallbearbeitungen im Frühjahrssemester erfolgt jeweils bereits Ende November/Anfang Dezember des Herbstsemesters über das Studierendenportal. Die Teilnehmerzahl je Fallbearbeitung ist beschränkt. Die genaue Anzahl ist noch nicht abschliessend festgelegt.

Learning Outcome:
Studierende sollen in der Lage sein, selbstständig einen Fall im Völker-/Europarecht zu lösen.

Target Groups:
Studierende der Aufbaustufe

Languages of Instruction:
Deutsch

Merkmale:

Responsible instructor:	Matthias Oesch

Requirements:

Prerequisites:	Keine
Prior Knowledge:	Erwartet werden Vorkenntnisse im Völker-/Europarecht (etwa Besuch der Vorlesungen in diesen Fächern).
Assessment:	Schriftliche Fallbearbeitung
Grading Scale:	Pass/Fail
Repeatability:	Can be repeated twice

Module Sustainability now! Feminist Pathways to environmental justice
10SMSTS-102 / Module

Description:

General description:
The event will be conducted as a lecture series by the Right Livelihood Center and the Sustainability Hub. The event always opens with an introductory presentation by a winner of the Alternative Nobel Prize. The lectures by laureates do not fall within classic academic areas but instead demonstrate impressively how knowledge is operationalized in the field. Additionally, engaging with the award winners promotes inter-, trans-, and multidisciplinary ways of thinking. This is because their achievements, for example in the areas of human rights or ecology, cannot be clearly assigned to a single field of study. The topic of sustainability is explored from various perspectives. Each evening, alongside the winners, there will be a representative from research and civil society on the podium.

ECTS: 3

Notes:
The module offers the opportunity to provide the assesment as a moderation or podcast.The module also offers the opportunity to get to know outstanding personalities with the award winners. The module is on high demand, so book early.

Course intro: https://t.uzh.ch/1Po

Learning Outcome:
The students acquire inter- and transdisciplinary skills. The group of moderators works on performance skills. The podcast group increases media competence. All students understand that complex societal challenges can only be tackled through transdisciplinary approaches and practice.

Target Groups:
BA, MA

Languages of Instruction:
English

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Jeannette Behringer Aline Steinbrecher Frei

Requirements:

Prerequisites:	Good knowledge of English is a prerequisite. The willingness to engage in different work formats. Willingness to take responsibility for the event.
Assessment:	Students have two options for providing proof of achievement: They can choose between moderation (in a team of two or three) during an evening or creating a podcast during an evening. They also write peer reviews for two events each. ---
Grading Scale:	Pass/Fail
Repeatability:	Can't be repeated

Organisation:

Offer pattern:	1 Semester (Every Spring Semester)
Request period:	from Mi 14.01.2026 10:00 to Di 27.01.2026 24:00
Place allocation at the latest:	Sa 31.01.2026 22:00

Module BIO 274 Mass extinctions, macroevolution and macroecology through the Phanerozoic
07SMBIO274 / Course

Description:

General description:
Mass extinctions belong to the major drivers of evolution. In this course, we will discuss major crises and radiations of the past 600 million years including causes, macroecological changes as well as the rise and fall of major groups of organisms. A special focus will be on conservation deposits of the Phanerozoic.

ECTS: 1

Learning Outcome:
In addition to the knowledge of the evolution of life, every student will present a related topic; presentation skills will thus be improved.

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Christian Klug

Requirements:

Prerequisites:	Basic knowledge in biology
Assessment:	Oral presentation (topic will be discussed in class)
Grading Scale:	1-6, Half Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Second Spring Semester)
Booking Deadline/Period:	from We 14.01.2026 10:00 to Tu 10.03.2026 24:00

Module Forensic Medicine for Associates Master's Participants
02SM90WMB1 / Course

Description:

General description:
Diese Veranstaltung wird von der Medizinischen Fakultät der Universität Zürich in Zusammenarbeit mit der Rechtswissenschaftlichen Fakultät der Universität Zürich angeboten. Das Modul erstreckt sich über zwei Semester und besteht aus einem theoretischen und einem praktischen Teil.

Der theoretische Teil beinhaltet die Vorlesung Rechtsmedizin (Inhalt sind insbesondere rechtsmedizinische Spezialgebiete) sowie den Gruppenkurs «Leichenschau und Bildgebung».

Der praktische Teil beinhaltet:

- Verkehrsmedizin (1/2 Tag, Terminabklärung individuell): Teilnahme an einer verkehrsmedizinischen Fahreignungsuntersuchung.
- Forensische Medizin (1 Tag, Terminabklärung individuell): Begleitung des Dienstarztes während einer Schicht, um seinen Alltag kennen zu lernen.
- Rechtsmedizinische Instruktion (1/2 Tag): Einführung in die Kerngebiete der Rechtsmedizin.

Pro Durchführung können 4 Masterstudierende der Rechtswissenschaftlichen Fakultät teilnehmen.

ECTS: 6

Notes:
Anmeldungen werden ab Beginn der Modulbuchungsfrist der RWF bis zum 30. Januar 2026, 23:59 Uhr entgegengenommen.

Weitere Informationen finden sich auf OLAT
(Kursname: "Rechtsmedizin (Master) FS/HS26", Link: https://t.uzh.ch/1pV).

Learning Outcome:
Einblick in die Methoden der Bearbeitung von aussergewöhnlichen Todesfällen und Gewalteinwirkungen, Begutachtung und Qualifikation von Vergehen und Verbrechen gegen Leib und Leben und Beurteilungen von Fahreignungsuntersuchungen, schwerpunktmässig mit theoretischem Bezug.
Dabei sollen sowohl Möglichkeiten als auch Problemstellungen und Grenzen gezeigt werden. Es sollen hier nützliche Grundlagen für eine spätere Tätigkeit als Strafjurist/in (Richter/in, Staatsanwältin, Verteidiger/in etc.) vermittelt werden.

Target Groups:
Rechtsmedizinisch interessierte Masterstudierende der Rechtswissenschaft.

Languages of Instruction:
Deutsch

Course Materials: Werden direkt oder über OLAT abgegeben.

Merkmale:

Responsible instructor: Brigitte Tag
Michael Thali

Requirements:

Prerequisites:	Bachelorabschluss, Aufnahme als assoziierte Teilnehmende auf Masterstufe
Prior Knowledge:	Keine, medizinisches Vorwissen ist aber von Vorteil. Es sei darauf hingewiesen, dass die Veranstaltungen von der Medizinischen Fakultät bzw. dem Institut für Rechtsmedizin (IRM) angeboten werden. Der Inhalt kann medizinisches Vorwissen beinhalten, über das Studierende der Rechtswissenschaft nicht verfügen.
Assessment:	Für die Teilnehmenden besteht Präsenzpflicht an allen Veranstaltungen (inkl. der Vorbesprechung anfangs Semester). Die Leistungsüberprüfung erfolgt im Rahmen einer Abschlussbesprechung unter fachkundiger Leitung. Hier können Fragen gestellt werden und das Erlebte sowie die gewonnenen Erkenntnisse ausgetauscht werden. Hierzu müssen die Studierenden einen Erfahrungsbericht von 6-8 Seiten einreichen.
Grading Scale:	Pass/Fail
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	2 Semesters (Begins in Spring Semester)
Dates/Times/Deadlines:	Die Termine werden auf OLAT publiziert. Die Einführungsveranstaltung vom 20.02.2026 findet im KOL-G-216 statt.
Booking Deadline/Period:	not bookable

Module Get R_eady: Dynamic Reporting & Reproducibility in Research
10SMSTS-507 / Module

Description:

General description:
Larger collections of data are becoming increasingly available. To exploit their potential, statistical analysis skills are needed.
The direct link between data and visualization/reporting of results in all empirical research disciplines is highly relevant as several scientific fields habe been criticized for lacking reproducibility.
Dynamic reporting tools can be used to directly link data and analysis output, enabling fast adaptation of changes in the dataset following e.g. after data preparation, validation or in the context of manuscript revisions.

Tailored to the application of empirical research, the course covers the basics of dynamic report compilation in RMarkdown, including examples of dynamic reports for presentations, manuscripts, and html websites. Reflections on research methodology, especially reproducibility, open science and transdisciplinarity will take place. Exemplary reports from different disciplines will be compiled and presented by the students.

ECTS: 1

Notes:
The Get R_eady module enhances digital skills in the context of data analysis and graphics. It stimulates critical thinking and provides tools for reproducible research. In applications corresponding to the course participants' backgrounds, the concepts are explained. Hands-on sessions facilitate the understanding of the participants and enhance the discussion.

The course is building on problem based learning and held in an interactive and diverse format, with short lectures, demonstrations and hands on practical exercises to be solved in small groups.

Learning Outcome:
Aims of the course

- to equip participants with the essential tools to document their research with dynamic reporting tools,
- to enable participants to generate presentations, manuscripts, and html websites directly from the underlying data sets,
- to empower participants to critically engage with and reflect on methodological aspects of dynamic reporting and adapt the techniques to their own data sets and problems.

Target Groups:
Master, Doktorat

Languages of Instruction:
English

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Ulrike Held Philosophische Fakultät N.N.-Dozent

Requirements:

Prerequisites:	Participants should have basic knowledge in statistical methods and in the programming language R, equivalent to completion of the course "Get R_eady:

Introduction to Data Analysis for Empirical Research". Students should be beginners with software Quarto, R Markdown, R Notebook and R Sweave.

Assessment: The assessment is based on the following components:

- preparatory work before course start
- completion of group exercises
- short presentations in the second and third part of the course
- homework

The components of the assessment take place during the course, and homework needs to be submitted during the course and 2.5 weeks after the last course date.

Grading Scale: Pass/Fail

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Semester)

Request period: not bookable

Place allocation at the latest:

Waiting list progression period: not bookable

Cancellation period: not cancelable

Module KOF ETH UZH Seminar in International Economic Policy
03SMDOEC1028 / Doktorandenseminar

Description:

General description:
External speakers present applied work on current policy issues in macroeconomics, trade and finance.

ECTS: 0

Notes:
The Seminar in International Economic Policy is co-organized by the UZH (Prof. Mathias Hoffmann & Prof. Ulrich Woitek) and the KOF ("Konjunkturforschungsstelle") Swiss Economic Institute of the ETH (Prof. Jan-Egbert Sturm & Prof. Peter Egger).
Seminar takes place in room: LEE-E-101.

Target Groups:
PhD-Students and private sector economists.

Languages of Instruction:
English

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Mathias Hoffmann

Requirements:

Module ESC 204 Computational Methods for Radiative Transfer
07SMESC204 / Course

Description:

General description:
In this lecture we will start by introducing the fundamental notions required to model how radiation propagates through matter, a subject known as radiative transfer.
This will entail describing the basic physical concepts behind the study of light propagation in a generic medium, maintaining a macroscopic perspective that should be accessible to students with a variety of backgrounds in the natural sciences. We will then show heuristically how to derive the radiative transfer equation and identify the relevant conditions and regimes that can be invoked to design numerical solvers for such equation (simple examples will be the diffusion and free- streaming limits). We will then describe the most popular methods utilized to construct efficient algorithms for the solvers, such as moment-based methods, ray-tracing and ray-casting, and Monte-Carlo methods. Applications of these computational methods will be shown in astrophysics, cosmology, planetary
science, Earth and environmental sciences (remote sensing), climate sciences, and computer graphics/animation techniques.

ECTS: 5

Module ESC 203 Advanced Simulation in Natural Science
07SMESC203 / Course

Description:

General description:
This course builds upon basic simulation techniques from ESC201 and ESC202. It covers more advanced topics selected from: Multigrid method for Elliptic and non-linear PDEs; Riemann solver methods for hydrodynamic simulations; advanced particle methods; Unitarity conserving methods for quantum mechanics; molecular dynamics; PIC codes for plasma simulations; Lattice-Boltzmann method; FFTs and spectral techniques; granular dynamics simulations. In addition we will explore some more advanced visualization methods to help us understand what is happening in these simulations.

ECTS: 5

Learning Outcome:
To have a broad understanding of methods used in state-of-the-art simulations and to prepare for a Masters/PhD in simulation sciences.

Target Groups:
Advanced Bachelor and Spec. Master in Computational Science

Languages of Instruction:
English

Course Materials:	Lecture Notes provided
Merkmale:	
Responsible instructor:	Joachim Gerhard Stadel

Requirements:

Prior Knowledge:	ESC201 and ESC202, or equivalent practical simulation courses
Assessment:	Based on Exercises and a final more involved project with presentation
Grading Scale:	1-6, Half Grades Given
Repeatability:	Can be repeated once

Module ESC 406 Computational Thinking II
07SMESC406 / Seminar

Description:

General description:
The course will be organized around a series of "computational challenges" which will require an understanding of a broad range of computational topics in order to successfully tackle them.

ECTS: 2

Learning Outcome:
To improve the knowledge base of all MSc and PhD students in Computational Science. This knowledge will also prepare the PhD students for questions during their eventual closed session exam, but in general will improve the performance of all students faced with computational questions during talks/conferences.

Languages of Instruction:

Module ESS 389 BSc Thesis Colloquium
07SMESS389 / Praktikum

Description:

General description:
Students present the result of their practical thesis (ESS 388) to their peers and the group of supervisors and answer questions in a colloquium that is also open to the public.

ECTS: 3

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Meredith Christine Schuman

Requirements:

Prerequisites:	Only bookable with ESS 388.
Assessment:	Presentation and Report Language of examination: German or English
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Semester)
Booking Deadline/Period:	from We 14.01.2026 10:00 to Tu 10.03.2026 24:00
Cancellation Deadline:	from We 14.01.2026 10:00 to Tu 21.04.2026 24:00

Module Comprehensive Traineeship / Summer School in MAMES
06SM278-507 / Module

Description:

General description:
This core elective approves the completion of a traineeship, summer school or workshop that deals with practical work experience or the study of thematic, theoretical, or methodological issues in relation to Modern Asia or the Middle East. Students need to consult with the program study advisor before booking the module as to confirm that the traineeship/summer school is offered by an accredited institution and can be counted towards their degree.

ECTS: 6

Notes:
Zur Buchung des Moduls beachten Sie bitte die Hinweise auf unserer Homepage: https://www.aoi.uzh.ch/de/studies/studyorganization/courseofstudies/booking.html

Learning Outcome:
Completion of a Traineeship/Summer School/Workshop can help students to gain practical work or research experience, deepen thematic knowledge or obtain further conceptual or methodological expertise.

Languages of Instruction:
gemäss Anbieter

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Nicolas Martin David Chiavacci

Requirements:

Prerequisites:	Students must identify potential host institutions / international organizations / NGS and their programs and organize the stay / completion.
Assessment:	dokumentierte praktische Arbeit ---
Grading Scale:	Pass/Fail
Repeatability:	repeatable once, book again

Organisation:

Offer pattern:	1 Semester (Every Semester)
Booking Deadline/Period:	not bookable

Module Bacteriology, Mycology
05SM.240_bm / Lecture with Practical Exercises

Description:

General description:
Gegenstand der Vorlesung sind die Grundlagen der Infektionslehre, der allgemeinen Bakteriologie inkl. Labordiagnostik und Prävention sowie der tiermedizinischen Mykologie. Anschliessend werden im Rahmen der klinischen Bakteriologie tiermedizinisch wichtige Gram-positive Bakterien bearbeitet. Es werden mit dem Schwerpunkt klinische Bakteriologie tiermedizinisch wichtige Gram-negative Bakterien, sowie tiermedizinisch wichtige Pilze bearbeitet.

ECTS: 5

Learning Outcome:
-Grundbegriffe der Infektions- und Seuchenlehre erklären

-Grundlagen des Aufbaus, der Genetik und der Funktion von Bakterien erklären

-Die Grundlagen der Pathogenität von Bakterien erklären

-Die Grundlagen der Bakterientaxonomie und -klassifizierung erklären

-Die Grundlagen der Probenahme und Präanalytik für bakteriologische/mykologische Untersuchungen beschreiben

-Die Begriffe Desinfektion und Sterilisation erklären und wichtige Desinfektions- und Sterilisationsverfahren erklären

-Die Empfindlichkeit und Resistenz von Bakterien gegen antibakterielle Chemotherapeutika (Antibiotika) und die Problematik der Antibiotikaresistenz in der Tiermedizin erklären

-Die Einteilung antibakterieller Wirkstoffe und deren Wirkungsmechanismus beschreiben

-Die Grundlagen der Impfung und der passiven Immunisierung bei bakteriellen Krankheiten der Tiere erklären

-Die Vielfalt der Pilze und ihre wichtigen Nutz- und Schadwirkungen erklären

-Die medizinisch wichtigen Strukturen und Funktionen einschliesslich Grundlagen der Pathogenität der Pilze erklären

-Die Labordiagnostik der Pilze beschreiben

-Medizinisch wichtige Sekundärmetaboliten von Pilzen beschreiben (Antibiotika, Mykotoxine)

-Tiermedizinisch relevante durch Pilze verursachte Erkrankungen erklären

-Die Wirkung der tiermedizinisch wichtigen antimykotischen Chemotherapeutika erklären

Module Biochemistry II
05SM.260_bc / Course

Description:

General description:
Der Intermediärstoffwechsel zeigt wie der tierische Organismus Energie gewinnen, Reserven anlegen und Reserven mobilisieren kann. Die wichtigsten Stoffwechselwege werden aufgezeigt. Am Ende soll an den drei Beispielen der Allosterie, der Hormone und des Zentralnervensystems erarbeitet werden, wie die Stoffwechselregulation stattfinden kann.

ECTS: 4

Learning Outcome:
Die Studierenden sind in der Lage, ...

- einen Überblick über die 4 Säulen des Intermediärstoffwechsels zu geben.
- einzelne Stoffwechselschritte im gesamten Stoffwechsel einzuordnen und sie den verschiedenen Körper-, Organ- und Zellkompartimenten zuordnen.
- die anabolen und katabolen Stoffwechselwege der 4 Stoffgruppen Kohlehydrate, Lipide, Proteine und Nukleinsäuren zu beschreiben und ihre Bedeutung zu erläutern.
- die allosteriesche, hormonelle und zentralnervöse Regulation des Intermediärstoffwechsels zu erklären.
- die Mechanismen ausgewählter, auf Störungen des Intermediärstoffwechsels beruhender Krankheitsbilder beim Tier zu erläutern.
- die neun wasserlöslichen Vitamine und deren Wirkungsorte und Funktion im Stoffwechsel zu erklären.
- Versorgungsstörungen und deren klinische Symptome der wasserlöslichen Vitamine bei verschiedenen Tierarten zu erklären.

Module Heart, Circulatory System, Respiratory System
05SM.270_hz / Lecture with Practical Exercises

Description:

General description:
Die Herz-Kreislauforgane und der Respirationstrakt haben eine zentrale Bedeutung für den Stoffwechsel des gesamten Organismus, indem sie unter anderem für die Aufnahme und Verteilung des für den aeroben Stoffwechsel lebensnotwendigen Sauerstoffs sorgen. Auf dem Weg des Sauerstoffs vom Zeitpunkt des Eintritts in den Körper bis zu dessen Verteilung in alle Körperregionen kann es zu mannigfaltigen Störungen kommen. Diese Erkrankungen lassen sich wie in vielen anderen Organsystemen pathophysiologisch schematisch nach VETAMIN D einteilen: V askulär
E ntzündlich
T raumatisch
A ngeboren
M etabolisch-toxisch
I nfektiös
N eoplastisch
D egenerativ

Die klinische Symptomatik bei Erkrankungen der Herz-Kreislauforgane und des Respirationstraktes ist entweder Folge eines Sauerstoffmangels (beispielsweise verminderte Belastbarkeit, Atemnot) oder Folge einer zugrundeliegenden Pathologie im betreffenden Organ (beispielsweise Niesen, Husten, abnormale Atemgeräusche). Manche dieser Symptome sind Ausdruck eines Schutzmechanismus' oder des Versuchs einer Kompensation.
Die Dekompensation führt zum Tod.

Der Organblock ist aufgebaut nach dem "Weg des Sauerstoffs". Damit beginnt der Block mit den oberen Atemwegen, es folgen die unteren Atemwege und schliesslich der Herz-Kreislauf-Apparat.
Auf dem weiteren Weg des Sauerstoffes lernen Sie in analogem Ablauf den normalen Aufbau und die Funktion des Herz-Kreislauf-Apparats, gefolgt von exemplarischen klinischen Bildern mit den dazugehörigen pathologischen Veränderungen kennen. Der Organblock wird vervollständigt durch Vorlesungen über die wichtigsten medizinischen (pharmakologischen) und chirurgischen therapeutischen Möglichkeiten sowie exemplarische organzentrierte mikrobiologische Aspekte. Mittels Praktika wird das theoretisch vermittelte Wissen bildlich dargestellt, angewandt und gefestigt.

ECTS: 12

Learning Outcome:
-Kenntnis von Aufbau (Anatomie, Histologie, radiologische Anatomie) und Funktion (Physiologie) im Normalzustand, insbesondere von tierartlichen Besonderheiten und Kenntnis der embryonalen Entwicklung

-Erkennen klinischer pathologischer Veränderungen bei verschiedenen Spezies

-Leitsymptome kennen und untersuchen können

-Durchführen des klinischen Untersuchungsgangs zur Erfassung von krankhaften Veränderungen im Herz-Kreislaufsystem und im Respirationstrakt beherrschen

-Kenntnis der Differentialdiagnose klinischer Leitsymptome

-Fähigkeit bei erkranktem Tier, den Respirationstrakt und / oder Herz- Kreislauf-Apparat als Ort der Erkrankung zu erkennen oder aber auszuschliessen

-Innerhalb der Differentialdiagnose Kenntnis und Verständnis der wichtigsten Krankheiten des Respirations- und Herz-Kreislauf-Apparates

-Kenntnis und Verständnis der den Krankheiten zugrundeliegenden pathophysiologischen Vorgänge

-Anpassungsprozesse (Kompensationsmechanismen) bei unterschiedlicher Belastung kennen und verstehen

-Kenntnis und Verständnis der wichtigsten pathologischen Organveränderungen, insbesondere der möglichen Reaktionsmuster

-Morphologische Veränderung beschreiben können

-Erkennen von akuten versus chronischen Veränderungen

-Fähigkeit, klinische und paraklinische Fächer zu vernetzen

-Kenntnis der weiterführenden diagnostischen Möglichkeiten, diese sinngemäss einsetzen können, und Grundfähigkeiten, die Resultate zu interpretieren (Röntgen, Endoskopie, EKG, koproskopische und serologische Untersuchungen)

-Kenntnis der wichtigsten zur Verfügung stehenden Pharmaka, ihrer Wirkungen, ihrer Wirkmechanismen, ihrer Nebenwirkungen und ihres sinngemässen Einsatzes

-Kenntnis der chirurgischen therapeutischen Möglichkeiten, ihrer Indikation, ihrer Komplikationen und ihrer Invasivität.

Module Skin, Thermoregulation
05SM.280_ht / Lecture with Practical Exercises

Description:

General description:
Der Organblock Haut und Thermoregulation befasst sich mit den vielfältigen Aufgaben der Haut und ihrer fundamentalen Bedeutung in der Veterinärmedizin.
Die Haut ist ein flächiges Organ, das die Barriere des Körpers gegenüber der Umwelt darstellt. Zu ihren Aufgaben gehört das Innere des Körpers vor Austrocknung und Wärmeverlust sowie vor Angriffen von Mikroorganismen und Parasiten zu schützen. Die Haut ist wesentlich in die Thermoregulation eingebunden, z.B. durch jahreszeitliche Veränderung der Behaarungsdichte, Aufstellen/Anlegen der Haare, Vasodilatation/
-kontraktion oder bei manchen Tieren durch Schwitzen. Auch werden über die Haut - als Sinnesorgan betrachtet - wichtige Informationen aus der Umwelt dem Organismus zugeführt. Des Weiteren dient die Haut auch als Kommunikationsmittel mit der Umwelt, insbesondere mit Artgenossen durch Sekrete von Duft- und Schweissdrüsen, Erröten oder Haarsträuben etc. Viele Erkrankungen der inneren Organe haben Veränderungen der Haut zur Folge. Diagnostisch ist die Haut eines der am wenigsten kostenintensiven Organe, weil sich ein Grossteil der Diagnosen durch einfaches Hinschauen stellen lässt. Therapeutisch ist die Haut ebenfalls leicht zugänglich. Die Erkrankungen an der Haut sind sehr vielfältig und sind oft mit einer erheblichen Einschränkung des Wohlbefindens des Tieres (z.B. Juckreiz, Störung der Wärmeregulation z.B. bei Alopezie) und/oder Minderung des wirtschaftlichen Ertrages bei Nutztieren (z.B. Furunkulose oder Parasitenbefall) verbunden. Dermatologie ist eine grosse diagnostische und therapeutische Herausforderung aufgrund der zahlreichen einwirkenden und oft nicht zu verifizierenden Noxen. Deshalb ist oft nur eine symptomatische anstatt einer äthiologischen Therapie möglich. Für den Tierarzt ist es deshalb unerlässlich ein fundiertes Wissen in Dermatologie zu besitzen.

Das Wissen betrifft:

- Makroskopsiche und mikroskopische Anatomie, Embryologie und Physiologie der Haut und ihrer Anhangsgebilde
- Allergische, bakterielle, virale, parasitäre und protozoäre Hauterkrankungen, Pilz-, endokrine und Autoimmune-Krankheiten der Haut unterscheiden
- Hauttumore
- Otitis externa
- Traumatische Hautverletzungen (Biss, Schnitt, Pfählung, Verbrennung, Schuss) und Wundtherapie
- Hautspezifische Bakteriologie und Mykologie
- Ektoparasiten
- Hautspezifische Immunologie
- Hautspezifische Pharmakologie

ECTS: 3

Learning Outcome:
Die Studierenden können die makroskopische und mikroskopische Anatomie, sowie die Entwicklung der Haut und ihrer Anhangsgebilde (einschliesslich Haare, Huf, Klaue, Hörner, Geweih und andere Modifikationen) erläutern.
Die Studierenden können eine allgemeine und problemorientierte Anamnese bei einem Patienten mit einem Hautproblem erheben Die Studierenden kennen die dermatopathologischen Fachbegriffe und können diese klinischen Läsionen zuordnen Die Studierenden sind in der Lage, wichtige allergische, autoimmune, bakterielle, virale, protozoäre, und mykologische Hautkrankheiten bei Tieren zu erklären
Die Studierenden sind in der Lage, die wichtigsten Hautumoren zu diagnostizieren
Die Studierenden sind in der Lage, ausgewählte Erreger (Bakterien, Hefen, Dermatophyten, Ektoparasiten, Protozoär) und deren grundlegende Pathomechanismen zu benennen
Die Studierenden sind in der Lage die Pathogenese von allergischen und Autoimmunen Hauterkrankungen zu erklären Die Studierenden sind in der Lage, Diagnostikverfahren und deren Anwendung sowie deren Limitationen anhand konkreter Beispiele zu erklären

Die Studierenden kennen die histologischen Veränderungen, die mit den verschiedenen klinischen Hautläsionen korrelieren.
Die Studierenden sind in der Lage, die Auswahl von geeignetem Probenmaterial anhand konkreter Beispiele zu benennen Die Studierenden kennen die Symptome, Differentialdiagnose und Ätiologien der wichtigsten Hauterkrakungen bei Tieren.
Die Studierenden kennen die Diagnose, die Therapie und die Prognose der wichtigsten Hauterkrankungen bei Tieren
Die Studierenden können die Hauptprinzipen eine Wundtherapie zu erläutern
Die Studierenden können in der Dermatologie eingesetzte Medikamente anwenden sowie die grundlegenden Prinzipien der Therapie mit Dermatologika erklären

Module Parasitology
05SM.285_p1 / Lecture with Practical Exercises

Description:

General description:
Parasitologie I (4. Semester)

Lehrinhalt sind die Helminthen (parasitische Würmer) von Heim- und Nutztieren: Cestoden, Trematoden und Nematoden.

Parasitologie II (5. Semester)

Lehrinhalt sind die parasitischen Protozoen von Heim- und Nutztieren und die veterinärmedizinische Arachno-Entomologie.

ECTS: 0

Learning Outcome:
Parasitologie I

- Die Studierenden kennen die Biologie, Epidemiologie, Pathogenese, Immunologie, Klinik und die Bedeutung von veterinärmedizinisch wichtigen Helminthen, bzw. den von ihnen verursachten Infektionen.
- Die Studierenden können die für Parasitosen relevanten diagnostischen Strategien nennen.
- Die Studierenden können Stadien von Parasiten in diagnostischem Material anhand der Morphologie identifizieren.
- Die Studierenden können auf der Basis der vermittelten Grundlagen Bekämpfungsstrategien für die jeweiligen Parasitosen diskutieren.

Parasitologie II

- Die Studierenden kennen die Biologie, Epidemiologie, Pathogenese, Immunologie, Klinik und die Bedeutung von veterinärmedizinisch wichtigen parasitischen Protozoen und Arthropoden.
- Die Studierenden können die für Parasitosen relevanten diagnostischen Strategien nennen.
- Die Studierenden können Stadien von Parasiten in klinischem Material anhand der Morphologie identifizieren.
- Die Studierenden können auf der Basis der vermittelten Grundlagen Bekämpfungsstrategien für die jeweiligen Parasitosen diskutieren.

Merkmale:

Module Vetsuisse Clinic Days
05SM.290_kt / Praktikum

Description:

General description:
Studierende absolvieren pro Studienjahr 4 mal 1/2 Tage in den Kliniken und Instituten der Vetsuisse-Fakultät. Sie können wählen, wo sie die Kliniktage absolvieren möchten, wobei mindestens die Hälfte der Kliniktage im klinischen Bereich absolviert werden muss.

ECTS: 1

Learning Outcome:
Die Studierenden können sich mit dem Arbeitsalltag einer Tierärztin und eines Tierarztes in der Praxis oder Klinik oder im Labor der Vetsuisse- Fakultät auseinandersetzen. Sie lernen die Kliniken, Abteilungen und Institute kennen. Sie erkennen die praktische Umsetzung von Vorlesungsstoff.

Merkmale:

Module Kommunication Basis
05SM.295_km / Lecture with Practical Exercises

Description:

General description:
Um in ihrer zukünftigen Tätigkeit erfolgreich zu sein, müssen die Studierenden auch Fähigkeiten zeigen, die einen guten Umgang mit den Tierbesitzern ermöglichen. Das Seminar Kommunikation im Herbstsemester und der Vertiefungs-Workshop im Frühjahrssemester tragen diesem Erfordernis Rechnung.

Methode (Seminar Einführung)
1. Theoretischer Input
2. Videobeispiele von Kommunikationssequenzen
3. Reflektion in Gruppen
4. Ableitungen im Plenum
5. Erfahrungslernen durch praktisches Üben (Aktives Zuhören)

Vertiefungs-Workshops

Gruppenarbeiten

ECTS: 1

Learning Outcome:
A: Die Teilnehmenden
1. lernen den Kommunikationsprozess zwischen Menschen kennen, ...
2. die damit verbundenen Schwierigkeiten, ...
3. mögliche Strategien, den Kommunikationsprozess zu verbessern ...
4. und reflektieren eigene Anteile

B: Die Teilnehmer üben «Aktives Zuhören»

C: Die Teilnehmer erhalten Einblick in
1. Wahrnehmung und Deutung von Information
2. Konstruktion von Realität
3. Unconscious Bias
4. Empathie
5. Austausch auf Augenhöhe

D: Elemente aus dieser Liste werden im Vertiefungs-Workshop wieder aufgenommen, vertieft und geübt

Merkmale:

Module Strukturierte Lehrmodule im Wahlstudienjahr am Universitäts- Kinderspital Zürich
04SMPED21004 / Kurs

Description:

ECTS: 0.2

Notes:
Kontakt-Email:
michelle.seiler@kispi.uzh.ch

Learning Outcome:
Sämtliche Medizinstudierende des Wahlstudienjahres werden während ihrer zweimonatigen Rotation am Universitäts-Kinderspital Zürich Module spezifischer Fachrichtungen besuchen. Diese Module, welche von Kaderärztinnen und Kaderärzten doziert werden, finden grundsätzlich einmal pro Monat statt und sind ausschliesslich für die Studierenden im Wahlstudienjahr. Das Ziel ist es, strukturierte Lehre anzubieten zu Themen, welche häufig Schwierigkeiten bereiten. Zum Beispiel: wie führe ich eine klinische Untersuchung bei einem Neugeborenen durch? Unter Anleitung einer Kaderärztin wird dies in Kleingruppen direkt am Bett gelehrt. Im Modul Kinderradiologie werden Fragen diskutiert wie "wann ist welche radiologische Untersuchung indiziert? Wie funktioniert ein Ultraschall und welche Fragestellungen können mit einer solchen Untersuchung beantwortet werden? Im Modul Allergologie wird gelehrt wie eine Anaphylaxie erkannt und rasch therapiert werden kann. Ebenso lernen die Studierenden die Grundlagen, wie bei einem Kind eine Gelenksuntersuchung durchgeführt wird und anschliessend kann dies direkt an Patientinnen und Patienten geübt werden. Das Ziel dieser Module ist es, die klinischen Fähigkeiten der Studierenden zu schulen und sie auf den klinischen Alltag in der Weiterbildung vorzubereiten.

Target Groups:
Studierende im Masterstudium

Module BIO 400 Research Project in Synthetic Biology - iGEM competition
07SMBIO400 / Sonstiges

Description:

General description:
This research internship implies active participation in the annual International Genetically Engineered Machine (iGEM) competition (https://igem.org). The exact details of the project will be initially discussed with the module leader, with inputs from other appropriate faculty members. The duration of the internship will be typically from March to the official end of the competition (typically in October). The module leader should be contacted in the first place by the team.
Research internships are only offered to Bachelor students, not to students who already registered for the Master.

ECTS: 12

Learning Outcome:
Depending on the specifics of the project, students will at the end of this module possess several of the following competences:

- Ability to identify an important biological/societal problem
- Design a research project with clear measurable outputs
- Analyse data with adequate statistical methods
- Acquire deepened knowledge about literature, questions and methods within a research project in Synthetic Biology and specific research field linked to the project developed.
- Conduct experiments fairly independently
- Scientific communication & education of the project, its goals, methodology, and results obtained, in academic as well as industry and layman contexts
- Analyse the scientific impact, as well as the societal impact of the project, considering ethics, regulations, production, target groups, etc.
- Summarize all outputs of the project in the wikipage of the iGEM competition

Module ECO 345 Online Landscape Genetics Graduate Student Course
07SMECO345 / Kurs

Description:

General description:
This course on Landscape Genetics provides a unique opportunity for interdisciplinary training and provides an overview of the field of landscape genetics. The course caters to students in basic and applied ecology, conservation and population genetics, landscape ecology, evolutionary biology and conservation biology. A key objective of landscape genetics is to study how landscape modification and habitat fragmentation affect organism dispersal and gene flow across the landscape. Landscape genetics requires highly interdisciplinary specialized skills making intensive use of technical population genetic skills and spatial analysis tools (spatial statistics, GIS tools and remote sensing). Even when students receive disciplinary training in these areas, educational programs often lack the necessary linkage and synthesis among disciplines. This linkage can only be accomplished after experts from each discipline work together to develop guiding principles for this new research area. Landscape Genetics will be concurrently offered at multiple universities across the globe, giving students the opportunity to learn from international experts and work with peers from outside institutions. For students who are not members of the participating institutions, we are offering a web-based online course to reach a broader audience. Each course meeting will start with a live web-cast lecture (no special software required) by an expert on the topic that introduces foundations and methods and highlights points for discussion in local seminar groups. After breaking out into local course group discussion (including a discussion group for online course students), a web-based discussion across campuses will wrap up the weekly topic. Students who are unable to make it to live-cast of lectures can view taped lectures. In addition, students can choose to participate in an optional lab section using R and/or interdisciplinary group term projects with web-based collaboration across institutions. The final two options are provided to help students develop analytical skills in Landscape Genetics. Students who participate in group projects will have the option of applying to attend a project synthesis meeting in Idaho in mid to late May.

ECTS: 3

Notes:
Online course, Jan 14 – May 6, 2026.

Class every Wednesday from 8:30 - 10:30 am Pacific time (starting Jan 14 and ending May 6), with an optional lab review at 10:30 - 10:50 (Lessons also can be taken at any time using taped lectures).

Please fill out this form to receive the registration information: https://forms.gle/d4hx4raMPTro4Pm58

Tentative course schedule: https://sites.google.com/site/landscapegeneticscourse/home/2026-course-schedule?authuser=0

Target Groups:
LSZGS PhD Program

Course Materials:	Landscape genetics: Concepts, methods, applications. 2015. Balkenhol, Cushman, Storfer, Waits, eds, Blackwell. https://onlinelibrary.wiley.com/doi/book/10.1002/9781118525258
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Debra Zuppinger-Dingley

Requirements:

Prerequisites:

Participating Master students will not be awarded ECTS credits unless agreed with the lecturer and the program coordinator prior to the course

Prior Knowledge:	Having taken an introductory course in statistics, genetics and ecology, and basic knowledge of R are necessary for fully benefiting from this course
Assessment:	Active participation throughout the course. To obtain credits for the course it is expected that you watch the online lectures, however, this will not be controlled. A total of 3 credits can be obtained, each earned by, 1. completing all exercises in R, and sending the completion marks to the system obtained using the R studio plug-in (1ECTS) 2. completing four conceptual exercises or completing three conceptual exercises and an essay (2 pages max) about how you plan applying the methods you learned during the course in your own research (1ECTS) 3. participation in a group project with written confirmation from the group supervisor that you actively participated, along with a half-page summary of the project and the outcomes (1ECTS)
Grading Scale:	Pass/Fail
Repeatability:	Can't be repeated

Module Designing Digital Teaching/Learning Media to Promote Learning
06SM222LGdL / Module

Description:

General description:
Lernen mit digitalen Medien setzt voraus, dass das entsprechende Lernmedium lernförderlich gestaltet ist. Im Seminar sollen grundlegende Theorien zur kognitiven Verarbeitung von Informationen, die durch das Lernmedium präsentiert werden, vorgestellt und besprochen werden. Aus diesen Theorien lassen sich eine Vielzahl von Gestaltungsempfehlungen für digitalen Lehr-/Lernmedien ableiten, die auch in der Forschung zum Lernen mit digitalen Medien häufig aufgegriffen werden. Das Seminar soll daher die Kenntnisse zur lernförderlichen Gestaltung digiler Medien erhöhen, sodass angehende Lehrkräfte in Zukunft sicher lernförderliche Lernmedien erstellen oder aussuchen können.

ECTS: 3

Merkmale:

Module Master Thesis
05SM.500_ma / Master Paper / MA-Arbeit

Description:

General description:
Die Masterarbeit ist eine wissenschaftlich ausgerichtete Arbeit aus dem Gebiet der Veterinärmedizin, die von den Studierenden individuell und selbständig während des Masterstudiums verfasst wird.

Die Masterarbeit beinhaltet die Formulierung einer Fragestellung,das Erstellen eines Forschungsplans, die Durchführung der Forschungsarbeit und das Abfassen eines Berichts, der strukturiert, inhaltlich konsistent, klar formuliert und korrekt referenziert ist.

ECTS: 20

Learning Outcome:
Die Studierenden lernen unter Anleitung mittels wissenschaftlicher Denk- und Arbeitsweise selbständig eine Projektarbeit durchzuführen und in einem Bericht zu dokumentieren.

Zu den Lernzielen der Masterarbeit gehören z.B. (abhängig von der Form der Masterarbeit):

- Die Ziele zu formulieren; eine relevante und präzise Forschungsfrage zu stellen und Hypothesen zu formulieren;
- Die adäquate Forschungsmethode zur Beantwortung einer wissenschaftlichen Fragestellung zu wählen und anzuwenden;
- Die Daten korrekt zu erheben und verständlich darzustellen;
- Die für die Daten geeigneten statistischen Methoden auszuwählen;
- Die Daten korrekt zu analysieren und die Ergebnisse sachlich zu interpretieren;
- Die erhobenen Daten in den Kontext des aktuellen Wissens und - bei patientenorientierten Fragestellungen - in den Kontext der klinischen tierärztlichen Tätigkeit zu stellen;
- Die aus den Daten korrekte Schlussfolgerungen zu ziehen;
- Die Literatur und Quellen zum Thema systematisch und effizient zu recherchieren, kritisch zu bewerten und in der Arbeit korrekt zu zitieren;
- Die ein Literaturverzeichnis korrekt zu erstellen;
- Die einen wissenschaftlichen Bericht strukturiert, inhaltlich konsistent und klar formuliert abzufassen.

Module Rotations Anesthesiology, Diagnostic Imaging, Ophthalmology
05SM.520_cls / Praktikum

Description:

General description:
Dieses Modul beinhaltet Rotationen in Fachbereichen, welche tierartübergreifende Patientenarten behandeln. Insgesamt dauern die supervidierten Rotationen 4 Wochen und sind gemäss folgendem Plan zu absolvieren:

Anästhesiologie: 2 Wochen
Bildgebende Diagnostik (Röntgen): 1 Woche Ophthalmologie: 1 Woche

Während der Rotation auf der Abteilung für Anästhesiologie.
lernen die Studierenden den gesamten Ablauf einer Anästhesie kennen. Die Studierenden sind dabei entweder in der Kleintierklinik oder in der Grosstierklinik eingeteilt.

In der Bildgebung können die Studierenden auf der Röntgenabteilung praktische Fertigkeiten lernen, vertiefen und anwenden. Während der Rotationswoche gilt es, unter Anleitung einer/s MTRA, die Lagerung der Patienten für die in der Alltagspraxis gängigen Röntgenprojektionen (dies kann je nach Fallaufkommen etwas variieren) und die technischen Aspekte des praktische Röntgens zu erlernen und zu vertiefen. Die Studierenden sollen unter Anleitung einer/s MTRA teilweise oder vollständig eine definierte Anzahl und Art von Röntgenstudien gemäss einer Checkliste erstellen. Während der Woche sind die Anforderungen für das Strahlenschutzpraktikum gemäss BAG zu erfüllen.

Studierenden lernen den klinischen Alltag auf der ophthalmologischen Abteilung des Tierspitals kennen und bekommen Einblicke in ophthalmologische Untersuchungsmethoden wie auch Operationen.

ECTS: 4

Learning Outcome:
Studierende in der Anästhesiologie
...sollen die Medikamente kennen, um ein Tier zu beruhigen, eine Anästhesie einzuleiten und aufrecht zu erhalten; ...sollen die möglichen Vor- und Nachteile von Medikamenten kennen;
...sollen die Medikamente richtig anwenden können.
...sollen einen Anästhesieplan für einen Routinepatienten erstellen können;
...sollen wissen, welche Möglichkeiten es gibt bei einem Tier Schmerzen zu bekämpfen und sollen diese anwenden können.
...sollen für die Anästhesie nötige Geräte zusammensetzen und einen Dichtigkeitstest des Anästhesiegerätes durchführen können.
...sollen den sicheren Arbeitsplatz für eine Anästhesie vorbereiten können (Monitoring, Medikamente, Tuben etc.); ...sollen ein Tier intubieren können.
...sollen wissen, wie bei ausgesuchten Notfällen reagiert werden muss.
...sollen eine Anästhesie überwachen (mit und ohne Monitore) können.

Studierende bei der bildgebenden Diagnostik (Röntgen) ...sollen die Indikationen für ein Röntgen kennen ...sollen kompetent in der praktischen Durchführung der gebräuchlichsten Röntgenprojektionen/ -studien bei den entsprechenden Tierarten sein;
...sollen die theoretisch - technischen Aspekte der Röntgenpraxis wie Belichtung, Beurteilung der Bildqualität und Archivierung vertiefen;
...sollen die Prinzipien des Strahlenschutzes und deren kompetente praktische Umsetzung und Anwendung kennen.

Studierende bei der Ophthalmologie
...sollen die genaue Betrachtung von Augen mittels Lichtquelle und Linsen erlernen;

...sollen pathologische Symptome beim Auge erkennen; ...sollen Differentialdiagnosen und Diagnosen erstellen können;
...sollen die Therapien der wichtigsten/häufigsten Augenerkrankungen verstehen;
...sollen die ersten therapeutischen Massnahmen planen und einen einfachen Therapieplan erstellen können.
...sollen die spezialisierten Instrumente und Therapie-/Operationsmöglichkeiten (über die praxisüblichen hinausgehend) kennenlernen, um den Sinn von Überweisungen aus Praxen zu erkennen.
...sollen die generellen Herangehensweisen für Augenprobleme kennenlernen, um mit einfachen Mitteln, die Aufarbeitung/Diagnostik, Planung der ersten therapeutischen Massnahmen, Literatursuche und Diskussion mit Kollegen und Spezialisten zu ermöglichen.

Course Materials:

Anästhesiologie allgemein:
-Casusfälle mit besonderem Augenmerk auf Anästhesiegeräte repetieren (http://switchaai.casus.net/).
-Onlinevorlesungen auf OLAT (Olatkurs "Allgemeine Anästhesiologie" repetieren und Videos anschauen, vor allem das Video über Anästhesiegeräte (http://www.ictvet.uzh.ch/mosing/4_geraete_v4_1mobile.mp4) (jeder Student muss einen Dichtigkeitstest durchführen können!).
-Unbedingt Medikamente auf OLAT mit Wirkungen und Nebenwirkungen repetieren (Olatkurs "Allgemeine Anästhesiologie").
-Zusätzliche Infomaterialien (Checklisten, SOP Anaesthetic case presentation) vor Rotationsbeginn lesen.

Anästhesiologie bei den Kleintieren:
-Skripten Allgemeine Anästhesie, Spezielle Anästhesie Kleintiere und Dosierungstabellen Kleintiere repetieren.
-Kleintierfälle aus den Vorlesungen repetieren.
-Vertiefung Kleintieranästhesie repetieren.

Anästhesiologie bei den Grosstieren:
-Skripten Allgemeine und spezielle Anästhesie Pferd und Wiederkäuer kennen.
-Anleitung zur Durchführung einer Pferdeanästhesie und SOP Katheter stecken gelesen haben.

Bildgebende Diagnostik (Röntgen):
-Skripte 1. JK zum Thema Strahlenschutz - RadioSurfVet
-Vorlesungsskripte über Bildgebende Diagnostik
-Unterlagen der Praktika im 4. Studienjahr
-Repetieren der Röntgenprojektionen
-CASUS Fälle studieren / repetieren

Ophthalmologie:
-Vorlesungsskript und Vorlesungsunterlagen (Organblock & Vertiefung), Propädeutik
-Weitere Literatur: Slatter's Fundamentals of Veterinary Ophthalmology, D.J. Maggs et al., 6. Auflage, 2017, Saunders
-Podcast 'Augenuntersuch beim Hund': https://lms.uzh.ch/auth/RepositoryEntry/16731865252/ CourseNode/101331398149894

Module Rotations Small Animal Clinic
05SM.530_kt / Praktikum

Description:

General description:
Das Modul Rotationen Kleintierklinik wird von Studierenden mit Schwerpunkt Kleintiere absolviert. Es beinhaltet zur Vertiefung der klinischen Fähigkeiten und Fertigkeiten im Kleintierbereich folgende Fachgebiete: Innere Medizin, Dermatologie, Kardiologie, Onkologie, Reproduktion, Chirurgie, Neurologie, Intensiv- und Notfallmedizin, Zoo- und Heimtiere, Bildgebende Diagnostik (Ultraschall/Befundung)und Anästhesiologie.
Studierende erhalten die Möglichkeit, unter Supervision unmittelbar an Patienten ihre Fähigkeiten und Fertigkeiten zu üben und zu vertiefen.
Dabei wird großer Wert auf den Diskurs über spezifische Fälle und das Erarbeiten der fallspezifischen Hintergründe gelegt. Die Teilnahme an den Fallbesprechungen im Zuge des Lehrbetriebes sowie die Absolvierung von Notfalldiensten sind wesentlicher Bestandteil der klinischen Rotationen. Insgesamt dauern die supervidierten Rotationen 20 Wochen und sind gemäss folgendem Plan zu absolvieren:

Kleintierchirurgie: 3 Wochen
Neurologie Kleintiere: 1 Woche
Inneren Medizin Kleintiere: 3 Wochen
Dermatologie Kleintiere: 1 Woche
Kardiologie Kleintiere: 1 Woche
Onkologie Kleintiere: 2 Wochen
Kleintierreproduktion: 1 Woche
Zoo- / Heim- und Wildtiere: 3 Wochen
Notfall- und Intensivmedizin: 2 Wochen
Bildgebende Diagnostik (Ultraschall / Befundung): 2 Wochen Anästhesiologie: 1 Woche

Kleintierchirurgie

Im Rahmen der Schwerpunktrotation auf der Kleintierchirurgie wird die Orthopädie, Weichteil- und Onkochirurgie durchlaufen. Die Studierenden nehmen aktiv an Sprechstunden, Röntgenuntersuchungen und Operationen teil. Zudem unterstützen sie die Assistierenden in der Betreuung der stationären Patienten und beim Erstellen der notwendigen Dokumentation.
Während der Rotation in der Orthopädie sowie Weichteilchirurgie nehmen die Studierenden zudem an drei Tagen der Woche an Fortbildungsveranstaltungen der Chirurgie teil.
Neben der zielgerichteten Aufarbeitung der Patienten gehört die Vertiefung praktischer Fähigkeiten (Orthopädischer Untersuchungsgang, Operations-Vorbereitung /Handhygiene, Operations-Assistenz).
Die Studierenden werden einem bestimmten Assistierenden im jeweiligen Team zugeteilt. Zusätzlich wird erwartet, dass die Studierenden während der Rotation eigenständig einen Fall aufarbeiten.

Neurologie Kleintiere

Die Studierenden werden während der Rotation in die tägliche neurologische Sprechstunde integriert, indem sie eine Neurologin / einen Neurologen begleiten. Das generelle Ziel ist das Erkennen und Beschreiben eines neurologischen Problems und dessen systematische Aufarbeitung und Behandlung. Dabei soll möglichst vor dem Einsatz weiterführender Abklärung mit einfachen klinischen Mitteln eine Lokalisation und eine sinnvolle Differentialdiagnose erstellt werden.
Durch Beobachtung des Vorgehens der Neurologen, Diskussion mit ihnen sowie Konsultation von Literatur zum jeweiligen Thema soll das Erlernte Wissen vervollständigt und vertieft werden (Learning on the job). Wenn möglich, sollten die Studierenden so viele Patienten wie möglich während ihres gesamten Aufenthalts an der Klinik verfolgen, um den ganzen Prozess von Abklärung bis Therapie zu sehen. Am Ende der Rotation sollten die

Studierenden die neurologischen Patienten einschätzen können und die diagnostischen und therapeutischen Strategien für die häufigsten neurologischen Erkrankungen kennen.

Innere Medizin, Dermatologie, Kardiologie Kleintiere

Die Studierenden rotieren durch verschiedene Abteilungen der Inneren Medizin Kleintier, um die fachlichen Grundkenntnisse aus den internistischen Vorlesungen in die Praxis umzusetzen und die verschiedenen Bereiche der Kleintiermedizin in Theorie und Praxis intensiv zu erlernen.
Hier sind Neugier und detektivische Fähigkeiten gefragt, wenn es darum geht, die problemorientierte Aufarbeitung von Patienten - vom Erstellen von Problemlisten anhand pathophysiologischer Überlegungen zur Auswahl geeigneter Diagnostik bis hin zur intensiven Therapie - zu begleiten. Die intensive Ausbildung beinhaltet zudem Patientenverantwortung; dies schließt auch die Kommunikation mit den Besitzern ein.
Die Studierenden werden in der Rotationszeit auf der Kleintiermedizin in die fachspezifischen Spezial-Sprechstunden Kardiologie und Dermatologie eingebunden, wo sie sich bei den jeweiligen Spezialisten wertvolle Fachkenntnisse aneignen können.

Onkologie Kleintiere

In der Rotation Onkologie werden die Studierenden in die onkologische Sprechstunde mit einbezogen. Sie sind bei Abklärungen neuer Tumorpatienten dabei, folgen den assistierenden Tierärztinnen / Tierärzten in der Aufarbeitung, Diagnostik und den Gesprächen mit den Besitzern. Sie beteiligen sich an den Fallbesprechungen der Abteilung und nehmen an den wöchentlich stattfindenden Weiterbildungen des Teams teil. Neben den Abklärungen folgen sie den Patienten in die Chemotherapie und Strahlentherapie, wo sie mit den jeweiligen Abläufen vertraut, gemacht werden.

Kleintierreproduktion

Während der Rotation bei der Kleintierreproduktion begleiten und helfen die Studierenden aktiv den Assistenz- und Obertierärzten/-tierärztinnen bei der Erhebung der Anamnese und Untersuchung von Patienten. Zudem helfen die Studierenden aktiv beim Erstellen von Problemlisten und begleiten die Tierärzte/Tierärztinnen bei der Durchführung weiterführender gynäkologischer oder andrologischer Untersuchungen. Neben der Aufarbeitung der Fälle assistieren die Studierenden auch bei Operationen und helfen bei der Erstellung der postoperativen Betreuungspläne der Patienten. Darüber hinaus erweitern die Studierenden ihre Kenntnisse im Bereich der Neonatologie und Pädiatrie.

Zoo-, Heim- und Wildtiere

In der Klinik für Zoo-, Heim- und Wildtiere sind die Studierenden an der Versorgung der stationären Patienten im laufenden Klinikalltag beteiligt und nehmen an der Sprechstunde teil. Die Studierenden untersuchen Patienten selbständig und stellen diese auch in den Teambesprechungen ("Klinikrounds") vor.
Neben grundlegenden Kenntnissen in der Propädeutik erwerben sie praktische und theoretische Fähigkeiten in den Bereichen der bildgebenden Diagnostik, Chirurgie, Anästhesie, Verbandslehre, innere Medizin und Ophthalmologie.
Im Bereich Labordiagnostik werden sie in die Schnell- und Notfalldiagnostik, die bei einer fachgerechten Untersuchung von Heimsäuger-, Vogel- und Reptilienpatienten Anwendung findet, eingearbeitet.
Außerdem lernen sie vogel- und reptilienspezifische Aspekte der Virologie, Bakteriologie, Mykologie und Parasitologie kennen.

Notfall- und Intensivmedizin

Die Studierenden sind in den Rotationen bei der Notfallversorgung und auf der Intensivstation der Kleintierklinik eingeplant. Von der Versorgung von Notfallpatienten am Tag und am Abend bis hin zur intensiv-medizinischen Betreuung bekommen die Studierenden hier eine solide Grundlagenausbildung für Notfälle jeder Art.

Bildgebende Diagnostik (Ultraschall / Befundung)

Die Studierenden erhalten vertiefte Einblicke in die Befundung von Röntgenstudien wie auch in die Ultraschalldiagnostik. Während der Befundung von Röntgenstudien erhalten die Studierenden einen Fall zugeteilt,

welchen sie vorbereiten und am Ende der Woche im Plenum diskutieren. Im Ultraschall begleiten sie die / den diensthabende:n Radiologin / Radiologen, vertiefen dabei ihr Wissen und lernen dabei das Handling mit dem Tier während einer Ultraschalluntersuchung kennen.

Anästhesiologie

Die Studierenden haben die Wahl in dieser Rotation die Anästhesisten am Tag oder den/die Assistierende:n im Pikettdienst, abends/nachts und am Wochenende zu begleiten. Wählen die Studiereden aus, den/die Assistierende:n am Abend/in der Nacht zu begleiten, dann haben sie die Möglichkeit, nach den Kliniköffnungszeiten für Anästhesienotfälle vor Ort mitzuhelfen diese Patienten zu betreuen.
Während dem Tag erholen sie sich von den Einsätzen in der Nacht und am Wochenende. Die Lernziele bleiben die Gleichen wie in der Kernrotation Anästhesiologie.
Zusätzlich sollen die Studierenden in der Lage sein, eine Aufwachphase selbstständig zu überwachen und zu erkennen, wann eingeschritten werden muss.

ECTS: 28

Learning Outcome:
Studierende in der Kleintierklinik

...können einen klinischen Vorberichte erheben (vollständige Anamneseerhebung)
...lernen den Umgang mit Tierbesitzern und Tieren kennen ...können einen exakten klinischen Untersuchung durchführen ...diskutieren die abnormalen klinischen Befunde ...können eine Problem- und Differentialdiagnosenliste erstellen ...können einen logischen und adäquaten diagnostischen Plan erstellen ...können die von Fall-relevanten Röntgenbildern und Ultraschalluntersuchungen interpretieren ...verstehen die Gründe für die Therapien ...können einen Behandlungsplane erstellen ...können einen Notfall erkennen
...können eine Kostenschätzung durchführen ...erstellen einen Besitzer- bzw. Tierarztbericht ...kommunizieren in jeweils passenden Ausdrücken mit Besitzern, Pflegern und Tierärzten in mündlicher und schriftlicher Form.
...kommunizieren mit Fachpersonen strukturiert und diskutieren die medizinischen Probleme
...wissen, wann ein Fall an Spezialisten verwiesen werden muss.
...erkennen die eigenen Grenzen und können entscheiden, welche Fälle eine Behandlung durch Spezialisten bedürfen.

Studierende bei der Kleintierchirurgie

...können Hunde und Katzen halten und fixieren während einer orthopädisch- neurologischen Untersuchung
...können eine Blutentnahme durchführen und einen iv Katheter platzieren.
...können eine komplette klinische, orthopädische und neurologische Untersuchung durchführen.
...können einen postoperativen Managements erstellen (Analgesie, Wundversorgung, Flüssigkeitstherapie, Antibiotika, Ernährung und Rehabilitation).
...können relevante wissenschaftliche Publikationen für einem von ihnen betreuten Fall suchen und in einer kurzen Präsentation vorstellen.
...können eine korrekte aseptische Präparation eines Pateinten durchzuführen und steril abdecken.
...kennen die systematische Exploration des Abdomens.
...können eine Wunde korrekt interpretieren ...können eine Wunde korrekt versorgen (Debridement, Wundauflage wählen, Verband, Therapieoptionen nennen)

Studierende bei der Neurologie Kleintiere

...können eine vollständige neurologische Untersuchung durchführen, mit dem Ziel der Lokalisation der Läsion.
...verstehen und kennen die Therapie der wichtigsten/häufigsten ZNS- und PNS-Erkrankungen
...kennen die spezialisierter Instrumente und Therapie-/Operationsmöglichkeiten bei neurochirurgischen Patienten

Studierende bei der Dermatologie Kleintiere

...können die wichtigsten dermatologischen Untersuchungen (Geschabsel, Trichogramm, Woodsche'Lampe, Zytologische Untersuchung, Hautbiopsie) durchführen
...können eine zytologische Untersuchung interpretieren

Studierende bei der Kardiologie Kleintiere

...können ein EKG schreiben und interpretieren ...können ein Thorax Röntgenbild interpretieren ...können die verschiedenen Herzstrukturen im Echokardiogramm und grobe Veränderungen erkennen

Studierende bei der Onkologie Kleintiere

...können die Dosierungen berechnen (Kontrolle durch OA) ...können die Chemotherapeutika nach Instruktion vorbereiten ...können ein Nebenwirkungsprofils mit Besitzer nach Diskussion mit Oberarzt besprechen
...betreuen während der Rotationszeit die Untersuchungen und Behandlungen von stationären Patienten (in Absprache mit OA)

Studierende bei der Kleintierreproduktion

...können eine gynäkologische und andrologische Anamnese durchführen ...können eine gynäkologischen und andrologischen Untersuchung durchführen ...können eine Vaginal und/oder Präputialzytologie entnehmen und interpretieren
...kennen die häufigsten Krankheitsbilder, Differentialdiagnosen und Therapie der Reproduktion und Pädiatrie

Studierende bei den Zoo-, Heim- und Wildtieren

...lernen den praktischen Umgang und das Handling von Zoo-/ Heim- und Wildtier kennen

Studierende bei der Notfall und Intensivmedizin

...lernen die häufigsten Gründe für Notfälle kennen;

...können lebensbedrohliche Zustände bei im Notfalldienst eingelieferten Patienten (Triage) einschätzen und kennen die Behandlung dieser Patienten

...lernen die Notfallprozeduren kennen (z.B. Wundbehandlung, Frakturstabilisierung, Thorako- oder Abdominozentese, etc.) ...erkennen akute Schmerzzustände und kennen die akkurate Behandlung; ...kennen die akkurate Behandlung von akuten Schmerzzuständen; ...können die stationären Patienten überwachen ...lernen die praktischen Fertigkeiten wie Injektionen, Blutentnahmen, Tablettengabe, Flüssigkeitstherapie.

Studierende bei der Bildgebenden Diagnostik (Ultraschall/Befundung) Kleintiere

...kennen die gängigen Projektionen / Röntgenstudien ...kennen der Lagerung der Patienten für die gängigen Röntgenstudien ...können die Röntgenbefunde der in der klinischen Praxis häufig vorkommenden Erkrankungen von Thorax / Abdomen / muskuloskelettalem System interpretieren
...haben einen Überblick über die Indikation und das Vorgehen bei Ultraschalluntersuchungen von Katzen und Hunden ...haben die theoretische Kenntnisse der praktischen Durchführung der abdominalen Ultrasachalluntersuchung von Katze / Hund durch Beobachtung ...kennen die Indikationen für weiterführende Studien wie CT, MRI

Studierende bei der Anästhesiologie

...kennen die Medikamente, die es braucht, um ein Tier zu beruhigen, eine Anästhesie einzuleiten und aufrecht zu erhalten.
...kennen die möglichen Vor- und Nachteile von den Medikamenten und können die Medikamente richtig anwenden.
...können einen Anästhesieplan für einen Routinepatienten erstellen.
...wissen, welche Möglichkeiten es gibt bei einem Tier Schmerzen zu bekämpfen und können diese anwenden;
...können Für die Anästhesie nötige Geräte zusammensetzen und einen Dichtigkeitstest des Anästhesiegerätes durchführen.
...können den sicheren Arbeitsplatz für eine Anästhesie vorbereiten (Monitoring, Medikamente, Tuben etc.).
... können ein Tier intubieren.
...wissen wie bei ausgesuchten Notfällen reagiert werden muss; ...können eine Anästhesie überwachen (mit und ohne Monitore)

Module Rotations Farm Animal Clinic
05SM.540_nt / Praktikum

Description:

General description:
Das Modul Rotationen Nutztierklinik wird von Studierenden mit Schwerpunkt Nutztiere absolviert. Es beinhaltet zur Vertiefung der klinischen Fähigkeiten und Fertigkeiten im Nutztierbereich folgende Fachgebiete: Innere Medizin, Reproduktion (Geburtshilfe und Gynäkologie), Nutztierchirurgie, Ambulanz und Bestandesmedizin, Notfallmedizin, Schweinemedizin und Veterinary public health. Studierende erhalten die Möglichkeit, unter Supervision unmittelbar an Patienten ihre Fähigkeiten und Fertigkeiten zu üben und zu vertiefen.
Dabei wird großer Wert auf den Diskurs über spezifische Fälle und das Erarbeiten der fallspezifischen Hintergründe gelegt. Die Teilnahme an den Fallbesprechungen im Zuge des Lehrbetriebes sowie die Absolvierung von Notfalleinsätzen sind wesentlicher Bestandteil der klinischen Rotationen. Insgesamt dauern die supervidierten Rotationen
20 Wochen und sind gemäss folgendem Plan zu absolvieren:

Nutztierchirurgie: 3 Wochen
Innere Medizin Nutztiere: 3 Wochen
Ambulanz (Fahrten): 3 Wochen
Reproduktion (Geburtshilfe und Gynäkologie): 2 Wochen Variabel (Chirurgie, Innere Medizin oder Ambulanz): 1 Wochen Notfallmedizin: 3 Wochen
Bestandesmedizin (Intensivwoche): 1 Woche Schweinemedizin / AgroVet Strickhof: 3 Wochen Veterinary Public Health Nutztiere: 1 Woche

Innere Medizin, Chirurgie, Reproduktion, Ambulanz und Bestandesmedizin, Notfall
Die Schwerpunktstudierenden verbringen einen Teil ihrer Rotationszeit an der Klinik für Wiederkäuer. In der Klinik werden Patienten aus der Inneren Medizin, Weichteilchirurgie, Orthopädie, Reproduktionsmedizin untersucht, besprochen und behandelt. Neben dem Klinikalltag, können sie am wöchentlichen Kursprogramm der Klinik für Wiederkäuer teilnehmen (Journalclub, Seminaren).
Bei der Ambulanz begleiten die Studierenden die Tierärzte/Tierärztinnen in der Fahrpraxis und lernen verschiedene Betriebe kennen. Die Studierenden werden zudem an Ausfahrten zur Bestandsbetreuung und -diagnostik teilnehmen sowie aktiv in der Ergebnisauswertung eingebunden.
Der Notfalldienst der Wiederkäuerklinik ist gemeinsam organisiert, sodass sowohl Fälle aus der Chirurgie, Innere Medizin und Reproduktion in dieser Rotation betreut werden. Es ist jeweils ein Tierarzt/Tierärztin vor Ort, sodass Studierende immer in unter direkter Supervision eines Tierarztes/einer Tierärztin handeln.

Schweinemedizin / AgroVet Strickhof
Studierende in den praktischen Semestern sollen das in den Vorlesungen vermittelte Wissen anhand praktischer Fälle und Tätigkeiten vertiefen.
Neben Grundlagen wie dem Umgang mit Schweinen und Charakteristika der modernen Schweinehaltung stehen die Krankheiten der Schweine im Mittelpunkt. Die Fälle werden systematisch (Anamnese, klinische Untersuchung des Einzeltiers, Bestandesuntersuchung, Benennung von Verdachts- und Differentialdiagnosen, Diagnostische Massnahmen, kurz- und mittelfristige Therapiepläne) aufgearbeitet. Ausserdem werden Routinetätigkeiten wie künstliche Besamung, Kastration der Saugferkel, kleiner chirurgischer Eingriffe oder Impfungen durchgeführt. Weiterhin werden diagnostische Massnahmen wie die Entnahme von Kot- und Nasentupferproben, Blutproben, Liquor- oder Gelenkspunktionen, Hautgeschabsel oder Sektionen eingeübt. Grundlagen der Impfprophylaxe, Entwurmung, und der Applikation von Medikamenten sind ebenfalls Bestandteil der Übungen.

Veterinary Public Health Nutztiere
Während einer Woche werden Nutztier-relevante Aspekte aus dem VPH- Bereich als Themenblöcke bearbeitet: Thema 1: Fleischgewinnung / sicheres Fleisch Thema 2: Salmonellen: als positives MFU-Ergebnis / als Zoonose Thema 3: Mastitis, Resistenzen, Antibiogramm Thema 4: aktuelle Tierseuche

Thema 5: Tierschutz bei Nutztieren / beim Schlachten Die Erarbeitung erfolgt im Rahmen von Exkursionen, Vorlesungen, Seminaren, Laborarbeiten und Selbststudium.

ECTS: 28

Learning Outcome:
Studierende bei der Wiederkäuerklinik
...können einen klinischen Vorbericht (vollständige Anamneseerhebung) erheben
...lernen den Umgang mit Tierbesitzern und Tieren ...können eine exakte klinische Untersuchung durchführen ...können abnormale klinische Befunde erheben ...können eine Problem- und Differentialdiagnosenliste erstellen ...können einen logischen und adäquaten diagnostischen Plan erstellen ...können fallrelevante Röntgenbilder und Ultraschalluntersuchungen interpretieren
...verstehen Gründe für die Therapien
...können einen Behandlungsplan erstellen ...können einen Notfall erkennen
...können Kostenschätzungen durchführen
...können einen Besitzer- bzw. Tierarztbericht erstellen ...kommunizieren in jeweils passenden Ausdrücken mit Besitzern, Pflegern und Tierärzten in mündlicher und schriftlicher Form ...kommunizieren mit Fachpersonen: Strukturierte Kommunikation / Diskussion medizinischer Probleme unter Tierärzten ...wissen, wann ein Fall an einen Spezialisten verwiesen werden muss; eigene Grenzen erkennen und entscheiden, welche Fälle eine Behandlung durch einen Spezialisten bedürfen.

Studierende bei der Wiederkäuerchirurgie ...können eine aseptische Präparation eines Patienten durchführen ...kennen die systematische Exploration eines Abdomens; ...können eine systematische Exploration durchführen.
...kennen das Wundmanagement kennen bzw. können es durchführen.

Studierende auf der Reproduktionsmedizin der Wiederkäuer ...können eine gynäkologische Untersuchung durchführen ...können eine Euteruntersuchung durchführen ...können eine Puerperalkontrolle durchführen ...können eine klinische Untersuchung eines Neonaten durchführen ...kennen lokale Euterbehandlungen kennen und können diese durchführen

Studierende im Notfall bei der Wiederkäuerklinik ...lernen häufige Gründe für Notfälle bei Wiederkäuern kennen ...können lebensbedrohlicher Zustände bei im Notfalldienst eingelieferten Patienten (Triage) erkennen; ...kennen die Behandlung von Notfallpatienten; ...lernen praktischer Fähigkeiten (z.B. klinische Untersuchung, Notfallprozeduren mit erster Hilfe, wie z.B. Wundbehandlung, Frakturstabilisierung, etc.)
...können akute Schmerzzustände erkennen; ...kennen die Behandlung von Schmerzen.
...helfen bei Notfalloperationen mit
...können stationäre Patienten überwachen.
...lernen praktische Fähigkeiten wie Injektionen, Blutentnahmen, Tablettengabe, Flüssigkeitstherapie
...lernen des praktischen Umgangs und Handlings von Patienten, auch von weniger vertrauten Spezies
...erkennen und interpretieren abnormer Befunde; ...können Patienten überwachen bei möglichen Medikamentennebenwirkungen

Studierende bei der Ambulanz und Bestandesmedizin ...können die SOP (standard operational procedures) im Stall oder auf dem Felde beim Tierbesitzer, wie man sie an den Kliniken lernt; adaptieren

Studierende bei der Schweinemedizin
...können eine klinische Untersuchung von Schweinen und Bestandesuntersuchung durchführen
... Umwelteinflüsse können erkennen und kennen die Managementmassnahmen in Bezug auf die Tiergesundheit
...können von Betriebsaufzeichnungen und Leistungsdaten interpretieren ...kennen der Routineabläufe in einem Schweinebestand

Veterinary Public Health Nutztiere
Ziel ist, dass die Studierenden verschiedene Schnittstellen zwischen VPH und der Nutztierpraxis kennenlernen und

deren Bedeutung einschätzen können.
-Thema 1: Studierende kennen die verschiedenen Kontrollen zur Gewährleistung der Sicherheit von Fleisch auf Stufe Schlachtbetrieb (Schlachttieruntersuchung, Fleischuntersuchung, Selbstkontrollpflicht)
-Thema 2: Studierende verstehen die Grundlagen der Mikrobiologischen Fleischuntersuchung
-Thema 3: Studierende kennen die Bedeutung verschiedener euterpathogener Erreger und können Mastitisdiagnostik und Resistenzprüfung eigenständig durchführen
-Thema 4: Studierende können die Bedrohungslage respektive einen Ausbruch einer Tierseuche mit nachfolgenden Massnahmen korrekt einschätzen und erklären.
-Thema 5: Studierende kenne die verschiedenen «Problemfelder»

Course Materials:

Innere Medizin, Chirurgie, Notfall
-Inhalt der Nutztierchirurgie-Skripten wissen
-Propädeutik Skripten
-Skripten der Nutztier-Medizin
-Merkblatt für Praktikum

Reproduktion (Geburtshilfe und Gynäkologie)

- Vorlesungsunterlagen zur Gynäkologie, Andrologie, Geburtshilfe, Neonatologie und Assistierten Reproduktion beim Rind studieren.
- Gynäkologische Propädeutik beim Rind (gelbes Heft) studieren
- Geburtshilfe (OLAT-Kurs "Geburtshilfe beim Rind") studieren.
- Während der Rotation bei Grunert/Berchtold "Fertilitätsstörungen beim Rind", Richter/Götze "Tiergeburtshilfe", McKinnon/Voss "Equine Reproduction" und Szenci et al. «Bovine Prenatal, Perinatal, and Neonatal Medicine» (sind in den Bibliotheken vorhanden) die in der Klinik vorgekommenen Krankheiten nachlesen.
Abteilung für Ambulanz und Bestandesmedizin
-Gynäkologische Propädeutik beim Rind (gelbes Heft) studieren
-OLAT-Kurs "Geburtshilfe beim Rind" studieren
-«Geburtshilfe» (blaues Heft) studieren
-«Ambulanz-Büechli» (weisses Heft) studieren und bereithalten

Schweinemedizin / AgroVet Strickhof -Vorlesungsunterlagen
-Skript Propädeutik Schwein VPH Nutztiere
-Gynäkologische Propädeutik beim Rind (gelbes Heft) studieren
-Vorlesungsunterlagen zur Gynäkologie, Andrologie und Assistierten Reproduktion beim Rind studieren.
-Unterlagen zur Bestandesmedizin aufarbeiten AgroVet Strickhof Tage

Veterinary Public Health Nutztiere
-VPH-Unterlagen 3. Jahr zum Schlachtprozess und Schlachthygiene repetieren
-VPH-Unterlagen 3. Jahr zu Mastitis repetieren Alle weiteren Unterlagen werden am ersten Tag im Rahmen der Einführung abgegeben.

Merkmale:

Responsible instructor: Christian Gerspach

Requirements:

Assessment: Während des klinischen Jahres sind je nach Fachgebiet verschiedene arbeitsplatzbasierte Assessments abzulegen, welche entweder summativ (mit einer Note) oder rein formativ (ohne Note) bewertet werden. Einzelne Veranstaltungen verlangen eine schriftliche Prüfung. Die Assessments müssen im e-Portfolio zeitnah dokumentiert und validiert werden.
Zur Vertiefung der klinischen Handlungskompetenz werden

regelmäßige Besprechungen, Diskussionen und Reflexion zu klinischen Fällen und der zugrundeliegenden Entscheidungen abgehalten. Feedback stellt ein zentrales Element dar. Des Weiteren werden bestimmte Fertigkeiten im Skills Lab vertieft.

Module Rotations Equine Clinic
05SM.550_pf / Praktikum

Description:

General description:
Das Modul Rotationen Pferdeklinik wird von Studierenden mit Schwerpunkt Pferd absolviert. Es beinhaltet zur Vertiefung der klinischen Fähigkeiten und Fertigkeiten im Pferdebereich folgende Fachgebiete: Chirurgie, Innere Medizin, Reproduktion, Notfallmedizin, Anästhesiologie und Bildgebende Diagnostik. Studierende erhalten die Möglichkeit, unter Supervision unmittelbar an Patienten ihre Fähigkeiten und Fertigkeiten ("Hands on") zu üben und zu vertiefen. Studierende werden intensiv in das praktische Arbeiten integriert. Es wird im Besonderen auf das Erlernen von praktischen Fertigkeiten (inkl. Kommunikationsfähigkeiten), eingegangen, auf das Erstellen von Behandlungsplänen nach Prinzipien von Evidence-based Medicine, antibiotic/microbial stewardship und Good Veterinary Practice, und es werden auf Tierschutz-relevante Aspekte eingegangen. Dabei wird großer Wert auf den Diskurs über spezifische Fälle und das Erarbeiten der fallspezifischen Hintergründe gelegt. Die Teilnahme an den Fallbesprechungen im Zuge des Lehrbetriebes sowie die Absolvierung von Nachtdiensten sind wesentlicher Bestandteil der klinischen Rotationen.
Insgesamt dauern die supervidierten Rotationen 20 Wochen und sind gemäss folgendem Plan zu absolvieren:
Pferdechirurgie: 6 Wochen
Inneren Medizin Pferd: 6 Wochen
Notfallmedizin (Critical Care Pferd): 4 Wochen Reproduktion Pferd: 2 Wochen
Bildgebung Grosstier (weitere bildgebende Modalitäten): 2 Wochen Anästhesiologie Grosstier: 1 Woche

Klinik für Pferdechirurgie

Die Rotation auf der Klinik für Pferdechirurgie dient dazu, die Anwendung des erlernten Wissens im klinischen Alltag zu üben sowie die theoretischen und praktischen Fertigkeiten zu erweitern. Die Studierenden beteiligen sich aktiv bei der Versorgung der sich in stationärer Behandlung befindlichen Pferde sowie der diagnostischen Aufarbeitung neuer Patienten und assistieren bei Operationen. Einige Aufgaben wie Medikamentengabe und Wundtoiletten übernehmen die Studierenden nach entsprechender Einweisung eigenverantwortlich. Des Weiteren wird Wert auf die praktische Ausbildung von essentiellen Fertigkeiten wie Verbände anlegen, chirurgischer Händedesinfektion und korrektes Anlegen von Handschuhen, Durchführung intravenöser Injektionen und Legen von Venenverweilkathetern gelegt. Diese Fertigkeiten können unter tierärztlicher Supervision in der klinischen Praxis geübt werden.

Klinik für Pferdemedizin

Die Studierenden absolvieren die Rotation auf der Klinik für Pferdemedizin um das Basiswissen aus den internistischen Vorlesungen in die Praxis umzusetzen und die verschiedenen Bereiche der Inneren Medizin des Pferdes in Theorie und Praxis intensiv zu erlernen.
Hier sind Neugier und detektivische Fähigkeiten gefragt, wenn es darum geht, die problem-orientierte Aufarbeitung von Patienten - vom Erstellen von Problemlisten anhand pathophysio-logischer Überlegungen zur Auswahl geeigneter Diagnostik bis hin zur intensiven Therapie - zu begleiten.
Studierende haben zugewiesene Fälle, die sich auch auf der Visite vorstellen und in deren Behandlung sie aktiv eingebunden sind. Die Studierenden übernehmen Aufgaben teilweise eigenverantwortlich nach Absprache mit Assistenztierärzten/-tierärztinnen (z.B.
Medikamentenapplikation, Infusionstherapie, intensivmedizinische Überwachung, POC Labor Untersuchungen) und teilweise unter Supervision eines Assistenztierarztes/-tierärztin (z.B. Katheter stecken, Blutentnahme, Assistenz bei invasiven bzw. weiterführenden Untersuchungen wie Endoskopie, Ultraschall, Liquorentnahme, Rektaluntersuchung).

Notfallmedizin (Critical Care Pferd)

Der Notfalldienst der Pferdeklinik ist gemeinsam organisiert, sodass sowohl Fälle aus der Pferdechirurgie, Innere Medizin für Pferde, Reproduktion und Ophthalmologie in dieser Rotation betreut werden. Es sind ständig ein oder mehrere Tierärzte/Tierärztinnen vor Ort, sodass Studierende immer in unter direkter Supervision eines Tierarztes/ einer Tierärztin handeln. Die Studierenden absolvieren die Rotation im Notfallbetrieb der Pferdeklinik, um das Basiswissen aus den internistischen und chirurgischen Vorlesungen in die Praxis umzusetzen und die verschiedenen Bereiche der Notfallmedizin bei Pferden in Theorie und Praxis intensiv zu erlernen. Hier sind Belastbarkeit, detektivische Fähigkeiten und schnelles Denken gefragt, wenn es darum geht, Notfall- Patienten in gemäss einer Triage aufzuarbeiten und zu behandeln. Mithilfe bei Operationen im Rahmen vom Notfalldienst ist ebenfalls Bestandteil dieser Rotation. Ein zweiter Schwerpunkt dieser Rotation ist die Betreuung und Überwachung von Intensivpatienten an der Pferdeklinik.
Die Studierenden übernehmen Aufgaben teilweise eigenverantwortlich nach Absprache mit Assistenztierärzten/-tierärztinnen und teilweise unter Supervision eines Assistenztierarztes/-tierärztin.

Reproduktion Pferd

Studierenden vom Schwerpunkt Pferd haben die Möglichkeit während einer Woche auf der Klinik der Reproduktion unter Supervision praktische Tätigkeiten der Geburtshilfe zu üben und vertiefen. Zusätzlich wird von April bis Juli eine Praktikumswoche in Avenches auf dem Schweizerischen Nationalgestüt angeboten.

Klinik für Bildgebende Diagnostik

Abteilung für Anästhesiologie

Studierende mit Schwerpunkt Pferd sind, anschliessend an die zwei Wochen Kernrotation, eine weitere Woche auf der Abteilung für Anästhesiologie eingeteilt. Sie können so weiter in der Pferdeanästhesie mitarbeiten und die erlernten Fähigkeiten der vergangenen 1 Wochen anwenden. Bei Routinepatienten dürfen sie die Anästhesie vorbereiten und helfen durchzuführen, Jugularis Katheter stecken, intubieren, Monitoring am anästhesierten Patienten anbringen, Flüssigkeitstherapie steuern und einen postoperativen Analgesieplan entwerfen.

ECTS: 28

Learning Outcome:
Übergreifende Lernziele

-Erheben eines klinischen Vorberichtes (vollständige Anamneseerhebung)
-Umgang mit Tierbesitzern und Tieren
-Durchführen einer exakten klinischen Untersuchung
-Erheben abnormaler klinischer Befunde und Erstellen einer Problem- und Differentialdiagnosenliste
-Erstellen eines logischen und adäquaten diagnostischen Plans
-Interpretation der Ergebnisse von Fall-relevanten weiterführenden Untersuchungen
-Stellen einer Diagnose bzw. Verdachtsdiagnose
-Erstellen eines Behandlungsplanes und Gründe für die Therapien verstehen
-Prognose stellen und dem Besitzer erklären
-Erkennen eines Notfalls
-Kosten für gängige Untersuchungen/Behandlungen kennenlernen
-Erstellen eines Besitzer- bzw. Tierarztberichtes
-Kommunikation in jeweils passenden Ausdrücken mit Besitzern, Pflegern und Tierärzten in mündlicher und schriftlicher Form.
-Kommunikation mit Fachpersonen: Strukturierte Kommunikation / Diskussion medizinischer Probleme unter Tierärzten
-Wissen, wann muss ein Fall an einen Spezialisten verwiesen werden; eigene Grenzen erkennen und entscheiden, welche Fälle eine Behandlung durch einen Spezialisten bedürfen.

Klinik für Pferdechirurgie

-Durchführen einer aseptischen Präparation eines Patienten
-Durchführung der chirurgischen Händedesinfektion
-Korrektes Anlegen von sterilem Operationsmantel und Handschuhen
-Anlegen von Verbänden

-Durchführung einer intravenösen Injektion
-Legen von Venenverweilkatheter
-Exploration eines Abdomens kennen bzw. durchführen
-Wundmanagement kennen bzw. durchführen können
-Lahmheitsuntersuchung in Anwendung und Durchführung kennen
-Maulhöhlenuntersuchung

Klinik für Pferdemedizin

-Durchführung der Allgemeinuntersuchung sowie spezieller Untersuchungstechniken am Patienten (gesamte Propädeutik)
-Durchführung und Interpretation von POC Laboranalysen (Laktat, Glukose, Blutgas)
-Überwachen von stationären Patienten und Erlernen praktischer Fähigkeiten wie Injektionen, Blutentnahmen, Tablettengabe, Flüssigkeitstherapie
-Erlernen des praktischen Umgangs und Handlings von Patienten, auch von weniger vertrauten Spezies
-Erkennen und Interpretation abnormer Befunde; Überwachen von Patienten auf mögliche Medikamentennebenwirkungen

Notfallmedizin (Critical Care Pferd)

-Kennenlernen häufiger Gründe für Notfälle bei Equiden (inkl. Fohlen)
-Erkennen lebensbedrohlicher Zustände bei im Notfalldienst eingelieferten Patienten (Triage) und Behandlung dieser Patienten;
-Erlernen und Üben praktischer Fähigkeiten (z.B. klinische Untersuchung, Notfallprozeduren mit erster Hilfe, wie z.B. Wundbehandlung, Frakturstabilisierung, etc.)
-Erkennen und Behandeln akuter Schmerzzustände
-Mithelfen bei Notfalloperationen
-Überwachen von stationären Patienten und Erlernen praktischer Fähigkeiten wie Injektionen, Blutentnahmen, Tablettengabe, Flüssigkeitstherapie
-Erlernen des praktischen Umgangs und Handlings von Patienten, auch von weniger vertrauten Spezies
-Erkennen und Interpretation abnormer Befunde; Überwachen von Patienten auf mögliche Medikamentennebenwirkungen

Reproduktion Pferd

Klinik für Bildgebende Diagnostik

Abteilung für Anästhesiologie

--Kennen der Medikamente, die es braucht, um ein Tier zu beruhigen, eine Anästhesie einzuleiten und aufrecht zu erhalten. Die möglichen Vor- und Nachteile sind bekannt und die Medikamente können richtig angewendet werden.
-Einen Anästhesieplan für einen Routinepatienten erstellen können.
-Wissen, welche Möglichkeiten es gibt bei einem Tier Schmerzen zu bekämpfen und diese anwenden können
-Für die Anästhesie nötige Geräte zusammensetzen können und einen Dichtigkeitstest des Anästhesiegerätes durchführen können.
-Den sicheren Arbeitsplatz für eine Anästhesie vorbereiten (Monitoring, Medikamente, Tuben etc.) können.
-Ein Tier intubieren können.
-Wissen wie bei ausgesuchten Notfällen reagiert werden muss
-Eine Anästhesie überwachen können (mit und ohne Monitore)

Studierende mit Schwerpunkt Pferd erhalten die Möglichkeit, in diesem Modul ihre klinischen Fähigkeiten und Fertigkeiten in der Kleintier- und Nutztierklinik zu vertiefen. Sie können
unter Supervision unmittelbar an Patienten ihre Fähigkeiten und Fertigkeiten ("hands on") zu üben und zu vertiefen. Studierende werden intensiv in das praktische Arbeiten integriert. Es wird im Besonderen auf das Erlernen von praktischen Fertigkeiten (inkl.
Kommunikationsfähigkeiten), eingegangen, auf das Erstellen von Behandlungsplänen nach Prinzipien von Evidence-based Medicine, antibiotic/microbial stewardship und Good Veterinary Practice, und es werden auf Tierschutz-relevante Aspekte eingegangen. Dabei wird großer Wert auf den Diskurs über spezifische Fälle und das Erarbeiten der fallspezifischen Hintergründe gelegt. Die Teilnahme an den Fallbesprechungen im Zuge des Lehrbetriebes sind wesentlicher Bestandteil der klinischen Rotationen.
Insgesamt dauern die supervidierten Rotationen 8 Wochen und sind gemäß folgendem Plan zu absolvieren:

Kleintierchirurgie: 2 Wochen
Innere Medizin Kleintier: 2 Wochen
Nutztierchirurgie: 1 Woche
Innere Medizin Nutztier: 1 Woche
Ambulanz: 1 Woche
Reproduktion Nutztiere: 1 Woche

ECTS: 16

Learning Outcome:
-Siehe Modul Rotation Kleintierklinik (Chirurgie / Innere Medizin)
-Siehe Modul Rotation Nutztierklinik (Chirurgie / Innere Medizin / Ambulanz / Reproduktion)

Course Materials:	-Siehe Modul Rotation Kleintierklinik (Chirurgie / Innere Medizin) -Siehe Modul Rotation Nutztierklinik (Chirurgie / Innere Medizin / Ambulanz / Reproduktion)
Merkmale:	
Responsible instructor:	Patrick Kircher

Requirements:

Assessment:	Während des klinischen Jahres sind je nach Fachgebiet verschiedene arbeitsplatzbasierte Assessments abzulegen, welche entweder summativ (mit einer Note) oder rein formativ (ohne Note) bewertet werden. Einzelne Veranstaltungen verlangen eine schriftliche Prüfung (z.B. die Labordiagnostik). Die Assessments müssen im e-Portfolio zeitnah dokumentiert und validiert werden. Zur Vertiefung der klinischen Handlungskompetenz werden regelmäßige Besprechungen, Diskussionen und Reflexion zu klinischen Fällen und der zugrundeliegenden Entscheidungen abgehalten. Feedback stellt ein zentrales Element dar. Des Weiteren werden bestimmte Fertigkeiten im Skills Lab vertieft.
Grading Scale:	1-6, Half Grades Given

Module Extramural Practicals
05SM.580_exp / Praktikum extern / Berufspraktikum

Description:

General description:
Die externen Praktika sind integrale und wichtige Bestandteile der praktischen Ausbildung. Die Studierenden absolvieren insgesamt 12 Wochen (60 Arbeitstage) externe Praktika. Sie wählen die Art der Praktika individuell aus und bewerben sich eigenständig.
Die Studierenden sind selbst in der Verantwortung ein Praktikumsplatz so auszuwählen, dass am Schluss des Studiums die entsprechenden Anforderungen der VetPROFILES abgedeckt werden.
Das Praktikum in einer tierärztlichen Praxis oder Klinik in der Schweiz ist an vertragliche Bedingungen gebunden. Dazu sind Verträge vor Antritt des Praktikums abzuschliessen.

ECTS: 15

Learning Outcome:
Der Tätigkeitenkatalog für die externen Praktika orientiert sich an den VetPROFILES Ausbildungszielen bzw. vertrauenswürdigen beruflichen Tätigkeiten (EPA) und integriert die Erwartungen und Möglichkeiten von Praktikumsbetrieben.
Es ist eine Zusammenstellung von beruflichen Tätigkeiten und Kompetenzen, die Studierende der Veterinärmedizin während eines klinischen Praktikums mit unterschiedlichem Betreuungsgrad durchführen sollen. Die Ausführung der beruflichen Tätigkeiten benötigen eine gleichzeitige Integration mehrerer Kompetenzen, dazu gehören die veterinärmedizinische Expertise, Kommunikation, Teamarbeit, Professionalität, Health Advocate und das lebenslange Lernen. Das Externe Praktikum verfolgt das Ziel, dass Studierende das bereits Erlernte anwenden und weitervertiefen.
Die Auflistung der Ausbildungsziele erfolgt anhand der jeweiligen EPAs.
Studierende sollen am Ende des Praktikums die Tätigkeiten unter dem gekennzeichneten Supervisionslevel / Betreuungsgrad ausüben können.

Module iPSZürich Lecture
04SMIRM21001 / Seminar

Description:

ECTS: 0

Notes:
Kontakt-Email:
melanie.generali@uzh.ch

Learning Outcome:
The discovery of so-called induced pluripotent stem cells (iPSCs, i.e.
embryonic-like cells created from ordinary body cells) by Prof. S.
Yamanaka at the Center for iPS Cell Research and Application (CiRA), Kyoto University, has ignited a new era of cell-based therapy initiatives and rewarded Yamanaka and his coworkers with the Nobel Prize for Medicine in 2012. iPSC-technology has experienced tremendous progress in the field of disease modelling, early drug discovery and regenerative medicine.
The iPSZürich lecture series, brings together early-career researchers (Undergraduate Students, PhD students and postdoctoral fellows) and experts working on exciting new innovations in the field. The main goal is to provide a forum to disseminate state-of-the art iPSC research, trigger free-ranging discussions and help to inspire ideas of current research projects in the field of iPSC technologies.

Target Groups:
Studierende im Masterstudium

Module BME 366 Medical Immunology
07SMBME366 / Block Course

Description:

General description:
The students will learn about the healthy immune system, autoimmunity, tumor immunology and allergy. We are going to use mouse models and human samples to study these immunological conditions. Techniques used during these experiments include cell culture, spectral flow cytometry as well as data analysis using FlowJo and R. To learn about allergy, we will visit the SIAF in Davos from 26.3.-28.3.2024.

ECTS: 6

Notes:
10 (+2 MD-PhD Candidates) = 12

Registration for Block courses here: https://www.mybioportal.uzh.ch

Learning Outcome:
On completion of the module students should have gained knowledge on the techniques and models used to study various immunological conditions. They should have a firm understanding of different immune responses and the cell types and immunological mechanisms involved in them. They should know how complex data can be analysed using tools such as R/RStudio.

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Onur Boyman

Requirements:

Prerequisites:	Basic studies completed Basic knowledge in Immunolgy (e.g. BIO 132, BME 236, BIO 430, Immunology I) Basic knowledge in R/RStudio (e.g. BIO 144)
Assessment:	Form, duration and timing of the assessment(s): (if several, define how the final grade is composed) The final grade will be defined through different elements: - Group report (40%) - Individual performance during group presentation (40%) - Individual performance during practical sessions (20%)
Grading Scale:	1-6, Half Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Spring Semester)

Module MAT 750 Seminar Fractal Geometry
07SMMAT750 / Seminar

Description:

General description:
Fractals are some of the most complicated and beautiful objects in all of mathematics. They range from perfectly symmetric to wild objects containing many different shapes. In this course, we will develop the basic tools for the mathematical analysis of fractals. The first part of the seminar will focus on defining the appropriate notions of dimension for fractal sets and computing them. In the second part, we will cover several topics in pure mathematics where fractal sets naturally appear: iterated function systems, continued fractions, nowhere differentiable functions, the Kakeya problem and holomorphic dynamics.

ECTS: 3

Notes:
The subject of fractal geometry is very visual. This is one of the main appeals of the subject, and this is why every talk should also be accompanied by slides showing many pictures.
There will also be a lot of opportunities to learn how to use mathematical software for drawing pictures, but this will not be compulsory.

Mathematical Fields: Analysis, Geometry/Topology

Target Groups:
Math BSc students from the 4th semester and MSc students.

Course Materials:	The seminar will mostly follow the book Fractal Geometry: Mathematical Foundations and Applications, 3rd Edition by Kenneth Falconer. Each of the specific topics will come with an additional set of smaller references, which will be provided at the start of the course. There are also many expository lectures and videos available online on the subject of fractals. A selection of them will be suggested at the start of the course.
Merkmale:	
Responsible instructor:	Corinna Ulcigrai

Requirements:

Prior Knowledge:	Knowledge of topology, analysis and basic measure theory at the level covered in the first three semesters at UZH is required.
Assessment:	- Prepare a talk and present it in class - Hand in a typed (LaTeX) version of the talk - Be present throughout the semester and participate actively in discussions - Language of Assessment: English
Grading Scale:	Pass/Fail
Repeatability:	Can be repeated once

Module Angewandte Physiologie anhand kinderanästhesiologischer Fallbeispiele
04SMPED22001 / Seminar

Description:

ECTS: 0

Notes:
Vorlesungen/Seminare für das Frühjahrsemester 2026

Datum: 19.02.2026
Referent: PD Dr. med. Alexander Schmidt

Raum: Kinderspital Zürich, Lenggstrasse 30, 8008 Zürich, Raum ASS.B113
Zeit: 16:30 – 18:00
Thema: Lungenprotektive Beatmung beim Neonaten

Datum: 05.03.2026
Referent: Prof. Dr. med. Achim Schmitz
Raum: Kinderspital Zürich, Lenggstrasse 30, 8008 Zürich, Raum ASS.B113
Zeit: 16:30 – 18:00
Thema: Allgemeinanästhesie für nichtkardiale Eingriffe bei Vitium Cardis

Datum: 19.03.2026
Referent: PD Dr. med. Jörg Thomas
Raum: Kinderspital Zürich, Lenggstrasse 30, 8008 Zürich, Raum ASS.B113
Zeit: 16:30 – 18:00
Thema: Chronische postoperative Schmerzen (CPSP)

Datum: 16.04.2026
Referent: PD Dr. med. Jörg Thomas
Raum: Kinderspital Zürich, Lenggstrasse 30, 8008 Zürich, Raum ASS.B113
Zeit: 16:30 – 18:00
Thema: Welchen Blutdruck braucht das Kind?

Datum: 30.04.2026
Referent: Prof. Dr. med. Achim Schmitz
Raum: Kinderspital Zürich, Lenggstrasse 30, 8008 Zürich, Raum ASS.B113
Zeit: 16:30 – 18:00
Thema: Nephrektomie bds beim Neugeborenen

Datum: 21.05.2026
Referent: PD Dr. med. Alexander Schmidt

Raum: Kinderspital Zürich, Lenggstrasse 30, 8008 Zürich, Raum ASS.B113
Zeit: 16:30 – 18:00
Thema: Schockformen und Management

Datum: 28.05.2026
Referent: PD Dr. med. Jörg Thomas
Raum: Kinderspital Zürich, Lenggstrasse 30, 8008 Zürich, Raum ASS.B113
Zeit: 16:30 – 18:00
Thema: Co-Analgetika in der postoperativen Schmerztherapie

Learning Outcome:
Lerninhalte:
Anwendung physiologischer Prinzipien und Gesetzmässigkeiten anhand kinderanästhesiologischer Fallbeispiele Beispiele für Physiologie sind Thermoregulation, Atemmechanik, pulmonale Perfusion- und Distributionsstörungen, Katecholamine und Nebennierenrindenhormone, Frank-Starling Mechanismus, Neuronale Innervation, peripartale Kreislaufumstellung Beispiele für Kinderanästhesiologische Szenarien sind Positive Pressure Ventilation, Thorax- und Abdominaleingriffe im Säuglingsalter, Laparoskopische Eingriffe, typische kinderanästhesiologische Atemwegskomplikationen, Mediastinal Mass Syndrom, usw.
Lernziele:
Die Studierenden sollen lernen, welche physiologischen Probleme den klinischen Szenarien zugrunde liegen bzw. welche physiologischen Gesetze angewendet werden, um in bestimmten Fallkonstellationen und Krisensituationen erfolgreich zu handeln Unterrichtsformat: Seminar- bzw. Kolloquium: Nach Vorstellung eines klinischen Falls mit Illustration des klinischen Kontextes durch den Referenten wird die zugrundeliegende Problematik gemeinsam erarbeitet und die physiologischen Gesetzmässigkeiten sowie die mögliche Anwendung zur klinischen Problemlösung diskutiert; die physiologischen Gesetze werden abschliessend vom Referenten zusammengefasst und als Handout zur Verfügung gestellt (Wird z.B. Pandemie-bedingt die Teilnehmerzahl zu hoch bzw. eine Präsenzveranstaltung unmöglich, so wird eine Online-Übertragung angeboten)
Prüfungsform:
Multiple-Choice Test. Zu jedem Fallbeispiel/Thema werden 2 - 3 Fragen erstellt. Die Teilnahme am Test ist freiwillig, er wird online durchgeführt und die Benutzung von Hilfsmitteln ist erlaubt. Die Multiple-Choice Fragen werden mit Google.forms zur Verfügung gestellt, die Teilnehmer können den Zeitpunkt, wann sie den Test durchführen, innerhalb einer bestimmten Frist selber bestimmen. Alle Teilnehmer, die einen Test ausfüllen, erhalten eine Korrektur mit Kommentaren per Email zugesandt. Sie können bei Bedarf auch persönlich, ggf auch videotelefonisch Rückfragen zu den Inhalten stellen.

Module How to manage an IT Company (L)
03SM22MI0016 / Course

Description:

General description:
Challenges and Lessons Learned from management of a software company

- processes and procedures in a traditional software company
- Failing and Learning
- market trends, standard way of working and cooperating
- new organization form, roles and meeting format
- (new) challenges (e.g. resources) and best practice

ECTS: 3

Notes:
Reading material will be provided in advance for lecture preparation.

Learning Outcome:
- software company (working models in the software industry, Industry standards, regulatory (external) requirements)
- market trends and standard way of working and cooperating (associated challenges, Agile: definition of agile management, agile playbook, bimodal approach, the new organization - holacracy, micro methods, examples for innovations in projects in current organization structures)
- new organization form, roles and meeting format (breakup with traditional positions and summary of roles vs. positions in a Software company, examples of innovations in projects in current organization structures)
- (new) challenges (e.g. resources) (best practice and how to avoid the old challenges)

Languages of Instruction:
English

Course Materials:	Will be digital provided from the lecturer.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Gerhard Schwabe

Requirements:

Prerequisites:	Lecture information management should be heard before or in parallel to the lecture
Assessment:	Grading based on homeworks.
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Module Seminar: Blockchain Programming (MSc)
03SM22MIS006 / Seminar

Description:

General description:
The goal of this Seminar is to give students first-hand experience in programming decentralised applications on the most popular blockchain protocols, including - but not limited to - Bitcoin, Ethereum and Polkadot.
Students will be given theoretical and technical guidance as well as technical infrastructure - forks of several before mentioned blockchain protocols, so that they can work on a project on their own deploying or developing decentralised applications on platforms akin to the original ones.
Examples include implementation of Decentralised Finance protocols (like Uniswap, SushiSwap or Aave) using smart contract functionalities on either Ethereum or Polkadot blockchains; deployment of second layer solutions; forkingand development of own blockchains; deployment of monitoring tools. Theoreticaland technical concepts will be covered in sufficient detail so that students can start working on their own projects. While prior programming knowledge and experience is necessary, not necessarily in the field of blockchain technologies. During their project work, students will be guided to critically assess all relevant technical aspects of their proposed application, to plan the development and deployment of their application, and to assess its usability in comparison to more traditional centralised solutions as well as inthe wider context of existing decentralised blockchain applications.

ECTS: 3

Notes:
While some topics will be outlined by the instructors, we encourage the students to suggest the topics for the final projects.
The allocation of students to this seminar will be done through the department via the new module booking tool. If there is a shortage of seats, we will give preference to students that are majoring in informatics and have not yet attended a seminar and are already far in their studies. Please note that we cannot guarantee a spot.
More information on the process can be found on our website: https://www.ifi.uzh.ch/en/studies/seminar.html.
Application for this seminar is via the module booking tool: https://studentservices.uzh.ch/uzh/launchpad

Learning Outcome:
At the end of the seminar students will gain practical knowledge in programming new decentralized applications on the most popular blockchain protocols, including, but not limited to, Bitcoin, Ethereum and Polkadot. They will learn how to setup their own blockchain forks for research and development. They willlearn how to research technical information (white papers) and read official documentation of the blockchain protocols, as well as (if needed) their source code in order to solve technical challenges while developing their decentralized applications.

Target Groups:
MSc Students in Information Systems, Software Systems, Data Science

Languages of Instruction:
English

Course Materials:	Online documentation / Course Material
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Claudio Tessone

Requirements:

Prerequisites:	Object Oriented Programming Recommended: Distributed Systems

Prior Knowledge:	Programming skills in any of the popular general purpose programming languages (C++, Java, Python). Optional experience in Web technologies (HTML, CSS, Javascript) for buidling Web applications.
Assessment:	- 70% written project report + code - 30% Oral exam (presentation on the final report) on 15. June 2026, 9 - 17h
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Fall Semester)
Request period:	from Mi 14.01.2026 10:00 to So 01.02.2026 24:00
Place allocation at the latest:	Mi 11.02.2026 24:00
Waiting list progression period:	from Mo 09.02.2026 00:00 to Fr 20.02.2026 24:00
Cancellation period:	from Mo 09.02.2026 00:00 to Mo 23.02.2026 24:00
Organisation:	Institut für Informatik
Offered in:	Spring Semester 2026 Spring Semester 2025 Spring Semester 2024 Spring Semester 2023

Module Advanced Microeconomics for Business Administration (L+E) (Fortgeschrittene Mikroökonomik für die BWL)
03SM22MO0005 / Course

Description:

General description:
The course provides basic knowledge of micro-economics including decision theory and market equilibrium through case studies.

ECTS: 6

Notes:
Business administration students (BWL) must register for this mandatory master module.
Economics (VWL) and M&E students must register for the mandatory module "Advanced Microeconomics 1" (MO0012).
This module takes place on-site.

Learning Outcome:
Solving case studies using microeconomics

Languages of Instruction:
English

Course Materials:	Angner, E. (2020). A course in behavioral economics. Bloomsbury Publishing. Microeconomics for Managers, by David M. Kreps Microeconomics for MBAs: The Economic Way of Thinking, by Richard B. McKenzie, Dwight R. Lee ppt-slides
Merkmale:	
Responsible instructor:	Johannes Luger

Requirements:

Prerequisites:	Completed bachelor's degree
Assessment:	Only students who attended the lecture 'Advanced Microeconomics for Busine Administration' in the previous semester and have not yet passed the exam are permitted to take the re-exam. The re-examination of the module will take place onsite. Written examination on: Wednesday, 15th April 2026, 12:00-14:00, exam duration: 90 minutes.
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Fall Semester)

Module Applied Empirical Methods for Business Administration
03SM22MO0006 / Lecture with Practical Exercises

Description:

General description:
This course aims to provide master students in business administration with both the knowledge and a critical understanding of standard statistical methods applied in modern management. The course will emphasize the application of regression analysis for managerial decision-making. Students are expected to develop a thorough understanding of applied statistics which will enable them to analyze business data and interpret and report their findings. A series of entertaining yet realistic case studies are a central element of the course.

ECTS: 6

Notes:
This module takes place on site and online (podcast).
The lecture with practical exercises takes only place in the fall semester.
In the spring semester, there is offered a re-examination, for students who failed the exam.

Target Groups:
Master students

Languages of Instruction:
English

Course Materials:	Statistics for Business: Decision Making and Analysis 3rd edition (January 5, 2017) Robert A. Stine (Author), Dean Foster (Author) Publisher: Pearson Language: English Hardcover: 830 pages ISBN-10: 0134497163 ISBN-13: 978-0134497167
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Oleg Prokopyev

Requirements:

Prior Knowledge:	A course in probability and statistics as well as basic knowledge of linear algebra.
Assessment:	The re-examination of the module will take place onsite. Re-examination on Thursday, 19.03.2026, 16:15 - 17:45 (90min). The conditions are the same as in the fall semester. The Re-examination is only available for students that failed the course 22MO0006 "Applied Empirical Methods for Business Administration".
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Module International Macroeconomics (L+E)
03SM22MO0013 / Lecture with Practical Exercises

Description:

General description:
The course equips students with key theoretical and empirical tools used by policymakers and academics to analyze international macroeconomic dependencies among modern national economies. Special emphasis is given to current policy issues such as the determinants and consequences of global and European imbalances, the role of financial globalization for the international transmission of business cycles and the macroeconomic aspects of exchange rate determination.

ECTS: 6

Notes:

Module Advanced Microeconomics II (L+E)
03SM22MO0014 / Lecture with Practical Exercises

Description:

General description:
The core topics of the lecture are consumer choice and competition theory.

ECTS: 6

Notes:
Lecture and exercise will not be recorded/no podcast.

Target Groups:
The course is intended for Master students. This module is compulsory for Economics and Banking and Finance students. For Management and Economics it is optional.

Languages of Instruction:
English

Course Materials:	The main textbook is Mas-Colell, Whinston and Green (1995): Microeconomic Theory, Oxford University Press. More materials will be provided via OLAT.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Armin Schmutzler

Requirements:

Assessment:	The examination of the module will take place onsite. Written examination on June 12, 2026, 2.15-3.45 PM (90 min).
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Semester)
Booking Deadline/Period:	from We 14.01.2026 10:00 to Tu 10.03.2026 24:00

Module Research Seminar Finance (MA)
03SM22MO0030 / Seminar

Description:

General description:
Research seminar in which external speakers present their work. The seminar takes places weekly during the semester. Each seminar runs 75 minutes. Topics cover a wide range of topics, including asset pricing, corporate finance, banking, ESG, and macro-finance.

ECTS: 3

Notes:
No restrictions on the number of participants. No separate registration is required. Those students wanting to take the examination must register via the Modulbuchungstool.

Learning Outcome:
To be exposed to and become familiar with cutting-edge research in finance

Target Groups:
Advanced Master students

Languages of Instruction:
English

Course Materials:	Presentation of research papers by invited speakers and the related paper. Titles/topics/speakers can be found at https://www.df.uzh.ch/en/research/seminars/finance-seminar.html
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Steven Ongena

Requirements:

Prior Knowledge:	Advanced knowlege of finance and economics
Assessment:	Written discussion (c. 3 pages per paper, c. 10 pages in total) of, and oral examination (c. 10 minutes per paper, 30 min in total) on three research papers presented. Date, time and location: End of June 2026; further details to be communicated. Until the end of May 2026 students suggest six papers to Francisco Amaral (francisco.amaral@df.uzh.ch) who then chooses and communicates to the students those three papers they will be examined on.
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Semester)

Module Takeovers, Restructuring, and Corporate Governance (S)
03SM22MO0032 / Seminar

Description:

General description:
This course studies mergers and corporate restructuring. The question addressed include: what are the motives for mergers? Which mergers create value? What arethe different methods of payment and what motivates their use? What are divestitures and spin-offs and what motivates their use? The course will cover various takeover defenses available to firms. We will examine the motives for going private and leveraged buyouts. Finally, the course will cover the relation between the market for corporate control and corporate governance.
To understand whether a particular type of merger or corporate event improves shareholder wealth we develop tools to calculate abnormal returns associated with the event and test whether these returns are statistically significant.
Additionally, we will look at valuation in the context of acquisitions and restructurings, using standard valuation techniques such as adjusted present value.

ECTS: 3

Notes:
Please send your cv and latest academic record (printout from the booking tool) until 28.02.2026. Advanced Corporate Finance I is the prerequisite for this seminar. For further information please contact Per Östberg, per.oestberg@df.uzh.ch

Target Groups:
Für Englischsprachige geeignet

Languages of Instruction:
Englisch

Course Materials:	The textbook is Weston/Mitchell/Mulherin, "Takeovers, Restructuring and Corporate Governance" (New International Edition), 4th Edition, Pearson, 2014.

Module Theories of Accounting Disclosure (S)
03SM22MO0094 / Seminar

Description:

General description:
This course provides an introduction to the fundamental theories and models of information disclosure, especially in the context of financial reporting.

ECTS: 3

Notes:
The number of participants is limited to 24. Students have to apply to the seminar before officially booking the course. Therefore, please send an application email with your CV and transcript of records to Prof. Petrov evgeny.petrov@business.uzh.ch before you officially book the seminar.
If you receive a positive confirmation, you are asked and allowed to officially book this seminar using the "Modulbuchungstool". Booking the seminar without a positive confirmation is not implying the right to attend the course. In this case the course will be graded as failed.

Module BIO 270 Dinosaur palaeobiology
07SMBIO270 / Course

Description:

General description:
The lecture comprises the anatomy, biology and systematics of the different groups of dinosaurs. Current research topics will be discussed, as will be the history of dinosaur research.

ECTS: 1

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Torsten Scheyer

Requirements:

Prerequisites:	Basics in evolution and biodiversity (e.g. BIO113 and BIO121)
Assessment:	Assessment in form of short research report/presentation
Grading Scale:	1-6, Half Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Second Spring Semester)
Booking Deadline/Period:	from We 14.01.2026 10:00 to Tu 10.03.2026 24:00
Cancellation Deadline:	from We 14.01.2026 10:00 to Tu 21.04.2026 24:00

Module Mastercolloquium
06SM254-891 / Module

Description:

General description:
Das Kolloquium für Masterarbeiten bietet den Studierenden eine Plattform zur Erarbeitung und Präsentation des eigenen Forschungskonzepts sowie zur kritischen Diskussion der Konzepte anderer. Die Gruppe (Abteilungszuordnung) wird jeweils nach Massgabe der Betreuung ausgewählt.

ECTS: 6

Notes:
https://www.ikmz.uzh.ch/de/studies/graduation/master.html

Learning Outcome:
Das Masterkolloquium bereitet die Studierenden auf die selbständige Erarbeitung der Abschlussarbeit vor und befähigt sie zur kritischen Reflexion der eigenen Arbeit sowie der Konzepte anderer Studierender.

Module Ethics and Reflection
10_1DSID0014 / Block Course

Description:

General description:
The interdisciplinary PhD block course "Ethics and reflection" aims to work on and reflect on the ethical questions that arise in connection with the dynamics and processes of digitalization. To this end, current problem constellations as well as an introduction to central ethical concepts in the context of the "Culture of Digitality" will be dealt in the initial part. Building on this, current digitalization dynamics as well as phenomena of transhumanism and artificial intelligence will be examined more closely in terms of their ethical implications. A further focus will also be on phenomena of Digital Religion and the question of singularity.

ECTS: 1

Notes:
The module will include lectures, group and plenary discussions as well as certain reflections and exchange on the connection of the ethical dimension of digitalization and their individual PhD-project.

Before the course days: Participants will have to read literature in preparation for the course. In the run-up to the course, participants are also asked to name the ethically relevant aspects of their own current studies that they consider central, so that these can be incorporated into the implementation of the course itself. Selected examples of current dystopian fiction as well as current films and series will be given.

Learning Outcome:
- Participants know about the ethical dimension and processes of digitalization
- Participants are able to identify possible ethical aspects in the context of their own subject-related, disciplinary and possible interdisciplinary academic work.
- Participants are able to connect this ethical dimension of digitalization with their own theoretical and methodological research approaches within their PhD-project.

Target Groups:
PhD candidates in the DSI Excellence Program and other interested PhD candidates of all disciplines (priority is given to DSI Excellence Program participants).

Course Materials:	Reading materials will be provided electronically approx. four weeks before the class.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Nina Cornelius-Malecha

Requirements:

Prerequisites:	The course is accessible for PhD students with own research projects. As a preparation for the course, participants will receive a list of literature to be read beforehand, which will then be discussed in the course itself.
Assessment:	The course concludes with the writing of an essay of 10-15 pages in which, building on the findings of the course, central aspects are dealt with in the context of one's own subject-related academic work or PhD- project.

Module Banking and Finance II (L+E)
03SM22AOEC06 / Lecture with Practical Exercises

Description:

General description:
Diese Vorlesung ist eine Einführung in die Bereiche "Financial Economics" und "Quantitative Finance". Sie soll den Studierenden grundlegende Kenntnisse und Fähigkeiten in diesen beiden Bereichen vermitteln und auf die nachfolgenden Veranstaltungen im Bachelorstudium in Banking und Finance vorbereiten. Der Kurs gliedert sich in zwei unterschiedliche Themenbereiche: Der erste Teil der Vorlesung gibt eine Übersicht über die Funktionsweise von Finanzmärkten und Finanzinstrumenten sowie eine Einführung in das Konzept Risiko und Rendite. Im zweiten Teil wird auf die Bewertung von Bonds und Derivaten eingegangen.

ECTS: 3

Notes:
Dieses Modul findet vor Ort und online (Podcast) statt.

Learning Outcome:
Kennen und Verstehen der Grundlagen sowie der wichtigsten Grundbegriffe und Konzepte der Finance.

Target Groups:
Studierende der Assessmentstufe Bachelor OEC

Languages of Instruction:
Deutsch

Course Materials:	Die Unterrichtsmaterialien werden auf OLAT bereitgestellt.
Merkmale:	
Responsible instructor:	Pablo Koch Medina

Requirements:

Prior Knowledge:	Banking and Finance I
Assessment:	Bestehen von Einzelaufgaben in Excel sowie der Abschlussprüfung. Die Prüfung zum Modul findet vor Ort als schriftliche Prüfung auf Papier an der "Messe Zürich" in Oerlikon statt. Angaben zu Ort und Zeit finden Sie hier: https://www.oec.uzh.ch/de/studies/exams/dates/assessment.html

Module Makroökonomik I (V+Ü) (Macroeconomics I)
03SM22AOEC08 / Lecture with Practical Exercises

Description:

General description:
Die Zielsetzung des Kurses besteht darin, zentrale gesamtwirtschaftliche Phänomene zu erklären. Im Mittelpunkt steht der Zusammenhang zwischen Output, Arbeitslosigkeit und Inflation.
Warum kommt es zu kurzfristigen Schwankungen in diesen Grössen? Wie entwickeln sie sich langfristig? Durch welche wirtschaftspolitischen Massnahmen kann die gesamtwirtschaftliche Entwicklung beeinflusst werden?

ECTS: 9

Notes:
Vorlesung und Übungen werden nicht aufgezeichnet / kein podcast.

Module Mathematik II (V+Ü) (Mathematics II)
03SM22AOEC09 / Lecture with Practical Exercises

Description:

General description:
Lineare Algebra (lineare Gleichungssysteme, Vektoren und Matrizen, Determinanten, Eigenwerte, lineare Abbildungen), Funktionen in mehreren Variablen, Optimierung unter Nebenbedingungen.
Weitere Details: https://www.business.uzh.ch/de/professorships/math/lehre/adds.html

ECTS: 6

Notes:
Vorlesung und Übungen finden vor Ort statt. Zusätzlich werden Podcasts angeboten.
Aus administrativen Gründen müssen Sie sich über das Vorlesungsverzeichnis für eine Mathematik-Übung einschreiben, die definitive Gruppenzuteilung in die Mathematik-Übungen erfolgt allerdings erst zum Vorlesungsbeginn in der ersten Veranstaltungswoche. Genauere Informationen erhalten Sie in der ersten Vorlesung.
Übungsleiter der Mathematik-Übungen ist Simon Laumer. Die Übungen werden von diversen TutorInnen unterstützt.

Learning Outcome:
Vermittlung mathematischer Grundlagen für die Wirtschaftswissenschaften und Informatik.

Target Groups:
Assessmentstufe Bachelor of Arts und Bachelor of Science

Languages of Instruction:
Deutsch

Course Materials:	siehe OLAT bzw. Moodle - Kurs Mathematik II
Merkmale:	
Responsible instructor:	Christiane Barz

Requirements:

Prerequisites:	Setzt den Stoff des Moduls Mathematik I im Herbstsemester voraus.
Prior Knowledge:	Mathematik I
Assessment:	Die Prüfung zum Modul findet vor Ort als schriftliche Prüfung auf Papier an der "Messe Zürich" in Oerlikon statt. Angaben zu Ort und Zeit finden Sie hier: https://www.oec.uzh.ch/de/studies/exams/dates/assessment.html
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Spring Semester)
Booking Deadline/Period:	from We 14.01.2026 10:00 to Tu 10.03.2026 24:00

Module Statistik (V+Ü) (Statistics)
03SM22AOEC10 / Lecture with Practical Exercises

Description:

General description:
Statistik ist die Wissenschaft der Daten. Die Zielsetzung der Vorlesung besteht darin, eine gründliche Einführung in diese Wissenschaft zu geben und ihre grundlegenden Konzepte zu besprechen. Der erste Teil der Vorlesung beschäftigt sich damit, wie man Daten sinnvoll anschaut und erforschend analysiert. Man könnte diesen Teil auch "Informelle Statistik" nennen. Im zweiten Teil der Vorlesung schauen wir uns kurz die Herkunft der Daten an. Statistische Methodenextrahieren Information aus Daten. Daher hängt die Qualität dieser Information entscheidend von der Qualität der Daten ab. Wir werden darüber reden, wie man Daten sammeln und wie man dies nicht tun soll. Der vierte und fünfte Teil der Vorlesung beschäftigen sich mit den klassischen Methoden der statistischen Inferenz: Konfidenzintervalle und Hypothesen- Tests. Das Ziel hier ist es, basierend auf einer begrenzten Stichprobe Schlussfolgerungen auf die gesamte zugrundeliegende Bevölkerung zu treffen. Man könnte diesen Teil auch "Formale Statistik" nennen. Der dritte Teil der Vorlesung schlägt die Brücke von der informellen zur formalen Statistik. Dieser Teil, Wahrscheinlichkeitstheorie, ist für uns eher ein Mittel zum Zweck: wir werden hier die notwendigen Werkzeuge erlernen, um formale Statistik zu betreiben. Er ist aber auch durchaus interessant für sich selbst betrachtet.

ECTS: 6

Notes:
Kein Podcast. Vorlesungen werden zwar aufgezeichnet, stehen jedoch nicht als Podcast zur Verfügung.
Bei organisatorischen Fragen zur Veranstaltung senden Sie bitte eine e-mail an stat_ewf@econ.uzh.ch.

Target Groups:
Studierende der Assessmentstufe

Module Foundations of Computing I (L+E) (Formale Grundlagen der Informatik I)
03SM22AINF05 / Lecture with Practical Exercises

Description:

General description:
This course introduces mathematical tools used in computer science (from database management to artificial intelligence, machine learning, data analysisand visualization, cryptography and security, computer graphics, computer vision, and image processing). In particular, the course will teach the following topics: propositional logic, digital logic circuits, induction and recursion, convolution, relations, modular arithmetic with application to cryptography, graphs, and trees.

ECTS: 6

Notes:
This module takes place on-site and online (podcast)

Learning Outcome:
Students will learn propositional logic, digital logic circuits, induction and recursion, convolution, relations, modular arithmetic with application to cryptography, graphs, and trees.

Target Groups:
Required for Bachelor students in Informatik (Assessmentstufe) as well as in the Minor of Informatics.

Languages of Instruction:
English

Course Materials:	Discrete Mathematics with Applications, by Susanna S. Epp, 4th Edition
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Davide Scaramuzza

Requirements:

Assessment:	The examination of the module will take place onsite as written "paper and pencil" exam at "Messe Zürich" in Oerlikon. Details about the location and time can be found here: https://www.oec.uzh.ch/de/studies/exams/dates/assessment.html
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Spring Semester)

Module Informatics II (V+Ü) (Informatik II)
03SM22AINF06 / Lecture with Practical Exercises

Description:

General description:
Search and sorting algorithms, recursion, correctness and complexity of algorithms, divide and conquer, recurrences, pointers, C, abstract data types, lists, trees, AVL trees, hashing, dynamic programming, graphs.

ECTS: 6

Notes:
This module takes place on-site. The lectures are not streamed and no podcasts are provided. Annotated slides with solutions to the exercise questions are provided.

Learning Outcome:
Effective understanding and use of data structures and algorithms for software development. Ability to implement algorithms in C.

Target Groups:
Major and minor students.

Languages of Instruction:
English

Course Materials:	Lecture slides. Cormen, Leiserson, Rivest and Stein, Introduction to Algorithms, MIT Press and McGraw-Hill.
Merkmale:	
Responsible instructor:	Michael Hanspeter Böhlen

Requirements:

Prerequisites:	Informatik I or equivalent knowledge.
Prior Knowledge:	Programming knowledge as taught in Informatics I.
Assessment:	The examination of the module will take place onsite as written "paper and pencil" exam at "Messe Zürich" in Oerlikon. Details about the location and time can be found here: https://www.oec.uzh.ch/de/studies/exams/dates/assessment.html
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Spring Semester)
Booking Deadline/Period:	from We 14.01.2026 10:00 to Tu 10.03.2026 24:00
Cancellation Deadline:	from We 14.01.2026 10:00 to Tu 10.03.2026 24:00
Organisation:	Institut für Informatik

Universität Zürich[UZH]

Offered in:

Module Asset Pricing (V+Ü)
03SM22BO0011 / Lecture with Practical Exercises

Description:

General description:
Teil 1: Übersicht über Derivatemärkte, Arbitragefreiheit, Futures-Märkte und Hedging-Strategien mit Futures, Bestimmung von Forward- und Futures Preisen.

Teil 2: Optionsmärkte, Optionsbewertung mit Binomial- und Black-Scholes-Modell, Hedging-Strategien und Risikomanagement mit Optionen.

ECTS: 6

Notes:
Dieses Modul findet vor Ort und online (Podcast) statt.

Learning Outcome:
Bewertung und Absicherung von derivativen Finanzinstrumenten

Target Groups:
Bachelor-Studierende

Languages of Instruction:
Unterrichtssprache und Unterrichtsmaterialien auf Deutsch

Course Materials:	"Optionen, Futures und andere Derivate" von John Hull, 9. Auflage, Pearson und optional "Asset Pricing - Derivative Produkte und ihre Systemrisiken" von Marc Chesney, Jonathan Krakow, Brigitte Maranghino-Singer und Vincent Wolff, 2nd Edition, Springer 2022.
Merkmale:	
Responsible instructor:	Markus Leippold

Requirements:

Assessment:	- Prüfung (100%) Prüfungstermin: Montag, 15. Juni 2026, 16.15 - 18.00 h. Die Prüfung findet als Bring Your Own Device (BYOD) Onlineprüfung vor Ort statt. Um die Prüfung absolvieren zu können, müssen Sie Ihren eigenen Laptop (Windows oder MacOS) mitbringen. Die Prüfung kann nicht auf Tablets absolviert werden. Ausserdem ist eine Online-Prüfungsaufsicht (Proctoring) möglich und wird mit Buchung des Moduls zugestimmt. Für die Teilnahme an der Prüfung muss eine Probeprüfung mit Ihrer individuellen technischen Ausrüstung absolviert werden. Genaue Informationen zur Probeprüfung und sonstigen Details erhalten Sie im Laufe des Semesters. Die Probeprüfung findet im Verlauf des Semesters statt. - Bonus Punkte (bis zu 6%): Zusätzliche Prüfungspunkte können durch die Partizipation am Derivative Game erworben werden.

Module Financial Reporting (L+E)
03SM22BO0013 / Lecture with Practical Exercises

Description:

General description:
This is a semester-long course that provides an introduction to corporate financial reporting at the undergraduate level. We begin with the accounting cycle of a single company and examine how it sets the foundation for the financial reporting system. Subsequently, we delve into the reporting of shareholders' equity and corporate investments. We then transition to the reporting processes of complex organizations, specifically focusing on group reporting and the consolidation of financial statements. Additionally, we explore major regulatory frameworks for financial reporting worldwide, including IFRS, U.S. GAAP, and Swiss GAAP FER.

ECTS: 3

Notes:
Podcasts available.

Learning Outcome:
The objective of this course is to equip you with an understanding of how a corporation reports its financial information to external stakeholders, particularly shareholders and the financial market. Upon completing the course,you should grasp a typical company's financial reporting process, comprehendthe accounting rules it adheres to, and be able to prepare its major consolidated financial statements with the provided information. Additionally, you should be able to understand the variations among different accounting regulations and how these regulations impact a company's accounting practices.

Target Groups:
Undergraduate/bachelor's students in business and economics.

Languages of Instruction:
The class will be held mainly in English, with bilingual lecture notes in both English and German.

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Hui Chen

Requirements:

Prior Knowledge:	You should have completed the Financial Accounting (03SM22AOEC02) course at the University of Zurich or an equivalent course elsewhere.
Assessment:	The examination of the module will take place onsite as written "paper and pencil" exam at "Messe Zürich" in Oerlikon. Details about the location and time can be found here: https://www.oec.uzh.ch/de/studies/exams/dates/assessment.html
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Module Makroökonomik II (V+Ü) (Macroeconomics II)
03SM22BO0014 / Lecture with Practical Exercises

Description:

General description:
Die Veranstaltung baut auf Makroökonomik I auf. Wir beschäftigen uns mit der offenen Volkswirtschaft und dem Problem der Staatsverschuldung.
Ausserdem wird ein erster Einblick in die dynamische Makroökonomik vermittelt.
Die Vorlesung findet im blended-learning/flipped classroom Format statt.
Lernmaterialien werden zum Semesterstart im OLAT in Form von Lernvideos, Lernkarten und Selbstlernmaterialien zur Verfügung gestellt.
Die Vorlesungen werden nicht aufgezeichnet.

ECTS: 3

Notes:
Bei organisatorischen Fragen zur Veranstaltung senden Sie bitte eine e- mail an teaching@econ.uzh.ch.

Languages of Instruction:
Deutsch

Merkmale:

Responsible instructor:	Ulrich Woitek

Requirements:

Assessment:	Die Prüfung zum Modul findet vor Ort als schriftliche Prüfung auf Papier an der "Messe Zürich" in Oerlikon statt. Angaben zu Ort und Zeit finden Sie hier: https://www.oec.uzh.ch/de/studies/exams/dates/assessment.html
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Module Managerial Accounting (L+E)
03SM22BO0015 / Lecture with Practical Exercises

Description:

General description:
This course introduces the basic concepts of managerial accounting and their applications. The focus is on how corporate cost information is recorded and used for internal decision-making in the companies. We will first study job-order costing, process costing, and activity-based costing (ABC) to understand how costs of products and services are established and recorded in the accounting system. Next, we will explore cost behavior and examine how cost-volume-profit (CVP) analysis and incremental analysis can be applied as decision-making tools. Finally, we will cover corporate budgeting.

ECTS: 3

Notes:
Podcasts available.

Learning Outcome:
The objective of this course is to provide you with an understanding of how companies record cost information and use it for internal purposes.
Upon completing the course, you should be able to:

- Understand how costs of products and services can be recorded in the accounting system.
- Explain the role of managerial accounting information in corporate decision-making.
- Apply analytical skills to prepare, interpret, and evaluate managerial reports, while recognizing their limitations.
- Assess available accounting information and provide recommendations for business decisions.

Target Groups:
Undergraduate/bachelor's students.

Languages of Instruction:
The class will be held mainly in English, with lecture notes provided in English and German.

Course Materials:	The recommended book is "Managerial Accounting" by Stacey Whitecotton, Robert Libby, and Fred Phillips (2025). Lecture notes and additional practice problems will be provided in OLAT.
Merkmale:	
Responsible instructor:	Evgeny Petrov

Requirements:

Prior Knowledge:	You should have completed the introductory Financial Accounting course at the University of Zurich or an equivalent course elsewhere.
Assessment:	The examination of the module will take place onsite as written "paper and pencil" exam at "Messe Zürich" in Oerlikon. Details about the location and time can be found here: https://www.oec.uzh.ch/de/studies/exams/dates/assessment.html
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Module Data Visualization Concepts (L+E)
03SM22BI0008 / Lecture with Practical Exercises

Description:

General description:
This course covers the fundamental concepts of interactive data visualization and related techniques, e.g. such as fundamental visual perception and color concepts, data types, basic data processing and data analysis, as well as various visualization techniques with a focus on multivariate data visualization.

ECTS: 3

Notes:
This module takes place on-site.

Learning Outcome:
The participating students will be introduced to the fundamental principles and techniques for the visualization of various data types, such as scalar, abstract, spatial and multidimensional data.

Languages of Instruction:
English

Course Materials:	- Interactive Data Visualization: Foundations, Techniques and Aplications by Ward, Grinstein and Keim, AK Peters, 2010. - Mathematical Principles for Scientific Computing and Visualization by Farin and Hansford, AK Peters, 2008 - Information Visualization: Perception for Design by Colin Ware, Morgan Kaufmann, 2013. - Interactive Visual Data Analysis by Christian Tominski and Heidrun Schumann, AK Peters, 2020. - Visualization Analysis and Design by Tamara Munzner, AK Peters.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Renato Pajarola

Requirements:

Prior Knowledge:	An introductory background in programming, algorithms, data structures as well as math for computer scientists, as well as programming in Python is required.
Assessment:	To pass the course, students must have successfully completed a few homework assignments, as announced in the first weeks of the semester, and pass the final exam. The final exam will take place onsite on Tuesday 09.06.2026, 08:00-09:45.
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Module Database Systems (L+E) (Datenbanksysteme)
03SM22BI0009 / Lecture with Practical Exercises

Description:

General description:
Comprehensive introduction to the foundations of database systems. The course is based on the relational data model and covers the following topics: relational data model, relational algebra and calculus, SQL, relational database design, physical data organization, query processing and optimization, transactions, concurrency, recovery.

ECTS: 6

Notes:
This module takes place on-site. The lectures are not streamed and no podcasts are provided. Annotated slides with solutions to the exercise questions are provided.
This module (as well as Software Engineering, Software Engineering Lab and Software Construction) is a prerequisite for admission to the mandatory internship (Informatik-Praktikum).

Learning Outcome:
The goal is a solid understanding of the foundations of database systems; to understand how these are implemented in concrete systems; and gaining experience in working with database systems.

Target Groups:
Major and minor students.

Languages of Instruction:
English

Course Materials:	Lecture slides. The course is based on the textbook Fundamentals of Database Systems, 7th Edition, Ramez Elmasri and Shamkant B. Navathe, Pearson, 2016.
Merkmale:	Target Group: Suitable for English Speakers Target Group: Open to School Students
Responsible instructor:	Michael Hanspeter Böhlen

Requirements:

Prior Knowledge:	Knowledge of basic set theory and logic. Basic knowledge of a procedural programming language (e.g., Python, C, or Java).
Assessment:	The examination of the module will take place onsite as written "paper and pencil" exam at "Messe Zürich" in Oerlikon. Details about the location and time can be found here: https://www.oec.uzh.ch/de/studies/exams/dates/assessment.html
Grading Scale:	1-6 Quarter Grades Given

Module Social Computing (L+E)
03SM22BI0010 / Lecture with Practical Exercises

Description:

General description:
Social computing studies the intersection of social behavior and computing systems. This intersection is not static: social behavior affects how computing systems are designed and computing systems affect how humans interact. Traditionally, social computing was more concerned with the first direction, how social norms and individual behavior affect the growth, success, and usage of online platforms. In recent years however, it is increasingly recognized that online platforms affect how people perceive the world, interact with each other, and ultimately how societal norms develop. Today, online platforms affect people's daily lives in essentially all domains: in healthcare, the labor market, social and family lives, education, information access, etc, and thus have a growing social, economical, and political impact.
Regulatory action tries to react to changes in technology (GDPR, online discrimination law, competition law, etc) but as argued in this course, still much power and social responsibility remains in the hands of online platform providers.

ECTS: 6

Learning Outcome:
Studying the ecosystem of online platforms and their users poses a multitude of challenges, given their complexity and how quickly they evolve. Understanding them requires the combination of technical skills (platform design, digital trace data collection, software tools), social science knowledge (from political science, social science, economics, law), and research design knowledge.

Throughout the semester we will discuss the evolution of online platforms and smart phone apps, their use, structure, and purpose in society. We will learn about the underlying data and algorithmic eco- systems. The students will learn to scrape digital trace data and use this data to answer societally relevant research questions. By the end of the course students will be able to a) summarize the most important papers addressing societal problems from different domains related to online platforms, b) design an empirical research project bringing together research questions and technical/societal background, and c) identify and critically discuss ethical and bias-related issues with their research design.

Target Groups:
This course is recommended for students in the 4th term of the BSc.

Languages of Instruction:
English

Course Materials:	Course materials will be distributed via OLAT.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Aniko Hannak

Requirements:

Prior Knowledge:	basics of computer science, basic programming skills (python), and basic statistics.
Assessment:	- Homework: 40% - Assignment/Presentation: 20% - Project: 40%

Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Spring Semester)

Module Software Engineering (L+E)
03SM22BI0011 / Lecture with Practical Exercises

Description:

General description:
The world runs on software, and this course (and the SE Lab / SoPra) is all about taking the skills and knowledge you learned in software construction and extending your abilities to design and build non-trivial software systems. This course will cover topics relevant to developing large, multi-module software systems, including their specification, design, implementation, and maintenance, as well as topics such as REST, agile development, and refactoring.

ECTS: 3

Notes:
This module takes place on-site (a podcast might be provided).
This module (as well as Software Construction, Software Engineering Lab and Database Systems) is a prerequisite for admission to the mandatory internship (Informatik-Praktikum).

Learning Outcome:
When you have completed this course, you should be able to:
§ Understand the benefits and disadvantages of various designs for constructing large, multi-version, multi-component software systems.
§ Demonstrate knowledge of the steps involved in building a large, complex software project using modern software engineering technologies.
§ Communicate your rationale and provide insight into requirements traceability to code.

Target Groups:
BSc from 4. semester

Languages of Instruction:
English

Course Materials:	Videos, readings, slides, and exercises
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Thomas Fritz

Requirements:

Prior Knowledge:	Students should have completed Software Construction. In particular, we expect that you have experience in modular design and are comfortable with object-oriented programming concepts in OO programming. If youbelieve you have the necessary expertise or can acquire it beforehand, you are welcome to register.
Assessment:	The grade will be based on - 30% midterm - 65% final exam - 5% participation grade The midterm exam for the module takes place on 01.04.2026 between 10:00 and 12:00 and the final exam takes place on 02.06.2026 between 15:30 and 18:00.

Both exams will be a Bring Your Own Device (BYOD) online exam on site. The exact times and rooms will be announced during the semester.
To take the exam, you must bring your own laptop (Windows or macOS). The exam cannot be taken on tablets. To take the exam, you must install the Safe Exam Browser (SEB) in advance and take a functional test using your individual technical equipment. Exact information on the required SEB version and other details will be provided to you during the semester.
The mandatory functional test will take place between 02.03.2026 and 20.03.2026 remotely. Completion of the functional test is mandatory. Students who have not completed the functional test will not be admitted to the exams and fail the course.

Details about the location and time can be found here: https://www.oec.uzh.ch/de/studies/exams/dates/assessment.html

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Module Software Engineering Lab (Softwarepraktikum)
03SM22BI0012 / Praktikum

Description:

General description:
The SoPra deepens the knowledge acquired in the Software Engineering module through a project that students will work on in teams of 4 to 5. For the project, students will specify, design, implement, test, and deploy a client-server application. Amongst others, the following topics will be covered in this course: requirements specification, effort estimation, architectural design, prototyping, implementation, testing, and acceptance. Students have to make continuous progress on the project and present their results.

ECTS: 6

Notes:
Due to the team-based nature of this course and the early milestones in this course, each student has to ensure to also be registered on OLAT and find/join a team early on.

Registration via Module booking (before the semester start) and via OLAT (from 16.02.2026, 16:00pm till 20.02.2026, 08:00am).

This module (as well as Software Construction, Software Engineering and Database Systems) is a prerequisite for admission to the mandatory internship (Informatik-Praktikum).

Learning Outcome:
Development of a larger software application in a team.

Target Groups:
BSc from 4. semester

Languages of Instruction:
English

Course Materials:	Slides, readings, videos, and assignments.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Thomas Fritz

Requirements:

Prior Knowledge:	Programming and Software Construction. Students should also take Software Engineering. In Software Engineering, we focus on the development of bigger software systems in teams and assume that participants already have experience in modular design and are comfortable with object-oriented programming concepts and in developing object-oriented programs/systems. While we sometimes briefly revisit a few of these topics/concepts, it will be difficult to follow the more advanced topics without a basic understanding and therefore the concepts taught in software construction are a prerequisite. If you believe you have the necessary expertise or can acquire it beforehand, then you are welcome to register.
Assessment:	Successful participation and execution of the individual and project work; continuous progress; oral examinations throughout the semester; submission and successful acceptance of the software project.

The individual assessment will be based on the handed-in work and an online oral exam; the group assessments will also be based on the handed-in work and the oral presentations that will be done in person.

Grading Scale:	Pass/Fail
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Spring Semester)

Module Business Informatics I (L+E) (Wirtschaftsinformatik I)
03SM22BI0013 / Lecture with Practical Exercises

Description:

General description:
The lecture gives an overview of the management of information systems and typical applications in companies.
The following topics are samples of the content of the course:
Information Systems, Organisation and Strategy.
Application systems. Integrated Information Processing. E-Commerce.
Ethical issues. Business Intelligence and Analytics. Knowledge Management and Decision Support. IT - Security
The course is complemented with practical use cases that the students must work out as group work and present during the module.

ECTS: 3

Notes:
This module takes place on-site.
The lecture is strongly oriented towards the textbook: Laudon, Laudon, Schoder: Wirtschaftsinformatik, Pearson 2015

Learning Outcome:
Participants will understand how application systems can transform businesses and the technical, organisational, strategic, and ethical challenges this raises.

Target Groups:
1. Bachelor students of IfI, especially business informatics;
2. Bachelor students of business administration, finance or economics with a minor in business informatics

Languages of Instruction:
English

Course Materials:	Online documentation / Course Material
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Claudio Tessone

Requirements:

Assessment:	- 30% Assignments: Final Assignment must have more than 50% of correct answers. - 70% Final written exam onsite on 19 June 2026 (10:00-12:00)
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Module CSCW (L+E)
03SM22BMI004 / Lecture with Practical Exercises

Description:

General description:
We will look at computer supported collaboration of collaborative units of any size: dyads, small groups, large groups, organizations, communities and social networks. For each collaborative unit, we will first look at their collaboration problems and what theories have to say about them. Then we will analyse how, and to what extent collaboration can be engineered for each of them. Finally we will discuss systems supporting their collaboration and how they should be designed.

ECTS: 6

Notes:
This module is intended for students who are enrolled in an Informatics degree program at the Faculty of Business, Economics and Informatics. It can be credited towards either the Bachelor's or the Master's level. (Please note that this module can becredited towards a degree only once.) A failed attempt will be credited towards the level at which the student is enrolled at that time.
About 60 % of the course will be lectures; the other 40% will be exercises, including group exercises. Some exercise sessions will be mandatory - to be announced in the first lecture.

Learning Outcome:
The student will learn how to analyze and design computer supported collaboration.

Target Groups:
Bachelor students can participate, but should be in the advanced stage (= 6th semester) of their Bachelor. This course is also open to students outside the ifi, e.g. business administration or social sciences.

Languages of Instruction:
English

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Gerhard Schwabe

Requirements:

Assessment:	Half the grade will be determined by about four homeworks (including points for attendance in lectures and exercises); the other half by a written exam. Both need to be passed in order to pass the course. The examination of the module will take place onsite. Written exam scheduled for 18 June 2026 (10:00-12:00) . In case of a low number of participants an oral exam might be scheduled instead of a written exam.
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Spring Semester)

Module Human-Computer Interaction (L+E)
03SM22BMI005 / Lecture with Practical Exercises

Description:

General description:
The Human-Computer Interaction (HCI) course provides students with a comprehensive "toolkit" of principles, processes, and approaches for designing interactive systems that address human needs and provide a good user experience. Central to the course is the human-centered design process which focuses on understanding problems from the human perspective, the iterative design cycle, and continuous analysis of design through gathering design feedback.
The course is structured around a semester-long team project addressing a real-world human problem through HCI approaches. Lectures will teach the principles, theory, and methods that are fundamental to Human-Computer Interaction. Students will learn to apply this knowledge in practice through the multi-part team project.

ECTS: 6

Learning Outcome:
Students will learn principles, processes, and methods pertaining to the topics below, and will be able to apply them in practice to the design and analysis ofinteractive systems and technologies:

- Approaches for understanding human needs
- Principles for usability and design
- Iterative design and prototyping
- User and expert evaluation processes

Target Groups:
Undergraduate Students in Informatics with Concentration in People-Oriented Computing (Mensch und Computer) -- mandatory
Undergraduate students in Informatics with other concentrations -- elective
Undergraduate students with a minor in People-Oriented Computing (Mensch und Computer) --mandatory

Languages of Instruction:
English

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Elaine May Huang

Requirements:

Prerequisites:	As all course materials and the exam will be in English; students should have a good command of spoken and written English. A group project is a core component of this course. Students should be preparedto work in teams, potentially with students who come from different backgroundsof study.
Prior Knowledge:	Knowledge in programming (e.g., Python or Javascript) is useful but not mandatory to pass the course successfully.
Assessment:	80% Group Project 20% Final Exam The examination of the module will take place onsite. Written examination on

11.06.2026 14:00-16:00.
Passing the final exam is required to pass the course.

Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Module Intermediate Econometrics (L+E)
03SM22BO0060 / Lecture with Practical Exercises

Description:

General description:
The course is intended to expose students to important econometric techniques used in empirical economics and to facilitate awareness in students of how these techniques can be used and applied. Building on the material covered in Introductory Econometrics this intermediate course will further develop and understanding of theory and methodology and also develop the ability of students to apply econometric theory to real world examples.

ECTS: 6

Notes:
There will be a lecture and tutorials during the first week: the tutorials during the first week will give an introduction to STATA. Students already familiar with STATA can join the tutorial in week 2.
There will be no podcast/recordings of the lecture and the tutorial sessions.

Learning Outcome:
After successful completion of this class, students will

- have a knowledge and understanding of intermediate techniques and skills in econometrics
- have an awareness of how to apply econometric models in practice to relevant data
- be able to demonstrate their familiarity with an econometric software program

Target Groups:
Students in 4th semester who have passed Introductory Econometrics

Languages of Instruction:
English

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Ronak Jain

Requirements:

Prior Knowledge:	Content of Statistics and Introductory Econometrics
Assessment:	Participation and exercises during the tutorial: 20% of the final grade. Exam on: 16.06.2026, 10:15-11:45 am (80% of the final grade // exam time: 90 min). The examination of the module will take place onsite.
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Module Subject Didactics Physics II (3 ECTS)
06SM090Phy23 / Module

Description:

General description:
Die Module Fachdidaktik I und II geben den Studierenden einen Überblick über die vielfältigen Themen und Methoden des Unterrichts in den einzelnen Unterrichtsfächern an Maturitätsschulen. Die Schwerpunkte der beiden Module liegen dabei auf der Umsetzung allgemeindidaktischer und fachdidaktischer Erkenntnisse im Unterricht an Maturitätsschulen. Die Studierenden lernen Theorie und Praxis im Unterricht zu verbinden, verschiedene Unterrichtsmethoden und -mittel einzusetzen sowie ihren Unterricht zu planen, durchzuführen und zu reflektieren.

ECTS: 3

Learning Outcome:
Die Studierenden sind in der Lage, zu einem vorgegebenen Thema eine Unterrichtssequenz mittels Backward Design nach fachdidaktischen Gesichtspunkten zu erstellen und zu evaluieren. Dazu gehört, dass sie die zentralen Konzepte und essentiellen Fragen der Unterrichtsinhalte identifizieren und die angestrebte Wissensstruktur in einer Concept Map veranschaulichen können. Sie berücksichtigen zentrale Prinzipien des Lernens (z.B. Vorwissen, Lernschwierigkeiten, Motivation) in ihrer Unterrichtsentwicklung und können Aktivitäten für Schülerinnen und Schüler designen, die das Lernen sichtbar machen (z.B. Clicker Sessions, Hands-on-Experimente, POE-Experimente, Applets, White Boards). Den Lernerfolg können die Studierenden mit Hilfe verschiedener Instrumente beurteilen.

Module GEO 454 Geovizualization
07SMGEO454 / Lecture with Practical Exercises

Description:

General description:
This course deepens and extends the principles, theories, and methods of geographic information visualization, a subfield of geographic information science (GIScience). The interactive lecture portion of this course draws from developments in GIScience, cartography, scientific visualization, information visualization, as well as from cognitive science. The laboratory sessions provide hands-on experience of concepts and theories discussed in lectures.

ECTS: 6

Learning Outcome:
Knowledge of the state of the art in geographic information visualization, critical evaluation of scientific literature (in non- native language), hands-on labs and group project work, application of relevant software and respective programming.

Target Groups:
Geography Masters students

Languages of Instruction:
Englisch

Course Materials:	Published on OLAT.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Sara Fabrikant

Requirements:

Prerequisites:	BSc
Prior Knowledge:	Module GEO 113. Programming knowledge equivalent to the learning objectives of GEO876
Assessment:	Group assignment submissions, oral presentations, group project web site. Language of assessments: English
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Module PT: Seminar Seelsorge/Religionspädagogik
01SM24LB005 / Seminar

Description:

General description:
Vertiefte Beschäftigung mit religionspädagogischen Grundfragen und Herausforderungen anhand eines konkreten Querschnittsthemas oder Reflexion und Diskussion exemplarischer Themen und Fragen der Seelsorge und der Diakonie.

ECTS: 3

Learning Outcome:
PT Seminar Religionspädagogik: Die Studierenden erwerben anhand eines religionspädagogischen Querschnittsthemas vertiefte Kenntnisse dieser praktisch-theologischen Teildisziplin und sind in der Lage, konkrete Herausforderungen von Bildungsprozessen in Schule und Gemeinde zu reflektieren und anhand von konkreten Unterrichtsfragen und -materialien probeweise umzusetzen.

PT Seminar Seelsorge: Die Studierenden erwerben vertiefte Kenntnisse zur Theorie und Geschichte der Seelsorge und Diakonie samt ihren Bezugswissenschaften. Sie sind fähig, seelsorgerlich-diakonische Praxis an unterschiedlichen Orten (Spital, Gefängnis, Flughafen usw.) wahrzunehmen und theologisch zu reflektieren.

Module IDB 500 Master Thesis in Interdisciplinary Brain Sciences
07SMIDB500 / Master Paper / MA-Arbeit MNF

Description:

General description:
The Master Thesis covers a research project completed within 6 months full time (including the write up) in one of the participating laboratories/research groups of the program.
The students independently work under individual guidance of an advanced supervisor on a specific defined research project and write a scientific report upon completion of the project. Thereby students connect theoretical knowledge to practical work and acquire practical insight into actual cutting-edge research in Interdisciplinary Brain Sciences.

ECTS: 30

Notes:
The project and work plan should be arranged directly with the host lab PI/supervisor, before contacting the mentor. The students ensure that the host lab PI/supervisor and the mentor agree with the planned course of the thesis. The students register for their Master Thesis by filling out the "Learning Agreement" and the "Master Thesis Registration Form", and submit them to the IDB Scientific Coordinator.

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Theofanis Karayannis Gerhard Schratt

Requirements:

Prerequisites:	Only for students enrolled in the MSc IDB program.
Assessment:	Master thesis written report. Language of the assessment: English.

Module IDB 501 Master Thesis Exam Interdisciplinary Brain Sciences
07SMIDB501 / Mündliche Prüfung

Description:

General description:
During 10 minutes the student presents a concise summary of his/her thesis work followed by 20 minutes of questions.

ECTS: 5

Notes:
The MSc thesis must be completed and the final thesis approved and sent to the IDB Scientific Coordinator before the oral examination can take place. Supervisor needs to check that all data are original and that no plagiarism has occurred. A time slot for the exam must be scheduled by the student directly with the supervisor and IDB mentor. The student must book a room for the exam.

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Theofanis Karayannis Gerhard Schratt

Requirements:

Module IDB 520 Internship in Company or Clinic
07SMIDB520 / Praktikum

Description:

General description:
The internship consists of a minimum of 8-week full-time project in a clinic or a company, with analysis of real cases and application of the acquired knowledge. The internship offers a direct contact with the clinical/business world and opportunities for future potential employment.

ECTS: 8

Notes:
The students register for their internship by filling out the "Learning Agreement" and the "Internship registration form", and submit them to the IDB Scientific Coordinator. Internship duration total work time must sum up to 2 months full time minimum (including the write up). The program provides a list of pre-informed contacts. The students independently contact a clinic or a company during the study period. The project and work plan should be arranged directly with the external supervisor. The final written report must be sent to the IDB Scientific Coordinator.

Merkmale:	Target Group: Suitable for English Speakers

Module Subject Didactics Physics II (4 ECTS)
06SM090Phy24 / Module

Description:

General description:
Die Module Fachdidaktik I und II geben den Studierenden einen Überblick über die vielfältigen Themen und Methoden des Unterrichts in den einzelnen Unterrichtsfächern an Maturitätsschulen. Die Schwerpunkte der beiden Module liegen dabei auf der Umsetzung allgemeindidaktischer und fachdidaktischer Erkenntnisse im Unterricht an Maturitätsschulen. Die Studierenden lernen Theorie und Praxis im Unterricht zu verbinden, verschiedene Unterrichtsmethoden und -mittel einzusetzen sowie ihren Unterricht zu planen, durchzuführen und zu reflektieren. Studierende mit zweitem bzw. zusätzlichem Unterrichtsfach erbringen eine zusätzliche Leistung, in welcher das erworbene Wissen im Hinblick auf den Unterricht umgesetzt wird, und buchen daher das Modul mit 4 ECTS Credits.

ECTS: 4

Learning Outcome:
Die Studierenden sind in der Lage, zu einem vorgegebenen Thema eine Unterrichtssequenz mittels Backward Design nach fachdidaktischen Gesichtspunkten zu erstellen und zu evaluieren. Dazu gehört, dass sie die zentralen Konzepte und essentiellen Fragen der Unterrichtsinhalte identifizieren und die angestrebte Wissensstruktur in einer Concept Map veranschaulichen können. Sie berücksichtigen zentrale Prinzipien des Lernens (z.B. Vorwissen, Lernschwierigkeiten, Motivation) in ihrer Unterrichtsentwicklung und können Aktivitäten für Schülerinnen und Schüler designen, die das Lernen sichtbar machen (z.B. Clicker Sessions, Hands-on-Experimente, POE-Experimente, Applets, White Boards). Den Lernerfolg können die Studierenden mit Hilfe verschiedener Instrumente beurteilen.

Module Qualitative Forschungsmethoden / Mixed Methods
04SM22CR_007 / Module

Description:

General description:
Die Promovendinnen und Promovenden sollen in der Lage sein die Abgrenzung zwischen qualitativer und quantitativer Forschung zu überwinden und ein integratives Methodendesign, kombiniert unter Berücksichtigung der Indidkation und der erkenntnistheoretischen Bezüge, herstellen und anwenden zu können. Die Trennung der empirischen Forschungsmethoden bzw. -traditionen (sprachliche und institutionelle Formen/Standards), die unterschiedlichen erkenntnistheoretischen Fundierungen und Paradigmen (der kritische Rationalismus vs. sozialer Konstruktivismus als auch Pragmatismus) werden thematisiert. Darauf aufbauend wird die Kombination von Methoden, die Bedeutung der Triangulation vs. Mixed Methods erörtert.

ECTS: 2

Learning Outcome:
Ziel des Moduls ist es, eine erkenntnispluralistische Haltung gegenüber Methodologien zu entwickeln und die Monomethodenforschung zu überwinden.
Gegenstand dieses Moduls ist somit, einen Überblick über die qualitativen Forschungsmethoden sowie Triangulation, Methodenkombination und Mixed Methods Research zu erhalten. Neben einer allgemeinen Einführung in die unterschiedlichen Designs sollen deren Spezifika hinsichtlich Methodologie und Methode vertieft werden. Als Vertiefung werden die unterschiedlichen Arten des Sampling, Datenerhebungsmethoden und das Spektrum an Datananalyseverfahren in der qualitativen Forschung besprochen und in praktischen Übungen angeeignet. Insbesondere die Integration als auch der Datentransfer vor dem Hintergrund von Mixed Methods wird diskutiert werden.

Module Implementation Science in Health Care
04SM22CR_008 / Module

Description:

General description:
Implementation science is the scientific study of methods to promote the systematic integration of research findings and evidence-based practices into care delivery and the de-integration of low value care.
Implementation science is a newer field of study that addresses the know-do gap in health care and builds on the insight that proving effectiveness of an innovation (practice, model of care, intervention, treatment modality etc.) does not automatically translate into effective adoption in clinical practice.
In this course, students will gain an understanding of the role of implementation science in clinical health research, familiarize themselves with implementation science methods, and develop skills by applying implementation science methods in their field of research.

Learning objectives:

- Students are familiar with the aims and methods of implementation science
- Students are able to describe the role of implementation science in healthcare research and practice
- Students have basic skills in designing an implementation science study
- Students can explain the importance and methods of engaging patients, families, clinicians, leaders, and other stakeholders in implementation efforts
- Students are familiar with methods to evaluate the determinants (i.e. contextual and other factors) that influence implementation efforts
- Students are able to develop theoretically informed implementation strategies
- Students can name and describe implementation outcomes and tools for their assessment

Module Health Economics
04SM22CR_502 / Module

Description:

General description:
This seminar will give PhD students an introduction to and an overview of what health economics is, what types of health economic analyses can be applied, how costs can be calculated, what basic models are used. Moreover, the strengths and limitations of the Quality-adjusted life year (QALY) as a widely used measure will be presented. In order to gain some insights into modelling the seminar will be complemented with hands-on sessions.

ECTS: 1

Learning Outcome:
At the end of the seminar, attendees should have gained a basic idea of the principles of health economic evaluations and its shortcomings. They will learn how to build certain models, conduct health economic evaluations using Excel, and interpret the subsequent results for evidence-based decision-making.

General learning outcomes

- Demonstrate familiarity with research methodology in general and the methods of the specific field of research in particular.
- Demonstrate intellectual autonomy and disciplinary rectitude as well as the ability to make assessments of research ethics.
- Demonstrate specialized insight into the possibilities and limitations of research, its role in society and the responsibility of the individual for how it is used.

Module Statistical Models with R
04SM22CR_503 / Module

Description:

General description:
Der Kurs widmet sich den wichtigsten statistischen Auswertungsmethoden für unterschiedlichste Arten von Studien (Experimentalstudien, Beobachtungsstudien (Kohorten-, Fallkontrollstudien, deskriptive Quer- und Längsschnittstudien), Sekundäranalysen (z.B. Metaanalysen)). Es werden die wichtigsten Auswertungstechniken quantitativer Daten und die wichtigsten statistischen Modelle der Gesundheitswissenschaften mit der Open-Source Software R besprechen:

- Lineare Modelle und deren Spezialfälle (LM: t-Test, ANOVA, Regression)
- Regressionsmodelle für ausgewählte Datentypen wie Zähldaten und zweiwertige Daten (GLM: Poisson, logistische Regression)
- Multivariate Verfahren (Hauptkomponenten- und Faktoranalyse)
- Einführung in Überlebensanalysen (Survival analysis)
- Hierarchische Modelle (LMM: lineare gemischte Modelle)
- Ausgewählte Methoden der Metaanalyse
- Arbeit mit dem Grafikpackage ggplot2, Arbeit mit den Packages im Tidyverse und Einführung in RMarkdown zur Berichterstellung

ECTS: 2

Target Groups:
Doktorierende der Doktoratsprogramm Care and Rehabilitation Sciences und Clinical Sciences

Languages of Instruction:
Deutsch, Unterlagen teilweise auf Englisch

Merkmale:

Responsible instructor: Christina Ramsenthaler

Requirements:

Prior Knowledge: - Grundlegende Kenntnisse in R sollten vorhanden sein. Dazu gehören: Datenstrukturen in R, Datensatzimport und -export, Datensatzmanagement in R, Tabellen & Abbildungen (base R-Funktion
- Berechnungen der deskriptiven Statistik (univariat, bivariat) mit R durchführen können.
- Uni- und multivariate deskriptive Statistiken tabellarisch und graphisch mit R bewerkstelligen können
- Verstehen die grundlegenden klassischen parametrischen und nicht-parametrischen statistischen Verfahren und Analysen (t-Test, Korrelationen, usw.) und können diese mit R durchführen Es wird vor Beginn des Kurses eine E-Learningeinheit zur Wiederholung und Auffrischung der Vorkenntnisse geben. Insbesondere die Funktionen in base R sollten bekannt sein, da wir diese Inhalte im Kurs zeitlich nicht wiederholen können.

Module Start! Teaching Essentials
10SMSTS-500 / Module

Description:

General description:
In diesem Modul werden didaktische Grundlagen vermittelt. Sie lernen, wie Sie Wissen vermitteln und andere bei ihrem Lernprozess unterstützen können. Das Modul eignet sich ideal als Vorbereitung auf eine Tätigkeit als Tutor:in. Es besteht aus einem OLAT Online-Kurs, der selbstständig bearbeitet wird, und einem 3-stündigen synchronen Workshop (wahlweise online oder in Präsenz).

Der OLAT-Kurs besteht aus 5 Bereichen:
1. Standort- und Rollenbestimmung
2. Feedback und Bewerten
3. Präsentieren und Auftreten
4. Unterrichtsplanung
5. Online Lehre

English:
This module imparts essential didactic principles. You will learn how to convey knowledge and support others on their learning journey. It is an ideal preparation for a tutor role. The module includes a self-paced OLAT online course and a 3-hour workshop (online or in-person).

The OLAT course consists of 5 sections:
1. Defining roles
2. Feedback and evaluation
3. Presentation skills
4. Lesson planning
5. Online teaching

ECTS: 1

Notes:
E-Learning, keine festen Wochentermine. Einmalige Teilnahme an einem der 3-stündigen Workshops (wahlweise online oder vor Ort) ist obligatorisch.
Onlineworkshop (Englisch): 14.04.2026, 16:15-19:00 Uhr
Präsenzworkshop (Deutsch): 16.04.2026, 16:15-19:00 Uhr

English version:
E-learning, no weekly dates. Attending one 3-hour workshop (either online or in-person) is mandatory.
Online workshop (in English): April 14, 2026, 4:15-7:00 PM
In-person workshop (in German): April 16, 2026, 4:15-7:00 PM

Learning Outcome:
Studierende setzen sich mit der Bedeutung verschiedener Erfolgsfaktoren guter Lehre auseinander und reflektieren ihren Kompetenzerwerb in den folgenden Bereichen:

- Grundverständnis akademischer Lehrtätigkeit
- Standortbestimmung bez. Lehr- und Auftrittskompetenz
- Rollenverständnis
- Umgang mit Konflikten
- Feedback geben und bewerten
- Auftrittskompetenzen analysieren und stärken
- Unterrichtsplanung und Aktivierung

- Einsatz digitaler Technologie für den Lehr- und Lernprozess
English:
Students engage with the significance of various success factors in effective teaching and reflect on their competencies in the following areas:

- Basic understanding of academic teaching
- Assessing own teaching and presentation skills
- Role comprehension
- Handling conflicts
- Providing and evaluating feedback
- Analyzing and enhancing presentation skills
- Lesson planning and student activation
- Use of digital technology in the teaching and learning process

Target Groups:
Bachelor, Master

Languages of Instruction:
Deutsch oder Englisch: siehe Sprache der Lehrveranstaltung

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Ute Woschnack

Requirements:

Prerequisites:	Keine Vorkenntnisse notwendig. Dieses Modul ist insbesondere geeignet für (angehende) Tutor:innen mit keiner oder wenig Lehrerfahrung, sowie für Studierende, die sich didaktische Kompetenzen aneignen möchten. English: No prior knowledge required. This module is especially suitable for (aspiring) teaching assistants with no or little teaching experience, as well as for students who wish to develop didactic skills.
Assessment:	Abgabe eines Portfolios. Das Portfolio beinhaltet verschiedene Übungen und Reflexionsaufgaben. Abgabe bis spätestens 30. Mai 2026. English: Submission of a portfolio is required. The portfolio includes different exercises and reflection tasks. The deadline for submission is May 30th, 2026. ---

Module Start! Practice your teaching
10SMSTS-501 / Module

Description:

General description:
Dieses Modul bietet die Möglichkeit zur Vertiefung und zum aktiven Üben spezifischer didaktischer Themen wie Gamification, Wissenschaftskommunikation, Auftrittskompetenz, oder das Erstellen von Lehrmaterialien. Die Vertiefungsthemen werden entweder als synchrone Workshops (eintägig vor Ort) oder als asynchrone Selbstlerneinheiten auf OLAT angeboten. Aus dem wechselnden Semesterangebot müssen zwei Workshops sowie eine asynchrone Selbstlerneinheit absolviert werden, um das Modul zu bestehen.

ECTS: 1

Notes:
Die Termine für die beiden obligatorischen Workshops sind wie folgt:

- Wissensvermittlung an eine breite Öffentlichkeit: 18.03.2026, 9-18 Uhr (obligatorisch und vor Ort)
- Auftrittskompetenz: 31.03.2026, 9-18 Uhr (obligatorisch und vor Ort)

Zusätzlich muss einer der beiden Online-Bausteine gewählt werden:
- Lernvideo erstellen (Workshop begleitend zum OLAT-Kurs: 06.05.2026, 16:15-19:00 Uhr, online)
- Der Baustein "Gamification" kann komplett online und asynchron absolviert werden.

Learning Outcome:
Studierende lernen verschiedene Kompetenzen und Methoden für die Lehre und Wissensvermittlung vertieft kennen und anwenden.

Target Groups:
Bachelor, Master

Languages of Instruction:
Deutsch

Merkmale:

Responsible instructor: Ute Woschnack

Requirements:

Prerequisites: Keine Vorkenntnisse notwendig.

Assessment: Der Leistungsnachweis besteht im Erstellen eines Portfolios anhand der ausgewählten Workshops/Lerneinheiten. Das Portfolio besteht aus verschiedenen Übungen oder dem Erstellen von Produkten sowie Reflexionsaufgaben. Abgabe Portfolio bis spätestens
30. Mai 2026.

Grading Scale: Pass/Fail

Repeatability: Can be repeated once

Module Videos in the Classroom: How to Use and Design Them to Support Learning?
06SM222Vic / Module

Description:

General description:
In this seminar, students will learn how to edit and design instructional videos, based on theoretical and empirical research in multimedia learning. Two projects are completed throughout the semester (one video edit, one video design) using freely available software and serve as a basis for assessment.
The aim is to provide participants with both theoretical design recommendation and practical skills to foster their use of video in their classrooms. The seminar will be held in English. Student papers will be submitted in English.

ECTS: 3

Learning Outcome:
Acquiring competence in video editing and creation based on multimedia learning theory.

Languages of Instruction:
Englisch

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Sascha Schneider

Requirements:

Assessment:	Portfolio: Modified video with presentation and written report. The module is assessed as passed if all elements of the portfolio are passed. ---
Grading Scale:	Pass/Fail
Repeatability:	repeatable once, book again

Module Summer School: International Sports Law
02SM90WM81 / Block Course

Description:

General description:
This Summer School offers unique insights into the legal context in which international sports organizations currently operate as well as into the limits to their autonomy. Participants will also explore the relevance of state law, more particularly of criminal law in sports- related matters. The focus is on one of the most heavily regulated matters in organised sport, namely the fight against doping.
The course will examine in particular

- the history of anti-doping
- the stakeholders and actors involved in anti-doping
- the legislative and procedural framework of the sports organisations in the fight against doping
- the role and the functioning of criminal and international law related to anti-doping and
- interdisciplinary aspects of anti-doping.

Participants will be able to put their knowledge into practice in a Moot Court designed specifically for this Summer School, allowing everyone to engage actively with a fictional case in the field of anti-doping. The Moot Court is a simulated arbitration procedure on a fictional sports law case, where participants will hold oral pleadings.
The Summer School will take place from 30th of June 2026 until 21st of July 2026, with 10 to 20 taught lessons per week, supplemented by self-study and a social program.
International students from around the world will join this summer school as well. UZH students participating in the module will be asked to actively engage with their international peers and to provide some support (i.e. group management on academic trips and social activities). For UZH students there are no participation fees.

If you have any questions related to this, get in touch with summer@int.uzh.ch or directly with your course leaders gunhild.godenzi@ius.uzh.ch and/or ulrich.haas@ius.uzh.ch.

ECTS: 6

Notes:
To participate in this module, students need to apply as soon as possible, not later than 10th March 2026, via email to summer@int.uzh.ch, submitting a short letter of motivation and current transcript of records. Admission status will be communicated as soon as possible, not later than by the end of March 2026. The number of participants is limited to 30-40 students in total (for UZH students 10 places are available). In case too few international participants register for the Summer School, the module will not be offered.
https://t.uzh.ch/1Bd

Learning Outcome:
Students will become acquainted with the specificities of organized sport and its national and international regulatory frameworks. They will gain expertise related to the field of anti-doping law and the interaction between sports disciplinary proceedings and criminal investigations and proceedings. After the summer school, students will be able to understand and analyse complex disputes related to anti- doping both in an international and national context.

Target Groups:
Master students of Law, History, Business, International Relations or related disciplines with anvinterest in Sports Law and Governance.
Application is also possible for advanced Bachelor students, but: Bachelor students must have at least 150 ECTS Credits at UZH law faculty (cf. § 39 RVO RWF).

The number of participants is limited. Participants will be selected based on the motivation and grade transcript submitted. Relevant prior knowledge will be considered, but is no requirement for admission.

Languages of Instruction:
Englisch

Course Materials:	A reader with relevant materials (including case studies) and background reading will be provided.
Merkmale:	
Responsible instructor:	Gunhild Barbara Godenzi

Requirements:

Prerequisites:	Open to master students at UZH and other universities. Application is also possible for advanced Bachelor students at UZH law faculty, but: Bachelor students must have at least 150 ECTS Credits at UZH law faculty (cf. § 39 RVO RWF).
Prior Knowledge:	The course is open to Master students of Law, History, Business, International Relations or related disciplines with an interest in international sports law and/or governance and arbitration. No specific prior knowledge is required for admission. A background in law or familiarity with basic legal concepts is desirable. The summer school will also include an introduction into the relevant basics of Criminal Law and arbitration.
Assessment:	Moot Court (group project: simulation of a sports arbitration proceeding). And attendance at the course is compulsory.
Grading Scale:	Pass/Fail
Repeatability:	Can't be repeated

Organisation:

Offer pattern:	1 Semester (Every Spring Semester)
Dates/Times/Deadlines:	End of june 2026/beginning of July 2026 for three weeks block course (exact dates will follow)
Request period:	not bookable
Place allocation at the latest:	
Waiting list progression period:	not bookable
Cancellation period:	not cancelable

Module Effective Software Testing (L+E)
03SM22BMI006 / Lecture with Practical Exercises

Description:

General description:
Software testing is a crucial activity that developers perform to produce high-quality and reliable software. However, this practice and its theory is often neglected in academic curricula. This course aims to fill this gap by providing students with an updated theoretical and practical knowledge on the most relevant software testing methods. The module includes a practical part that aims at providing students with hands-on experience on updated software testing methods. Students will test existing open source software system, applying theoretical concepts to the practice.

ECTS: 6

Notes:
This course replaces "Software Testing (L)" (BMINF021). Students which have already successfully passed "Software Testing" are not allowed to book this course.

Learning Outcome:
At the end of the course students:

- are able to recall and list the most important software testing practices
- can describe the most common applications of software testing practices
- can judge the benefits/drawbacks of using specific software testing practices
- are able to recall and list coverage criteria and judge their usefulness
- are able to apply software testing practices to existing code bases

Languages of Instruction:
English

Course Materials:	The course will be based on several resources, but mostly the book "Effective Software Testing" by Dr. Maurício Aniche (ISBN 9781633439931). Moreover, the course' slides will be shared with the students as additional study material.
Merkmale:	Target Group: Suitable for English Speakers Target Group: Open to School Students
Responsible instructor:	Alberto Bacchelli

Requirements:

Prerequisites:	- Informatics I (or equivalent) - Informatics II (or equivalent) - Software Construction
Prior Knowledge:	Object oriented programming (possibly Java), algorithms, and data structures
Assessment:	Written final exam onsite with theoretical questions and exercises on June 9, 2026 (14:00-16:00). Grade 100% final exam.
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Module Internship in Applied Social Anthropology
06SM721o475 / Module

Description:

General description:
Studierende im Bachelor und im Master können selbst organisierte externe Praktika à 6 ECTS (ca. 180h) in Institutionen, die in Anwendungsbereichen der Ethnologie tätig sind, anrechnen lassen. Vor Ende der Buchungsfrist sind - nach vorgängiger Absprache - einer Betreuungsperson (= Betreuer*innen für Bachelorarbeiten) die anbietende Stelle (Praktikumsort), die/der dortige*n Betreuer*in sowie die geplanten Tätigkeiten und die Dauer (Tage und Stunden) anzugeben. Im Anschluss an das Praktikum wird ein schriftlicher Bericht (2'000 bis 2 '500 Wörter) eingereicht, mit Darstellung der Tätigkeiten, Diskussion des Berufsfeldes und Bezug nehmend auf Literatur zu diesem Anwendungsbereich; sowie Praktikumszeugnis, das Arbeitsumfang und Tätigkeiten benennt.

ECTS: 6

Notes:
Information Sheet: Internship in Applied Social Anthropology: https://t.uzh.ch/1oK Request for the Booking of an Internship in Applied Social Anthropology: https://t.uzh.ch/1oL

Learning Outcome:
Studierende erhalten durch ihr ca. vierwöchiges selbständig organisiertes Praktikum einen vertieften Einblick in ein nicht- akademisches Berufsfeld für Ethnologie*innen wie der Museumspädagogik, der Interkulturellen Kommunikation, der Arbeit mit Geflüchteten, im Tourismus oder der Unternehmensberatung. Sie erlangen praktische Kenntnisse darüber wie sie zahlreiche fachliche wie überfachliche Kompetenzen aus ihrem Studium auch im nicht-akademischen Berufsleben gewinnbringend anwenden können. Die individuellen Erfahrungen stellen sie im Praktikumsbereicht Berichten aus der Literatur gegenüber.

Merkmale:

Responsible instructor:	Juliane Neuhaus

Requirements:

Prerequisites:	Es wird empfohlen, zuerst alle Module des Einführungsstudiums der Ethnologie zu absolvieren. Weitere Voraussetzungen können von den Praktikumsanbietenden verlangt werden.
Assessment:	dokumentierte praktische Arbeit (Praktikumsbericht) ---
Grading Scale:	Pass/Fail
Repeatability:	Can't be repeated

Organisation:

Offer pattern:	2 Semesters (One-Time)
Booking Deadline/Period:	not bookable
Cancellation Deadline:	not cancelable

Module IDB 412 Introductory Course in Laboratory Animal Science (LTK Module 1 - Theory part)
07SMIDB412 / Course

Description:

General description:
This module provides the theoretical knowledge in laboratory animal science that is required by the Swiss legislation as basic education for experimenters.
Topics discussed include: ethical aspects and regulations; criteria for assessment of discomfort and pain; alternative methods; laboratory animals: characteristics, needs, husbandry, breeding, normal behaviour, diseases.

ECTS: 1

Notes:
Registration upon instructions from the IDB Scientific Coordinator. IDB 412 must be listed in the Learning Agreement.

Learning Outcome:
By the end of this module the students are able to:

- consult the relevant paragraphs of the Swiss animal protection law and weigh the respective interests (benefit for humans vs suffering of the animal) during an animal experiment
- explain the parameters which influence the outcome of an animal experiment and apply these in planning the experiment
- evaluate and apply the concept of 3R's with regard to the animal experiment planned

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Philippe Bugnon

Requirements:

Prerequisites:	The course is open for MSc IDB students only.
Assessment:	Written examination: approx. 180 min Date of the performance record: written final test after the course (answer by email 1-2 weeks after the test). Assessment in English or in German.
Grading Scale:	Pass/Fail
Repeatability:	Can be repeated once

Module IDB 413 Introductory Course in Laboratory Animal Science (LTK Module 1 - Practical part)
07SMIDB413 / Praktikum

Description:

General description:
This education provides expertise and practical training that are required by the Swiss legislation for a responsible and gentle handling of laboratory animals.
Topics included: handling and techniques in rodents (e.g. application of substances, sampling, anaesthesia).

ECTS: 1

Notes:
Limited number of participants. Registration upon instructions from the IDB Scientific Coordinator. IDB 413 must be listed in the Learning Agreement. Confirmation by e-mail from the lab PI that vertebrate animals are used during the laboratory / research project.

Learning Outcome:
By the end of this module the students are able to:

- handle, restrain and inject mice and rats correctly and according to a specified time schedule
- assess health and sex of the animals used in practical trainings
- anaesthetize rats, monitor depth and recovery of anaesthesia and collect small amounts of blood

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Philippe Bugnon

Requirements:

Prerequisites:	The course is open for MSc IDB students only.
Assessment:	During the whole duration of the module (fulfilled / not fulfilled). Requirements: fulfilled (handling and work with laboratory animals). Assessment in English or in German.
Grading Scale:	Pass/Fail
Repeatability:	Can be repeated once

Description:

General description:
Das Modul führt in die Ikonographie der mittelalterlichen und frühneuzeitlichen Kunst ein. Es vermittelt einen Überblick zu zentralen Bildthemen, Bildtraditionen und Referenztexten und eröffnet so den inhaltlichen Zugang zur Bildkunst. In der Auseinandersetzung mit den Kunstwerken werden Verfahren und Begriffe der Beschreibung und Analyse eingeübt. Ergänzend zur Erarbeitung eines inhaltlichen Grundverständnisses der Werke werden weitergehende Zusammenhänge wie die Rolle von Medium und Funktion, oder von religiösen, politischen und ästhetischen Kontexten beleuchtet.

ECTS: 6

Learning Outcome:
Die Studierenden verfügen über Grundkenntnisse im Bereich der Ikonographie mittelalterlicher und frühneuzeitlicher Bilder. Sie sind mit zentralen Themengebieten sakraler und/oder profaner Bildkunst vertraut und kennen wichtige Referenztexte, die aus dem Bereich der jüdischen und der christlichen Religion, der weltlichen Dichtung, der Geschichtsschreibung oder der Naturwissenschaft stammen. Sie beherrschen Techniken der Beschreibung und Analyse, die es ihnen erlauben, ikonographische Besonderheiten von Kunstwerken systematisch herauszuarbeiten. Sie sind in der Lage, die dafür relevanten Nachschlagewerke heranzuziehen und den Zugang zu Bildthemen eigenständig zu erschliessen.

Merkmale:

Responsible instructor:	Carola Jäggi

Requirements:

Assessment:	Portfolio. --- Der Leistungsnachweis besteht aus Referat (1/3) und schriftlicher Arbeit (2/3). Alle Elemente des Portfolios müssen absolviert werden. Wird ein Element nicht absolviert, gilt das gesamte Portfolio als nicht absolviert und das Modul als nicht bestanden. Aktive, mündliche Mitarbeit wird erwartet. Abgabetermin für die schriftlichen Arbeiten ist der 10. Juli 2026.

Module Advanced Study of Media and Functions of Medieval Visual Arts
06SM640-023 / Module

Description:

General description:
Das Modul bietet die Möglichkeit einer konzentrierten Auseinandersetzung mit zentralen Gegenstandsbereichen und Forschungsfeldern der Kunstgeschichte des Mittelalters. Im Vordergrund steht die Rolle spezifischer Medien und Funktionen der Kunstwerke. Damit will das Modul den Blick für die Vielfalt der Gattungen und Techniken mittelalterlicher Bildkünste schärfen, die über den klassischen Gattungskanon der Kunstgeschichte hinausführt. Die Diskussion dieser Aspekte ist im Modul in eine Auseinandersetzung mit historischen Produktionsprozessen, Gebrauchsformen und Wahrnehmungsmustern eingebunden.

ECTS: 6

Learning Outcome:
Die Studierenden sind mit unterschiedlichen Bildmedien vertraut und in der Lage, den Einsatz bestimmter Materialien, Techniken und Formate differenziert zu beschreiben und zu analysieren. Sie verstehen den Zusammenhang zwischen medialen Prägungen von Kunstwerken und ihren historischen Funktionen. Sie sind in der Lage, einzelne Kunstwerke in die Geschichte ihrer Bildmedien einzuordnen.

Module Educational Foundations of Vocational Education and the Swiss Vocational Education Training System.
06SM222EGB / Module

Description:

General description:
Rund zwei Drittel aller Jugendlichen entscheiden sich mit dem Übergang in die Sekundarstufe II für die Berufsbildung. Diese bietet von der Berufsorientierung über die berufliche Grundbildung, die Berufsmaturität, die höhere Berufsbildung und die Weiterbildung vielfältige Möglichkeiten beruflichen Lernens. Dabei geht es sowohl um eine Befähigung zur Berufsausübung als auch um Bildungsmöglichkeiten und die Kompetenz, die eigene berufsbiografische Entwicklung zu gestalten. Die beiden Veranstaltungen im Modul eröffnen einen breiten Zugang zur Berufsbildung, indem sie dazu Grundlagen und aktuelles Wissen vermitteln, die die Studierenden im Projektseminar für eigene Praxiserkundungen mit fachlicher Fragestellung nutzen.

ECTS: 4

Notes:
Das Modul ist Bestandteil der Berufspädagogischen Zusatzqualifikation (BPZQ). Für Studierende mit Unterrichtsfach Wirtschaft und Recht sowie für solche, welche die BPZQ erwerben, ist es ein Pflichtmodul und damit nicht substituierbar. Für alle anderen ist es ein substituierbares Wahlpflichtmodul. Falls eine Hälfte des Moduls bereits absolviert wurde, bitte bei der Leitung Abteilung LLBM, Daniel Weyermann, daniel.weyermann@ife.uzh.ch, melden.

Learning Outcome:
- Die Studierenden kennen das Berufsbildungssystem der Schweiz mit seinen rechtlichen und historischen Grundlagen, seinen Strukturen, Akteuren und Lernorten sowie seine berufspädagogischen Grundlagen und können diese erläutern. - Die Studierenden kennen wichtige berufspädagogische Begriffe und Konzepte und können diese zur Gestaltung und Reflexion ihrer eigenen Tätigkeit einsetzen und sie auf die berufliche Praxis und Lebenswelt von Lernenden der Berufsbildung beziehen. - Die Studierenden haben aufgrund eigener Erfahrungen im beruflichen Umfeld und ihrer fachlichen Reflexion ein Verständnis für die spezifischen Herausforderungen für die Lernenden und können darauf im Unterricht Bezug nehmen. - Die Studierenden verstehen die Entwicklung ihrer professionellen Kompetenzen als iterativen Prozess und kennen Grundlagen der individuellen Weiterbildungsplanung im Lehrberuf. - Die Studierenden kennen aktuelle Themen der Berufsbildung und ihre berufspädagogischen Grundlagen sowie Möglichkeiten, sich regelmässig über aktuelle Entwicklungen in der Berufsbildung und Veränderungen in den Berufen zu informieren.

Module Project seminar
06SM640-522 / Module

Description:

General description:
Den Studierenden wird in wechselnden Projekten die Möglichkeit gegeben, themenbezogen zu arbeiten und dabei praxisbezogene Aufgaben durchzuführen. Dazu gehört der fachgerechte und wissenschaftliche Umgang mit Primärmaterial sowohl mit künstlerischen Originalen wie auch mit Archivmaterial. Dabei werden neue Recherchetechniken erlernt, Forschungsmethoden erprobt und die Selbstorganisation von Vorhaben in umfassender Weise (z.B. mit Öffentlichkeitsarbeit oder Vermittlungsarbeit/Führungen, Informationsmaterial) praktiziert. Formen wissenschaftlichen Schreibens werden eingeübt wie z.B. die Erstellung eines publikationsfähigen Textes (Saaltext, Exponattext, Katalogeintrag). Die Studierenden lernen Publikationsformen und ihre Anforderungen kennenlernen und damit auch die spezifische Auswertung von Recherchen. Die Heranführung an die kunsthistorische Praxis kann auch in online-Präsentationen bestehen, in der Realisierung einer Ausstellung, eines Films oder anderen Formen der praktischen Umsetzung. Die Projektthemen und Durchführungsmodalitäten werden jeweils im VVZ angekündigt. Hier werden auch die Leistungsnachweise spezifiziert.

ECTS: 12

Learning Outcome:
Die Studierenden lernen, eine Rechercheaufgabe selbständig durchzuführen, und dafür die wissenschaftlichen Recherchetechniken anzuwenden. Sie beschäftigen sich mit praktischen wie theoretischen Fragestellungen und finden Lösungen sowohl für die Bearbeitung als auch für die Darstellung und Präsentation des Themas. Die Arbeit in Institutionen und die Bearbeitung von Primärmaterial in Archiven wird von der Seminarleitung angeleitet und unterstützt. Die Praxisarbeit wird mit der Reflexion darüber, welche theoretischen Folgen die Praxis hat, in wissenschaftliche Kontexte eingebunden. Das Seminar verlangt in besonderem Masse die Eigeninitiative der Studierenden bei der Umsetzung des Projektes.

Languages of Instruction:
Deutsch

Merkmale:

Responsible instructor:	Bärbel Küster

Requirements:

Assessment:	Portfolio --- Der Leistungsnachweis besteht aus praxisorientierten Formaten wie Essay, Blog- oder Katalogeinträgen, Kurztexten (additiv), Interview mit Auswertung, Filmskript/ schnitt etc. (Gewichtung: praxisorientiertes Format 2/3 und Präsentation desselben 1/3): Details werden in der ersten Sitzung festgelegt.
Grading Scale:	1-6, Half Grades Given
Repeatability:	repeatable once, book again

Module European Civil Procedure
02SM90WM51EN / Lecture with Practical Exercises

Description:

General description:
In this course, we will discuss rules for cross-border litigation. A particular focus will be on the Lugano Convention that applies in the relationship between Switzerland, the EU, Iceland, and Norway.

ECTS: 6

Notes:
Further information will be made available on the website of Prof. Domej's chair.

Learning Outcome:
Students are familiar with issues arising in cross-border litigation, particular in the relationship between Switzerland, the EU, Iceland, and Norway. They are able to identify the relevant sources of law and to apply them to cases.

Target Groups:
Students of the MLaw programme.

Languages of Instruction:
Englisch

Module Introduction to Artificial Intelligence (L+E)
03SM22BI0018 / Lecture with Practical Exercises

Description:

General description:
Artificial Intelligence is not just an empty buzzword: it is a research area that can trace its origins back to the early decades of computing. This course will introduce the foundations of this broad field, as well as a selection of more recent topics and applications.

After an overview of mathematical prerequisites and key concepts in AI, the course will cover topics relating to problem solving, reasoning and planning, and reasoning under uncertainty. Later lectures will turn to the basics of natural language processing, supervised learning and deep learning.

ECTS: 6

Learning Outcome:
Students learn the theoretical and practical foundations of classical problems in artificial intelligence and their algorithmic solution. In particular, participants will obtain the necessary knowledge and skills to independently solve typical AI problems by selecting, implementing and evaluating standard algorithms from the AI literature.

Languages of Instruction:
English

Course Materials:	Will be announced in the course.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Alberto Bacchelli

Requirements:

Prior Knowledge:	Solid knowledge of foundational concepts in computer science (algorithms, complexity theory) and mathematics (formal proofs and basic concepts like sets, functions and relations, as well as some probability and statistics) are necessary for following the lecture. Good programming skills in Python are necessary for some of the exercises.
Assessment:	To pass the module, students need to obtain at least 50% of the total marks from the exercise sheets and they need to pass the final exam (8.06.2026, 14:00-16:00) which will take place onsite. For students who pass the module, the final grade will only be determined based on the final exam.
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Spring Semester)
Booking Deadline/Period:	from We 14.01.2026 10:00 to Tu 10.03.2026 24:00
Cancellation Deadline:	from We 14.01.2026 10:00 to Tu 10.03.2026 24:00

Module Miami Exchange Program
02SM120MC8W / Seminar

Description:

ECTS: 6

Notes:
Im Bachelor wird der Leistungsnachweis als Bachelorarbeit (6 ECTS Credits) und zusätzlich als Wahlmodul (6 ECTS Credits) anerkannt (gesamthaft 12 ECTS Credits). Es ist das ganze Exchange Seminar zu absolvieren (Teil in Zürich und Teil in Miami). Die Anrechnung der beiden Studienleistungen erfolgt im selben Semester.
Im Master wird der Leistungsnachweis als Masterarbeit anerkannt (12 ECTS Credits).

Merkmale:

Responsible instructor:	Andreas Kellerhals

Requirements:

Grading Scale:	1-6, Half Grades Given
Repeatability:	Can be repeated as necessary

Module BIO 207 Comparative Systematics and Evolution of Primates
07SMBIO207 / Course

Description:

General description:
The order Primates comprises many very diverse families, but also peculiar species with multiple unique adaptations, such as aye-ayes, tarsiers, gibbons, or humans. In this course, we will explore the adaptive radiation of living primates and the distinguishing traits of taxonomic groups and representative species. Morphological characteristics are set in relation to behavioural traits such as activity period, locomotion, diet, ranging patterns, social structure and life history. Complementing the lectures, short videos and skeletal material are shown. Following an introduction in comparative phylogenetic studies in R, we will investigate relationships between various traits and test hypotheses about primate and human evolution (code provided).

ECTS: 2

Notes:
Primate systematics and characteristics are taught by the primatologist Dr. Thomas Geissmann.
An optional excursion to the Zoo of Mulhouse will be offered on a Saturday in April.

Learning Outcome:
By the end of this course students should be able to:
-recognize typical primate taxa from pictures and skulls
-identify distinguishing traits of primate taxa groups
-interpret primate morphology, behaviour and life history traits within a comparative evolutionary framework
-test hypotheses using phylogenetic comparative analyses in R
-explain correlates of primate brain size evolution

Merkmale:

Responsible instructor:	Karin Isler

Requirements:

Prerequisites:	Basic knowledge in evolution, e.g. BIO 113 or BIO 115
Assessment:	Active participation, written exam in English.
Grading Scale:	1-6, Half Grades Given
Repeatability:	Can be repeated once

Module Computer Engineering and Software Systems (L)
03SM22BI0019 / Course

Description:

General description:
Computer systems have changed over the past three decades almost every aspect of our life: They manage traffic infrastructures as well as financial transactions, they provide entertainment and education, and they are hidden in many tiny, mobile devices in daily operations for homes, transport, and leisure. The Information and Communications Technology (ICT) age has arrived within our daily life. Thus, the society has to cope with such developments of digitization. However, besides communications and distributed systems being already taught in a different class, the underlying basis, especially the processing of information is performed typically at the hardware level in binary digits (bit of value zero or one).
Thus, while one pillar one of our ICT-based society is driven by programs, which assume a multitude of factors and experiences over the past 75 years, thesecond pillar of our ICT-based society is based on foundations of the Boolean logic to make such information's processing possible. Within part one of thislecture the understanding of these basics is provided for very basic gates, basic logic and math operations, computer arithmetic, combinatorial circuits, sequential circuits, computer architectures and organization, and computer components as well as their interactions, including inaccuracies, erroneous behavior, or processing delays. After providing these suitable grounds for the understanding of essential operational constraints, the next level of perception of technology leads to computers to interoperate, to synchronize, and to cooperate. Thus, there is the need to understand the basics of each of those systems in terms of systems software. An operating system with its kernel, library, and tools determines the fundamental basis upon which all application programs and software systems can reliably build on. Therefore, this lecture's part two covers the fundamental principles of operating systems,including the basic principles of inter-process communications, processes and threads, scheduling, and memory and resource management in modern multi-user and multi-tasking operating systems. It continues with coordination-based systems and examples of these.

ECTS: 6

Learning Outcome:
Our daily life will be contemplated and concrete impacts as well as influences of ICT technology will become possible and guided by key methodological computer design and operations knowledge. Thus, this lecture will teach computer arithmetic, combinatorial circuits, sequential circuits, computer architectures and organization extended by basic principles of modern operatingsystems.
Overall, students will be able to understand which performance restrictions computer hardware involve, how inaccuracies in computing may occur, which operations can be reliable, how basic system software functionality has to be designed and, which inter-operations of the Internet works.

Target Groups:
This lecture is targeted to students with an assessment level B.Sc. in Informatics or similar basic knowledge of computer science, programming, data structures, and algorithms. It is recommended for the exercises to know the basics of C/C++, while relevant introduction material for C/C++ programming is available.

Languages of Instruction:
English

Course Materials:	All teaching-related material will be introduced during the first class.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Burkhard Stiller

Requirements:

Prerequisites:	The lecture "Computer Engineering and Software Systems CESS" runs as a basic course on basically no specific technical requirements, however, basic mathematical and programming language skills help. Furthermore, the knowledge of "Communication Networks and Distributed Systems (CNDS)" is recommended.
Prior Knowledge:	The lecture of "Computer Networks and Distributed Systems" is recommended, but not required.
Assessment:	The examination of the module will take place on-site. Written examination as the final exam on date June 11, 2026, 8:00-10:00 hours.
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Spring Semester)

Module Seminar: Advanced Software Engineering (BSc)
03SM22BIS010 / Seminar

Description:

General description:
The software requires constant evolution due to changing customer needs, bugs that have to be fixed, or changes in the environment. Lehman's first law of software evolution states that a software system must be continuously adapted, or it becomes less and less useful. The constant change poses many challenges, and both researchers and practitioners have recognized the importance of studying and support software evolution and the humans involved in the process. In this seminar, we will cover some of the most relevant studies, approaches, and techniques that researchers have looked at in this context.
The students will work on a specific research topic in software engineering. By the end of the course, they will be asked to present a literature review on the chosen topic in the form of a report.
Furthermore, the students will take part in a simulated peer-reviewing process for the first version of the produced reports. Finally, they will share as a presentation the results of their work and discuss them with the class.

ECTS: 3

Notes:
For this course, you will be asked to read and discuss research papers, actively participate in class, as well as work and hand in a written proposal, a final written report and an oral presentation of a scientific topic in software engineering research.
The allocation of students to this seminar will be done through the department via the new module booking tool. If there is a shortage of seats, we will give preference to students that are majoring in informatics and have not yet attended a seminar and are already far in their studies. Please note that we cannot guarantee a spot.
More information on the process can be found on our website: https://www.ifi.uzh.ch/en/studies/seminar.html.
Application for this seminar is via the module booking tool: https://studentservices.uzh.ch/uzh/launchpad

Learning Outcome:
At the end of this course, students should be able to: find and identify relevant related work reflect on a topic and discuss it; critically analyze and reflect on research articles; review and summarize the current state of the art of the selected topic; reflect on possible future directions; provide constructive feedback on a research report.

Target Groups:
BSc students

Languages of Instruction:
English

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Harald Gall

Module Seminar: Human-Computer Interaction (BSc)
03SM22BIS011 / Seminar

Description:

General description:
This seminar will focus on selected areas in Human-Computer Interaction (HCI) research, such as Computer-Supported Cooperative Work (CSCW), Ubiquitous Computing, Information Visualization, Assistive Technology, smart homes, and health and wellness. The course materials will consist of current and seminal research papers in the field and represent various aspects of HCI, such as methods, design, applications, and studies

ECTS: 3

Notes:
The allocation of students to this seminar will be done through the department via the new module booking tool. If there is a shortage of seats, we will give preference to students that are majoring in informatics and have not yet attended a seminar and are already far in their studies. Please note that we cannot guarantee a spot.
More information on the process can be found on our website: https://www.ifi.uzh.ch/en/studies/seminar.html.
Application for this seminar is via the new module booking tool: https://studentservices.uzh.ch/uzh/launchpad

Learning Outcome:
The goal of this seminar is to gain an understanding of the broad field of HCI research, and learn what constitutes a scientific contribution within this field. Students will learn to analyze and discuss research from a critical perspective, with particular focus on the methods, design, findings, and contributions presented in scientific works.

Target Groups:
Recommended for students in the BSc program

Languages of Instruction:
English

Course Materials:	The readings for this class will consist of current and seminal classic scientific papers from the HCI literature and related areas. Specific topics for the term will be announced in the first meeting and are subject to change.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Elaine May Huang

Requirements:

Prerequisites:	A willingness to participate actively in class discussions of the socio- technical impacts of technology is highly recommended.
Prior Knowledge:	A good understanding of HCI fundamentals in regard to the design process, prototyping skills, and evaluation is strongly recommended. Students should have an understanding of how to apply basic usability principles and user research techniques for both formative and summative purposes.
Assessment:	- Moderation of 1-2 discussion sessions (1 class session each) including presentation of main themes and preparation of discussion topics (15%) - Response essays (1-3 pages each) for each reading assignment (50%) - Active participation in discussion sessions (35%)
Grading Scale:	1-6 Quarter Grades Given

Repeatability:	Can be repeated once

Module Seminar: Information Systems (BSc)
03SM22BIS012 / Seminar

Description:

General description:
This year's seminar will deal with the topic "Agentic AI". Students can either cover a topic through a systematic literature review or engage in an empirical or technical mini-study. Note that the extra effort in this seminar is compensated by 6 ECTS.

ECTS: 6

Notes:
The allocation of students to this seminar will be done through the department via the new module booking tool. If there is a shortage of seats, we will give preference to students that are majoring in informatics and have not yet attended a seminar and are already far in their studies. Please note that we cannot guarantee a spot.
More information on the process can be found on our website: https://www.ifi.uzh.ch/en/studies/seminar.html.
Application for this seminar is via the module booking tool: https://studentservices.uzh.ch/uzh/launchpad

Learning Outcome:
The students should learn to acquire knowledge on specific topics from scientific publications and to critically evaluate them.
They should continue to learn to apply this literary knowledge in a small scientific study.

Target Groups:
Recommended for students in the BSc program from 6th semester

Languages of Instruction:
English

Course Materials:	will be announced in the lecture
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Gerhard Schwabe

Requirements:

Assessment:	- Seminar paper (10 - 12 pages, acceptable preliminary and final version) 60% - Qualified feedback on two to three other papers (review) 20% - Continuous participation in the block seminar onsite (at the end of the semester) including presentation of the seminar paper onsite 20%
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Spring Semester)

Dates/Times/Deadlines:

Dates with mandatory attendance:
18.02.26 16:15 - 17:45 Topic assignment / KickOff Meeting
15.04.26 16:15 - 17:45 Introduction to scientific reviewing
22.05.26 8.30 - 18.30 Block seminar
23.05.26 8.30 - 18.30 Block seminar

Request period:	from Mi 14.01.2026 10:00 to So 01.02.2026 24:00
Place allocation at the latest:	Mi 11.02.2026 24:00

Module Seminar: Communication Systems (BSc)
03SM22BIS015 / Seminar

Description:

General description:
Communication systems provide today the infrastructure needed for a successful exchange of data and information. For this purpose, communication systems constitute a critical contributor to reliable and robust business operations, both for SMEs and large international corporations with multiple, geographically distant establishments.
This seminar sheds light on selected aspects of communication systems in terms of public telecommunication systems, mobile systems, and the Internet. Aspects of interest range from reliability, performance, security to usability of communication systems and will be defined according to very recent advances anddevelopments in that field.

ECTS: 3

Notes:
The allocation of students to this seminar will be done through the department via the new module booking tool. If there is a shortage of seats, we will give preference to students that are majoring in informatics and have not yet attended a seminar and are already far in their studies. Please note that we cannot guarantee a spot.
More information on the process can be found on our website: https://www.ifi.uzh.ch/en/studies/seminar.html.
Application for this seminar is via the module booking tool: https://studentservices.uzh.ch/uzh/launchpad

Learning Outcome:
The students have to show in this seminar that they are able to acquire relevant knowledge from scientific literature in order to address an assigned seminar topic in a sufficient manner. Compiled results need to be presented in a talk, and a pro-actively moderated discussion, including the defense of developed hypotheses, is expected. Each seminar covers a written seminar report that incorporates all relevant results.

Target Groups:
Recommended for students in the Bachelor program.

Languages of Instruction:
English

Course Materials:	All relevant literature as well as task descriptions will be handed out to the students at the first seminar date.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Burkhard Stiller

Requirements:

Prerequisites:	Interest in the area of communication systems is key.
Prior Knowledge:	The lecture "Computer Networks and Distributed Systems (CNDS)" is highly recommended, but not a strong requirement, as long as the student is able to adopt the respective understanding in a self-study manner.
Assessment:	Individual seminar talks of 35-40 minutes supported by presentation slides, followed by a moderated discussion of 45 minutes on the seminar topic handed-out at the start of term. Production of an individual, content-wise correct written seminar report, ready for publication, covering bibliographic references, and being

compliant with all formal requirements raised on the basis of the LaTeX template provided.

Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Spring Semester)
Request period:	from Mi 14.01.2026 10:00 to So 01.02.2026 24:00

Module Computer Graphics (L+E)
03SM22BMI007 / Lecture with Practical Exercises

Description:

General description:
Introduction to the fundamental concepts, algorithms, and data structures of interactive 3D computer graphics such as graphics systems, polygonal modeling, geometric transformations, illumination and shading, texturing, viewing in 3D, and visibility. Furthermore, we will cover some additional advanced topics such as physically based rendering, photorealistic rendering, e.g. using recursive ray-tracing and path-tracing, geometry and point cloud processing, and scientific visualization.

ECTS: 6

Notes:
This module is intended for students who are enrolled in an Informatics degree program at the Faculty of Business, Economics and Informatics. It can be credited towards either the Bachelor's or the Master's level.
(Please note that this module can be credited towards a degree onlyonce.)

Learning Outcome:
This course will teach the participating students the fundamental concepts of
3D image synthesis, covering not only basic interactive rendering but also more physically based rendering. The students will learn how real-time image formation as used in interactive 3D games, virtual reality simulation and scientific visualization applications is performed through the pipelined processes of perspective projection, visibility determination, illumination, rasterization and shading. A number of advanced techniques for improved physically based rendering and geometry processing will also be discussed.

Target Groups:
For BSc-Students (from 4th semester) and for MSc-Students.
Students who have completed the introductory computer science and math courses with a strong interest in harnessing computer power to generate convincing visual representations and interactive graphical applications.

Languages of Instruction:
English

Course Materials:	Literatur: - Interactive Computer Graphics: A top-down approach with shader-based OpenGL. by Edward Angel and David Shreiner, Addison-Wesley. 6th Edition, 2012. - Real-Time Rendering, Fourth Edition by Tomas Akenine-Möller, Eric Haines, Naty Hoffman, Angelo Pesce, Michał Iwanicki, and Sébastien Hillaire. CRC Press, 2018 Complete slide sets of lecture, additional supporting documents.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Renato Pajarola

Requirements:

Prerequisites:	Successful completion of introductory computer science, programming and math courses, plus experience with C/C++.
Prior Knowledge:	The prospective student should be knowledgeable in fundamental algorithms (i.e.

searching, recursive functions), data structures (i.e. arrays, linked lists, trees), basic euclidean geometry (i.e. planar trigonometry, points, line and plane representations, distances), linear algebra (i.e. vector and matrix operations) and mathematics.

Assessment:	In addition to the final exam, the course participants have to complete a number of computer graphics exercises and programming tasks, mostly using OpenGL. The course grade will be evaluated in a written final exam onsite on 8 June 2026, 14.00h. For further details please check the individual website.
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Module Mobile Communication Systems (L+E)
03SM22BMI008 / Lecture with Practical Exercises

Description:

General description:
Based on the basic knowledge on communication systems as well as distributed systems the specifics of communications in the wireless and mobile domain are addressed within this course.
Those include technical basics, media access schemes, and signals. In a more detailed view mobile and wireless telecommunication systems are discussed, which include GSM, UMTS, LTE, LTE-A, 5G, satellites, and radio. The wireless local area is addressed in terms of WLAN technology, Bluetooth, IoT, sensor networks, and security. The development of these systems into an Internet usageis shown by discussing Mobile IP as well as mobile transport protocols.

ECTS: 6

Notes:
The exercises are mandatory, are looked after by assistants, and will influence the grade of the final examination. This module is intended for students who are enrolled in an Informatics degree program at the Faculty of Business, Economics, and Informatics. It can be credited toward either the Bachelor's or the Master's level. Please note that this module can be credited toward a degree only once. A failed attempt will be credited towards the level at which the student is enrolled at that time.

Learning Outcome:
This lecture's goals encompass the gaining of knowledge of principles and protocols for wireless and mobile communications. While telecommunications and Internet aspects are of utmost importance, their integration and future needs are discussed. Thus, respective protocol details and technology aspects for mobile and wireless communications will be covered.

Target Groups:
Recommended for students in the BSc program and the MSc program.

Languages of Instruction:
English

Course Materials:	Literature as well as all teaching material will be announced in the first class.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Burkhard Stiller

Requirements:

Prerequisites:	The content of the lecture on "Computer Networks and Distributed Systems (CNDS" is essential, the lecture on "Computer Engineering and Systems Software (CESS)" is highly recommended.
Prior Knowledge:	Interest in mobile and wireless communications (telecommunications and the Internet) for public, private, and sensor networks.
Assessment:	Written exam on-site Wednesday, June 17, 2026, between 10.15 and 11.45 hours. In case of small attendance, an oral exam may take place. The exercises are mandatory and will influence the grade of the final exam.
Grading Scale:	1-6 Quarter Grades Given

Module Personal Branding Applications (S)
03SM22BO0063 / Seminar

Description:

General description:
In this course, we'll focus on personal branding through internet and social media tools. Personal branding is an important tool for individuals, jobseekersand young startup companies to define, communicate and sell their strongest attributes and uniqueness to a target audience. Becoming a brand on social media seems to be an important first step today to become a thought leader in one specific field.
This seminar is a follow-up course to the Personal Branding and Digital Marketing class offered each fall and offers a highly specialized setting for asmaller number of students to work and improve their personal brands. The focusof this seminar is on the marketing, the creativity and branding perspectives, not on legal or funding topics. By the end of the seminar, students should havea digital marketing toolbox of ideas on how to further improve their personal brands.

ECTS: 3

Notes:
This seminar is limited to 8 students.
Application for this seminar is via the module booking tool: https://studentservices.uzh.ch/uzh/launchpad. Please upload: a) Motivation letter, b) Presentation of the state of the art of your brand, and c) Expected achievements as of January 2026 (draft).
For detailed information, please download the seminar syllabus on our website.
Contact: market-research@business.uzh.ch

Learning Outcome:
1. In this course, we profoundly analyze the status-quo of student's personal brands.
2. Using a new ideation tool, students will collaborately develop ideas for each brand.
3. Based on the feedback, students have the chance to improve the marketability of the brand, and/or get ready for a launch.

Target Groups:
BA-students, who participated in the class Personal Branding and Digital Marketing

Languages of Instruction:
English

Course Materials:	To be announced.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	René Algesheimer

Requirements:

Prerequisites:	- Successful participation in the Personal Branding and Digital Marketing class. - Students need to have a personal brand developed and have access to all required digital platforms.
Prior Knowledge:	This class is for students who took the Personal Branding and Digital Marketing lecture in the Fall semester.

Assessment:	The assessment for this module takes place on-site and is based on the following: - Final Powerpoint discussing a three-step brand development process (50%); - Final report on discussant brand (30%); - In-class participation (20%).
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Spring Semester)

Module R - a non-technical introduction with applications to Marketing (L+E)
03SM22BO0065 / Lecture with Practical Exercises

Description:

General description:
People that use data analytics often spend more than 80% of their time with collecting, cleaning, and organizing data and only 20% with applying statistical models. This is not only true for real world analytics, but also for data analyses within bachelor or master theses.
This class will prepare you for those challenges by applying a non- technical approach. This means that we start every unit with "real-world" questions and explain key programming concepts "on the way" while discussing the solutions to these questions.
This class is a lecture with integrated exercises. For every session, you will need your own laptop with the latest R version installed. We do not require anyexperience with R, as we start from the very beginning

ECTS: 3

Notes:
This course will be held on-site with digital elements. Students must bring a laptop (iPads and other tablets are not permissible) with R (https://cran.r-project.org/) & R-Studio (https://rstudio.com/ rstudio.com/)installed (latest version).
Contact: market-research@business.uzh.ch

Learning Outcome:
Presenting data management and munging techniques that "scale well",
i.e., that are applicable to datasets which are usually observed in real- world settings (1 to 100 GB). These include loading external data (from text files, Excel files, databases); manipulating data (merging, aggregating, and selecting observations) and simplifying complex and repetitive data munging tasks (writing loops and conditional statements).

Target Groups:
Bachelor Students

Languages of Instruction:
English

Course Materials:	Crawley, M. J. (2015). The R Book. Chichester, Wiley.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	René Algesheimer

Requirements:

Prerequisites:	You must have a laptop with the latest version of the applicable operating system installed. Please remember to bring your charger.
Assessment:	The following components comprise the final grade: 1. Daily coding exercises (days 1-5) (30%): on-site assessments (computer-based, BYOD format; bring a charger) 2. Final exam on 13.02.2026 (50%): on-site, written examination, multiple choice format 3. Online exercises to be completed after the course (20%)

Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Module Verhandlungstheorie und -praxis (S) (Negotiations and Conflict Resolution: Theory and Role Playing)
03SM22BO0066 / Seminar

Description:

General description:
Die Veranstaltung verfolgt im Wesentlichen zwei aufeinander aufbauende Ziele:
1. Theoretische Erkenntnisse über Verhandlungssituationen und deren Rationalität und Probleme erarbeiten;
2. Anhand von Rollenspielen das erlernte Wissen in die Praxis umsetzen.

ECTS: 3

Notes:
Begrenzte Teilnehmerzahl: 24
Die Teilnehmerzahl ist auf 24 beschränkt. Bewerbungsschreiben, eine Kopie des aktuellsten Leistungsausweises sowie den aktuellen Ausdruck der Online-Modulübersicht bis 13.01.2026 ans Team Verhandlungsseminar (vhs@business.uzh.ch).
Bescheid über Aufnahme wird bis 30.01.2026 versandt. Die Kosten von ca. Fr. 250.- bis 300.- für die Unterkunft, Verpflegung und Pflichtlektüre müssen von den Teilnehmern selbst getragen werden.
Syllabus hinterlegt mit Link: https://www.business.uzh.ch/de/research/professorships/emap(www.business.uzh.ch/de/research/professorships/emap/teaching/courses/Spring-Term-2026/negotiations.html)

Learning Outcome:
1. Die Studierenden können die Rationalitäten und Probleme von Verhandlungssituationen in Theorie und Praxis nennen und erklären.
2. Die Studierenden können das erlernte Wissen in Verhandlungssituationen gezielt anwenden.

Target Groups:
Studierende des Bachelor-Studiengangs

Languages of Instruction:
Deutsch

Course Materials:

Pflichtlektüre: Bazermann, Max H.; Neale, Margaret A. (1992): Negotiating Rationally. New York: The Free Press.

Weiterführende Literatur:

Module Behavioral Economics (L) (Verhaltensökonomie)
03SM22BO0067 / Course

Description:

General description:
Behavioral economics departs from the neoclassical model of Homo Oeconomicus by accounting for irrational behavior and non-selfish motivations. This course introduces key models and empirical findings in behavioral economics. Topics include heuristics and biases, reference-dependent preferences, present-biased preferences, and social preferences. The lectures also explore implications of behavioral insights for public policy and the private sector.

ECTS: 3

Notes:
The lecture will not be recorded / no podcast.

Learning Outcome:
Students understand important models and empirical findings in behavioral economics. Students can critically assess models and methods in economics and their application to real economic problems.

Languages of Instruction:
English

Course Materials:	The literature covered will be announced at the beginning of the semester. Lecture slides will be provided via OLAT.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Björn Bartling

Requirements:

Prerequisites:	Students should have covered the material from Microeconomics I and Microeconomics II.
Prior Knowledge:	No formal requirements, but good microeconomic knowledge (material from Microeconomics I and Microeconomics II) is assumed.
Assessment:	The examination of the module will take place onsite. Written examination on 12.06.2026, 8.15 - 9.45 AM (The final exam lasts 90 minutes).
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

03SM22BO0068 / Course

Description:

General description:
Allgemeine Beschreibung: Die Finanzkrisen, die Finanzinstabilität sowie das Credit Suisse-Debakel von 2023 haben zu vielfältigen Anschuldigungen gegen Banken, Finanzaufsichtsbehörden und Zentralbanken, aber auch gegenüber Vertretern: innen der Wirtschaftswissenschaften geführt. Letzteren wird vorgeworfen, sie hätten sich zu wenig mit den Ursachen und Folgen der Finanzkrise von 2007/08 befasst. Die vorliegende Veranstaltung will der Frage nachgehen, wer welche Verantwortung für die Stabilität der Finanzmärkte in Zukunft zu tragen hat. Diese Fragestellung wird aus mehreren wissenschaftlichen Disziplinen (Banking, Finance, Psychologie, Recht, Ethik, Ethnologie) beleuchtet werden. Neben den zwei leitenden Referenten: innen werden auch Gastreferenten: innen aus Wissenschaft und Praxis zu Wort kommen und den Gedankenaustausch bereichern.

Module Gender Economics (L)
03SM22BO0070 / Course

Description:

General description:
Why do women earn less than men? What causes gender segregation in occupations? What determines gender differences in preferences? This course aims to delve into these topics to understand the many ways that gender is relevant in the economy. We will do an overview of the state-of-the-art literature on gender economics, largely building upon empirical studies. We will also analyze policy interventions and potential solutions. The geographical focus is mainly on the labor markets of developed economies.
We will cover topics such as gender differences in labor market outcomes and education, family (children, fertility, contraception, abortion..), the historical roots of gender norms, gender bias and discrimination, parental leave policies, gender quotas, among others.

ECTS: 3

Notes:
The lecture will not be recorded. No podcast.

Learning Outcome:
- Understand the many ways gender matters in the economy.
- Learn about the determinants of gender differences.
- Increase knowledge and familiarity with empirical studies.
- Develop the skills to think carefully about policy interventions.
- Increase their ability to effectively communicate academic economic content to expert and inexpert audiences: academia, government, business...

Target Groups:
BA-students

Languages of Instruction:
English

Module Introduction to Health Economics (L)
03SM22BO0071 / Course

Description:

General description:
This course provides an introduction to economic analysis in health and health care. Topics covered include demand for health and health care, the physician-patient relationship, demand for health insurance, equity in access to and financing of health care, among other topics. Moreover, health is impacted by behaviors and by social and environmental conditions - factors thatcan be impacted via social policies. To effectively develop social policies, itis crucial to understand the causal mechanisms driving these factors. We will discuss fetal origins, the impact of air pollution on health, causes and consequences of mental illness, the impact of income on health, COVID-19, etc.
In terms of methodology, the course will combine concepts from theoretical microeconomics and empirical studies.

ECTS: 3

Notes:
The lecture will not be recorded. No podcast.

Learning Outcome:
The broadly goals of this course are to:

- Make students familiar with applying economic theory, economic reasoning, and economic analysis to the fields of health and health care
- Increase knowledge and familiarity with empirical studies in health economics
- Develop the skills to carefully think and assess policy interventions
- Improve ability to communicate economic content to expert and inexpert audiences (academia, government, business..)

Module Rechnungslegung nach IFRS: Vertiefung anhand ausgewählter Themen (V) - IFRS – in-depth analysis of selected
03SM22BO0074 / Course

Description:

General description:
Neben den konzeptionellen Grundlagen der IFRS Rechnungslegung vermittelt dieses Modul Kenntnisse zu wichtigen Bilanzierungsthemen nach IFRS. Die Inhalte umfassen:

- Bestandteile von IFRS Abschlüssen
- Ansatz, Ausweis und Bewertung in der Bilanz
- Aufstellung der Gesamtergebnisrechnung einschliesslich Ertragsrealisierung
- Eigenkapitalveränderungsrechnung

ECTS: 3

Notes:
Dieses Modul findet vor Ort statt. Es wird ein Podcast angeboten.
95% Prüfungspunkte und 5% Attendance-Points

Learning Outcome:
Die Studierenden kennen die verschiedenen Bestandteile eines IFRS Abschlusses und sind in der Lage, ausgewählte Bilanzierungsfragen selbständig zu lösen. Im Rahmen der Vorlesung werden ausgewählte Mini Cases betrachtet.

Target Groups:
BA-Studierende

Languages of Instruction:
Deutsch

Module Seminar "Governance"
03SM22BO0076 / Seminar

Description:

General description:
Das Ziel des Seminars ist es, die Kenntnisse im Bereich «Governance» zu erweitern. Die Studierenden werden selbstständig einen wissenschaftlichen Artikel bearbeiten und diesen präsentieren. Zudem werden die Erkenntnisse aus dem Seminar mit einem praktischen «Fall»verknüpft. Ein ausgewähltes Fallbeispiel wird in einem fiktiven «offenen Brief» schriftlich festgehalten, im Rahmen des Korreferatspräsentiert und im Plenum diskutiert.

ECTS: 3

Notes:
Dieses Modul findet vor Ort statt.
Die Teilnehmerzahl ist beschränkt. Neben der Modulbuchung ist eine zusätzliche Anmeldung am Lehrstuhl erforderlich. Senden Sie dazu bitte via Email ein Schreiben, in dem Sie Ihr Teilnahmeinteresse begründen (max. 1 Seite) sowie eine Übersicht über die von Ihnen besuchten Lehrveranstaltungen an Norina Furrer - norina.furrer@business.uzh.ch.
Studierende, welche die Vorlesung "Governance" besucht haben, werden bei der Anmeldung prioritär behandelt.
Die Anmeldefrist endet spätestens am
31.1.2026.

Learning Outcome:
Selbständiges Bearbeiten, Präsentieren und Kommentieren einer ausgewählten wissenschaftlichen Publikation im Bereich Governance.

Target Groups:
Studierende, die an der Governance-Thematik interessiert sind.

Languages of Instruction:
Deutsch

Merkmale:

Responsible instructor:	Egon Franck

Requirements:

Prerequisites:	Zulassung zum Bachelorstudium.
Prior Knowledge:	Vorlesung "Governance", welche jeweils im Herbstsemester stattfindet.
Assessment:	Präsentation, Korreferat, schriftlicher Leistungsnachweis (offener Brief) sowie aktive Teilnahme an der Diskussion. Der Leistungsnachweis findet vor Ort statt. Anwesenheit gilt als Voraussetzung. Bitte beachten Sie, dass dieses Seminar voraussichtlich im FS26 zum letzten Mal angeboten wird und somit nicht wiederholt werden kann.
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Module Unternehmensbewertung und M&A (L+E) (Valuation of the firm and M&A)
03SM22BO0078 / Lecture with Practical Exercises

Description:

General description:
Das Modul umfasst die Behandlung der wichtigsten Techniken zur Unternehmensbewertung, die Besprechung von Anwendungsfällen der Unternehmensbewertung in der Praxis und selbständiges Lösen von Fallstudien. Zusätzlich zur Bewertung von klassischen Industrie Unternehmen wird auch die Bewertung von öffentlichen Firmen und Banken behandelt. Des weiteren werden gewisse Spezialthemen wie Private Equity oder Venture Capital besprochen und eine Einführung in die Thematik M&A gegeben.

ECTS: 3

Notes:
Dieses Modul findet vor Ort statt. Die Vorlesung wird aufgezeichnet. Materialien werden online über OLAT zur Verfügung gestellt.

Learning Outcome:
- Beherrschung der Techniken und Methoden zur Unternehmensbewertung
- Besonderheiten und Schwierigkeiten bei der Bewertung von öffentlichen Unternehmen oder Banken kennen
- Erlangen von Grundkenntnissen im Bereich M&A

Target Groups:
Studierende des Bachelor-Studiums

Languages of Instruction:
Deutsch. Teils englischsprachige Literatur.

Course Materials:	Ergänzende Literatur: Valuation: Measuring and Managing the Value of Companies (Wiley Finance) (Englisch) 8. Auflage Volkart, R. & Wagner, A.: Corporate Finance: Grundlagen von Finanzierungund Investition, 6. überarbeitete und aktualisierte Auflage, Versus Verlag, Zürich 2014
Merkmale:	Target Group: Open to School Students
Responsible instructor:	Michel Habib

Requirements:

Prior Knowledge:	Besuch der Bachelor-Vorlesung Corporate Finance wird empfohlen. Wer diese Voraussetzungen nicht erfüllt, belegt die Veranstaltung auf eigene Verantwortung und muss für den erfolgreichen Besuch eventuell mit einem höheren Anteil an Eigenleistung rechnen.
Assessment:	Abgabe von Einzelübungen und Bestehen der schriftlichen Prüfung am 23. Juni 2026,10:00 - 12:00 Uhr. Die Prüfung findet als Bring Your Own Device (BYOD) Onlineprüfung vor Ort statt. Um die Prüfung absolvieren zu können, müssen Sie Ihren eigenen Laptop (Windows oder MacOS) mitbringen. Die Prüfung kann nicht auf Tablets absolviert werden. Ausserdem ist eine Online-Prüfungsaufsicht (Proctoring) möglich und wird

mit Buchung des Moduls zugestimmt. Für die Teilnahme an der Prüfung muss eine Probeprüfung mit Ihrer individuellen technischen Ausrüstung absolviert werden. Genaue Informationen zur Probeprüfung und sonstigen Details erhalten Sie im Laufe des Semesters. Die Probeprüfung findet im Verlauf des Semesters statt.

Module Pioneering Economics: The Department of Economics at UZH (L)
03SM22BO0079 / Course

Description:

General description:
What does economic research study? What are the tools used by economists? What have we learnt from economics in recent years? And what do your professors at UZH spend a lot of their time doing?
This course provides a bridge between BA courses and frontier economic research. Each week a professor from the department will present a research topic that they have worked on. The course will address questions such as: Are trade agreements good or bad for you? What have decades of randomized control trials in developing countries taught us? What can we learn from history? What are the economic consequences of trade with China on American and European labor markets? Is innovation the solution to climate change? etc.

ECTS: 3

Notes:
No podcast.

Target Groups:
BA students

Languages of Instruction:
English

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Maya Eden

Requirements:

Assessment:	written exam 22.6.2026, 2.15 -3.15 PM (60 min). The examination of the module is carried out onsite.

Module Behavioral Macroeconomics (V)
03SM22BO0080 / Course

Description:

General description:
Aufbauend auf den Kenntnissen, die in den Vorlesungen Makro I und Makro II erworben wurden, geht es in dieser Vorlesung darum, die Grundannahmen der rationalen Erwartungen "aufzuweichen" und psychologische Einflussfaktoren, die zum Beispiel auf dem Arbeitsmarkt wie auch Geld- und Kapitalmarkt eine Rolle spielen könnten, näher zu bestimmen sowie deren Auswirkungen zu diskutieren.
Der Schwerpunkt wird vor allem auf Forschungspapiere aus dem Bereich Behavioral Economics/Macroeconomics gelegt.

ECTS: 3

Notes:
Kein Podcast

Learning Outcome:
In dieser Vorlesung werden den Studierenden die Grundlagen der Behavioral Macroeconomics vermittelt. Dabei werden makroökonomische Phänomene, die mit den klassischen Modellen nicht oder nur ungenügend zu erklären sind, aus der Perspektive der Behavioral Macroeconomics betrachtet.

Target Groups:
Bachelor

Languages of Instruction:
Deutsch- und Englischkenntnisse notwendig

Course Materials:	Die Unterlagen werden in OLAT zur Verfügung gestellt.
Merkmale:	
Responsible instructor:	Thorsten Hens

Requirements:

Prerequisites:	Stoff der Vorlesungen Makro I+II
Prior Knowledge:	Makro I+II
Assessment:	Die Prüfung zum Modul findet am Donnerstag, 18.06.2026 zwischen 10:15-12:00 als Bring Your Own Device (BYOD) Onlineprüfung vor Ort statt, 60 mins.

Module Corporate Entrepreneurship (S)
03SM22BO0083 / Seminar

Description:

General description:
Corporate entrepreneurship refers to entrepreneurial activity that occurs in established firms, which compete in technologically sophisticated markets and search for entrepreneurial opportunities.
Innovation constitutes a major foundation for the discovery and exploitation of opportunities in those firms. Opportunities typically arise from market conditions and the firm's internal capabilities, resources and skills. In their search for opportunities, corporate entrepreneurs frequently explore technological frontiers within and outside a firm's current business domain. The seminar will focus particularly on corporate venturing, strategic renewal, and innovation, with an emphasis on how firms get access to knowledge from external sources that can be combined with internal capabilities. In the seminar, students will present and discuss selected academic journal articles on the topic.

ECTS: 3

Notes:
The seminar is limited to a maximum of 36 students. Beyond normal booking (Modulebooking), a second application to the chair is necessary by February, 1, 2026 by e-mail: entrepreneurship@business.uzh.ch.
It is not allowed to attend the seminar without confirmation from the chair, as there will be a waitinglist. The papers will be randomly assigned to groups of two in the introductory session. If you have any preferences with respect to the person you want to work with, please let us know his/her name in your e-mail.
The seminar will be held on site.

Learning Outcome:
By completing the module, students should have acquired knowledge about the importance and characteristics of corporate entrepreneurship, including issues related to corporate venturing, strategic renewal, and innovation. Moreover, students should have developed skills in analysing and presenting an academic paper as well as in participating in a scientific discussion.

Target Groups:
This seminar targets students from Business Administration. It is also recommended (but not required) for students who have attended or are planning to attend the lecture 'A Primer in Entrepreneurship'.

Languages of Instruction:
English

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Ulrich Kaiser

Requirements:

Assessment:	To obtain the credit points, the following requirements have to be fulfilled: presentation (40%), a discussion (20%), a summary (30%), oral participation (10%)
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Irregular)
Dates/Times/Deadlines:	March 24, 2026 and April 20-21, 2026; The seminar will be held on site.

Module Introduction to Strategic Management (L+E)
03SM22BO0084 / Lecture with Practical Exercises

Description:

General description:
The course introduces the concepts, tools, and principles of strategic management. The course is emphasizing the distinctive perspective of the general manager that has to be attuned to forces in the organization's environment and within the organization that shape firm performance. Topics discussed during the course include understanding the firm's internal and external environment, competitive positioning, creating and maintaining competitive advantage, strategy formulation, and strategy implementation. In addition to the lectures, students will be able to practically apply theoretical frameworks learned in a business simulation.

ECTS: 6

Learning Outcome:
After the course students should (1) know the main concepts of strategic management in multinational enterprises, (2) be able to apply the most common frameworks and tools of strategic management in multinational enterprises, and (3) have a basic understanding of how to think and act strategically in international contexts

Target Groups:
Bachelor level students

Languages of Instruction:
English

Course Materials:	Textbook, lecture slides
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Thomas Keil

Requirements:

Prior Knowledge:	Contents of the assessment level
Assessment:	The grading is based on the final exam and participation in guest lectures and in the mandatory simulation game. The exam will be based on all the lectures and the textbook. To pass the course, students need to reach at least 50% of the total points in the final exam before any bonus is applied. Students who have attended all guest speaker lectures will receive 5% bonus points in the final exam, provided that they pass the final exam. Students can moreover receive up to 5% extra points in the final exam based on their performance in the simulation game. This is also conditional on passing the final exam. The exam of the module will take place as a Bring Your Own Device (BYOD) online exam on site on 18.06.2026 from 10:00-12:00. To take the exam, you must bring your own laptop (Windows or macOS). The exam cannot be taken on tablets. To take the exam, you must install the Safe Exam Browser (SEB) in advance and take a mandatory mock exam using your individual technical equipment. Exact information on the required SEB version and other details will be provided to you during the semester. The mandatory mock exam will be on 11.06.2026 during the day between

07:00 to
19:00. Completion of the mock exam is mandatory. Students who have not completed the mandatory mock exam will not be admitted to the final exam and fail the course.

Module Emerging Market Finance (S)
03SM22BO0086 / Seminar

Description:

General description:
Emerging economies represent about half of the global GDP. More and more emerging market assets are being added to globally diversified portfolios. This seminar will focus on how to analyze emerging markets from an investment perspective. We will look at different fundamental economic drivers and asset classes (e.g. bonds, currencies, equities).

ECTS: 3

Notes:
The number of participants is limited (30). Please find more information about the application process on the website of the Department of Finance: https://www.df.uzh.ch/en/studies/bachelor-master/bachelor/ba-seminars.html#Bachelor:_Emerging_Market_Finance
An initial selection of participants is made according to professional criteria, followed by a lottery. The order of registrations does not matter. If you have any questions, please contact teaching@df.uzh.ch.

Learning Outcome:
To know and understand the fundamentals used to analyze and evaluate investments in emerging markets.

Target Groups:
Advanced bachelor students.

Languages of Instruction:
Englisch

Course Materials:	Slides and course materials to be downloaded from OLAT.
Merkmale:	Target Group: Suitable for English Speakers

Module Emotions in Organizations (S)
03SM22BO0087 / Seminar

Description:

General description:
Students will discover the important role of emotions in organizations. We study individual emotions, as well as shared emotions at the group-level and at the organizational level, and we will relate these experience to important outcomes for he workplace. The seminar will begin with an interactive session before the regular lecture period to kick off the seminar, learn about the basics of emotions research, and then split up in student groups that will prepare deep dive presentations into specific topics in emotions research. After that first session, the student groups will independently work on their presentations. Once they have done some initial work, we will have a session where the students will receive coaching on their presentations. Afterwards, student groups will independently finalize their presentations. Then, there will be four sessions during which the students will deliver their presentations.
We finish with a reflection on the learnings.

ECTS: 3

Notes:
Participation in this seminar is limited. To apply for this seminar, please send an e-mail to Maria Diaz at maria.diaz@business.uzh.ch. In your e-mail, please include one PDF with the following parts: (a) a one-paragraph statement of your research interests (b) your CV, and (c) an indication of whether you wish to contribute a working paper of your own to our reading list (if so, please submit a draft of the paper if it is available). Please submit your materials before January 23, 2026. We will confirm the receipt of your e-mail and announce the list of participants by January 28, 2026.

Max. Number of participants: 28

If you have not received confirmation of participation from Maria Diaz Macias for the seminar, you cannot participate in the seminar even if you have booked it.

Learning Outcome:
1. Develop a basic understanding of how emotions affect organizationally relevant outcomes
2. Be able to read and present original research on emotions and moods, and to critically evaluate such research
3. Transfer and apply the insights gained from the readings and in class to practically improve the workplace

Module Neuproduktmarketing (VU) (New Product Marketing)
03SM22BO0088 / Lecture with Practical Exercises

Description:

General description:
Die Studierenden erhalten durch das Modul "Neuproduktmarketing" eine Einführung in die Marketingperspektive des Neuproduktmanagements sowie in den Methodenapparat zur Unterstützung von Neuproduktentscheidungen. Es wird auf die Rolle und Aufgaben der Marketingfunktion bei der Neuproduktentwicklung eingegangen. Es werden Teamkoordinations- und Planungstools sowie Entscheidungskonzepte im Bereich Neuproduktentwicklung vorgestellt.
"Neuproduktmarketing" umfasst u.a. Methoden wie Diffusionsmodelle, Checklisten oder Markttests. Es wird insbesondere auch auf Test- und Marktforschungsmethoden wie z.B. "Information Acceleration" im Bereich Neuproduktplanung eingegangen. Das Modul Neuproduktmarketing thematisiert auch Besonderheiten der Marketingplanung bei Start-ups. Die Blockveranstaltung beinhaltet auch Übungseinheiten, die Ihre aktive Mitarbeit erfordern.

ECTS: 3

Notes:
- Die Anmeldung für diese Lehrveranstaltung erfolgt über das UZH Modulbuchungstool.
- Räume und Uhrzeiten werden einige Tage vor Kursbeginn auf der Lehrstuhl Website publiziert (siehe Lehrstuhl für Marketing, Prof. Natter - Education, Courses https://tiny.uzh.ch/XK).
- Weitere Informationen werden auf OLAT zur Verfügung gestellt.
- Es besteht die Möglichkeit online Fragen zu stellen und zu diskutieren.
- Podcast wird nachträglich zur Verfügung gestellt.
- Kontaktperson für Fragen zur Lehrveranstaltung: Herr Nils Hossli (nils.hossli@business.uzh.ch)

Learning Outcome:
Die Studierenden sollen einen Überblick über die Rolle der Marketingfunktion bei der Neuproduktentwicklung erhalten. Sie sollen ein fundiertes Wissen über die Methoden zur Unterstützung von Neuproduktentscheidungen sowie zur Konzeption, Bewertung und Vermarktung von Neuprodukten erlernen.

Module Global Policy Analysis: Poverty, Development, Growth (L+E)
03SM22BO0093 / Lecture with Practical Exercises

Description:

General description:
This course has two primary objectives: First, it provides students with a solid overview of what we know about key topics of global development, such as the trends in poverty around the world, inequality, access to education and healthcare, international migration, world hunger and population growth. Second, it equips students with tools to critically assess statistical claims and analysis about these issues of global development, by providing an introduction to commonly used empirical methods. In other words: how to spot when someone lies with data? Students will have some opportunities to try out these methods themselves in a hands-on way.

ECTS: 6

Notes:
The lecture will take place on site with simultaneous livestream via Zoom (but without recording or podcast afterwards).
The tutorial will be recorded/podcast available afterwards.

Description:

General description:
Die Vorlesung beschäftigt sich mit der Rolle der Multinationalen Unternehmen (MNU) in einer globalisierten Wirtschaft. Im Spannungsfeld zwischen Gewinninteresse und Corporate Social Responsibility werden theoretische Perspektiven und praktische Handlungsoptionen thematisiert.

ECTS: 6

Learning Outcome:
Verständnis der Globalisierungsproblematik und deren Folgen für Unternehmen, Wirtschaft und Politik.

Target Groups:
Studierende der Bachelorstufe

Languages of Instruction:
Deutsch, Englischkenntnisse

Course Materials:	Vorlesungsreader, Folien, weitere Literaturhinweise
Merkmale:	Target Group: Open to School Students
Responsible instructor:	Andreas Scherer

Requirements:

Assessment:	Die Prüfung zum Modul findet vor Ort statt. Schriftliche Prüfung am Montag, 08.06.2026, 14:00-15:45.
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Module Industrieökonomik (V+Ü) (Industrial Economics)
03SM22BO0098 / Lecture with Practical Exercises

Description:

General description:
Einführung in die Theorie der unvollkommenen Märkte mit Anwendungen auf Wettbewerbspolitik und Produktmarktregulierung.

ECTS: 6

Notes:
Einige Übungstermine können auch für Vorlesungen verwendet werden (und umgekehrt).
Vorlesung & Übung werden nicht aufgezeichnet.

Learning Outcome:
Verständnis für die strategische Interaktion in unvollkommenen Märkten.
Verständnis der ökonomischen Grundlagen von Wettbewerbspolitik und Regulierung.

Target Groups:
Studierende im Bachelor. Insbesondere Studierende mit VWL Vertiefung. Aber auch sonstige Wirtschaftsstudierende, die sich für die Materie der Wettbewerbspolitik und Marktregulierung interessieren.

Languages of Instruction:
Deutsch

Course Materials:	Die Unterrichtsmaterialien werden auf OLAT zur Verfügung gestellt.
Merkmale:	
Responsible instructor:	Armin Schmutzler

Requirements:

Prior Knowledge:	Inhalt von Mikroökonomik I (Assessment) Mikroökonomik II (Bachelor)
Assessment:	Schriftliche Prüfung am: 9.06.2026, 8.15-9.45 Uhr (90 min). Die Prüfung zum Modul findet vor Ort statt.

Module Organisation und Führung (V) (Organisation & Management)
03SM22BO0100 / Course

Description:

General description:
Die Vorlesung behandelt grundlegende Aspekte der Unternehmensführung vor dem Hintergrund einer organisationstheoretischen Betrachtung betrieblicher Zusammenhänge. Unter anderem werden Asatzpunkte einer Professionalisierung der Führungspraxis, die Handhabung von Entscheidungsproblemen sowie das weite Feld des Strategischen thematisiert. Überdies wird die Unternehmensführung als evolutionäre Führungskonzeption diskutiert, die systematisch von der Offenheit der Zukunft ausgeht. Der dadurch vermittelte, differenzierte Blick soll letztlich zu einem besseren Verständnis der Unternehmenspraxis verhelfen. Die Veranstaltung orientiert sich dabei an dem Lehrbuch Kirsch/Seidl/van Aaken "Unternehmensführung" (Stuttgart: Schäffer-Poeschel, 2009).

ECTS: 3

Notes:
Es werden ein Livestream und ein Podcast zur Verfügung gestellt.

Learning Outcome:
- Fundiertes Verständnis organisationaler Grundlagen der Unternehmensführung (darunter u.a. Entwicklung eines Bezugsrahmens für die Bedeutung von Führung, Grundlegendes zum Entscheidungsverhalten, differenzierte Betrachtung des Strategischen)
- Kenntnis des Konzepts der offenen Zukunft als Ausgangspunkt einer evolutionären Führungslehre
- Einsicht in eine Vielzahl wissenschaftlicher Disziplinen und deren Implikationen auf die Unternehmenspraxis

Target Groups:
Bachelor-Studierende

Languages of Instruction:
Deutsch

Course Materials:	Kirsch/Seidl/van Aaken "Unternehmensführung" (Stuttgart: Schäffer- Poeschel, 2009). Siehe "Links" für die Verfügbarkeit der Pflichtlektüre in den Bibliotheken des Rechercheportals. Sonstige Unterlagen werden auf OLAT zur Verfügung gestellt.

Module Einführung in qualitative Forschungsmethoden (S)
03SM22BO0101 / Seminar

Description:

General description:
Das Seminar "Einführung in qualitative Forschungsmethoden" bietet Bachelorstudierenden einen Einblick in die Methoden der qualitativen Sozialforschung. Der Fokus liegt dabei auf Methoden der Management- und Organisationsforschung. Die Struktur des Kurses orientiert sich am Aufbau eines qualitativen Forschungsprojekts. Der Kurs setzt sich zusammen aus abwechselnden theoretischen, praktischen und reflexiven Elementen: Im Theorieteil lernen die Studierenden, wie ein qualitatives Forschungsprojekt aufgesetzt und durchgeführt wird, aus welchen Elementen es grundsätzlich besteht und wie konkret qualitative Daten erhoben und ausgewertet werden können. Illustriert wird der Inhalt durch Beispiele, wie die verschiedenen qualitativen Forschungsansätze in Forschung und Praxis angewendet werden. Im Praxisteil wenden die Studierenden das Gelernte direkt an, indem sie bspw. qualitative Interviews durchführen und die erhobenen Daten auswerten. Im Reflexionsteil werden die praktischen Erfahrungen gemeinsam mit den Dozierenden sowie in studentischen Gruppen reflektiert. In allen Sitzungen finden Übungen statt, welche die Inhalte greifbarer machen und dadurch das Verständnis erleichtern. Im Verlauf des Seminars führen die Studierenden ein kleines Forschungsprojekt durch, sodass sie das Erlernte nicht nur während der Seminareinheiten direkt üben, sondern zusätzlich im Hinblick auf eine konkrete Fragestellung anwenden. Die Studierenden erhalten dadurch neben den gewonnenen methodischen Kompetenzen Einblicke in das Projektmanagement und die dazugehörigen Soft Skills. Um genügend Zeit und Raum für das komplementäre theorie- und praxisorientierte Erlernen qualitativer Forschungsmethoden, Diskussionen und Feedbacks zu bieten, ist die Teilnehmerzahl begrenzt.

ECTS: 6

Notes:
Die Bewerbung für dieses Seminar erfolgt über das Modulbuchungstool via: https://studentservices.uzh.ch/uzh/launchpad
Sie können sich bis zum 1. Februar um eine Teilnahme am Kurs bewerben. Bitte laden Sie dafür Ihren Lebenslauf, Motivationsschreiben und Leistungsausweis im Bewerbungsmodul hoch.

Module Deep Dive into Blockchain – Linking Economics, Technology and Law (Summer School) (S)
03SM22BO0102 / Seminar

Description:

General description:
Blockchain-based systems allow the validation of transactions, voting, and many other novel applications without trusted parties or central authorities and are revolutionarising many fields. This summer school provides an always up-to-date program giving the students a complete immersion into blockchain, cryptocurrencies, digital tokens, decentralised governance and finance. The intensive course is taught by different Professors and lecturers from UZH and leading Universities Worldwide, and top practitioners of a variety of projects in the space. It also leverages on the huge momentum that the space has in Switzerland, which became a World-wide blockchain hub.
The technology behind, the economic incentives intertwined with them, and the governance frameworks and regulation completely shape what can be done with blockchains. For a full understanding of blockchain, with all its implications and potentials for applications in practice, it is absolutely crucial to look at it from an intedisciplinary perspective.
This is exactly what the UZH Blockchain Center offers during the three weeks of this course: delving into the three key pillars of blockchain systems, namely the technology, the economics and the legal and governance aspects behind it. Building on this, we will then explore other fields of application, such as forensics and data analytics. Further, the programme is highly interactive, with several hands-on and practice sessions incorporating the most advanced and promising blockchain-based platforms.

ECTS: 6

Notes:
Restricted seminar.
Before booking the module, students need to apply for a participation by email. Please send the following documents by e-mail to claudio.tessone@uzh.ch and to summer@int.uzh.ch (inCC) before the application deadline: 3 March 2026, 24:00.
- current Transcript of Records,
- CV,
- short motivation letter outlining your interest in the summer school (max. 500 words, written in English).

After the application, applicants may not receive the reply immediately, but they will receive via email the invitation to join an evaluation interview after the application deadline. Participants will be selected based on relevant skills, student performance and fit. The admission status will be communicated by email in time.

Booking the seminar without a positive confirmation from our chair is not implying the right to attend the course. In this case the course will be graded as failed.

UZH students participating in the module will be asked to actively engage with their international peers and to provide some support (i.e. group management on academic trips and social activities). For UZH students there are no participation fees.

Learning Outcome:
Get to know how blockchain-based systems work and what makes them trustworthy
Understand the economic incentives as the basis of blockchain-based systems
Learn to critically assess the decisions taken when designing blockchain technologies and evaluate them
Learn from experts in academia and industry, and obtain hands-on experience in both established and advancing technologies.

Target Groups:
Bachelor students, preferably third year.

Languages of Instruction:
english

Course Materials:	- Mastering Bitcoin: Programming the Open Blockchain, Andreas M. Antonopoulos. O'Reilly - Cryptocurrencies and Blockchains (Digital Media and Society), Quinn Du Pont. 1st Edition, Polity (2019) - Mastering Blockchain: Deeper insights into decentralization, cryptography, Bitcoin, and popular Blockchain frameworks
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Claudio Tessone

Requirements:

Prior Knowledge:	This course is open to advanced Bachelor students of all subject areas, preferably from the fields of Computer Science, Mathematics, Physics, Banking and Finance, Economics Business and Law. Students from other fields of study with a strong technical and analytical background are welcome. Students should have a strong interest in Data Science. Basic knowledge of programming is not required, but desirable.
Assessment:	Group project (written report and source code) to be presented (orally) in the third week of the program. The assessments of the module is carried out on-site.
Grading Scale:	Pass/Fail
Repeatability:	Can be repeated once

Module Einführung in die Neuroökonomie und Soziale Neurowissenschaften (V) (Introduction to Neuroeconomics and So
03SM22BO0103 / Course

Description:

General description:
Diese Lehrveranstaltung gibt eine Einführung in das neue Fachgebiet "Neuroökonomie". Sie informiert über die Grundlagen, die es erlauben, Ergebnisse der Neuroökonomie zu verstehen und zu interpretieren. Neurowissenschaftliche Methoden (fMRT, EEG, TMS usw.) werden vorgestellt und ihre jeweiligen Vor- und Nachteile erklärt; zudem wird ein Überblick über relevante Gehirnstrukturen gegeben. Auch behandelt werden die neurowissenschaftlichen Grundlagen der Belohnungsmodelle (Erwartungsnutzen, Prospect Theory usw.), der Entscheidungsfindung, des Risikos, der Heuristik und der Verzerrungen. Schliesslich wird ein Ausblick auf das "soziale Gehirn" gegeben. Thema hierbei ist die neurale Grundlage von sozialen Präferenzen, Vertrauen und Verständnis anderer.

ECTS: 3

Notes:
Die Vorlesung wird aufgezeichnet und nachträglich als Podcast via OLAT zur Verfügung gestellt.
Bitte beachten: Sollten Sie die Vorlesung nicht live besuchen, kontrollieren Sie vor der Modulbuchung den Prüfungstermin (Vorlesungen, die zur gleichen Zeit stattfinden, haben denselben Prüfungstermin).

Module Corporate Finance 2 (VU)
03SM22BO0104 / Lecture with Practical Exercises

Description:

General description:
Vertiefung der Investitionsrechnung mit Schätzung von Cash-flows, zukunftsgerichteter Kapitalkostenmodell und Real-Optionen Vertiefung der Kapitalstrukturpolitik mit Mezzaniner Finanzierung, Optimierung des Leverage und Sustainable Financing Begleitet wird die Vorlesung durch eine umfassende Case Study.

ECTS: 6

Notes:
Materialien und Aufzeichnungen werden online zur Verfügung gestellt. Es besteht die Möglichkeit online Fragen zu stellen und zu diskutieren in Foren auf OLAT.

Learning Outcome:
Vertiefte Anwendung der Konzepte aus der Vorlesung Corporate Finance

Target Groups:
Bachelorstudierende im vierten Semester

Languages of Instruction:
Deutsch, Englischkenntnisse, je nach Literaturwahl

Course Materials:	Die Unterrichtsmaterialien werden auf OLAT bereitgestellt.
Merkmale:	
Responsible instructor:	Alexander Wagner

Requirements:

Prerequisites:	Stoff der Vorlesung Corporate Finance
Prior Knowledge:	Grundlagen der Corporate Finance
Assessment:	Abgabe von Fallstudien und Bestehen der schriftlichen Prüfung am 11.06.2026, 14:00 - 15:45 Uhr statt. Die Prüfung findet als Bring Your Own Device (BYOD) Onlineprüfung vor Ort statt. Um die Prüfung absolvieren zu können, müssen Sie Ihren eigenen Laptop (Windows oder MacOS) mitbringen. Die Prüfung kann nicht auf Tablets absolviert werden. Ausserdem ist eine Online-Prüfungsaufsicht (Proctoring) möglich und wird mit Buchung des Moduls zugestimmt. Für die Teilnahme an der Prüfung muss eine Probeprüfung mit Ihrer individuellen technischen Ausrüstung absolviert werden. Genaue Informationen zur Probeprüfung und sonstigen Details erhalten Sie im Laufe des Semesters. Die Probeprüfung findet im Verlauf des Semesters statt.
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Module Geschichte der Weltwirtschaft (1900 bis heute) (V) History of the World Economy (1900 to the Present)
03SM22BO0105 / Course

Description:

General description:
In dieser Veranstaltung geht es um die wirtschaftliche Entwicklung Europas im 20. Jahrhundert. Drei Themen stehen im Zentrum: die grossen Finanz- und Wirtschaftskrisen im Zeitalter der Katastrophen (1914-45), die neue Rolle Europas in einer multipolaren Weltwirtschaft seit 1945 und die Geschichte des makroökonomischen Denkens.

ECTS: 3

Notes:
Die Vorlesung wird nicht aufgezeichnet.

Learning Outcome:
Studierende sind vertraut mit:

- der Diskussion über die wirtschaftlichen Ursachen und Folgen des Ersten Weltkriegs.
- den wichtigsten Erklärungen der Weltwirtschaftskrise (1929-33).
- den politischen Voraussetzungen und dem Verlauf des Wirtschaftswunders.
- den Phasen der Globalisierung seit 1945.
- der Geschichte des makrooökonomischen Denkens.

Target Groups:
Die Veranstaltung wendet sich an Studierende der Wirtschafts- und Geschichtswissenschaften auf der Bachelorstufe (auch für Nebenfächler geeignet).

Languages of Instruction:
Deutsch

Course Materials:	Das Skript wird während der Vorlesung fortlaufend an die Teilnehmer versendet und in OLAT bereitgestellt.
Merkmale:	Target Group: Open to School Students
Responsible instructor:	Ulrich Woitek

Requirements:

Prior Knowledge:	Vorausgesetzt werden Anfängerkenntnisse in Mikro- und Makroökonomik sowie in Ökonometrie.
Assessment:	Schriftliche Prüfung am 17. Juni 2026, 16.15-17.00 Uhr (45 Minuten). Die Prüfung zum Modul findet vor Ort statt.
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Module Advanced Software Engineering (L+E)
03SM22MI0026 / Lecture with Practical Exercises

Description:

General description:
This course has the goal of deepening the knowledge about advanced software engineering practices. The lectures will be complemented by a software project developed in teams. The teams will work by applying most of the software engineering processes presented within the lectures. At the end of the course, the teams will present their project.

ECTS: 6

Notes:
For more details about the organization, please consult the website of the course https://www.ifi.uzh.ch/en/seal/teaching/courses/ase.html

Learning Outcome:
Learn advanced techniques, methods, and processes in software engineering and apply them in practice.

Target Groups:
Only for MSc informatics students

Languages of Instruction:
English

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Harald Gall

Requirements:

Prior Knowledge:	Programming, Software Engineering
Assessment:	- The project deliverables (60%) - Quizzes & written exam (40%) Written exam as Bring your own device (BYOD) online exam onsite on Monday, 1 June 2026 at 12:15-13:45. In the case of only a few participants, there will be an oral exam (with individual exam dates).
Grading Scale:	1-6 Quarter Grades Given

Module Deep Learning (L+E)
03SM22MI0027 / Lecture with Practical Exercises

Description:

General description:
The Deep Learning lecture provides a mathematical understanding of artificial neural networks and, particularly, deep learning models. Additionally, an overview of modern deep learning architectures is provided. In the exercise, wewill use a deep learning framework, PyTorch, to employ the theoretical knowledge in practical examples.

ECTS: 6

Notes:
The lecture and the exercise will generally be carried out onsite. A digital backup will be provided by live streaming of the lecture and the exercise via Zoom. There will be no recordings.

Learning Outcome:
Students know the mathematical background of deep learning, which types of problems could be solved and what are the current issues with deep learning systems. They are able to solve problems at hand by deep learning using the PyTorch framework.

Target Groups:
Master students in the second semester.

Languages of Instruction:
English

Course Materials:	Slides for the lecture will be provided online during the lecture. Other references: - C. M. Bishop. "Neural Networks for Pattern Recognition", Oxford University Press, 1995. - I. Goodfellow, Y. Bengio, A. Courville. "Deep Learning", MIT Press, 2016. - S. Skansi: "Introduction to Deep Learning - From Logical Calculus to Artificial Intelligence", Springer, 2018. - Other recent scientific publications that will be announced in the lecture.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Manuel Günther

Requirements:

Prior Knowledge:	The lecture includes a mixture of calculus, analysis and statistics, so a good understanding of math is required. The exercise will use the Python programming language, which is content of AINF002: Informatics I.
Assessment:	A total of five assignments will be distributed during the semester, out of which three have to be passed to be eligible for the exam. Additional points for the exam can be collected by passing the additional two homework assignments. The examination itself has two parts: An open-book written examination (50%) and a practical programming task in Python (50%). The examination for the module takes place as a Bring Your Own Device (BYOD) online exam, executed onsite on Friday, 12.06.2026 between 08:00 and 10:00.
Grading Scale:	1-6 Quarter Grades Given

Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Spring Semester)

Module Web and mobile accessibility (L+E)
03SM22MI0029 / Lecture with Practical Exercises

Description:

General description:
This course gives an overview of assistive technologies used by people with disabilities and elderly persons, and provides the fundamentals (including exercises) on web and mobile accessibility for these target groups. This lecture is a block lecture, consisting of 5 parts.
Part I: Assistive technologies (lecture, 2 Half-days). Students get to know different so-called assistive technologies for persons with various disabilities, including visual, hearing, mobility, and cognitive disabilities.
Part II: Web and mobile accessibility implementation (1 Day, self- study). Students learn techniques and tools to make web and mobile applications accessible for persons with disabilities, according to the international Web Content Accessibility Guidelines (WCAG 2.1). During this day, the lecturer will be available throughout the day to answer any questions. At the end of the day, students will receive the source code of an inaccessible website or mobile app, which will be used for the task in Part III.
Part III: Student work (independent work). Working in groups of 4 people, students should re-implement the received source code of the inaccessible website/app, adjusting it into an accessible version that aligns with WCAG 2.1. If there are few students in the lecture, the student work should be carried out individually rather than in groups.
Part IV: Presentation of the results (1 Day). Student groups present the results of their work in a 10-minute presentation.
Part V: Discussions with student groups (1 Half-Day). Discussions will take place with each student group to provide feedback on their implementation.

ECTS: 3

Learning Outcome:
Understanding the needs of users with disabilities and elderly persons in interactions with digital systems, skills in web and mobile accessibility, familiarity with different types of assistive technologies.

Target Groups:
Master students majoring or minoring in People-Oriented Computing, and ETH Master students in Rehabilitation and Inclusion.

Languages of Instruction:
English

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Elaine May Huang

Requirements:

Prior Knowledge:	Prior knowledge in HCI (BMINF016) is helpful but not required. Students must have prior knowledge in web or mobile programming (HTML 5, Javascript, CSS, native iOS/Android programming, etc.).
Assessment:	The course evaluation will be based on the implementation of your solution (80%), the final presentation (10%), and the report (10%).
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Irregular)
Booking Deadline/Period:	from We 14.01.2026 10:00 to Tu 10.03.2026 24:00

Module Systems for Data Science (L+E)
03SM22MI0030 / Lecture with Practical Exercises

Description:

General description:
Data-driven decisions are changing the way organizations and science operate.
Many methods which were infeasible a couple of decades ago, can now be leveraged due to increasingly available large amounts of data. Processing this kind of data, though, is not just difficult because of its sheer size, but alsobecause it is generated ever more rapidly, exhibits a more complex structure, and is often noisy. In this course, we look at the backend part of data science, i.e., what kind of technology and systems do we need to process and store huge amounts of data efficiently and in a scalable way. On the one hand, we look at principles underlying distributed systems in general; on the other hand, we also investigate the functionality of concrete systems. The latter part is enhanced by practical (programming) exercises, in which we take a closer look at the architecture of these systems and the programming models they employ.

ECTS: 6

Learning Outcome:
Learn the general principles underlying distributed systems. Learn to process large amounts of data with massive parallel computations systems and understandtheir architecture and programming models. Learn about data processing and storage in these systems. Learn how to apply this knowledge in practical exercises using well-known systems (e.g. Apache Spark).

Target Groups:
Master students

Languages of Instruction:
English

Course Materials:	Will be published on the OLAT-page of the course.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Dan Olteanu

Requirements:

Prerequisites:	An (introductory) module on database systems, such as BI0009 Database Systems.
Prior Knowledge:	Basic understanding of computer network and parallel computing terminology. Also, programming experience and knowledge about basic data management techniques (as taught, e.g., in introductory database courses) is expected. Thepractical exercises will be done using the Python programming language. So, knowledge of Python (or a similar language) is required. Also, because many of the covered systems run on Linux, basic knowledge of shell commands is also a requirement.
Assessment:	Final written exam onsite (100%) on 10 June 2026 at 14.00h, duration: 90 minutes.
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Universität Zürich[UZH]

Module Blockchains and Overlay Networks (L+E)
03SM22MI0035 / Lecture with Practical Exercises

Description:

General description:
Fully distributed systems, typically termed Peer-to-peer (P2P) systems, seem to fade from the front row these days, especially due to their integrated and partially commercial use and application. Additionally, many new applications tend to prefer in certain cases an overlay networks approach, such as blockchain-based systems.
This lecture outlines the major technology alternatives of P2P, introduces overlay networks, analyzes key features, checks on implementation and deployability aspects, details blockchains and Smart Contracts, and investigates on scalability, efficiency, reliability, and commercial applicability. Respective security mechanisms complete the overall view. Based on a number of sample systems, the potential of them is outlined and applied in a challenge task in practical exercises, which are mandatory.

ECTS: 6

Notes:
Practical exercises will take place Thursdays from 14.00 to 15.45 h and form a mandatory part of the lecture in terms of the Challenge Task, which is run typically in a team of students.
This module is intended for students who are enrolled in an Informatics BSc or MSc degree program at the Faculty of Business, Economics, and Informatics.

Learning Outcome:
This lecture's goals encompass the gaining of knowledge of principles and protocols in overlay networks and in fully decentralized (P2P) communications.
Emerging blockchains and their integration into today's Internet is addressed in theory and in a practical challenge task, which includes designed and prototyping aspects. Thus, respective protocol details and system aspects for will be covered, showing potentials as well as problems.

Target Groups:
Recommended for students in the MSc program.

Languages of Instruction:
English

Course Materials:	Literature and teaching material will be announced in the first class.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Burkhard Stiller

Requirements:

Prerequisites:	Content of the lecture on "Computer Networks and Distributed Systems (CNDS)" is essential. The knowledge of "Computer Engineering and Systems Software (CESS)" is recommended, but not necessary.
Prior Knowledge:	Content of the lecture on "Computer Networks and Distributed Systems (CNDS)" is essential. The knowledge of "Computer Engineering and Systems Software (CESS)" is recommended, but not necessary.
Assessment:	The written exam is planned on-site for Tuesday, June 2, 2026, between 12.15 and 13.45 hours. In case of small attendance, an oral exam may take place. The final grade will include the evaluation of the Challenge Task as well.

Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Module Seminar: Advanced Software Engineering (MSc)
03SM22MIS010 / Seminar

Description:

General description:
The software requires constant evolution due to changing customer needs, bugs that have to be fixed, or changes in the environment. Lehman's first law of software evolution states that a software system must be continuously adapted, or it becomes less and less useful. The constant change poses many challenges, and both researchers and practitioners have recognized the importance of studying and support software evolution and the humans involved in the process. In this seminar, we will cover some of the most relevant studies, approaches, and techniques that researchers have looked at in this context.
The students will work on a specific research topic in software engineering. By the end of the course, they will be asked to present a literature review on the chosen topic in the form of a report.
Furthermore, the students will take part in a simulated peer-reviewing process for the first version of the produced reports. Finally, they will share as a presentation the results of their work and discuss them with the class.

ECTS: 3

Notes:
For this course, you will be asked to read and discuss research papers, actively participate in class, as well as work and hand in a written proposal, a final written report and an oral presentation of a scientific topic in software engineering research.
The allocation of students to this seminar will be done through the department via the new module booking tool. If there is a shortage of seats, we will give preference to students that are majoring in informatics and have not yet attended a seminar and are already far in their studies. Please note that we cannot guarantee a spot.
More information on the process can be found on our website: https://www.ifi.uzh.ch/en/studies/seminar.html.
Application for this seminar is via the module booking tool: https://studentservices.uzh.ch/uzh/launchpad

Learning Outcome:
At the end of this course, students should be able to: find and identify relevant related work reflect on a topic and discuss it; critically analyze and reflect on research articles; review and summarize the current state of the art of the selected topic; reflect on possible future directions; provide constructive feedback on a research report.

Target Groups:
MSc students

Languages of Instruction:
English

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Harald Gall

Requirements:

Prior Knowledge:	Programming, Software Engineering
Assessment:	The written report (60%), presentation (20%), and participation in the simulated reviewing process (20%).
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Module Seminar: Human-Computer Interaction (MSc)
03SM22MIS011 / Seminar

Description:

General description:
This seminar will focus on selected areas in Human-Computer Interaction (HCI) research, such as Computer-Supported Cooperative Work (CSCW), Ubiquitous Computing, and Information Visualization. The course materials will consist of current and seminal research papers in the field and represent various aspects of HCI, such as methods, design, applications, and studies.

ECTS: 3

Notes:
The allocation of students to this seminar will be done through the department via the new module booking tool. If there is a shortage of seats, we will give preference to students that are majoring in informatics and have not yet attended a seminar and are already far in their studies. Please note that we cannot guarantee a spot.
More information on the process can be found on our website: https://www.ifi.uzh.ch/en/studies/seminar.html.
Application for this seminar is via the module booking tool: https://studentservices.uzh.ch/uzh/launchpad

Learning Outcome:
The goal of this seminar is to gain an understanding of the broad field of HCI research, and learn what constitutes a scientific contribution within this field. Students will learn to analyze and discuss research from a critical perspective, with particular focus on the methods, design, findings, and contributions presented in scientific works.

Target Groups:
Recommended for students in the MSc program

Languages of Instruction:
English

Course Materials:	The readings for this class will consist of current and seminal classic scientific papers from the HCI literature and related areas. Specific topics for the term will be announced in the first meeting and are subject to change.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Elaine May Huang

Requirements:

Prerequisites:	A willingness to participate actively in class discussions of the socio- technical impacts of technology is highly recommended.
Prior Knowledge:	A good understanding of HCI fundamentals in regard to the design process, prototyping skills, and evaluation is strongly recommended. Students should have an understanding of how to apply basic usability principles and user research techniques for both formative and summative purposes.
Assessment:	- Moderation of 1-2 discussion sessions (1 class session each) including presentation of main themes and preparation of discussion topics (15%) - Response essays (1-3 pages each) for each reading assignment (50%) - Active participation in discussion sessions (35%)
Grading Scale:	1-6 Quarter Grades Given

Module Seminar: Information Systems (MSc)
03SM22MIS012 / Seminar

Description:

General description:
This year's seminar will deal with the topic "Agentic AI". Students can either cover a topic through a systematic literature review or engage in an empirical or technical mini-study. Note that the extra effort in this seminar is compensated by 6 ECTS.

ECTS: 6

Notes:
The allocation of students to this seminar will be done through the department via the new module booking tool. If there is a shortage of seats, we will give preference to students that are majoring in informatics and have not yet attended a seminar and are already far in their studies. Please note that we cannot guarantee a spot.
More information on the process can be found on our website: https://www.ifi.uzh.ch/en/studies/seminar.html.
Application for this seminar is via the module booking tool: https://studentservices.uzh.ch/uzh/launchpad

Learning Outcome:
The students should learn to acquire knowledge on specific topics from scientific publications and to critically evaluate them.
They should continue to learn to apply this literary knowledge in a small scientific study.

Target Groups:
Recommended for students in the Information Systems Master's program

Languages of Instruction:
English

Course Materials:	will be announced
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Gerhard Schwabe

Requirements:

Assessment:	- Seminar paper (14 - 16 pages, acceptable preliminary and final version) 60% - Qualified feedback on two to three other papers (review) 20% - Continuous participation in the block seminar onsite (at the end of the semester) including presentation of the seminar paper onsite 20%
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Spring Semester)

Dates/Times/Deadlines:

Dates with mandatory attendance:
18.02.26 16:15 - 17:45 Topic assignment / KickOff Meeting
15.04.26 16:15 - 17:45 Introduction to scientific reviewing

Module Seminar: Communication Systems (MSc)
03SM22MIS015 / Seminar

Description:

General description:
Communication systems provide today the infrastructure needed for a successful exchange of data and information. For this purpose, communication systems constitute a critical contributor to reliable and robust business operations, both for SMEs and large international corporations with multiple, geographically distant establishments.
This seminar sheds light on selected aspects of communication systems in terms of public telecommunication systems, mobile systems, and the Internet. Aspects of interest range from reliability, performance, security to usability of communication systems and will be defined according to very recent advances anddevelopments in that field.

ECTS: 3

Notes:
The allocation of students to this seminar will be done through the department via the new module booking tool. If there is a shortage of seats, we will give preference to students that are majoring in informatics and have not yet attended a seminar and are already far in their studies. Please note that we cannot guarantee a spot.
More information on the process can be found on our website: https://www.ifi.uzh.ch/en/studies/seminar.html.
Application for this seminar is via the module booking tool: https://studentservices.uzh.ch/uzh/launchpad

Learning Outcome:
The students have to show in this seminar that they are able to acquire relevant knowledge from scientific literature in order to address an assigned seminar topic in a sufficient manner. Compiled results need to be presented in a talk, and a pro-actively moderated discussion, including the defense of developed hypotheses, is expected. Each seminar covers a written seminar report that incorporates all relevant results.

Target Groups:
Recommended for students in the Master program.

Languages of Instruction:
English

Course Materials:	All relevant literature as well as task descriptions will be handed out to the students at the first seminar date.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Burkhard Stiller

Requirements:

Prerequisites:	Interest in the area of communication systems is the key.
Prior Knowledge:	The lecture "Computer Networks and Distributed Systems (CNDS)" is highly recommended, but not a strong requirement, as long as the student is able to adopt the respective understanding in a self-study manner.
Assessment:	Individual seminar talks of 35-40 minutes supported by presentation slides, followed by a moderated discussion of 45 minutes on the seminar topic handed-out at the start of term. Production of an individual, content-wise correct written seminar report, ready for publication, covering bibliographic references, and being

compliant with all formal requirements raised on the basis of the LaTeX template provided.

Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Module Seminar: Interactive Data Science in Digital Health (MSc)
03SM22MIS101 / Seminar

Description:

General description:
Both data scientists and medical researchers such as epidemiologists conduct data-driven research to discover new knowledge and create evidence.
Interestingly, the methodologies of both disciplines differ considerably, as you will learn in the seminar. At a glance, epidemiologists conduct carefully designed experiments to gather new data for downstream analyses, whereas data scientists exploit existing data, e.g., for visual data exploration purposes.
Also, data visualization and interactive data analysis methods differ considerably in both domains.
How to evaluate new digital and mobile health applications? Which methods or study designs are most appropriate? What are legal and regulatory requirements? How can data quality problems be addressed? How to cope with the complexity of data? Which user and stakeholder groups exist in the health domain? And when and how should users be involved in the development and evaluation process?
This block course will address these and more questions from the viewpoints of clinical research methods on the one hand and interactive data science, on the other hand. Together, we build bridges between a) experimental methods and concepts for evaluating medical health and b) statistical and machine learning tools and interactive data analysis methods. The focus will beon concepts, study planning, and the choice of analytic designs and methods.
The course will not be mathematical. Despite this, students should possess a basic understanding of data science tools such as statistical methods (e.g.
linear regression). In the course, we plan for practical group exercises where students design a mobile health study.
In the weeks after the block course, students will conduct (continue) individual project work according to real-world application examples in digitalhealth. The project results will be submitted to the teacher in form of a written document, according to a document structure pre-defined by the teacher.

ECTS: 3

Notes:
The allocation of students to this seminar will be done through the department via the new module booking tool. If there is a shortage of seats, we will give preference to students that are majoring in informatics and have not yet attended a seminar and are already far in their studies. Please note that we cannot guarantee a spot.
More information on the process can be found on our website: https://www.ifi.uzh.ch/en/studies/seminar.html.
Application for this seminar is via the module booking tool: https://studentservices.uzh.ch/uzh/launchpad

Learning Outcome:
At the end of the seminar, students have gained a deeper and broader understanding of data-driven decision making in health applications.
In particular, participants should have an awareness for the critical points in study design and conduct, and for the data analysis workflow.
Given this knowledge, students will be able to critically appraise protocols and publications.

Target Groups:
Master students in Informatics

Languages of Instruction:
English

Course Materials:

The teacher will distribute teaching materials in the block course. In addition, for the individual student projects additional material will be distributed. The teaching materials may also include data. There is no preparation needed prior to the block course days.

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Jürgen Bernard

Requirements:

Prerequisites:	Bachelor Abschluss
Prior Knowledge:	Lecture: Introduction to Interactive Visual Data Analysis is useful but not necessary.
Assessment:	- Active participation in the block course including contributions to discussions and feedback (1/3) - Quality of project results (1/3) - Quality of written project result documentation (1/3)
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (One-Time)
Request period:	from Mi 14.01.2026 10:00 to So 01.02.2026 24:00

Module Seminar: Ethical, legal and social aspects of cybersecurity (MSc)
03SM22MIS102 / Seminar

Description:

General description:
The seminar will provide an in-depth introduction into ethical, legal and social aspects of cybersecurity. Discussions and group work will be an inherent component of the course.
The main structure of the course is as follows:
1. Students will obtain a basic introduction into technical, ethical, legal and social science aspects of cybersecurity (four sessions)
2. Six sessions are dedicated to specific topics of cybersecurity and they will include input by external experts; one topic will be addressed by an individual assignment. Planned topics to be discussed: CERT-Operations, Cybercrime Cyberwar, Darknet, Dilemmas in Cybersecurity, and Forensics. Two more sessions are dedicated to Open Source Intelligence and Cybersecurity for preparing and discussing the individual assignment.
3. Students will present their group work in a final poster session, where they will address a specific, self-chosen question associated to one of the six topics of the course.

ECTS: 3

Notes:
The final poster session will be a public event, to which members of the DSI Cybersecurity Community will be invited as well.
The allocation of students to this seminar will be done through the department via the new module booking tool. If there is a shortage of seats, we will give preference to students that are majoring in informatics and have not yet attended a seminar and are already far in their studies. Please note that we cannot guarantee a spot.

Eight spots are reserved for law students; in case those are not taken, they will be opened for informatics students.

More information on the process can be found on our website: https://www.ifi.uzh.ch/en/studies/seminar.html.
Application for this seminar is via the module booking tool: https://studentservices.uzh.ch/uzh/launchpad

Learning Outcome:
- Knowledge on the ethical, legal and social science issues related to cybersecurity
- Ability to apply ethical and legal theories for understanding and resolving cybersecurity dilemmas
- Ability to present cybersecurity topics in a concise form in a poster and an individual assignment

Target Groups:
Master students in computer science and law.

Languages of Instruction:
English

Course Materials:	Material provided by the CANVAS reference curriculum: open access book "Ethics of Cybersecurity", case studies, MOOC videos.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Abraham Bernstein

Requirements:

Prior Knowledge:	None, beside basic knowledge in computer science.
Assessment:	Grading of the course is based on the following components: - 50% of grading is based on the result presented at the final poster session (group work of 2 students each). This grading will involve both an assessment by the lecturers as well as by peers. - 50% of the grading is based on an individual assignment to be executed during spring break and graded by the lecturers. Students are allowed to miss maximal two classes; higher missing rates will affect grading as well.
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Spring Semester)
Request period:	from Mi 14.01.2026 10:00 to So 01.02.2026 24:00

Module ME2: The Economics of Innovation (L+E)
03SM22MO0002 / Course

Description:

General description:
This course discusses the economics behind innovation. In particular issues related with the incentives to innovate and the business strategies associated with innovation.

ECTS: 6

Notes:
Further information is available on our website. See Link(s).

Learning Outcome:
Endow students with the elementary skills necessary to understand the driving forces behind innovation at the firm level which enables them to judge and rate a firms' innovation policy.

Target Groups:
This course is recommended for advanced students of management and economics who plan to work with high technology firms or institutions that finances innovative firms such as banking, private equity or venture capital

Languages of Instruction:
English

Course Materials:	Lecture notes and further information is available on our webiste and on OLAT (26FS 22MO0002 ME2: The Economics of Innovation (L)). See Link(s).
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Ulrich Kaiser

Requirements:

Prior Knowledge:	Basics microeconomics
Assessment:	Written exam on June, 16. 2026, 10:15-12:00. The exam will take place on site.

Module ME3: Organizational Economics (L+E)
03SM22MO0003 / Lecture with Practical Exercises

Description:

General description:
This course offers an economic perspective on platforms as a new form of organization. Economic activity has become increasingly digital, and online platforms have now become an essential part of the economy. Digital platforms disrupt existing markets but also create new ones, raising a series of important questions related to firms' management and competitive strategy. Thecourse will present and discuss the key concepts that dictate and shape platforms and platform markets. These concepts will be discussed using both theoretical economic models as well as empirical evidence based on academic research. Industry cases will also be discussed.

ECTS: 6

Learning Outcome:
Students will learn about the main economic forces driving platforms and their business models. They will learn to apply these concepts to real world cases and examples and to discuss managerial and economic implications in various contexts and industries. Students will learn to understand and critically assess academic empirical studies related to platforms.

Languages of Instruction:
English

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Luis Aguiar

Requirements:

Prior Knowledge:	Econometrics and microeconomics, and a solid background in empirical methods.
Assessment:	The assessment will be based on a closed-book final written exam. The final written exam takes place on site on Friday, June 19, 2026 10.15-12.00.
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Spring Semester)

Module Quantitative Finance (L+E)
03SM22MO0015 / Lecture with Practical Exercises

Description:

General description:
The module offers an introduction to quantitative methods in finance.
Topics covered in the lecture are: regression techniques and simple time series models, forecasting and modelling volatility, fundamentals of options and of derivative instruments, hedging and option pricing in discrete and continuous time, bond pricing, modelling dependencies via copulae, risk measurement.
The lecture is complemented by 2-3 practical topics partly taught by experienced practitioners.
The exercise sessions cover simple applications of results from the lecture as well as additional topics that complement those treated in the lecture.
An extensive literature overview will be given in the first lecture.

ECTS: 6

Notes:
This module takes place on-site and online (podcast).
Materials and recordings are made available via OLAT.

Target Groups:
Master students B&F, Master students Economics,
Master students Management & Economics

Languages of Instruction:
English

Course Materials:	Lecture notes
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Erich Walter Farkas

Requirements:

Prerequisites:	Univariate differential and integral calculus and basic probability theory, as given, for example, in the Masters course "Fundamental Probability for Finance"
Prior Knowledge:	Probability theory at the level of the Masters course "Fundamental Probability for Finance"
Assessment:	The exam for the module takes place on 24.06.2026 between 10:00 and 12:00 as written exam on site.
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Spring Semester)
Dates/Times/Deadlines:	weekly lecture (2h/week)+ exercises (2h/week)
Booking Deadline/Period:	from We 14.01.2026 10:00 to Tu 10.03.2026 24:00

Universität Zürich[UZH]

Cancellation Deadline:	from We 14.01.2026 10:00 to Tu 10.03.2026 24:00

Module Advanced Financial Economics (L+E)
03SM22MO0016 / Lecture with Practical Exercises

Description:

General description:
The course combines empirical analysis and theoretical foundations in modern asset pricing. In the empirical part, we explore financial data using tools such as event studies, variance ratio tests, testing CAPM, and Fama-French factor models. The theory section covers portfolio theory, CAPM, no-arbitrage, Arrow-Debreu pricing, complete markets, and incomplete markets within a coherent framework.

ECTS: 6

Learning Outcome:
Students should get familiar with the cornerstones of modern financial economics

Target Groups:
Master Students

Languages of Instruction:
Englisch

Course Materials:	Slides and lecture notes
Merkmale:	
Responsible instructor:	Yucheng Yang

Requirements:

Prerequisites:	Advanced Microeconomics recommended
Prior Knowledge:	Decision theory, statistics and basic programming knowledge
Assessment:	Midterm exam: Thursday, 16 April 2026 (16:15-18:00) Final exam: Thursday, 18 June 2026 (16:15-18:00) The grade is calculated as follows: homework, including programming exercises with real financial data (10%), midterm exam (30%), and final exam (60%).
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Module Advanced Banking (L+E)
03SM22MO0017 / Lecture with Practical Exercises

Description:

General description:
The objective of this class is to get a better understanding of the role of banks in the economy, and how new financial products and technologies have changed traditional banking.

The course addresses the following questions:

- Why do banks exist?
- How does the loan market work?
- How has banking changed in response to globalization?
- How do banks manage credit risk?

Topics covered: The role of financial intermediaries, the lender- borrower relationship, credit market rationing, competition in the banking sector, the transmission of monetary policy, credit risk management and global banking.

ECTS: 6

Learning Outcome:
We will develop simple theoretical models with information asymmetry and review the recent empirical literature on bank stability and regulation.
At the end of the course, you should be able to understand the functioning of these models and be able to analyze and interpret banking data.

Target Groups:
Master Students and MSC UZH/ETH in Quantitative Finance Students

Languages of Instruction:
English

Course Materials:	Book: Microeconomics of Banking (Jean-Charles Rochet). For availability of the required reading please refer to "Link(s)" Freixas, X. and J.C. Rochet. "Microeconomics of Banking", MIT Press, second edition Degryse, H., M. Kim and S. Ongena. "Microeconometrics of Banking", Oxford University Press Various scientific papers
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Steven Ongena

Requirements:

Prerequisites:	Advanced Microeconomics recommended
Prior Knowledge:	Microeconomics
Assessment:	The final exam will take place on Thursday, 11 June 2026, 14.00 - 15.45 h. Class participation determines 15% of the final grade for students who choose to participate in class presentations and whose presentation grade is better than the exam grade, and 0% otherwise. The remainder of the final grade is determined by the exam.

Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Module Sustainable Investing (L)
03SM22MO0106 / Course

Description:

General description:
Students learn the detailed concepts of sustainable investing.

ECTS: 3

Notes:
This lecture takes place onsite.

Learning Outcome:
Students learn the concepts and historical evolution of sustainable investing.
They acquire a detailed understanding of the integration of sustainability into firm valuation, investment decision making, modern portfolio theory and portfolio optimization. They get insights into sustainability (ESG) ratings and ESG business intelligence.
Students learn about the different sustainable investment and portfolio strategies and discuss theoretical concepts and empirical results regarding firms' financial and sustainability performance. Furthermore, the class provides an introduction to impact investing.

Target Groups:
Master students Banking and Finance, Business Administration and Economics

Languages of Instruction:
Englisch

Course Materials:	Lecture slides and selected reading recommendations
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Zacharias Sautner

Requirements:

Prerequisites:	Bachelor degree
Assessment:	Final exam (written) on Thursday, 11 June 2026, 08.00 - 10.00 The examination of the module is carried out in presence.
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Spring Semester)
Booking Deadline/Period:	from We 14.01.2026 10:00 to Tu 10.03.2026 24:00
Cancellation Deadline:	from We 14.01.2026 10:00 to Tu 10.03.2026 24:00

Module Investments – Selected Quantitative Tools (L)
03SM22MO0108 / Course

Description:

General description:
The lecture provides a comprehensive introduction to state-of-the-art machine learning tools for finance. Participants learn how to express relationships among financial variables and predict the risk and return of investments using neural architectures. Sample Python code is provided and used to experiment with real-life data and create a hands-on experience. Machine learning enables us to learn complex dependencies and describe e.g., tipping point behaviour and sharp reversals of prices during market corrections. This unlocks enormous modelling potential but also the pitfall of overfitting the available data. The objective of the lecture is to get comfortable with these new tools, both from a theoretical and practical perspective.

ECTS: 3

Notes:
This module takes place onsite with Zoom running in parallel to enable remote participation. Regular presence at the lecture required.

Learning Outcome:
Introduction to statistical inference and machine learning applied to finance

Target Groups:
Master students MSc QF, Master students B&F

Languages of Instruction:
English

Course Materials:	Lecture notes will be provided for selected chapters
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Erich Walter Farkas

Requirements:

Prerequisites:	Bachelor Degree
Prior Knowledge:	Solid background in mathematics (linear algebra, probability theory) and basic in Python.
Assessment:	The final assessment consists of a small Python project that students will develop in groups of 2-3 during the semester. The final grade is composed of two equally weighted parts: a short paper (containing the project findings as well as the Python code) and an oral presentation in person on the exam date: 26.06.2026, 12:00-16:00.
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Spring Semester)

Module The Risk and Finance Lab (S)
03SM22MO0109 / Seminar

Description:

General description:
Aim of the lecture: to discuss and demonstrate the common mechanisms underlying all types of financial analysis spanning from liquidity risk management via traditional and advanced book keeping to rocket science risk analytics. It will be shown, that based on sound first principles, it is possible to reduce complexity of financial analytics to a manageable level without compromising on its content.
Lab: in the lab tutorials students can practically implement the knowledge acquired in the lectures with a professional, globally used software, thereby enhancing the learning effect significantly. Students will build models in groups which handle problems such as "Liquidity stress scenarios at a large UK bank" or "Interest income forecast at a regional Swiss bank under different market scenarios" or "A global framework of credit risk exposure" etc.

ECTS: 6

Notes:
This module takes place onsite. Materials will be made available in OLAT.
Technical equipment: have your own laptop.
Students with a bachelor in banking and finance and students participating in the Master of Science UZH ETH in Quantitative Finance can apply directly.
Other students should contact Willi Brammertz by mail willi@brammertz- consulting.ch before booking. The course is limited to 20 students.
In case of overbooking, the order of application applies.

Learning Outcome:
How to apply financial theory in a real life case. To offer a close to life experience how risk managers, treasurers and CFO's manage a bank.
To increase the understanding of financial data, its relationship to financial analytics and managerial decisions.

Target Groups:
Students MSc QF, Master students BF, BWL

Languages of Instruction:
English

Course Materials:	- Software Tool "AnalytX" - Book: Brammertz et al. "Unified Financial Analysis: The missing links of finance", John Wiley & Sons, 2009. For availability of the requiredreading please refer to "Link(s)". - Hand-out notes
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Erich Walter Farkas

Requirements:

Prerequisites:	Bachelor Degree
Prior Knowledge:	Finance (capital markets, valuation and certain knowledge of option pricing), Accounting

Assessment:	The exam takes place in person, on-site, on 12.06.2026, 8:00-12:00. The exam has two parts: Part 1 Theoretical exam (weight 50%): This is a 50 minutes hand written test. It is open book. It examines the theoretical comprehension of the concepts of "Unified Financial Analysis" expounded during the lectures. All lecture notes and the script (Unified Financial Analysis) can be consulted. Not allowed is the use of AI. Part 2 Practical exam (weight 50%): The groups present their models created during the labs within about 20 minutes each. Each group member presents one aspect of the model and its background. Generally we test whether the concepts presented in the lecture and lab have been really understood.
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Module Derivatives portfolio valuations: advanced computational methods for real world business applications
03SM22MO0111 / Lecture with Practical Exercises

Description:

General description:
The module addresses how to value derivatives portfolios for computationally very challenging business applications, that require modelling and numerical technics beyond the standard fair value theory of pricing. Advanced valuation methodologies based on Monte Carlo simulations, Adjoint Algorithmic Differentiation (AAD) and supervised machine learning will be presented with a hands-on approach; showing how these cutting edge computational methods can be efficiently implemented in Python and introducing standard coding practices for quant developers.
Widely used metrics taken from the financial industry, such as XVA, Value-At-Risk (VAR), Expected Shortfall (ES) and regulatory capital, will be discussed extensively, by explaining their practical usage and directly implementing them in Python. In specifics, students will learn how the above-mentioned valuation methodologies can be leveraged to overcome major computational challenges.

ECTS: 3

Notes:
There will be a 2-day block part (14h, 50%) before the official lecture start, continued by 2h lectures on a weekly basis (14h, 50%). Weekly ZOOM catch-ups for questions regarding the homework will be offered.

Learning Outcome:
Upon successful completion of the course, the students should achieve a practical understanding of:

- The numerical challenges of portfolio level valuations for derivatives.
- How to implement an efficient framework for Monte Carlo simulations over the life of the portfolio, based on industry standard models for Risk Factors Evolution (RFE) and pricing; as well as using advanced numerical technics such as multi-level Monte Carlo and Richardson extrapolation.
- How to implement AAD to compute portfolio Greeks in a scalable fashion.
- How to apply supervised machine learning to derivatives pricing.
- How to implement the most common portfolio level metrics used in the context of derivatives (XVA, VAR, ES, IM, regulatory capital).

Target Groups:
Master MScQF, Master B&F

Languages of Instruction:
English

Course Materials:	No text book is required for the course; provided material will be self-consistent. Additional references for people interested will be provided during lectures.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Erich Walter Farkas

Requirements:

Prerequisites:	Bachelor
Prior Knowledge:	-Basic understanding of quantitative risk management concepts -Basic understanding of derivatives pricing

-Basic programming experience and previous exposure to one of Python, R,
Matlab or similar

Assessment:	The final grade will be based on a weighted average of the grades achieved in: - Four home-assignments covering the Python implementation of the computational methods and risk metrics discussed, to be handed in during the course. (60%: 15% for each assignment) - A final onsite exam of 1.5h duration, that will be based on the topics discussed during class with a more qualitative, business oriented, angle (40%). Onsite exam on Wednesday 10 June 2026.
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Module Management and Marketing in the Entertainment Industry (L)
03SM22MO0116 / Course

Description:

General description:
In this course, we will study the peculiarities in the entertainment industry and their implications for marketing and management decisions of firms. We will focus on the traditional marketing channel for entertainment (and creative) goods, and will focus on key management and marketing decisions of content producers (e.g., where and how to compete, which business model to use, how to price, distribute and design entertainment experiences).
This will be a highly interactive course that uses a case-based teaching approach. We will cover a broad range of business cases and types of entertainment products, including sports, movies, books, and music.

ECTS: 3

Notes:
This module takes place onsite.

Learning Outcome:
On completion of this course, students should have reached the following learning outcomes:
Topic specific knowledge and skills:
You have gained substantial knowledge about marketing and management in the entertainment industry. In particular, you will be able to answer the following questions:
1. What makes entertainment products and markets unique? What drives consumption of entertainment products?
2. How to manage products and product portfolios in entertainment industries? (e.g., why are so many firms caught in a blockbuster trap?)
3. How to manage talent in the entertainment industries? (e.g., when to use a grassroots marketing approach; how can talent market itself successfully?)
4. How to manage products and talent in view of the rise of digital technology? (e.g., how does digital distribution affect star power?)

Transferable skills:
1. You learn to think about business problems in the entertainment industry in a structured and analytical manner.
2. You are able to apply the concepts, frameworks and analytical tools from class to real-world case studies.
3. You are able to clearly articulate your analysis and recommended solution for a case problem.
4. You are able to critically evaluate the practical relevance of conceptual frameworks, theories and analytical tools.
5. You gain experience in a group work environment and improve your skills as a team member.
6. You improve your presentation skills.

Languages of Instruction:
English

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Johannes Luger

Requirements:

Prerequisites:	Familiarity with key concepts in marketing and strategic management.
Prior Knowledge:	BA degree in Management or Economics
Assessment:	In-class participation (40%) Group Project and Presentation (60%)

Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Module Applied Sports Research (S)
03SM22MO0117 / Seminar

Description:

General description:
This seminar focuses on writing a short quantitative research paper in the field of sports economics.

ECTS: 3

Notes:
This module takes place on-site. The seminar is organized as a "block seminar" with a kick-off and later two consecutive days of the seminar. The number of participants is limited. Please register in the Module Booking Tool (application period 14.1 - 1.2.2026). Priority is given to students who have attended the lecture "The Economics of Sports: Governance and Markets".
Application for this seminar is via the module booking tool: https://studentservices.uzh.ch/uzh/launchpad

Learning Outcome:
Students get familiar in the writing of a quantitative research paper in the field of sports economics.

Target Groups:
Students who are interested in the field of sports economics.

Languages of Instruction:
English

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Egon Franck

Requirements:

Prerequisites:	Admission to Master's Program
Prior Knowledge:	Basic knowledge in a statistics program like STATA, R, SPSS or similar.
Assessment:	- written seminar paper (50%) - oral presentation (30%) - Active participation during the seminar sessions (20%) Attendance is compulsory. Please note that this seminar is expected to be offered for the last time in the spring semester of 2026 (FS26) and therefore cannot be repeated.
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (One-Time)

Module Brand Management in the Digital Age (VU)
03SM22MO0118 / Lecture with Practical Exercises

Description:

General description:
Die Vorlesung vermittelt einen grundlegenden Überblick über Aufgaben und Inhalte des Markenmanagements mit einem Fokus auf Veränderungen durch die Digitalisierung.
Vorlesungsinhalte:
1. Bedeutung der Marke für unsere Gesellschaft und im Markt in unserer digitalen Welt
2. Wirkung von Marken
3. Strategisches Markenmanagement
4. Operatives Markenmanagement (Umsetzung des Markenmanagements unternehmensintern und -extern)
5. Markencontrolling

Die Vorlesung beinhaltet auch eine Gruppenarbeit, in der ein Brand Audit durchgeführt wird. Darin werden Eigenschaften einer Marke anhand von Sekundärdaten erfasst (z.B. Produkt-/ Dienstleistungsangebot) und aus der Analyse werden dann Handlungsempfehlungen für das Management abgeleitet.

ECTS: 3

Notes:
Dieses Modul findet vor Ort statt. Vorlesungsmaterialien werden online via OLAT zur Verfügung gestellt. Es gibt keine Podcasts der Vorlesung. Die Anmeldung für diese Lehrveranstaltung erfolgt über das UZH Modulbuchungstool.
Weitere Informationen werden auf OLAT zur Verfügung gestellt.
Dieses Modul ist teil des Marketing Minor Programms des Masterprogramms.

Learning Outcome:
Die Studierenden...
...verstehen, was Marken sind und welche Bedeutung diese in unserer digitalen Welt in der Gesellschaft und auf dem Markt haben.
...verstehen die einzelnen Schritte des Markenmanagementprozesses und können diese auf ausgewählte Marken anwenden.
...verstehen die Veränderungen des Markenmanagements durch die Digitalisierung und können die damit einhergehenden Chancen und Gefahren erläutern.
...können Ansätze der Entwicklung einer Markenidentität und - positionierung sowie deren Umsetzung am Markt sowie bei Mitarbeitern erläutern.
...können unterschiedliche Ansätze der Markenwertmessung miteinander vergleichen.

Target Groups:
Studierende des Masterprogramms

Languages of Instruction:
Deutsch

Course Materials:	Unterrichtsfolien und Lesematerialien (im Unterricht angekündigt)
Merkmale:	
Responsible instructor:	Andrea Giuffredi-Kähr

Requirements:

Assessment:	Dokumentation der Brand Audit Analyse als Gruppenarbeit (30% der Endnote, Voraussetzung zum Prüfungsantritt); Schriftliche Prüfung (70% der Endnote).

Die Prüfung zum Modul findet vor Ort statt. Schriftliche Prüfung (closed book) am
17.06.2026 von
10:15 bis
11:45 Uhr (90 Minuten).

Grading Scale:	1-6 Quarter Grades Given

Module Managing Education and Training in Firms/for Firms (L)
03SM22MO0122 / Course

Description:

General description:
This course views education and training in firms from an economic perspective. The engagement of firms is important for well-functional vocational education and training systems, as it ensures an adequate supply of relevant skills in the labor market. However, institutions and framework conditions are necessary to ensure an adequate training quality as well as the certification and transferability of skills, so that individuals find it attractive to acquire (part of) their skills in the workplace.
Course contents:
1. Labor market and human capital theory
2. The functioning of markets for vocational education and training
3. The returns to vocational education and training for firms and individuals
4. Financial incentives for firm and individuals
5. Informal and non-formal training in the workplace

ECTS: 3

Learning Outcome:
Students develop an understanding of how competitive and frictional labor and training markets work, which includes the training behavior of firms and educational choices of individuals, as well as the returns to education and training for firms, individuals, and the state. Moreover, students learn about the importance of institutions and framework conditions in successful national education and training systems. Finally, students learn how careful empirical evaluation strategies can be used to support continuous improvement of learning processes in firms as well as effective and efficient policy decisions at the macro level.

Target Groups:
Master students

Module Introduction to Operations Research: Stochastic Models (L+E)
03SM22MO0123 / Lecture with Practical Exercises

Description:

General description:
Students will be exposed to a variety of methods to analyze sequential decisions under uncertainty.

ECTS: 6

Notes:
This module takes place on-site and online (podcast).

Learning Outcome:
Students can solve simple stochastic problems using decision trees.
For problems in discrete time, students can model the corresponding stochastic process as a Markov chain, analyze the long run behavior, and calculate performance measure of interest. Given a dynamic decision process, students can formulate the problem as a Markow decisison process and find the best decisions by solving it for a given objective function. For continuous time problems, students learn the terminology if Markov processes and queueing systems, model them, evaluate different models, and analyze the long run behavior.

Target Groups:
Master students

Languages of Instruction:
English

Course Materials:	see OLAT- or Moodle-course
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Christiane Barz

Requirements:

Prerequisites:	Content of Statistics 1, an introductory course on linear programming.
Prior Knowledge:	Basics of linear programming, probability.
Assessment:	- Midterm Exam (40%) - Written examination conducted on-site. Scheduled for Tuesday, 14 April, 14:00-15:45 (90 minutes + administrative buffer). - Final Exam (60%) - Written examination conducted on-site. Scheduled for Tuesday 9 June 2026, 14.00-15:45 (90 min. exam + administrative buffer). - Bonus Project (up to 5%) - Additional points can be earned by completing a small project.
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Module Advanced Financial Accounting (L+E)
03SM22MO0124 / Lecture with Practical Exercises

Description:

General description:
This course provides an introduction to advanced financial accounting, covering topics such as corporate investments, business combinations, and other complex business transactions. In this course, we will learn and analyze various methods to report investments, accounting for mergers and acquisitions, preparation of consolidated financial statements, and accounting treatment for hedging, financial derivatives, foreign currency transactions, etc.
Additionally, we will discuss issues related to different accounting regimes (IFRS, U.S. GAPP, and Swiss GAAP FER); and how these standards influence accounting practices.

ECTS: 6

Notes:
Podcasts available.

Learning Outcome:
The objective of this course is to provide the students with a foundation in accounting for complex transactions. The students will learn to record these transactions, prepare financial statements, and evaluate the implications of alternative accounting methods.

Target Groups:
Master's students

Languages of Instruction:
English

Course Materials:	Advanced Accounting, by Hoyle, Schaefer, Doupnik. McGraw-Hill Publishing.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Hui Chen

Requirements:

Prior Knowledge:	Prior knowledge in financial accounting and reporting.
Assessment:	The examination of the module will take place on site. Written examination on: 22.06.2026, 10:15-11:45.
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Module Crunchpoints in seriously large banking/payment-IT-projects (L+E)
03SM22MO0126 / Lecture with Practical Exercises

Description:

General description:
The banking, payment, funding and consumer industry in need of financial interactions and transactions are in a mode of drastic change, which will stay being "disruptive" for at least another 10 years. There are several forms of IT projects that come along with this change. The lecture discusses their destiny with respect to previous experiences, risks, and their location within "the un-sketched" map of current and future large financial IT projects". e.g. - "Old" institutions try to restructure their IT, but often fail. Why? How can it be done with lower risk of fail?

- New financial online portals are planned or built, new on-line banking- or payment services come into the market. Can they grow?
- An all European "xyz"-mobile-bank-IT: Costs? Duration?
- Domestic (national) payment schemes head for substituting old brands like all these well-known credit card schemes. How, what is the cost, technical effort/risk?
- States and nations discuss "digital money", what does it need to make the rather large IT project "The British Pound delivered as crypto- currency in parallel to the "old" printed Pound")?
- SWIFT and other global joint interaction conventions: What does it cost to make 5 SWIFT clouds world-wide instead of one? The core target of the lecture is the typical large (banking) IT project sized at 10 Mio. €, lasting for 18 months. Depending on the audience and participants we will head for deeper experiences in size and structure together.

ECTS: 3

Notes:
Block course On-site lecture with integrated exercises Without recording

Learning Outcome:
Participants shall get an overall picture about serious chances and risks in large IT projects with special focus on the financial sector (payment, banking, funds, etc.). They should be able to understand their current and future role within such scenarios and learn to distinguish between the tree and the leaves in such large projects. Risks that will repeat, scenarios that do not work, best practices that have worked is the major core of the interaction goal with the participant. The lecturer follows the idea of a master class rather that of a textbook (which cannot exist in such subtle matters).

Target Groups:
Master Students MSc QF, Master Students B&F, Master Students BWL, Master Students Informatics

Languages of Instruction:
English

Course Materials:	Various Resources depending on case study
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Erich Walter Farkas

Requirements:

Prerequisites:	Bachelor Degree
Prior Knowledge:	IT-Knowledge on Bachelor level

Assessment:	Written onsite exam on 12.06.2026, 14:00-16:00 (90 min!) The final grade is composed of a final exam (80%) and an exercise during the semester (20%)
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Module Portfolio Management Theory 2 (S)
03SM22MO0128 / Seminar

Description:

General description:
This seminar constitutes the second component of the Portfolio Management Program. In this seminar, students use the theoretical foundations learned in the lecture Asset Management: Advanced Investments as well as the seminar Portfolio Management Theory 1 and the programming skills learned in Backtesting for Portfolio Management to develop and backtest a unique trading strategy.
Students participate in regular expert presentations and act as investment analysts to prepare for the Portfolio Management Program Implementation seminar in the following semester.

ECTS: 3

Notes:
The number of participants is limited. Only open to students who successfully completed Portfolio Management Theory 1, Asset Management: Advanced Investments and Backtesting for Portfolio Management.
The seminar will be held onsite at the scheduled times. Materials will be provided electronically. Students are encouraged to ask questions and contribute to the class discussions.

Learning Outcome:
Based on the theoretical knowledge gained from the lecture Asset Management: Advanced Investments and the seminar Portfolio Management Theory 1, students learn how to develop and analyse their own investment strategy. Working as a team, students learn how to analyze their proposed strategy at a level of detail sufficient to allow the strategy to be used to guide real-world investment decisions in the Portfolio Management Implementation seminar in the following semester.

Target Groups:
Masters students with an interest in portfolio management.

Languages of Instruction:
English. German is an advantage.

Course Materials:	Diverse materials
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Thorsten Hens

Requirements:

Prerequisites:	Successful completion of Portfolio Management Theory 1, Asset Management: Advanced Investments and Backtesting for Portfolio Management.
Prior Knowledge:	Portfolio Management Theory 1, Asset Management: Advanced Investments and Backtesting for Portfolio Management.
Assessment:	Participation in seminars and expert presentations, investment analyst presentations and a term paper (group project).
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Spring Semester)
Dates/Times/Deadlines:	Die, 17.02.2026, 13:00-16:00, UZH Die, 24.02.2026; 14:00-15:45, UZH Die, 03.03.2026, 14:00-15:45, UZH Die, 10.03.2026, 14:00-18:00, Extern Die, 24.03.2026, 13:00-16:00, UZH Die, 14.04.2026, 14:00-18:00, Extern Die, 26.05.2026, 14:00-20:00, Extern

Module Portfolio Management Implementation 2 (S)
03SM22MO0129 / Seminar

Description:

General description:
Following a year of insight into the theoretical foundations of portfolio management and asset allocation, students are given the unique opportunity to implement what has been learned. They actively manage a portfolio, following an academic, fundamental or quantitative approach. Students provide regular performance updates in the form of monthly reporting sheets and regularly present on their portfolio holdings and performance to their peers, professors, and industry experts.
Furthermore, participants in this module act as tutors for students in the "Portfolio Management Theory 2" course to prepare them for their upcoming portfolio management tasks and to ensure a smooth handover of the portfolio. The tutors introduce the students to the required reporting tools and ensure that the students understand the portfolio they will be responsible for during the second year of the Portfolio Management Program.

ECTS: 6

Notes:
The number of participants is limited. Only open to students who successfully completed Portfolio Management Theory 1 and 2.
The seminar will be held onsite at the scheduled times. Students are encouraged to ask questions and contribute to the class discussions.

Learning Outcome:
Under the supervision of professors and practitioners, students learn to actively manage a portfolio, in a group setting, according to a predetermined investment strategy. This module develops students' ability to mentor other students and organize knowledge transfer in an institutional setting.

Target Groups:
Masters students with an interest in portfolio management.

Languages of Instruction:
English. German is an advantage.

Course Materials:	None
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Thorsten Hens

Requirements:

Prerequisites:	Successful completion of Portfolio Management Theory 1 and 2
Prior Knowledge:	Portfolio Management Theory 1 and 2
Assessment:	Participation in regular meetings and performance presentations. Submission of monthly reports and contribution to the PMP yearbook.

Module Real Estate Finance (L)
03SM22MO0130 / Course

Description:

General description:
The real estate market is one of the most important asset markets in the global economy. The lecture Real Estate Finance deals with the fundamentals of urban economics and the characteristics of the real estate investment market as well as the behavior of its participants.
Emphasis is placed on methods of valuing real estate and real estate investment vehicles. Both direct and indirect forms of investment are covered, including real estate private equity, mortgage securitization, and real estate derivatives. Other topics covered include the regulation of real estate markets, real estate markets in Asia, and the financial aspects of development and green buildings.

ECTS: 3

Notes:
This module takes place on-site and online (podcast)

Target Groups:
Master students

Languages of Instruction:
English

Course Materials:	Study notes. Various papers and articles (will be announced prior to the lectures).
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Francisco Osswald do Amaral

Module Behavioral Finance and Private Banking (L)
03SM22MO0131 / Course

Description:

General description:
The aim of the course is to introduce results from psychological decision theory into mainstream finance. The students will in particular learn how to combine prospect theory with mean-variance analysis and how to give advice to private investors. By the end of this course, the students will be able to:

- distinguish between rational and irrational behavior;
- learn to implement behavioral finance insights to assess the risk profiles of individual investors;
- question and assess the suitability of various rules of thumbs when investing under different market conditions and over time;
- integrate behavioral finance insights along a standard wealth management process.

ECTS: 3

Notes:
This module takes place onsite. Materials are made available online. It is possible to ask questions and discuss online via Zoom or OLAT.

Learning Outcome:
Individual customer consulting on interdisciplinary investment issues in rational and irrational behavior.

Target Groups:
Master

Languages of Instruction:
English

Course Materials:	Bachmann, Kremena + De Giorgi, Enrico, Hens,Thorsten "Behavioral Finance for Private Banking" Wiley Finances Series, 2018 (2nd Edition). For availability ofthe required reading, please refer to "Link(s)".
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Thorsten Hens

Requirements:

Prior Knowledge:	Good knowledge of Mathematics, at the level of the book "Mathematik für Wirtschaftswissenschaftler, Basiswissen mit Praxisbezug" by Knut Sydsaeter, Peter Hammond (Verlag Pearson Studium).
Assessment:	The examination of the module will take place onsite. Written examination on: Thursday, 18 June, 2026,10:15-12:00hrs. A non-programmable calculator is allowed (such as Texas Instruments TI-30- Series). Additional points can be collected via research proposals. More information on the procedure and the topics will be provided in the first lecture (19.02.2026).
Grading Scale:	1-6 Quarter Grades Given

Module Market Microstructure (S)
03SM22MO0132 / Seminar

Description:

General description:
This course on Market Microstructure gives an introduction into the analysis of price determination and trading activities in financial markets. Starting out from perfect (efficient) markets, market microstructure theory introduces more realistic features that explain why prices converge to or diverge from a long-range equilibrium. These realistic features correspond to a number of ?frictions? such as market illiquidity, order handling costs, inventory costs, asymmetric information, market power, search costs, or strategic behavior of market participants. We will discuss various approaches with a close connectionto the original research papers.

ECTS: 3

Notes:
Course contents: Market microstructure, in particular market liquidity, market design, and regulation of financial markets. The numbers of Students is limited to 15 students on a first-come, first-served basis. Students should apply to participate in the seminar until 11.01.2026, at the latest to angelo.ranaldo@unibas.ch, including a short letter of motivation, CV, certificate of the Bachelor with Academic Record, all in one PDF file.
This module takes place on-site.

Learning Outcome:
Students who will successfully complete this course will gain a strong background to understand trading mechanisms used for financial securities and the actual behavior of market participants, including the recent trends such asalgorithmic and high-frequency trading. We will also discuss how new regulations such as Basel III have changed market infrastructures and the effects of Unconventional Monetary Policies (e.g. Quantitative Easing) on financial markets. The lecture Market Microstructure is research oriented. It is balanced between theoretical modeling and empirical findings.

Target Groups:
Master students

Languages of Instruction:
English

Course Materials:	Slides. Course literature: Course material is provided on OLAT.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Thorsten Hens

Requirements:

Prerequisites:	Bachelor's degree in economics, business administration or in banking and finance.
Prior Knowledge:	This research seminar is primarily designed for Master students who have already finished their compulsory coursework.
Assessment:	Grading will be based on a written closed-book exam on-site. Exam: Friday, 13 February 2026, 10:15-12:00 hrs.
Grading Scale:	1-6 Quarter Grades Given

Module Blockchain (L+E)
03SM22MO0133 / Lecture with Practical Exercises

Description:

General description:
The lecture "Blockchain" gives an introduction to the topic and includes two parts:

- Theory: This part includes a mixture of scientific content and practical contributions involving high level industry representatives, entrepreneurs, investors, etc.
- Lab: This part involves the development of a concept for a self-chosen blockchain solution (e.g., mockup / prototype).
The theory part takes place during a two day block lecture at the beginning of the semester, the lab part is an ongoing exercise during the semester including an onsite event at Trust Square, Zurich's largest blockchain hub. The students have the opportunity to present their developed concepts to a jury of specialists consisting of start-up entrepreneurs, venture capitalists and blockchain experts from service providers and receive feedback. Students have the opportunity to network with start-ups from Trust Square, Tenity and the Crypto Valley.

ECTS: 3

Notes:
This module takes place on-site. Attendance in the lecture hall is required in accordance with the current protection concepts and with registration by name.
Materials are made available online. It is possible to ask questions and discuss online via OLAT.

Learning Outcome:
Introduction to the theory and practice of blockchain as well as acquisition of competences for the development of own blockchain concepts.

Target Groups:
Students in the Master of Arts in Economics and the Master of Science in Informatics

Languages of Instruction:
Englisch

Course Materials:	Course material will be distributed during the Lectures.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Thorsten Hens

Requirements:

Prerequisites:	Passed Bachelor-Level, Branch of Study: Bachelor of Arts UZH in Business and Economics or Informatics
Assessment:	Seminar paper in groups, (20 pages, 80%), with final presentation (20%). Final presentations on May 20, 2026, from 9-18.
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Spring Semester)

Module Regulatory Challenges in Financial Markets: From Banking and Insurance to Blockchain (L)
03SM22MO0134 / Course

Description:

General description:
What are the regulatory challenges in our days in the area of banking, insurance and blockchain? How could the financial specialists, asset and risk managers, actuaries, brokers, crypto specialists quickly react to the latest requirements of the supervisory authorities, enterprise risk management, blockchain developments in all aspects from solvency, auditing till legal aspects? The content of the lecture orients to a quick understanding of the real financial industry experience.
Basel III (and its updates) is an internationally agreed set of measures developed by the Basel Committee on Banking Supervision in response to the financial crisis of 2007-09. The measures aim to strengthen the regulation, supervision and risk management of banks. The Swiss Solvency Test (SST) is a supervisory tool applied in Switzerland which adopts a risk-based and total balance sheet approach. Insurance companies are required to provide a market-consistent assessment of the value of their assets and liabilities.
Possible changes to these balance sheet positions are then modelled over a one-year period in order to arrive at the total required capital.

ECTS: 3

Notes:
The lecture will benefit from several invited contributions of senior representatives from FINMA and the financial services industry.
Materials are made available online.
This module takes place on-site.
No Podcast

Learning Outcome:
The course aims to introduce the fundamental facts on Basel III and SST and to analyze the impact of new technologies like blockchain on the existing regulatory frameworks for banks and insurers. It will include an introduction to the Basel III regulation environment for banks, to the Swiss Solvency Test for insurers.

Target Groups:
Master students with basic know-how on financial markets.

Languages of Instruction:
Englisch

Course Materials:	Reading materials will be made available on the OLAT platform throughout the course.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Thorsten Hens

Requirements:

Prerequisites:	The course will be self-contained, however, a basic knowledge of financial markets on Bachelor level is welcome.
Prior Knowledge:	This course requires basic knowledge of financial markets on Bachelor level.
Assessment:	The examination of the module will take place onsite. Written examination on: Wednesday 18th June 2026, 16:15-18:00.

Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Module Digital Real Estate: Designing Innovative Business Models (S)
03SM22MO0135 / Seminar

Description:

General description:
Das Seminar "Digital Real Estate" gibt Einblicke in die digitale Transformation der Immobilienwirtschaft. Zu Beginn gibt es einen theoretischen Einblick in die Grundlagen der Immobilienwirtschaft. Anschliessend wird der Status Quo der Digitalisierung im Immobiliensektor beleuchtet und auf aktuelle Innovationen und innovative Geschäftsmodelle näher eingegangen. In diesem Kontext wird der Besuch einer "smarten Liegenschaft" angestrebt, um Innovationen sichtbar und somit greifbar zu machen. In einer Case Study werden die Studierenden in Gruppen eingeteilt und gebeten, ihr eigenes digitales Geschäftsmodell zu entwickeln. Hierfür werden im Vorfeld kreative Arbeitsansätze und Methoden wie Design Thinking, Business Model Canvas und User Journeys gelehrt.
Abschliessend wird jede Gruppe gebeten, ihr Geschäftsmodell vor einem ausgewählten Innovation Committee zu pitchen.

ECTS: 3

Notes:
Begrenzte Verfügbarkeit (30 Teilnehmende). Studentinnen und Studenten müssen sich für das Seminar über die Institutswebseite bewerben. Weitere Details sind über folgende Webseite zu finden:
https://www.df.uzh.ch/de/studies/bachelor-master/master/ma-seminare.html.
Sollte das Seminar überbucht sein, erfolgt eine Auswahl der Teilnehmerinnen und Teilnehmer basierend auf ihren Fähigkeiten und Leistungen. Wenden Sie sich bei Fragen an teaching@df.uzh.ch
Dieses Modul findet onsite statt.

Learning Outcome:
- Einführung in die Immobilienwirtschaft und zum Real Estate Asset Management
- Identifizierung der wesentlichen Elemente der Digitalisierung im Real Estate Asset Management
- Verstehen relevanter Technologien
- Erkennen des aktuellen Zustands der Immobilienwirtschaft in Deutschland und Europa
- Erste Übersicht über die Start-Up Landschaft der Immobilienwirtschaft
- Verstehen von Projektbeispielen
- Innovation in der Immobilienwirtschaft greifbar machen
- Identifizierung der drängendsten Handlungsfelder
- Erarbeitung von praktischen Initiativen im Bereich der Digitalisierung
- Identifizierung von passenden technischen Modellen und Methoden zum Lösen spezifischer Probleme und zur Entwicklung neuer Ideen in der Immobilienwirtschaft

Languages of Instruction:
Deutsch

Course Materials:	via OLAT
Merkmale:	
Responsible instructor:	Thorsten Hens

Requirements:

Prerequisites:	Abgeschlossenes Bachelorstudium Interesse an Immobilien Interesse an Digitalisierung
Assessment:	Bearbeitung von Case Studies.

Präsentation in Gruppen am Mittwoch, 25. März 2026 (13:00-18:00)
Die Leistungsnachweise zum Modul finden vor Ort statt.

Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Spring Semester)
Dates/Times/Deadlines:	Eine zusätzliche Anmeldung über OLAT ist erforderlich. Weitere Details sind auf der Webseite des Instituts für Finance zu finden: https://www.df.uzh.ch/de/studies/bachelor-master/master/ma-seminare.html: Donnerstag, 12. Februar 2026 (09.00 - 18.00 Uhr): Grundlagen Real Estate, Digitale Technologien & Besichtigung. Freitag, 13. Februar 2026 (09.00 - 18.00 Uhr): Grundlagen Innovation Management & Anwendung und Ausarbeitung Business Case. Mittwoch, 25. März 2026 (13.00 - 18.00 Uhr):Leistungsüberprüfung in Form von Gruppenpräsentationen vor Ort. Optional: Q&A zwischen Tag 2 und Leistungsüberprüfung

Module Sentiment Analytics (L)
03SM22MO0136 / Course

Description:

General description:
This course gives a general introduction into sentiment analytics applied to financial markets, and Natural Language Processing (NLP) with a focus on Natural Language Understanding (NLU), and applying these algorithms to analysing news for their sentiment (i.e. news sentiment). The news sentiment data is then used in order to build models for predicting financial asset returns across asset classes (equities, fixed income, foreign exchange, commodities). Students will get an overview of the news sentiment analytics literature and newest developments in this field, as well as practical insightsof how this data can be used in asset management.
Upon completion of the course, students will have an overview of news sentimentanalytics and its application in finance/asset management. Students will be able to work with news sentiment data for their group project, giving them applied experience in the field.

ECTS: 3

Notes:
This course is designed for master students who are interested in applying sentiment analysis in asset pricing and portfolio management. Therefore, basic knowledge of empirical asset pricing, portfolio management, behavioral finance,and data analysis are useful to understand the content of this lecture.
Information of the lecture will be published on OLAT and through email. Please complete the enrolment in OLAT so that you will be on the email-list and have the complete access to the course material. Please check OLAT regularly for themost updated information regarding the course.
This lecture takes place on site.

Learning Outcome:
Upon completion of the course, students will have an overview of news sentiment analytics and its application in finance/asset management. Students will be able to work with news sentiment data for their group project, giving them applied experience in the field.

Target Groups:
Master of Finance Master of Quant Finance Master of Economics

Languages of Instruction:
English

Course Materials:	Course material will be made available through OLAT.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Thorsten Hens

Requirements:

Prerequisites:	Master students only
Prior Knowledge:	Finance, MATLAB/Python coding skills, Portfolio Management, Behavioral Finance not required but desirable.
Assessment:	The examination for the module takes place as a Bring Your Own Device (BYOD) online exam on site on 04.06.2026 between 12:15 - 13:45, 60 mins. Evaluation If you are taking this lecture for credits, you are expected to attend every lecture as well as successfully passing the final exam.

The final grade depends on the following two components:

- Final Exam (80%): 04. June 2026, 12:15-13:45
- Attendance & Participation (20%):

Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Module Personnel Management in Entrepreneurial Firms (S)
03SM22MO0137 / Seminar

Description:

General description:
Identifying, recruiting and retaining the "right" employees are among the most important task in the formative stages of a new business. At the same time these tasks are also among the most challenging. While the importance of the human capital endowment for the performance of a young firm is undisputed, the focus in the academic entrepreneurship literature has traditionally been on thehuman capital of the founders. This seminar provides an overview over recent academic literature that deals with the effects of the human capital of both founders and employees on new ventures' performance. Who founds successfulstart-ups? Whom do young firms employ? And how does this affect future start-upperformance as well as the careers of founders and employees?

ECTS: 3

Notes:
The seminar is limited to a maximum of 20 students. Beyond normal booking (Modulbuchung), a second application to the chair is necessary by February, 1,
2026 by e-mail: entrepreneurship@business.uzh.ch.
It is not allowed to attend the seminar without confirmation from the chair, as there will be a waitinglist. The papers will be randomly assigned to groups of two in the introductory session. If you have any preferences with respect to the person you want to work with, please let us know his/her name in your e- mail.
The seminar will be held on site.

Learning Outcome:
1.) Introductory session: This session will provide an overview over the topic, details on grading and organization, and guidelines on how to prepare the seminar papers and presentations. The topics will be randomly assigned to groups of two students.
2.) A seminar paper (based on 1-2 papers assigned to the group) has to be prepared by each group between the introductory meeting and the presentation session.
3.) Presentation sessions: Each group has to present their seminar paper and summarize the assigned papers. Active participation in the discussion by all participating students is required.

Target Groups:
This seminar targets students from Business Administration and Management and Economics. It is recommended (but not required) that students have attended or are planning to attend the lecture 'A Primer in Entrepreneurship'

Languages of Instruction:
English

Course Materials:	Lecture notes and further information will be made available on our website and on OLAT (26FS 22MO0137 Personnel Management in Entrepreneurial Firms (S))
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Ulrich Kaiser

Requirements:

Assessment:	Preparation of a seminar paper, presentation of the seminar paper, active participation in group discussion.
Grading Scale:	1-6 Quarter Grades Given

Universität Zürich[UZH]

Module Introduction to Mergers and Acquisitions (L)
03SM22MO0138 / Course

Description:

General description:
Firms engage yearly in thousands of mergers and acquisitions. Acquisitions can add new competences, enable entries to new markets and, in some instances, even restructure whole industries. This course provides an introduction to mergers and acquisitions from a strategic management perspective. Through lectures, in class exercises, case studies and guest presentations, students will learn about topics such as motives for mergers andacquisitions, their performance implications and key challenges in managing these transactions.

ECTS: 3

Notes:
Syllabus will be published on the Chair's webpage.

Learning Outcome:
After the course, the participant should (1) understand the role of mergers and acquisitions in firm's strategy, (2) know the main concepts related to managingmergers and acquisitions, and (3) be able to apply common frameworks and tools related to mergers and acquisitions.

Target Groups:
Masters level students

Languages of Instruction:
English

Course Materials:	Readings and lecture slides
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Thomas Keil

Requirements:

Assessment:	In order to pass the course, students need to participate in guest lectures and pass the final examination. Final grades will be based upon the examination only. The exam will be based on all the lectures and the readings indicated in the syllabus of the course. Students who have attended all guest speaker lectures will receive 5% bonus points in the final exam, provided that they pass the final exam. To pass the course at least 50% of the total points are required. The exam of the module will take place as a Bring Your Own Device (BYOD) online exam on site on 15.06.2026 from 10:00-12:00. To take the exam, you must bring your own laptop (Windows or macOS). The exam cannot be taken on tablets. To take the exam, you must install the Safe Exam Browser (SEB) in advance and take a mandatory mock exam using your individual technical equipment. Exact information on the required SEB version and other details will be provided to you during the semester. The mandatory mock exam will take place on 08.06.2026 during the day from 07:00 to 19:00. Completion of the mock exam is mandatory. Students who have not completed the mandatory mock exam will not be admitted to the final exam and fail the course.

Module Financial Engineering (L+E)
03SM22MO0142 / Course

Description:

General description:
This lecture is intended for students who would like to learn more on equity derivatives modelling and pricing. After introducing fundamental concepts of mathematical finance including no-arbitrage, portfolio replication and risk-neutral measure, we will present the main models that can be used for pricing and hedging European options e.g. Black- Scholes model, stochastic and jump-diffusion models, and highlight their assumptions and limitations. We willcover several types of derivatives such as European and American options, Barrier options and Variance-Swaps. Basic knowledge in probability theory and stochastic calculus is required. Besides attending class, we strongly encouragestudents to stay informed on financial matters, especially by reading daily financial newspapers such as the Financial Times or the Wall Street Journal.

ECTS: 6

Notes:
This module takes place on-site and online (podcast).

Learning Outcome:
Quantitative models for European option pricing (including stochastic volatility and jump models), volatility and variance derivatives, American and exotic options.

Target Groups:
Masterstudents (Banking and Finance, Quantitative Finance) Für Englischsprachige geeignet

Languages of Instruction:
Englisch

Course Materials:	Script, exercises
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Markus Leippold

Requirements:

Prerequisites:	Content of Asset Pricing
Prior Knowledge:	Basic knowledge of probability theory and stochastic calculus
Assessment:	The examination of the module will take place onsite. Written examination on Thursday, 11.06.2026, 8:00 -10:00
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Module Social Choice Theory (L+E)
03SM22MO0147 / Lecture with Practical Exercises

Description:

General description:
Social choice theory is concerned with the question how individual preferences can be aggregated into a social preference and a collective decision. It deals with the problem of defining goals and making decisions in a society in which citizens might have conflicting interest. From one perspective, questions of justice and fairness are therefore at the heart of social choice theory. From another perspective, the mechanisms that societies use to make decisions can often be interpreted as voting systems. Hence social choice theory is also a theory of different voting systems and their properties. We will develop a mathematical framework in which the problem of preference aggregation can be studied. We will then investigate several social choice mechanisms, such as plurality voting, Borda count, or the Copeland method. We will state, prove and discuss Arrow's impossibility result. We will study how the impossibility problem can be avoided, for instance when the set of individual preferences can be restricted. We will also examine the liberal paradox, the problem of manipulability of voting systems, solutions using more than just ordinal utility, and behavioral issues.

Module Empirical Financial Accounting (L)
03SM22MO0150 / Course

Description:

General description:
This lecture provides a scientific and empirical treatment of research topics in financial accounting.

ECTS: 3

Notes:
This module takes place on-site.

Learning Outcome:
Students have a thorough understanding of how to empirically test the effectiveness of various financial accounting measures.

Languages of Instruction:
English

Course Materials:	Academic research papers on financial accounting
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	David Oesch

Requirements:

Prior Knowledge:	A basic understanding of econometrics is necessary.
Assessment:	The examination of the module will take place on-site. Written open book examination on Tuesday, 02.06.2026, 12:15-13:15h.
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Module Theory of Financial Intermediation and Banking (S)
03SM22MO0151 / Seminar

Description:

General description:
The course will explore the leading approaches to understand the economic role of banks and financial intermediations. The course also prepares participants for advanced seminars in the microeconomics and microeconometrics of banking (e.g. Research Seminar by Prof. S. Ongena).

ECTS: 3

Notes:
The number of participants is limited to 20 students. No preliminary registration before the first session is required. In order to register for the course, students are requested to come at the first session. For further information, please visit the course page on OLAT or write an email to jason.blunier@df.uzh.ch. Additionally, the course has to be booked via the module booking tool of the University.
Teaching default is on-site (in person). If necessary, classes will be online via Zoom, on specific dates. Materials and recordings are made available online. In the case of online class, It is possible to ask questions and discuss via Zoom.

Target Groups:
Students of the MSc in Quantitative Finance and MA in Banking and Finance.

Languages of Instruction:
Englisch

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Steven Ongena

Requirements:

Prior Knowledge:	Recommended: Graduate course in "Financial Markets and Institutions" and "Empirical Methods" or equivalent. Recommended reading: Microeconomics of Banking
Assessment:	Inclusive but not exclusive a presentation as well as active participation.
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Spring Semester)

Module Empirical Methods in Sustainable Banking (L)
03SM22MO0152 / Course

Description:

General description:
The objective of the course is to read and understand the empirical literature on banking, with a focus on sustainable banking. The course mirrors the structure of the "Advanced Banking" class to offer a coherent synthesis betweentheory and empirics in Banking, and to confront the theory with empirical evidence. Each chapter of the course offers a brief introduction to discuss theempirical implications of the theory, a methodology section and illustrative applications that focus on the sustainability of banks, bank clients (households and firms), the economy and society.

ECTS: 3

Module Corporate Social Responsibility (S)
03SM22MO0155 / Seminar

Description:

General description:
The seminar assesses the topic of Corporate Social Responsibility (CSR) in theory and practice. The course will give an overview on research concerned with CSR and focuses on CSR-related topics on the macro-, meso-, and micro-level of analysis.

ECTS: 3

Notes:
A maximum of
20 master students will be admitted to the seminar. To participate, please send an email to florian.ueberbacher@gmail.com with your CV and grades record by Friday,
23 January
2026 at the very latest. Participant confirmations will be send out by Friday,
30 January
2026. Students who are accepted for the seminar have to book this seminar through the module booking system. Reading material and all documents to this seminar will be shared via email.

Learning Outcome:
The course highlights aspects of managing CSR and sensitizes students for practical and ethical dimensions of managing CSR. Students will develop and present relevant topics of this field and will learn more about ongoing research projects of the Chair of Foundations of Business Administration and Theories of the Firm.

Languages of Instruction:
English

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Andreas Scherer

Requirements:

Assessment:	In order to get credit for the course, students have to write a seminar paper, present their findings to the class, and participate actively in the seminar meetings (Grading Weights: Seminar Paper 45%, Presentation 45%, Active participation in class 10%).
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Module Economics of Gender in Education and Labor Markets (S)
03SM22MO0159 / Seminar

Description:

General description:
All over the world, we observe different economic outcomes for men and women.
This course uses economic theory and analysis in order to explain these differences in outcomes focusing on educational attainment, career choices, and earnings. We will examine the role of gender differences in abilities, preferences (career vs. staying at home, but also for competition), and discrimination in explaining these differences. We will also examine how the choices women make (like marriage and child rearing), medical advancement (the birth control pill), and policies by firms affect these outcomes. Lastly, we will discuss what roles firms, educational institutions, and governments could have in achieving gender equality today.

ECTS: 6

Notes:
Please note, the number of students that can participate in this seminar is limited. To determine who is allowed to participate, each interested student needs to prepare a short assignment to be submitted before the semester starts.
Students who are interested in taking the seminar should e-mail Professor Segal (carmit.segal@business.uzh.ch) for details about the assignment before February
15,
2026.

Learning Outcome:
Students will acquire knowledge about the economic models explaining women&apos choices and the empirical evidence regarding the factors (such as culture and governmental policies) that affect these choices. Through their work on the homework assignments and seminar paper, students willlearn how to construct hypotheses based on theories learned in class or on a combination of such theories and inputs from the "real world" (such as newspaper articles or their own experiences as workers and students). They willunderstand what data is relevant to test such hypotheses (both ideally and in practice) and know where to look for such data, how to use such data to determine whether it supports the hypotheses and what conclusion (and limitation) can be drawn based on the relationships found in the data.

Target Groups:
MA students

Languages of Instruction:
English

Course Materials:	Papers will be distributed electronically
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Carmit Segal

Requirements:

Prerequisites:	Successful completion of a bachelor's degree
Prior Knowledge:	Microeconomics and econometrics
Assessment:	The seminar is composed of mandatory weekly meetings, in which we will discuss different theories and the evidence supporting them. Part of the meetings will be

devoted to student presentations of their homework assignments, which are designed to help them find a research question for their seminar paper and to provide them with the tools to start investigating this question. In addition to homework presentations throughout the semester, students will be presenting their final work in the last week of the semester (see the "Organization" section for details) and are expected to submit a seminar paper summarizing that work.
The module grade will be determined based on the student's seminar paper and its presentation (50% of the grade), homework (40% of the grade), and class participation (10% of the grade). To pass the class a student needs to have a passing grade in each of these components.

Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Spring Semester)
Dates/Times/Deadlines:	The tentative dates and times for presentations are: May 28, 2026 (12:00-16:00). May 29, 2026 (10:00-16:00). Please note that some of these dates/times do not coincide with the seminar's usual hours and/or days, which have been assigned to accommodate up to 20 students. In case they are unnecessary, some of these dates/hours will be canceled. Participation in classmates' presentations is mandatory. However, conflicting classes' will be taken into consideration. The exact times and dates of each individual presentation will be determined during the course of the seminar.
Booking Deadline/Period:	from We 14.01.2026 10:00 to Tu 10.03.2026 24:00
Cancellation Deadline:	from We 14.01.2026 10:00 to Tu 10.03.2026 24:00

Module Organization Theories (L)
03SM22MO0160 / Course

Description:

General description:
Given the complexity of organizations, it is not surprising that there is a plurality of theories offering different perspectives for studying organizations. All of these theories offer valuable insights on central questions in organizations studies, in particular on how organizations emerge, how they are sustained and how they function. Apart from that, these theories also have important practical implications, e.g. on organizational design. This course will provide an overview of central organization theories discussing their relevance both in scientific and practical terms. The different theories will be illustrated with empirical examples.

ECTS: 3

Notes:
Materials and recordings will be made available online (via OLAT).

Learning Outcome:
At the end of the course, you should be able to:
1. have an in-depth knowledge of the most relevant organizational theories
2. be able to distinguish between the ontological, epistemological and methodological assumptions underlying the different theories
3. be able to discuss the scientific and practical relevance of the different organization theories

Languages of Instruction:
English

Course Materials:	Slides and academic papers will be uploaded to OLAT.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	David Seidl

Requirements:

Assessment:	The exam for the module takes place on Thursday, 11.06.2026 (two weeks after the end of lectures) from 14:00 to 15:00 (60 mins) in person (not online) at UZH main campus.
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Spring Semester)
Booking Deadline/Period:	from We 14.01.2026 10:00 to Tu 10.03.2026 24:00
Cancellation Deadline:	from We 14.01.2026 10:00 to Tu 10.03.2026 24:00

Module Introduction to the Philosophy of Economics (L)
03SM22MO0161 / Course

Description:

General description:
The course offers an introduction to the philosophy of economics. The lectures will cover the following topics: an overview over the philosophy of economics, the most important positions in general philosophy of science that are present in the economic literature, aspects of the foundations of microeconomics, reductionism in economics, the methodological position of Milton Friedman, the role of models in economics, the introduction of behavioral economics, the controversies about neuroeconomics, and the status of economics between the natural sciences and other social sciences. The lectures will mostly proceed by critically presenting central papers and book chapters of the respective fields.

ECTS: 3

Notes:
Lectures are recorded and recordings will be made available to the students.

Important Notice: If you do not intend to attend the lecture in real time, please check the exam date before registering. Lectures held at the same time share the same exam date.

The lecture is held by an external lecturer, Prof. Paul Hoyningen-Huene (Professor Emeritus of Philosophy of Science, University of Hanover).

Learning Outcome:
To understand what kinds of philosophical problems economics is confronted with; to develop a deeper understanding of various methodological aspects and problems of economics and to develop a critical attitude towards them.

Languages of Instruction:
English

Module Big Data Methods for Economists (S)
03SM22MO0163 / Seminar

Description:

General description:
The seminar provides an introduction to, and hands-on experience with, statistical big-data tools for modelling and understanding complex datasets.
Depending on students' interests and background, topics range from regression trees, lasso or cross-validation to more advanced deep learning topics such as neural networks. Students can complete the course with either R or Python.

ECTS: 3

Notes:
There will be four sessions and attending each session is compulsory.
Since it is a small group seminar, we encourage students to actively participate in the lecture discussion.
This seminar is limited to 30 participants and requires an application. Allocation is handled via the module booking tool.
If demand exceeds capacity, priority is given to Economics majors.
Important: Seminar booking periods differ from regular lecture module booking periods. Attendance is mandatory at all sessions.
More information on the process can be found on our website: https://www.econ.uzh.ch/en/study/undergraduate/ma/seminar.html

Application for this seminar is the module booking tool:https://studentservices.uzh.ch/uzh/launchpad

Target Groups:
MA students

Languages of Instruction:
English

Course Materials:	An introduction to statistical learning: with applications in R; Gareth James, Daniela Witten, Trevor Hastie and Robert Tibshirani; New York : Springer 2013. This book is available online. The Elements of Statistical Learning: Data Mining, Inference, andPrediction; Jerome Friedman, Trevor Hastie, and Robert Tibshirani, 2009, Springer-Verlag.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Damian Kozbur

Requirements:

Assessment:	The final grade will be based on the written work and presentation of the methods component (45%), the written report and presentation of the application (45%) as well as general class participation (10%). Students will work in groups of 2.
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Module Topics in Time Series Analysis (S)
03SM22MO0167 / Seminar

Description:

General description:
This seminar builds on the lecture "Time Series Analysis". Certain topics discussed there will be studied now in greater detail from both a theoretical and applied perspective.

ECTS: 3

Notes:
IMPORTANT: This seminar is limited to 12 participants and requires an application. Allocation is handled via the module booking tool. If demand exceeds capacity, priority is given to Economics majors.

Important: Seminar booking periods differ from regular lecture module booking periods.
More information on the process can be found on our website: https://www.econ.uzh.ch/en/study/undergraduate/ma/seminar.html

This seminar takes place at ZUH-F-02 (Zürichbergstrasse 14). Participation in all session is mandatory.

Application for this seminar is the module booking tool:https://studentservices.uzh.ch/uzh/launchpad

Learning Outcome:
Understanding of the material from both a theoretical and applied perspective.

Languages of Instruction:
English

Merkmale:	Target Group: Suitable for English Speakers

Module Advanced Industrial Economics (L+E)
03SM22MO0171 / Lecture with Practical Exercises

Description:

General description:
Advanced treatment of the theory of imperfectly competitive markets, with applications to competition policy and product market regulation.
Introduction to working with academic papers in this topic.

ECTS: 6

Notes:
Some exercise slots might be used for lecture sessions (and vice versa).
Lecture and Exercise will not be recorded/no podcast.

Learning Outcome:
Deeper understanding of strategic interactions in imperfectly competitive markets, and applying this theory to competition policy and regulation.
Understanding of academic papers in the field.

Languages of Instruction:
English

Course Materials:	Teaching materials will be available at OLAT
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Armin Schmutzler

Requirements:

Prior Knowledge:	Good command of microeconomic theory, including basic game theory. Previous exposure to an IO course (e.g. at the Bachelor level) is helpful, but not required.
Assessment:	Written final exam (80%): 5.06.2026 (12:15-1:45 PM, 90 min); one homework assignment(20%). The exam takes place on-site.
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Spring Semester)
Booking Deadline/Period:	from We 14.01.2026 10:00 to Tu 10.03.2026 24:00

Module Managementvergütung und Anreizsysteme (VU) (Executive Compensation and Incentive Systems)
03SM22MO0172 / Lecture with Practical Exercises

Description:

General description:
Der Kurs vermittelt die theoretischen Grundlagen der Gestaltung von Anreiz- und Entlohnungssystemen für Manager. Vor diesem Hintergrund werden praktische Probleme bei der Gestaltung von Anreizverträgen, relevante empirische Fakten zur Entwicklung der Managerlöhne sowie jüngere Entwicklungen im regulatorischen Umfeld aufgezeigt und diskutiert.

ECTS: 6

Learning Outcome:
Studierende sollen die Prinzipien der Gestaltung von Anreiz- und Entlohnungssystemen verstehen und die Zweckmässigkeit bestehender Vergütungspraktiken und Regulierungsansätze beurteilen können.

Target Groups:
Studierende auf Masterstufe.

Languages of Instruction:
Vorlesung: Deutsch Literatur, Foliensammlung und Übungen: vorwiegend Englisch

Course Materials:	Foliensammlung, ergänzende Literatur gemäss Syllabus. https://www.business.uzh.ch/macc
Merkmale:	
Responsible instructor:	Robert F. Göx

Requirements:

Prior Knowledge:	Grundlegende Kenntnisse der nicht-kooperativen Spieltheorie. Ein erfolgreicher vorheriger Besuch des Moduls 03SM22MO0005 "Fortgeschrittene Mikroökonomik für die BWL" wird empfohlen.
Assessment:	Die Prüfung zum Modul findet am Montag, 8.6.2026 zwischen 14:15 und 15:15 Uhr als Bring Your Own Device (BYOD) Onlineprüfung vor Ort statt.
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Module Advanced Corporate Finance II (L)
03SM22MO0173 / Course

Description:

General description:
The course studies the relation between firms and financial and product markets. Topics considered are bond issuance, earnings (mis)management by an energy producer and intermediary (Enron), portfolio hedging, private equity, the analysis of relative cost, securitisation, collateralized debt obligations (CDO) and credit default swaps (CDS), the hedging of foreign exchange risk, risk arbitrage in takeovers and valuation. These are studied in the context of real cases.

ECTS: 3

Learning Outcome:
To study problems and issues in Corporate Finance in the context of real cases.

Target Groups:
Students in MBF or MQF.

Languages of Instruction:
English

Course Materials:	Course material and cases to be obtained from the OLAT website.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Michel Habib

Requirements:

Prior Knowledge:	Advanced Corporate I (L) or Corporate Finance (L)
Assessment:	Group case studies to be handed in. Final presentation. The final grade may be further adjusted for class participation. Compulsory attendance.
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Spring Semester)
Booking Deadline/Period:	from We 14.01.2026 10:00 to Tu 10.03.2026 24:00

Module Masterprojektarbeit in Informatik (Master's Project in Informatics)
03SM22MP_INF / Master Paper / MA-Arbeit

Description:

General description:
The Master's Project is a large group project for 2 to 5 students. It is an intensive and demanding piece of work worth 15 ECTS credits. The Master's Project is supervised by an IfI professor.

The factsheet and registration form can be found here: https://www.ifi.uzh.ch/en/studies/msc-info.html

ECTS: 15

Notes:
You can find project topics on the websites of the research groups, further Master's
Projects are presented at the Master Project Market every semester. You have to search for group members for project work on your own.

The department of Informatics is offering a Master's project market every semester. Details to be found here: https://www.ifi.uzh.ch/en/studies/msc-info.html

Target Groups:
Master students majoring in Informatics

Languages of Instruction:
Deutsch, English

Merkmale:

Responsible instructor:	Alberto Bacchelli

Requirements:

Assessment:	The proof of achievement of the Master's Project usually consists of a presentation or demonstration of the solution and the mandatory final report. The responsible person may specify further requirements.
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Semester)
Booking Deadline/Period:	not bookable
Cancellation Deadline:	not cancelable

Module Leadership Research (S)
03SM22MO0177 / Seminar

Description:

General description:
Students will learn about how leadership research is produced. Students will receive hands-on experience in the research process and learn a mix of content, learning about the current leadership research landscape and how to conduct cutting-edge, rigorous leadership research. We begin by surveying topic areas in leadership research and identifying design and methodological issues. Then, we will focus our attention on designing rigorous research to answer the leadership questions of today (and tomorrow). In addition to practice with design and analytic techniques, students will also develop their academic writing skills in preparation for a Master thesis or other research-related writing.

ECTS: 3

Notes:
Participation in this seminar is limited to 25 students. Please apply for this seminar via the new module booking tool: https://studentservices.uzh.ch/uzh/launchpad/ including: (a) a current curriculum vitae (b) proof of attendance of the Leadership Lecture "Leadership (L) (22MO0193)" (c) a one paragraph motivation statement
The application deadline is 01.02.2026.
Please contact Dr. Ryan Miller at ryan.miller@business.uzh.ch if you have any questions regarding your application for this course.

Learning Outcome:
1. Increase familiarity with topic areas within leadership research and common methodological and design issues.
2. Understand the scientific process of conducting leadership research and analyzing data.
3. Be prepared to write an academic Master thesis on the topic of leadership or related topics (e.g. HRM, OB)

Target Groups:
Master students interested in leadership, human resource management, or organizational behavior.

Languages of Instruction:
English

Course Materials:	Materials will be provided weekly including slides. Recommended bibliography will be available as PDF or accessible through the library.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Jochen Menges

Requirements:

Prerequisites:	Leadership (L) (22MO0193)
Prior Knowledge:	- A Good understanding of English (min. B2-C1). - Basic knowledge of statistics - Previous experience with statistical software such as R, Stata, SPSS is a plus
Assessment:	- Class participation (15%) - Homework (35%)

- Final paper (50%)

Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Spring Semester)
Request period:	from Mi 14.01.2026 10:00 to So 01.02.2026 24:00

Module Online Course II: Introduction to Legal Data Science
02SM90WM82 / Lecture with Practical Exercises

Description:

General description:
This online course aims to introduce students to legal data science and teach them competences in the statistical software R and basic statistics. The course is designed for law students who are interested in expanding their skillset to data science and intend to use these skills to conduct simple legal data science projects, for example as part of their master's thesis or dissertation.

The course is conducted solely online and will be self-paced.

Course structure:

- What is Legal Data Science?
- R Basics
- Analyzing Data and Data Visualization in R
- Descriptive Statistics in R
- Statistical Inference in R
- Linear regression in R
- Tidy Data
- Text as Data Basics

ECTS: 6

Learning Outcome:
The students

- know how legal data science shapes legal science, jurisprudence and lawmaking;
- know basic concepts and methods of statistics;
- have basic data science skills in R;
- have the competence to carry out simple statistical analyses with legal data in R.

Target Groups:
Master students

Languages of Instruction:
English

Course Materials:	All materials will be available on https://elearn2.mnf.uzh.ch/courses/course-v1:RWF+02SM90WM82+FS26
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Tilmann Altwicker

Requirements:

Prerequisites:	As the course is conducted online and using the statistical software R, students should have access to a notebook on which they can install the statistical software R and R Studio.

Prior Knowledge:	No programming skills necessary; all essential basics are taught in the course. Online Course II does not build on Online Course I, so it can be taken independently.
Assessment:	online exam on-site (multiple choice, with Inspera)
Grading Scale:	1-6, Half Grades Given
Repeatability:	Can be repeated as necessary

Organisation:

Offer pattern:	1 Semester (Every Semester)
Booking Deadline/Period:	from We 14.01.2026 10:00 to Tu 10.03.2026 24:00
Cancellation Deadline:	from We 14.01.2026 10:00 to Tu 24.03.2026 24:00

Module Hybridbildgebung: Vom Bild zum Befund
04SMRAD22001 / Kurs

Description:

ECTS: 1

Learning Outcome:
Lerninhalte:
Klinische relevante Themen und Fallvorstellungen zum Thema Hybridbildgebung mit Schwerpunkt Tumorstaging und Befundung von PET/CT sowie PET/MR

Lernziele:
Interessierte Studierende erhalten einen vertieften Einblick in die klinische Befundung von PET/CT und PET/MR. Das daraus erworbene Wissen ergänzt das Angebot an Vorlesungen und Kursen.

Unterrichtsformat:
Vortrag vor Ort (Raum NUK A33). Der Kurs ist als Fellows-Vorlesung konzipiert (PET/CT- und PET/MR-Neulinge aus dem In- und Ausland), eignet sich aber auf Grund der praktischen Beispiele sehr gut für das neue Curriculum, wo es um das Einüben praktischer Fähigkeiten (hier: Befundung von PET mit CT oder mit MR) geht. Kleingruppen ermöglichen ein besonders hohes Mass an Interaktion, was in den aktuellen Angeboten (Mantelstudium und Kursnachmittage für die gesamte Studentenschaft mit Minimum 8 Studierende pro Dozent) nicht erreicht werden kann.
Der Kurs eignet sich besonders auch für Studierende, die sich spezifisch für die Befundung, bzw. die «black box» hinter dem Befund und dem Bild interessieren. Diese Studierenden wollen wir damit gezielt ansprechen.

Themen:
PET Hybrid Imaging: Distinguishing Normal from Abnormal PET Hybrid Imaging in the Staging of NSCLC as Illustrated by Case Studies
PET Hybrid Imaging in Malignant Melanoma Imaging of oncologic Emergencies
Hybrid Imaging of Head and Neck Cancer
PET Hybrid Imaging Gastro-Esophageal Cancers PET Hybrid Imaging in Colorectal Cancer
PET Hybrid Imaging in Prostate Cancer
PET Hybrid Imaging in Inflammation and Infection PET Hybrid Imaging in The Heart

Prüfungsform:
Der behandelte Stoff wird durch Aktivierungstools während des Vortrags informell geprüft.

Wo und wann findet der Kurs statt?
Kursstunden werden auf VAM bekannt gegeben. Raum bereits bekannt: NUKA
33. Zeiten voraussichtlich: Mo-Fr 09.15 - 10.15h. Genauer Plan wird noch bekannt gegeben.

Wieviele Studierende dürfen teilnehmen?
Max. 3 Studierende pro Kursstunde

Für Studierende aus welchem Studienjahr ist der Kurs gedacht?
5./6. Studienjahr.

Bis wann brauchen Sie die Teilnehmerliste? Kurzfristige Anmeldung für einzelne Stunden bis am Freitag der Vorwoche ist möglich.

Module Research Project MAMES (Master Thesis)
06SM278-509 / Module

Description:

General description:
Presentation and discussion of Master thesis project. Students have two primary options: a presentation with a follow-up handout, or a written excerpt or chapter from their thesis for discussion. Option 1: Presentation and Follow-up Handout Students may choose to present an outline of their thesis, covering aspects like their research design, research questions, or the interpretation of their results. Subsequent to this presentation, they are required to provide a handout of 1200-1500 words. This handout summarises the main points of the presentation and explicates how the student plans to manage any substantial criticism or feedback received during the presentation. It will address the main criticisms, utilising additional resources such as research literature, scholarly references, and theoretical concepts if applicable, in order to demonstrate how the feedback can be integrated to enhance their thesis. Option 2: Written Excerpt or Chapter Alternatively, students can opt to share a written excerpt or a chapter (up to 8000 words) from their thesis. This piece will serve as the discussion point with MAMES professors and fellow students. Like the first option, the goal is to gain valuable feedback that can help in refining their thesis further.

ECTS: 3

Notes:
This module can only be booked by students who have already found an advisor for their master thesis. The module has to be booked via the booking agreement available on the website of the IAOS: https://www.aoi.uzh.ch/de/studies/studyorganization/courseofstudies/booking.html. Please consult with Dr. Helena Hof directly (Helena.hof@uzh.ch) and early before the booking-deadline in order to sign the agreement in due time.

Learning Outcome:
This colloquium aims to provide students with an opportunity to present their Master thesis project in class and to develop the ability to formulate and present a relevant and feasible research question. Students will learn about how to contextualize research questions within the scholarly literature (both theoretical and regional) and evaluate the different types of evidence they might use to answer them.

Languages of Instruction:
Englisch

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Nicolas Martin David Chiavacci

Requirements:

Prerequisites:	The course is designed for students working towards their Master thesis.
Assessment:	Portfolio (Presentation; Handout) In order to pass the module all elements of the portfolio must be successfully completed. ---
Grading Scale:	Pass/Fail
Repeatability:	repeatable once, book again

Organisation:

Offer pattern:	1 Semester (Every Semester)
Booking Deadline/Period:	not bookable
Cancellation Deadline:	not cancelable
Organisation:	Institute of Asian and Oriental Studies
Offered in:	Spring Semester 2026 Fall Semester 2025 Spring Semester 2025 Fall Semester 2024 Spring Semester 2024 Fall Semester 2023 Spring Semester 2023

Module Culture and Communication
06SM390-510 / Module

Description:

General description:
Ce module articule un volet théorique (Se) et un volet appliqué (Ue), deux composantes qui s'étalent sur deux semestres. Le premier, en général sous responsabilité d'un professeur, approfondit un sujet spécifique relevant d études de la littérature française ou francophone modernes ou contemporaines en vue d'un événement culturel annoncé; le deuxième, accompagné généralement une lectrice ou un lecteur, permet de faire opérer et d'enrichir le savoir acquis au contact d'acteurs de la culture ou de la communication culturell (exemples: journées littéraires, représentations théâtrales, sorties de films).
Le projet documenté est à rendre à la fin du module.

ECTS: 6

Learning Outcome:
À partir d'une réflexion théorique menée en commun, les étudiantes et les étudiants se montreront capables de réaliser un projet inviduel qui leur permettra d'entrer en contact avec le champ de la culture ou de la communication culturelle.

Languages of Instruction:
Français

Merkmale:

Responsible instructor:	Ursula Bähler

Requirements:

Prerequisites:	Modules "Introduction aux études du français" ou équivalent, module "Littérature moderne: théories et pratiques" ou équivalent, niveau de langue B2 minimum recommandés.
Assessment:	Portfolio: Exercices variés à faire en cours ou sur des plateformes d'enseignement (20%) et réalisation d'un projet individuel à discuter préalablement avec l'enseignante ou l'enseignant (80%). ---A déterminer en fonction du déroulement du module, en concordance avec les participant·e·s.
Grading Scale:	1-6, Half Grades Given
Repeatability:	repeatable once, book again

Organisation:

Module IDB 403 Translational, Clinical and Cognitive Neuroscience
07SMIDB403 / Block Course

Description:

General description:
The block course is divided into 1 week of lectures followed by a 6- week laboratory work. Additional course days/ hours may be integrated. The following topics are covered:

1. Translational neuroscience
2. Clinical methods and Therapies
3. Experimental Psychology
4. Neuroeconomics
5. Ethics

ECTS: 12

Notes:
The last day of the block course is reserved for possible interactive re-assessment and discussion with course lecturers.

Learning Outcome:
Students will:

- obtain understanding of novel methodological approaches to study variations in cognitive performance across the lifespan and along the continuum from healthy to pathological functioning.
- become very familiar with the broad range of measurements, analysis and treatment methods in translational, clinical and cognitive neuroscience.

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Nicolas Langer

Requirements:

Prerequisites:	The course is addressed primarily at students enrolled in the MSc IDB programme. Students from UZH and ETHZ may enrol upon permission of the module coordinator and space availability. These students should have completed BIO143 or equivalent.
Assessment:	- Written lab report, presentation and labwork. - Final written exam (2 hours), MC questions. Exam on weeks 19-22. - Assessment in English.
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Module Introduction to Market Design (L+E)
03SM22BO0110 / Lecture with Practical Exercises

Description:

General description:
The course discusses the design of markets and other institutions mediating matching and resource allocation, as well as the behavior of participants of such markets and institutions. The markets and institutions covered include: (i) matching markets such as the match between residents and hospitals, matching of refugees and receiving countries and localities, and the operation of match-making websites; (ii) resource allocation in environments in which transfers are not used such as allocation of school seats to students, and kidneys to transplant patients; and (iii) allocation with transfers (auctions), for instance online auctions, electricity auctions, and treasury auctions. The questions studied include: How market participants can optimize their actions (and hence outcome) in such markets? How to design such markets? The course looks at both case studies of markets and economic models of them.

ECTS: 6

Notes:
Lecture and exercise will not be recorded / no podcast.

Learning Outcome:
The objective is to develop an understanding of market institutions and market-like strategic situations, an understanding of the connection between models and modeled reality, and an ability to interpret empirical data.

Target Groups:
Bachelor, 3rd year

Languages of Instruction:
English

Course Materials:	lecture notes and problem sets on OLAT textbook "Market Design. Auctions and Matching" by Guillaume Haeringer, MIT Press.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Marek G. Pycia

Requirements:

Prior Knowledge:	The participants need a good background in mathematics, probability theory and microeconomics.
Assessment:	Assessment: Final exam on 15.6.2026; 10.15-11.45 AM (90 min, on site). An optional classpaper can be substituted for 40% of the final course score. For those who choose to write the optional class paper, its due date is 27.05.2026.
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Module Deterministic Methods in Operations Research (L+E)
03SM22MO0178 / Lecture with Practical Exercises

Description:

General description:
We will cover the fundamental concepts of linear and discrete linear optimization, along with numerous examples of real-world applications. Topics will include: (i) in-depth look at linear programming (LP), covering essential aspects such as modeling, algorithms (simplex and interior-point methods), and sensitivity analysis; (ii) mixed-integer linear programming (MILP) solution methods, including branch-and-bound techniques; (iii) practical modeling with LPs/ MILPs, including analysis of weak vs. strong formulations, and solving these models using modern off-the-shelf MILP solvers; and (iv) an overview of real-world applications, such as supply chain optimization, portfolio optimization, scheduling, assortment optimization, transportation and logistics, network design, and resource allocation, all of which are effectively modeled and solved using LP/MILP-based approaches.

ECTS: 6

Notes:
This module takes place on-site and online (podcast).

Learning Outcome:
The learning goals for students include learning (i) how to identify opportunities for the use of optimization in various application contexts, and then, (ii) how to formulate and solve optimization problems using linear programming & nbsp; and linear mixed-integerprogramming approaches with modern off-the-shelf solvers.

Target Groups:
Master students

Languages of Instruction:
English

Course Materials:	D. Bertsimas, J.N. Tsitsiklis, "Introduction to Linear Optimization"; some topics will be covered using real-life application examples & nbsp;
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Oleg Prokopyev

Requirements:

Prior Knowledge:	Knowledge of (a) linear algebra, (b) calculus, and (c) basic mathematical concepts & nbsp;
Assessment:	The examination of the module will take place onsite. Written examination, open book / notes (80%) on: Thursday, 11.06.2026, 14:00 - 15:30 (90min), 3 Homeworks (20%)
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Module Sustainable Operations Management (L)
03SM22MO0179 / Course

Description:

General description:
In this MSc level course some important principles, models and techniques for the planning, analysis, and design of environmentally and socially responsible operations will be discussed. While business has one true bottom line - profitability- we will study how this can be achieved in an environmentally and socially responsible manner. In particular, we will focus on sustainable generation and distribution of goods and services.

ECTS: 6

Notes:
This module takes place on-site and online (podcast).

Learning Outcome:
Upon successful completion of the course, the student should be familiar with analyzing and incorporating sustainability aspect in operations management decision making processes and supply chain management, together with cost and service aspects. The objectives of the course are:

- Thorough understanding and appreciation of major sustainability concepts and concerns in operations management and supply chain management
- Understanding of various aspects of sustainability in decision making
- Quantitative and qualitative comprehension of selected techniques for incorporating sustainability in operations management
- Following the recent advances and trends in environmentally and socially responsible supply chains
- Ability to judge other work in this area and identify new research directions

Target Groups:
Master's students

Languages of Instruction:
English

Course Materials:	Textbook: Bouchery, Y., Corbett, C. J., Fransoo, J., and Tan, T. (2024), Sustainable Supply Chains: A Research-based Textbook on Operations and Strategy, 2nd edition, Springer, ISBN 978-3-031-45564-3. Also, some scientific articles will be discussed.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Tarkan Tan

Requirements:

Assessment:	- Class participation (50%) - In-class assignments (28%) - 10 cases to be solved and discussed in class. The 7 highest grades each worth 4% will be used in calculating the final grades (meaning that students can miss 3 lectures without any consequences). Requires personal attendance on campus. Each participant will receive a basis grade for attendance, irrespective of the correctness of the answers.

- In-class presentations (15%) - One presentation per student.
Requires personal attendance on campus, peer-assessed.
- Questions & discussions (7%) - questions in advance and after the presentation.
- Final Project (50%)

Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Module BME 335 Regenerative Medicine and Applied Tissue Engineering
07SMBME335 / Course

Description:

General description:
This lecture series will focus on current engineering strategies for different organ systems. The first part of each lecture will offers basic insights into embryology, anatomy and physiology. During the second part we will discuss the current state of the art in organ engineering and current challenges in clinical translation. The organs presented include heart, muscle, ligaments and blood vessels.

ECTS: 3

Notes:
The lecture is held irregularly with a total of 10 lectures and one exam. Compulsory reading and presentation of a summary.

Learning Outcome:
Students who successfully complete this course should be able to explain in detail:

- the concept of tissue engineering using biomaterials, cells and growth factors.
- how the physiological regenative processes can be used in regenerative medicine.
- the current bottlenecks in the cilinical application of tissue engineering.
Key skills By the end of the module, students should be able to:

- better understand and interpret published data in the field of regenerative medicine.
- define interesting research questions in translational medicine for possible future research.

Languages of Instruction:
English

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Daniel Eberli

Requirements:

Prerequisites:	Basic studies completed
Assessment:	- written final exam (Multiple Choice) in English
Grading Scale:	1-6, Half Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Spring Semester)
Booking Deadline/Period:	from We 14.01.2026 10:00 to Tu 10.03.2026 24:00
Cancellation Deadline:	from We 14.01.2026 10:00 to Tu 21.04.2026 24:00
Organisation:	Master's degree program Biomedicine

Module BME 348 Journey into Medical Research
07SMBME348 / Block Course

Description:

General description:
Goal of the block course is to

- teach the whole way of a therapeutic approach from target identification through preclinical and clinical development until market
- give an overview of principles and guidelines of preclinical and clinical research, including research with data and samples
- discuss ethical aspects of research
- teach how to prepare and use key documents such as study plan, patient information, risk analysis, (exercises)

ECTS: 6

Notes:
REGISTRATION FOR BLOCKCOURSES HERE
https://www.mybioportal.uzh.ch

Learning Outcome:
At the end of the module students should be able to:

- elucidate the key elements of preclinical and clinical research and provide examples for their application.
- critically evaluate different study designs
- outline the critical aspects of research projects with data and samples, including recognize data security and data protection issues and propose preventive measures.

Merkmale:

Responsible instructor:	Regina Grossmann

Requirements:

Prerequisites:	Basic studies completed
Assessment:	Selected exercises and a mini symposium will be evaluated and will equally contribute to the final grade. - Exercises: One exercise per lecture series, assessed on individual basis by the responsible lecturers. - Mini Symposium at the end of the course: Students will create a scientific poster derived from a medical research paper and deliver a compelling presentation on the final day of the course. - Students' engagement and motivation will be assessed over the entire course duration. - All in Englisch - graded
Grading Scale:	1-6, Half Grades Given

Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Spring Semester)
Booking Deadline/Period:	not bookable
Cancellation Deadline:	not cancelable

Module BIO 216 Primate origins of human sociality, cognition, and mind
07SMBIO216 / Course

Description:

General description:
This course aims at exploring the current state of the art of research in primate cognition. To do so, we will first provide an overview over the fastly growing field of comparative psychology, identifying cognitive capacities across primates in various social and non-social domains, with data from both the wild and captivity. Based on the comparative approach, we will then discuss various hypotheses of primate cognitive evolution that have been proposed to explain this pattern, and ultimately ask whether and how this approach can help us to understand the evolutionary pathways that have led to our own cognitive capacities, but also more complex features of the human mind including general intelligence, language, normativity and morality.

ECTS: 3

Notes:
This course is also open to psychology students and students from other related fields.

Learning Outcome:
After the course, students should be able to

- Provide an overview of cognitive performance of the different primate taxa across different domains
- Critically evaluate cognitive task performance: -Do tasks really measure what they are supposed to measure? -Can results be explained by alternative mechanisms?
- Summarize the most prominent hypotheses on primate cognitive evolution, and critically evaluate them based on the available body of empirical data
- Explain how data on primate cognitive performance can be used to test hypotheses about the evolution of cognition
- Be able to apply this knowledge to human evolution

Module CHE 748 Introduction to Computational Materials Science and Quantum Chemistry
07SMCHE748 / Lecture with Practical Exercises

Description:

General description:
This course aims at providing students fundamentals in materials science and quantum chemistry. The lectures deals with the theoretical background knowledge for state-of- the-art materials simulations at atomistic-level details and quantum chemical calculations.
Students will acquire knowledge of fundamental theories on which algorithms in computer simulation are based in the context of computational material science and more.
Students are expected to learn fundamentals of computational science simulations in modeling solid, liquid, and solid-liquid nanostructures acquiring the ability to apply these approaches to practical problems in materials science. This course will focus on multiple subjects related to up-to-date research topics. Attendees will acquire a critical thinking in evaluating the pros and cons in modeling solid structure, nanomaterials and surface via a detailed knowledge of main properties of these latter.
The lectures in the field of quantum chemistry will focus on basics from quantum mechanics and an introduction to the Hartree-Fock theory.

ECTS: 2

Learning Outcome:
Understanding and applying the content covered

Target Groups:
Advanced students in Chemistry, Physics and Material Science

Languages of Instruction:
English

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Sandra Luber

Requirements:

Assessment:	Regular presence at the lectures, fulfillment of exercises, oral presentation All parts of the assessment are in English
Grading Scale:	Pass/Fail
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Spring Semester)
Booking Deadline/Period:	from We 14.01.2026 10:00 to Tu 10.03.2026 24:00
Cancellation Deadline:	from We 14.01.2026 10:00 to Tu 21.04.2026 24:00
Organisation:	Department of Chemistry
Offered in:	Spring Semester 2026 Spring Semester 2025

Module BIO 433 Biology of Cancer Treatment: Old and Novel Therapeutic Strategies
07SMBIO433 / Lecture with Practical Exercises

Description:

General description:
In this module, we will discuss the biology underlying cancer treatment along the hallmarks of cancer. We will consider established chemotherapeutic agents, novel biologically oriented targeted therapies as well as diagnostic methods used to guide therapy. All concepts will be illustrated with examples from clinical studies. Students will have the possibility to actively participate in the course and are expected to have passed their basic biology courses.

ECTS: 3

Learning Outcome:
By the end of this module, students should be able to:

a) demonstrate their understanding of the biological mechanisms underlying conventional and novel cancer treatment strategies

b) explain and illustrate the hallmarks of cancer

c) link mechanisms of the different cancer strategies (a) with the hallmarks of cancer (c)

d) Compare different methods for cancer diagnostics in the laboratory and the clinic

e) Evaluate and present clinical trial results based on literature analysis

Key skills
On completion of the module, students should :

a) be able to discuss the possibilities and limitations of cancer treatment strategies

b) be able to sketch the biological pathways underlying the hallmarks of cancer

Module BIO 296 Microbial bioinformatics: sequencing technologies to pathogen analysis
07SMBIO296 / Block Course

Description:

General description:
In this practical course, you will learn about whole genome sequencing (WGS), which provides the ultimate resolution for bacterial comparisons (typing), showing relationships between isolates and the presence of genes encoding antimicrobial resistance and virulence. For clinical applications, WGS of pathogens isolated from patients is the state of the art to detect transmissions, outbreaks, and to optimise antibiotic treatments. The faster the information is available, the better.
This course will teach hands-on real-time nanopore sequencing, compare nanopore data with validated Illumina data, and show participants how to perform comparative genomic analysis, as well as resistance and virulence determinant detection. Methods within wet and dry labs will be compared and discussed, the influence on clinical decision making will be explored, as well as how WGS data can feed back into diagnostics.

ECTS: 6

Notes:
maximale Teilnehmerzahl: 12
DIE ANMELDUNG FÜR DIE BLOCKKURSE ERFOLGT UNTER: https://www.mybioportal.uzh.ch
Kursort:
Institut für Medizinische Mikrobiologie, Gloriastrasse 30/32 GLN Seminarraum und Uni Zentrum KO2-F-173EV

Learning Outcome:
Hands on experience with whole genome sequencing using Oxford Nanopore Technologies methods.
Comparison with Illumina data: theory and practise.
Bioinformatic analysis of resulting data using online tools, custom pipelines and licensed softwares.
Critical comparison of results from different sources.
Interpretation of results in relevant / clinical context.
Development of potential diagnostic assay

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Adrian Egli

Requirements:

Prerequisites:	Basic studies completed
Assessment:	- presentation / discussion rounds: everyone must contribute once (50%) - summary paragraph for each topic of individual research to submit at end of course (50%)
Grading Scale:	1-6, Half Grades Given
Repeatability:	Can be repeated once

Module Master's Thesis
06SM368-MA / Master Paper / MA-Arbeit

Description:

General description:
Die Masterarbeit ist ein wissenschaftlicher Beitrag, der dem Nachweis der Befähigung dient, ein wissenschaftliches Thema selbstständig sowie inhaltlich und methodisch angemessen bearbeiten zu können. Im TAV- Programm ist es möglich, aber nicht zwingend, praktische Arbeitsproben innerhalb einer theoretischen Reflexion mit einem fachwissenschaftlichen Gegenstand zu verbinden.

ECTS: 30

Learning Outcome:
Die Masterarbeit ist der Ausweis über die Fähigkeit, eine stufenspezifische wissenschaftliche Aufgabenstellung innerhalb der vorgegebenen Frist selbstständig zu bearbeiten und adäquat darzustellen. Die Studierenden sind in der Lage, relevante wissenschaftliche Literatur adäquat zu recherchieren, zu diskutieren sowie systematisch und korrekt zu zitieren. Sie vermögen eine wissenschaftliche Arbeit zu konzipieren und durchzuführen, in der sie sich kritisch mit der vorhandenen Forschung auseinandersetzen und eine eigenständige Perspektive auf den gewählten Gegenstand entwickeln. Sie können je nach gewählter Themenstellung einen Anwendungsbezug zum fachwissenschaftlichen Gegenstand herstellen und so Praxis mit Theorie verbinden.

Module Literatur im Bildungswesen
06SM360-533 / Module

Description:

General description:
Das Modul eröffnet vertiefende Einblicke in die Theorie ebenso wie in die konkrete Praxis der Vermittlung von Literatur im Bildungswesen, ausgehend von der theoretischen Frage, welches überhaupt die unverzichtbaren Funktionen literarischer Texte in Bildungsprozessen sein könnten: Literatur als grundlegend alteritäres, vom vertrauten Sprachgebrauch abweichendes Ereignis mit offenen Konnotationsräumen, und Ambiguitäten wird dabei im Modul sowohl theoretisch begründet wie auf die unterschiedlichen Möglichkeiten der praktischen Umsetzung in didaktischen Settings, insbesondere auch in digital gestützten, hin erprobt. In Kooperation mit bestehenden Bildungsinstitutionen und - anlässen wie: Mittelschultag des Deutschen Seminars, Zentrum für literarische Gegenwart, affiliierten Mittelschulen, DaF-Einrichtungen für Migrant:innen und weiteren Bildungseinrichtungen, eröffnet sich für die Studierenden des Moduls die Möglichkeit, im Rahmen ihres Leistungsnachweises erste eigene Praxiserfahrungen im Literaturunterricht zu sammeln.

ECTS: 15

Learning Outcome:
Die Studierenden gewinnen im Modul «Literatur im Bildungswesen» ein Überblick über die unterschiedlichen Einsatzmöglichkeiten und Funktionen, welche die Vermittlung von Literatur in Bildungsprozessen haben kann. Sie entwickeln ein theoretisches Verständnis für die Spezifik des Gegenstands «Literatur» und für seine gesellschaftlich Rahmenbedingungen, um davon ausgehend sowohl die Chancen als auch die Herausforderungen der Literaturvermittlung im Bildungswesen erkennen und begründen zu können. In Zusammenarbeit mit verschiedenen Bildungseinrichtungen erproben sie selbst didaktische Strategien und Methoden in der praktischen Umsetzung, die sie begleitend theoretisch reflektieren. Das Modul ermöglicht hierdurch auch die Vernetzung der Studierenden auf den verschiedenen Tätigkeitsfeldern der Literaturdidaxe und Literaturvermittlung.

Module Elective Module: The Musculoskeletal System: Treatment pathways of pain in and around the bones
04SM22MAS006 / Sonstiges

Description:

General description:
Der Bewegungsapparat ist täglich und fast ununterbrochen im Einsatz, Verletzungen und Abnutzungserscheinungen schränken die Lebensqualität der Patienten stark ein. Die moderne Medizin verfügt über viele diagnostische und therapeutische Möglichkeiten, welche für jeden Patienten individuell zusammengestellt werden sollen. So entsteht ein individueller Behandlungspfad. In diesem Modul vertiefen die Studierenden ihr Wissen und ihre Skills um den Bewegungsapparat und lernen, ein ganzheitliches Konzept zur Behandlung dieser in unserer Gesellschaft häufig vorkommenden Schmerzen zu erstellen. Sie erleben den Umgang mit Fachexperten, im akademischen interprofessionellen Umfeld und begleiten diese in der klinischen Versorgung von Patienten in der Form von Bedside Teachings, ambulant, stationär und im intensivmedizinischen Setting. Die Studierenden erlernen Grundlagen, sowie erweiterte Skills in der Sonographie und begleiten Fachspezialisten wie z.B.
interventionelle Schmerztherapeuten und Chiropraktiker im Alltag.

ECTS: 4

Learning Outcome:
1.) Die Studierenden erkennen häufige orthopädische Erkrankungen, Verletzungsmuster und Gründe für Schmerzen, nach klinischem Untersuch und können korrekte weitere diagnostische und therapeutische Massnahmendefinieren.
2.) Sie vertiefen und erweitern ihr Wissen und ihre Skills in der erweiterten Schmerzdiagnostik (inkl. Einblick in die genetische Prädisposition und ""personalized medicine"") und Schmerztherapie, sowie in der diagnostischen und interventionellen Sonographie.
3.) Die Studierenden vertiefen ihr Wissen in der Anatomie und den Krankheitsbildern des Bewegungsapparates, sowie ihre Skills in der körperlichen Untersuchung.
4.) In praktischen Übungen werden grundlegende praktische Fähigkeiten in der Sonographie erworben und vertieft.
5.) Die Studierenden erstellen einen Treatment Pathway, ein interdisziplinäres Behandlungskonzept, welches sämtliche angegliederten Fachdisziplinen und Fachspezialisten einbezieht (Orthopädie, Rheumatologie, Schmerzspezialisten und Anästhesie, Intensivmedizin, Physiotherapie und chiropraktische Medizin).
6.) Die Studierenden erlernen und erleben den Umgang im interprofessionellen Team, sowie den Umgang zwischen Patienten und Fachpersonen im Rahmen der klinischen Arbeit.

Module Elective Module: Nutrition Medicine
04SM22MAS007 / Sonstiges

Description:

General description:
Ernährungsphysiologie, Abklärung Ernährungszustand Ernährungszusammensetzung - Makro-, Mikronährstoffe Ernährung in Schwangerschaft/ Stillzeit, im Alter, bei Sport Ernährung in Onkologie, lntensivemdizin, perioperativ und bei Stoffwechselkrankheiten Kurzdarmsyndrom
Künstliche Ernährung (enteral, parenteral)

ECTS: 4

Learning Outcome:
Studenten können nach dem Mantelstudium die Physiologie der Ernährung erklären, die Komponenten einer gesunden Ernährung (Makro- und Mikronährstoffe) aufzählen, den Ernährungszustand eines Patienten mit geeigneten Mitteln evaluieren, die Bedeutung der Ernährung in spez.
Lebensphasen (z.B. Schwangerschaft, Alter) erläutern, Ernährungsinterventionen bei Krankheiten (z.B. Krebs, lntensivmedizin etc.) beschreiben, Produkte der künstlichen Ernährung (enteral, parenteral) nennen und erklären.

Languages of Instruction:
Deutsch

Course Materials:	Zeitgerechte Publikation der Hand-Outs auf VAM Aufschaltung der zu besprechenden Publikationen auf VAM Empfehlung Online Lehrliteratur UZH (z.B. Thieme "Ernährungsmedizin")
Merkmale:	
Responsible instructor:	Philipp Gerber

Requirements:

Assessment:	Pro Doppelstunde (je nach Anzahl Studenten auch pro Lektion oder pro Vormittag) wird jeweils ein Student in einem Kurzreferat (10min) eine durch den Dozenten vorgegebene Studie vorstellen und kritisch kommentieren, jeder Student wird diesen Leistungsnachweis erbringen müssen.
Grading Scale:	Pass/Fail
Repeatability:	Can't be repeated

Organisation:

Offer pattern:	1 Semester (Every Semester)
Request period:	from Mi 14.01.2026 10:00 to Di 27.01.2026 24:00

Module Elective Module: Implementing research findings into health care: The science and the praxis
04SM22MAS011 / Sonstiges

Description:

General description:
Course description
Implementation science is the scientific study of methods to promote the systematic integration of research findings and evidence-based practices into care delivery and the de-integration of low value care. Implementation science is a newer field of study that addresses the know-do gap in health care and builds on the insight that proving effectiveness of an innovation (practice, model of care, intervention, treatment modality etc.) does not automatically translate into effective adoption in clinical practice.
This course will provide tools and methods to address complex implementation challenges that arise in clinical practice in order to ultimately improve the quality of health care practice. This course will enable medical students to understand the consequences of poor implementation, reduce research waste, and close translational gaps that exist between clinical research and routine care.
Students should have basic knowledge of research methods (taken at least 1 research course) to benefit from this course.

ECTS: 4

Module Elective Module: Manual medicine in theory and practice
04SM22MAS013 / Sonstiges

Description:

General description:
Erwerb und Vertiefung von Kenntnissen in funktioneller Anatomie, Biomechanik und Schmerzgenese anhand von typischen klinischen Fallbeispielen Training der Palpationsfähigkeit und Untersuchungsalgorithmen als Basisfähig-keit für
Diagnostik von Funktionsstörungen des Bewegungsapparates Vermittlung von manualmedizinischen/ chiropraktischen Untersuchungstechniken
Einordnung von ersten exemplarischen Funktionsstörungen des Bewegungsap- parates in den klinischen Kontext

ECTS: 4

Learning Outcome:
1. Die Studierenden kennen die Grundlagen der Manuellen Medizin.
2. Die Studierenden erarbeiten vertiefte Kenntnisse in der funktionellen Anatomie und Biomechanik
3. Durch einen Schwerpunkt von praktischen Übungen werden die palpatorischen Fähigkeiten der Studierenden geschult.
4. Auf Grund von Untersuchungsbefunden können erste Bezüge zu häufigen Pathologien des Bewegungsapparates hergestellt werden.

Languages of Instruction:
Deutsch

Course Materials:	Lernunterlagen, z. B. Folien, Pflichtlektüre oder zusätzliche andere Unterlagen: Als Lernunterlagen dienen einerseits die Folien zu Grundlagen der manuellen Medizin und den Untersuchungstechniken wie im Kurs verwendet. Bzgl. der anatomischen Grundlagen können entsprechende anatomische Lehrbücher (Sobotta Atlas o.ä.) verwendet werden.
Merkmale:	
Responsible instructor:	Nora Wieloch

Requirements:

Assessment:	Der Leistungsnachweis erfolgt durch das Überprüfen der anatomischen Grundlagen der verschiedenen Untersuchungsschwerpunkte.

Module MAT 702 Elements of Geometry
07SMMAT702 / Lecture with Practical Exercises

Description:

General description:
This foundational course will provide an introduction to selected topics in geometry.
In the first part, taking as a starting point the familiar setting of curves and surfaces, basic concepts in differential geometry will be introduced (e.g. differential surfaces/manifolds, Riemannian metrics, fundamental forms, curvature, geodesics). Geometry and topology of surfaces will be linked through the Gauss-Bonnet theorem.
The second part will extend these ideas to higher dimensions.

ECTS: 9

Notes:
The first part of this course covers a good part of the material which was previously in the 'Geometrie/Topologie' course, which now focuses on Topology.

Mathematical Field: Topology/Geometry

Learning Outcome:
Understanding of fundamental concepts in geometry.

Target Groups:
BSc and MSc students

Languages of Instruction:
English

Course Materials:	- L. M. Woodward and J. Bolton, A First Course in Differential Geometry, Cambridge University Press, 2019 - M. P. do Carmo, Riemannian Geometry, Birkhäuser, 1992 - B. O'Neill, Elementary Differential Geometry, Academic Press, 2006
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Alberto Cattaneo

Requirements:

Prior Knowledge:	Analysis I+II , Linear Algebra, elements of Topology
Assessment:	Written exam There will be no testat (no mandatory exercises) Language of Assessment: English
Grading Scale:	1-6, Half Grades Given
Repeatability:	Can be repeated once

Module M3L 620 Scientific writing in English for doctoral students
07SMM3L620 / Block Course

Description:

General description:
This two-day block course is aimed at early doctoral students within the first two years after starting their doctorate. It is an intensive course covering all central aspects of writing scientific papers in English to equip students with all necessary insights and skills to write their first scientific paper. The course is particularly tailored for doctoral students with a technical background, like engineering, or computer science. Topics covered are academic integrity, scientific writing, scientific English, giving and receiving feedback, information research, project and time management. The course is designed as an interactive writing laboratory, where students give each other feedback and support.

ECTS: 1

Notes:
Between the two days of teaching, the doctoral students give each other feedback in small groups based on their own texts.
The course takes place at ETH Zurich Zentrum, ML E 13

Learning Outcome:
At the end of the 2-day course, the participants know how to efficiently write good scientific texts in fluent English thanks to their knowledge of methods, tools and guidelines.

Target Groups:
Doctoral students UZH: Computational Science PhD Programm and Data Science PhD Programm ETHZ: ETH-D-BAUG PhDs

Languages of Instruction:

Module Music, Sound, and Religion in South Asia
06SM721o137 / Module

Description:

General description:
This course examines music and sound as a means to understanding South Asian religious life. Music and sound are ways of experiencing divinity and play important roles in producing social structure. By extension, religio-musical performances are vital to South Asian modernity, politics, and social identities. This course engages closely with ethnographic themes in anthropology, sound studies, and ethnomusicology. Upon completion, students will be able to demonstrate knowledge of historical, cultural, and religious contexts of music in South Asia, including key ideas, texts, genres, and practices. This course does not require any prior musical knowledge.

ECTS: 6

Learning Outcome:
Upon course completion, students will be able to:

1. Demonstrate knowledge of historical, cultural, and religious contexts of music in South Asia, including key ideas, texts, genres, and practices.
2. Apply basic skills in observing and analyzing musical performances.
2.
Carry out a structured research project involving an abstract, literature review, and draft.
3. Collaborate with and present work to colleagues.

Languages of Instruction:
English

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Christopher John McGuinness

Requirements:

Prerequisites:	It is recommended that all modules of the introduction to Social Anthropology be taken first.

Module Anthroplogy and Science-Fiction
06SM721o321 / Module

Description:

General description:
In this seminar, we explore relationships and overlaps between anthropology and science-fiction as both a literary genre and a form of imagination. We engage with anthropological scholarship on science- fiction, which includes analyses of concrete media products (novels, films, comics etc.), ethnographic studies on "lived sci-fi" (e.g., UFO movement, transhumanism), and a growing interest in the future within the anthropology of time. The seminar also asks more general questions about the complex relationship between ethnographic and literary / fictional writing. We will critically explore the role of the "unknown / unknowable" as well as imaginations of "alterity", "diversity", or "alienness" in ethnographic texts and science-fiction.

ECTS: 6

Learning Outcome:
Focusing on science-fiction as a form of popular culture, students gain insight into a range of thematic subfields within anthropology: time (future), literature, Science and Technology Studies.
Participants of the seminar practice to apply anthropological perspectives to the analysis of media and popular culture products.
The seminar also aims to provide critical tools for students to reflect on the nature of ethnographic data and representation as well as the boundaries between science and fiction.

Languages of Instruction:

Module Virology
05SM.335_vr / Course

Description:

General description:
In Virologie I werden die Prinzipien der Allgemeinen Virologie vermittelt. Die Studierenden lernen was ein Virus überhaupt ist, wie es sich im Umfeld der Zelle, seines Wirtes, bzw. in einer Wirtspopulation verhält. In Zweiergruppen wählen die Studierenden zu Beginn des Semesters eine spezifische Prüfungsfrage aus einem Katalog aus und beantworten diese im Laufe des Semesters im Rahmen eines Kurzvortrags.

In Virologie II befassen sich die Studierenden mit spezifischen Virusinfektionen bei Tieren. Schwerpunkte sind Aetiologie, Epidemiologie, Pathogenese, Immunantwort, Diagnostik, prophylaktische und therapeutische Möglichkeiten sowie gegebenenfalls staatliche Bekämpfungsmassnahmen.

ECTS: 5

Learning Outcome:
Virologie I

- Prinzipien der Allgemeinen Virologie kennen und verstehen
- Grundlagen der Virus-Zell-Interaktion, der Virus-Wirts- Interaktion und der Virus-Wirtspopulations-Interaktion verstehen
Virologie II

- Kenntnis der Besonderheiten spezifischer Virusinfektionen bei Haus- und Nutztieren

Module Anatomy applied
05SM.345_aa / Lecture with Practical Exercises

Description:

General description:
Die angewandte Anatomie der Haustiere wird anhand Demonstrationen geübt.
Dazu gehören Situs-Demonstrationen der Brusthöhlenorgane und der Verdauungsorgane.

ECTS: 2

Learning Outcome:
Die Studierenden kennen die Topographie der Brusthöhlenorgane bei den verschiedenen Haussäugetieren.

Die Studierenden kennen die Topographie der Bauchhöhlenorgane bei den verschiedenen Haussäugetieren.

Merkmale:

Module Epidemiology, Biostatistics
05SM.355_eb / Course

Description:

General description:
In diesem Kurs werden vier Kernelemente vorgestellt: Biostatistik, evidenzbasierte Veterinärmedizin, Epidemiologie und One Health. Das Verständnis grundlegender Statistiken ist für die veterinärmedizinische (epidemiologische) Forschung von zentraler Bedeutung. Daher bietet dieser Kurs eine Einführung in die Biostatistik. In diesem Kurs werden die Konzepte der evidenzbasierten (Veterinär-)Medizin vorgestellt, die als gewissenhafte, explizite und umsichtige Nutzung aktuell bester Evidenz bei Entscheidungen über die Pflege von Tieren definiert wurde. Die Epidemiologie wird am häufigsten als Instrument zur Untersuchung der Verbreitung eingesetzt der Determinanten von (Tier-)Krankheiten. Methoden zur Untersuchung dieser Krankheitsdeterminanten und zur Diagnose von Krankheiten bei Individuen und Tierpopulationen werden zusammengefasst. Die Prinzipien des One Health-Konzepts werden anhand relevanter Beispiele erläutert.

ECTS: 3

Learning Outcome:
Studierende sind in der Lage...

-Definition und Bedeutung der Epidemiologie mit Unterdisziplinen und Anwendungsgebieten mit Beispielen zu erklären

-Konzept und die Anwendungen der evidenzbasierten Medizin definieren und anwenden können

-Kriterien für eine systematische kritisch Beurteilung von Publikationen und die wesentlichen Elemente von Systematischen reviews und Metanalysen zu erklären.

-Masszahlen und Begriffe der Krankheitshäufigkeit (Prävalenz, kumulative Inzidenz, Inzidenzrate, Mortalität, Letalität) definieren und bestimmen können

-Masszahlen für die Bestimmung von Risiko/protektiven Faktoren (Riskratio, Oddsratio), definieren und anwenden können

-Kausalität in der Epidemiologie zu erklären und diese von statistischer Signifikanz und epidemiologischer Assoziation abzugrenzen

-Definition, Ziele und Bedeutung der wichtigsten Studientypen (Querschnittsstudie, Fall-Kontroll-Studie, Kohortenstudie, Experimentelle / Klinische Studie) mit ihren Masszahlen zu erklären

-Die wichtigsten Fehlerquellen und Verzerrungen (Bias) bei der Durchführung und Auswertung von epidemiologischen Studien zu erklären

-Im Rahmen von klinischen Studien geeignete Verfahren zur Randomisierung und zum Blinding vorschlagen und begründen

-Qualitative und quantitative Ansätze in Studien zu differenzieren und deren Vor- und Nachteile zu nennen

-Die wichtigsten Elemente einer Fragebogen-Studie (Entwicklung, Validierung, Anwendung, Follow-up, Datentransfer und Auswertung) anzuwenden Konzept des Hypothesentestens erklären und anzuwenden

-Verschiedene Datenformate und Wahrscheinlichkeitsverteilungen beschreiben können

-Explorative/deskriptive Datenauswertung anwenden

-Parametrische und Nichtparametrische Tests für zwei und mehr Gruppen anwenden und erklären können

-Lineare und Logistische Regression und Survival analysis anwenden und Ergebnisse interpretieren können

-Sensitivität, Spezifität und prädiktive Werte diagnostischer Tests erklären und bestimmen zu können

-Prinzipien einer ROC-Kurve und Grenzwerte/cutoffs erklären zu können

-Das Konzept von Verwendung verschiedener diagnostischer Tests (Gold Standard, serielles und paralleles Testen) zu erklären

-Das Vorgehen bei der Ausbruchsuntersuchung an einem Beispiel systematisch anzuwenden

-Die Prinzipien des One Health Ansatzes an Beispielen zu erklären

-Den Mehrwert eines One Health Ansatzes als Grundlage der nachhaltigen Entwicklung und deren

-Das Burden of Disease Konzept zu erklären

-Grundlagen der Betriebswirtschaftslehre und der Tiergesundheitsökonomie zu erläutern

Module Endocrinology, Metabolism
05SM.370_en / Lecture with Practical Exercises

Description:

General description:
Der Organblock Endokrinologie fasst die Struktur, den Aufbau, die Funktion und die Krankheiten der endokrinen Drüsen zusammen. Die Studierenden erhalten Kenntnisse über die morphologischen und funktionellen Aspekte der Hormondrüsen im Gehirn, der Schild- und Nebenschildrüse, der Nebenniere und des endokrinen Pankreas.

ECTS: 3

Learning Outcome:
Neben dem Verstehen der Wirkung und der Interaktion der verschiedenen Hormone sind die Studierenden in der Lage, die Störungen in der Funktion endokriner Drüsen zu erkennen, die daraus entstehenden klinischen Bilder zu erläutern, und die entsprechenden Therapieprinzipien und pharmakologischen Therapien abzuleiten. Dazu erwerben sie auch eine genaue Kenntnis der Methoden der Analytik und der Präanalytik.

Module Reproduction, Mammary Gland
05SM.360_gem / Lecture with Practical Exercises

Description:

General description:
Der Organblock gliedert sich in die Organsystemen der Fortpflanzung, weiblicher und männlicher Geschlechtsapparat sowie Milchdr se.

Sie befassen sich mit den morphologischen und physiologischen Grundlagen Geschlechtsorgane und deren Pathophysiologie. Es werden Trächtigkeits- und Geburtsstörungen thematisiert.

ECTS: 8

Learning Outcome:
Am Ende des Blocks kennen Sie die Morphologie und Physiologie der Fortpflanzungsorgane und der Milchdr se, sowie die Grundz ge der Entwicklung dieser Organe.
Sie können die Grundlagen der Sterilitäts- und Graviditätsdiagnostik sowie ausgewählte biotechnischer Verfahren in Theorie und Praxis erklären.
Sie wissen über die wichtigsten Aspekte der Diagnose, Therapie und Prophylaxe von Erkrankungen der weiblichen und männlichen Geschlechtsorgane sowie der Milchdr se Bescheid.

Module Central Nervous System, Sensory Organs
05SM.350_zsi / Lecture with Practical Exercises

Description:

General description:
Die Vorlesungen zum Organblock ZNS und Sinnesorgane vereinen die Disziplinen Physiologie, Anatomie, klinische Neurologie und Ophthalmologie aller Haustiere, Bildgebung, Pharmakologie und Pathologie zu einem vernetzten Gesamtbild, das den Studierenden sowohl ein solides theoretisches Wissen als auch erste praktische Fähigkeiten vermitteln soll. Aufbauend auf anatomische und physiologische Grundlagen wird das Handwerk der klinischen Fächer vermittelt und die Anwendung der diagnostischen Werkzeuge aufgezeigt. Die Lehre der Behandlungsprinzipien wichtiger neurologischer und ophthalmologischer Erkrankungen soll den Studierenden erste Schritte in die kurative Tätigkeit ermöglichen. Die pathologischen und histologischen Bilder zu den verschiedenen Krankheitsbilder sollen das Verständnis für ihre Ursachen und Entstehung fördern und auf diesem Weg zu einer professionelle Denkweise führen.

ECTS: 7

Learning Outcome:
Die Studierenden sollen die Grundlagen der jeweiligen Disziplin erlernen, deren praktischer Anwendung und Diskussion bei spezifischen Fragestellungen. Am Ende des Organblocks sollen die Studierenden über ein breites Wissen und praktische Kompetenzen in den besprochenen Disziplinen des Nervensystems und der Sinnesorgane verfügen.

Module Propaedeutics Practically
05SM.375_pro / Klinischer Kurs

Description:

ECTS: 4

Learning Outcome:
- Erheben der Anamnese (Erfragen des Problems, Charakterisierung des Problems, Erfragen des allgemeinen Gesundheitszustandes und der Lebens- bzw. Haltungsverhältnisse, Fragen nach Bestandesproblemen)
- Aufnehmen des Signalements
- Allgemeinbeurteilung: Verhalten, Ernährungszustand, Körperbau
- Untersuchung der Lymphknoten und der Schleimhäute
- Verabreichung von Medikamenten
- Allgemeiner Untersuchungsgang
- Durchführung der im Praxislabor relevanten Untersuchungen

Module Vetsuisse Clinic Days
05SM.385_kt2 / Klinischer Kurs

Description:

General description:
Studierende absolvieren pro Studienjahr 4 mal 1/2 Tage in den Kliniken und Instituten der Vetsuisse-Fakultät. Sie können wählen, wo sie die Kliniktage absolvieren möchten, wobei mindestens die Hälfte der Kliniktage im klinischen Bereich absolviert werden muss.

ECTS: 1

Learning Outcome:
Die Studierenden können sich mit dem Arbeitsalltag einer Tierärztin und eines Tierarztes in der Praxis oder Klinik oder im Labor der Vetsuisse- Fakultät auseinandersetzen. Sie lernen die Kliniken, Abteilungen und Institute kennen. Sie erkennen die praktische Umsetzung von Vorlesungsstoff. Sie können Fragen stellen und Fragen beantworten. Sie können Propädeutik üben.

Module PHY 371 Machine Learning for the Sciences
07SMPHY371 / Lecture with Practical Exercises

Description:

General description:
Machine learning algorithms enjoy a large and increasing number of technological applications. They help us to extract relevant information from big datasets and transform the way we interact with machines. In the sciences, machine learning emerges as a more and more routinely used tool with applications in physics, geography, medicine, chemistry, biology and more. This course offers an introduction to the basic concepts, including supervised and unsupervised learning with neural networks and methods to make the learned results interpretable. The material will be presented with scientific research applications in mind, where data has often very peculiar structure and quantitative accuracy is paramount. In the exercise class, examples will be implemented with openly available machine learning libraries.

ECTS: 6

Learning Outcome:
The goal is to become familiar with basic machine learning techniques for scientific applications, through lectures and practical programming exercises.

Languages of Instruction:
English (course and exam)

Merkmale:

Responsible instructor:	Jan Dirk Wegner

Requirements:

Prior Knowledge:	basic knowledge of linear algebra and analysis, good Python programming skills
Assessment:	graded semester performance via programming homework and exercises
Grading Scale:	1-6, Half Grades Given
Repeatability:	Can be repeated once

Module Elective Module: Optimizing Digital Therapeutics for Women’s Health
04SM22MAS014 / Sonstiges

Description:

General description:
Content
The following topics are covered:
1.   Introduction to precision digital therapeutics (motivation, definition, application areas)
2.   Introduction to women’s health (gap, challenges, opportunities)
3.   Introduction to design and evaluation frameworks for digital therapeutics
4.   Introduction to optimization strategies for digital therapeutics and corresponding study designs
5.   Workshop on optimization trial designs (in groups)
6.   Design of an optimization trial (in groups)
7.   Technical implementation of an optimisation trial for a smartphone-based and chatbot-delivered digital therapeutic (in groups)
8.   Data collection and analysis (in groups)
9.   Presentation and discussion of optimisation trial results (in groups)

Methodology
The module consists of live input sessions with interactive group exercises and discussions. Complementary online learning material is provided. Additional coaching sessions are offered to support the groups with the design of their optimization trials in women’s health, the technical implementation of the study designs and with the preparation of the final group presentations. A design and trial service for precision digital therapeutics will be used for the implementation of the optimization trial. Programming skills are not required.

Objectives
1.   Students understand design and evaluation frameworks for digital therapeutics.
2.   Students can explain optimization strategies for digital therapeutics.
3.   Students can draft study designs for optimisation trials.
4.   Students can implement an optimisation trial for a smartphone-based digital therapeutic.
5.   Students can critically assess the results of an optimisation trial.
6.   Students can discuss the opportunities and challenges of optimisation trials for digital therapeutics.
7.   Students understand the main challenges within Women’s Health and can draft digital therapeutics to tackle them.

Module MAT 636 Methods in Analysis
07SMMAT636 / Course

Description:

General description:
We study tools that play a major role in modern analysis. Topics to be discussed include: integral inequalities (Young inequality, Hardy-Littlewood-Sobolev inequality), Fourier transform, distributions, Sobolev spaces, Sobolev inequalities, Sobolev embeddings, potential theory, elliptic regularity, calculus of variation (direct method), Weyl law and semiclassical approximations

ECTS: 6

Notes:
Mathematical Field: Analysis

This is the Module to be booked by MSc & BSc Students PhD students please book MAT636DP

Target Groups:
Mathematics bachelor students 2nd and 3rd year and master students

Languages of Instruction:
English

Course Materials:	The basic reference for this class is the book: E.H. Lieb, M. Loss. Analysis. Second Edition. Graduate Studies in Mathematics, AMS.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Benjamin Schlein

Requirements:

Prerequisites:	Analysis 1,2,3 Previous knowledge of Functional Analysis may be useful but is not necessary.
Assessment:	Oral Exam Language of Assessment: English
Grading Scale:	1-6, Half Grades Given
Repeatability:	Can be repeated once

Module CHE 815 Research Seminar in Chemical Biology
07SMCHE815 / Forschungsseminar

Description:

General description:
Talks of PhD students about their own research

ECTS: 1

Learning Outcome:
current research of the Institute, lecture techniques

Target Groups:
scientific co-workers

Languages of Instruction:
english

Merkmale:

Responsible instructor:	Pablo Rivera Fuentes

Requirements:

Assessment:	report on own research, usually as talk
Grading Scale:	Pass/Fail
Repeatability:	Can be repeated as necessary

Organisation:

Offer pattern:	1 Semester (Every Semester)
Booking Deadline/Period:	not bookable
Cancellation Deadline:	not cancelable
Organisation:	Department of Chemistry
Offered in:	Fall Semester 2026 Spring Semester 2026 Fall Semester 2025 Spring Semester 2025 Fall Semester 2024 Spring Semester 2024 Fall Semester 2023 Spring Semester 2023

Module BME 646 Research in Orthopedic Computer Science
07SMBME646 / Forschungsseminar

Description:

General description:
Recent publications and research projects from the fields of digital technologies in surgery (Augmented Reality, AI, surgical robotics), as well as other related machine learning computer vision disciplines, are presented and discussed by the attendees.

ECTS: 2

Notes:
Registration by email to rocs@balgrist.ch

Learning Outcome:
Students will be updated with cutting edge developments in the field of computer-aided surgery, both by actively presenting papers and by participating in a group discussion. Discussions will enable them to reflect on pros and cons of selected state-of-the-art methods, and offer guidance for the presentation of own research results at major computer science conferences.

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Philipp Fürnstahl

Requirements:

Prerequisites:	Interest in the field of computer-aided surgery, prior exposure to computer vision and machine learning is helpful.
Assessment:	Oral presentations with active participation.
Grading Scale:	Pass/Fail
Repeatability:	Can be repeated as necessary

Organisation:

Offer pattern:	1 Semester (Every Semester)
Dates/Times/Deadlines:	The course is taking part also during the "non-lecture" time of the semester.
Booking Deadline/Period:	not bookable
Cancellation Deadline:	not cancelable
Organisation:	Department of Quantitative Biomedicine
Offered in:	Spring Semester 2026 Fall Semester 2025 Spring Semester 2025 Fall Semester 2024 Spring Semester 2024 Fall Semester 2023

Module Dermatochirurgische Fortbildung für UnterassistenInnen
04SMDER22001 / Seminar

Description:

ECTS: 1

Notes:
Kontakt-Email: christian.greis@usz.ch

Learning Outcome:
Die Veranstaltung soll Studierenden im fortgeschrittenen Semester die Dermatochirurgie näherbringen.
In diesem Rahmen werden praktische dermatochirurgische Fälle vorgestellt, besprochen, sowie auch typische Krankheitsbilder der Dermatochirurgie aufgezeigt.
Inhaltsschwerpunkte:

- Indikationen in der Dermatochirurgie
- Klassische Nahttechniken
- Klassische Verschlusstechniken (inkl. Lappenplastiken)
- Praktische, interaktive Fallbesprechungen
- (Nahtkurse bei Präsenz)

Target Groups:
Studierende im Masterstudium

Merkmale:

Responsible instructor:	Peter Schmid-Grendelmeier

Requirements:

Grading Scale:	Pass/Fail

Organisation:

Module ESS 812 Sustainable management of biological diversity
07SMESS812 / Lecture with Practical Exercises

Description:

General description:
ESS 812 Sustainable Management of Biological Diversity explores genetic resources as key biodiversity variables and their significance for both society and natural systems. Beginning with a look at biological materials essential to human use, the course delves into various genetic resources, examining management challenges, and sustainable practices needed for long-term conservation. Emphasis is placed on strategies vital for protecting biodiversity, such as conservation areas and responsible resource use, particularly within agriculture. We'll also cover fair benefit-sharing of genetic resources including biopiracy practices, societal issues surrounding biotechnology and genetic modification and methods for quantifying genetic diversity. This course will challenge students to critically assess global policies, like the Nagoya Protocol, and consider innovative approaches to preserve biodiversity for a resilient future.

ECTS: 2

Notes:
The Sustainable Development Goals (SDGs (https://sdgs.un.org/goals)) are a collection of 17 global goals interacting with each other, which are designed to be the blueprint to achieve a better and more sustainable future for all. The 2030 Agenda for SDGs is adopted by all United Nations Member States.

These SDGs are covered in this module: 2; 12; 14 & 15

Learning Outcome:
Students will be able to:

- Understand genetic resources and their importance
- Analyze human impact on biodiversity and genetic resources
- Evaluate sustainable management practices
- Discuss ethical and legal aspects of genetic resources
- Collaborate with peers to explore and present on case studies related to biodiversity management.

Target Groups:
6 Sem. Bachelor and Master Students in Earth System Sciences
6 Sem. Bachelor and Master Students in Geography Bachelor and Master Students in Biodiversity

Languages of Instruction:
English

Course Materials:	Selected readings (peer-reviewed papers), lecture slides
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Sofia van Moorsel

Requirements:

Prior Knowledge:	None
Assessment:	50% group presentation, 50% written exam. Language of assessments: English

Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Module MINTerlink: Formation of Knowledge in STEM Fields in Primary and Secondary School
06SM090MINT / Module

Description:

General description:
Das Projekt MINTerlink wurde lanciert, um einen Wissensaustausch zwischen Lehrdiplomstudierenden in den MINT Fächern (Mathemathik, Naturwissenschaften, Informatik) und Volksschullehrpersonen aller Stufen in den MINT-Fächern zu etablieren. Dabei absolvieren Lehrdiplom- Studierende ein vorbereitendes Blockseminar um dann anschliessend mit einer Lehrperson von der Volksschule gemeinsam auf der Primar- oder Sekundarstufe zu unterrichten. Diese Assistenzzeit beinhaltet in der Regel einen Einsatz von 10 bis 16 Lektionen in der Klasse. Die Veranstaltung findet gemeinsam mit der ETHZ statt.

ECTS: 2

Notes:
Das Modul ist geeignet für Lehrdiplomstudierende mit den Fächern Mathematik, Informatik, Biologie, Chemie, Physik, Geographie. Dieses Modul kann nur nach erfolgreichem Abschluss von Modul 222PPM "Pädagogische Psychologie" belegt werden. Dozierende: Ursina Markwalder, Kai Niebert. Die Modulbuchung erfolgt über die ETH, dazu ist eine Registrierung bei der ETH erforderlich. http://www.ethz.ch/de/studium/non-degree-angebote/fachstudierende.html

Merkmale:

Responsible instructor:	Kai Niebert

Requirements:

Assessment:	Portfolio: Mündliche, schriftliche und praktische Übungen. Das Modul wird als bestanden bewertet, wenn alle Elemente des Portfolios bestanden sind. ---

Module Managing Digital Innovation (S)
03SM22MO0187 / Seminar

Description:

General description:
Digital technologies have fueled numerous innovations. Thereby, digital technology is imperative, but not sufficient. Largely, it will fall on firms to transform digital technologies into innovative products and services. Thereby, digitalization has been changing not only what firms innovate, but also how they manage their innovation. Profound changes to firms' innovation strategies, processes, and competencies are required to identify and seize opportunities, and to respond to challenges posed by the digitalization.
This seminar introduces how firms cope with and respond to the chances, changes, and challenges, that digital technologies bring to firms' innovation activities.

ECTS: 3

Notes:
1. Admission: Admission to the seminar is limited. To apply for participation book this seminar through the module booking system (https://studentservices.uzh.ch/uzh/launchpad). Please upload to the booking system a short statement indicating your interest in the seminar, your CV and your last transcript of records by Ende Modulbuchungsfrist FS 2026 at the very latest.
Participant confirmations will be sent out within one week after that deadline. Reading material and all documents to this seminar will be shared via email.

2. Introductory session: (19.02.2026 14:00 – 15:45):
This session will provide an overview of its content, details on organization and grading, and guidelines on how to prepare the term papers and presentations. Term paper topics will be assigned to student teams of two based on their preferences.

3. Paper development: Student teams of two write a term paper.

4. Consultation for paper development: Individual appointment per team by arrangement (week of 02.03. – 06.03.2026)
5. Midterm presentation: 19.03.2026, 14:00 – 15:45

6. Presentation sessions: 08.05.2026 9:15 – 15:45

Each group presents its term paper. In addition, each student will serve as a discussant to a peer group's paper. Beyond, active participation in the discussion by all participating students is required.
The seminar takes place on site. Attendance is compulsory.

Learning Outcome:
- understanding what digital innovation is
- understanding, how firms can manage for continuous and beneficial innovation of digital products and services
- obtaining an overview of current academic literature in the subject area of the seminar
- improving writing, presentation, assessment, and discussion skills

Target Groups:
Suitable for English Speakers

Languages of Instruction:

English

Course Materials:	The list of readings for the seminar will be introduced during the introductory session and will be distributed electronically.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Anja Schulze

Requirements:

Prerequisites:	Bachelor's Degree
Prior Knowledge:	Genuine interest in the management of innovation.
Assessment:	- Term paper (15 - 20 pages) (40% of the final grade) - Oral presentation of term paper (20% of the final grade) - Discussion of assigned peer term paper (20% of the final grade) - Individual appointment for each team to consult for and discuss the term paper development (5% of the final grade) - Midterm presentation (5% of the final grade)
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Module Doctoral Seminar in Graphics and Visualization
03SMDINF1139 / Doktorandenseminar

Description:

General description:
The course consists of two parts: A 3 day workshop including individual presentations of research projects, as well as group work on and presentations of new approaches in specific research fields. The second part consists of regular meetings which include researchers and doctoral students presenting their PhD research progress, current paper projects, conference reports, presentation rehearsals, new research projects or guest lectures, as well as the review and evaluation of other student projects.

ECTS: 2

Notes:
Room: BIN 1.D.02

Learning Outcome:
The PhD students learn to know how to design and present a scientific publication, as well as how to manage their PhD project, and how to manage, supervise and evaluate student projects.

Target Groups:
PhD students in computer graphics and visualization

Languages of Instruction:
English

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Renato Pajarola

Requirements:

Assessment:	One Presentation of a paper project, conference presentation or research project.
Grading Scale:	Pass/Fail
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Semester)
Booking Deadline/Period:	not bookable
Cancellation Deadline:	not cancelable
Organisation:	Institut für Informatik
Offered in:	Fall Semester 2026 Spring Semester 2026 Fall Semester 2025 Spring Semester 2025 Spring Semester 2024

Module MAT 827DP Numerical Methods for Hyperbolic Partial Differential Equations
07SMMAT827DP / Lecture with Practical Exercises

Description:

General description:
- Introduction to hyperbolic problems: Conservation, flux modeling, examples and significance in physics and engineering.
- Linear Advection equations in one dimension: Characteristics, energy estimates, upwind schemes.
- Scalar conservation laws: shocks, rarefactions, solutions of the Riemann problem, weak and entropy solutions, some existence and uniqueness results, finite volume schemes of the Godunov, Engquist-Osher and Lax-Friedrichs type. Convergence for monotone methods and E-schemes.
- Second-order schemes: Lax-Wendroff, TVD schemes, limiters, strong stability preserving Runge-Kutta methods.
- Linear systems: explicit solutions, energy estimates, first- and high- order finite volume schemes.
- Non-linear Systems: Hugoniot Locus and integral curves, explicit Riemann solutions of shallow-water and Euler equations. Review of available theory.

ECTS: 3

Notes:
This is th Module to be booked by PhD students, Master Students please book MAT827 (without the DP)

Learning Outcome:
Numerical schemes for hyperbolic equations. Finite volume schemes, TVD, ENO and WENO will also be described. Practical exercises will involve Matlab implementation of the numerical methods.

Course Materials:	H. Holden and N. H. Risebro, Front Tracking for Hyperbolic Conservation Laws, Springer 2011. Available online. R. J. LeVeque, Finite Volume methods for hyperbolic problems, Cambridge university Press, 2002. Available online. E. Godlewski and P. A. Raviart, Hyperbolic systems of conservation laws, Ellipses, Paris, 1991.

Module MAT 636DP Methods in Analysis
07SMMAT636DP / Course

Description:

General description:
In this class, we will study some important tools that play a major role in modern analysis. Topics we plan to discuss include: Integral inequalities (Young inequality, Hardy-Littlewood-Sobolev inequality), Distributions, Sobolev spaces and Sobolev inequalities, Potential theory, Elliptic regularity, Calculus of Variation (direct method).

ECTS: 2

Notes:
This is the Module to be booked by PhD Students, MSc & BSc Students please book MAT636

Languages of Instruction:
English

Course Materials:	The basic reference for this class is the book: E.H. Lieb, M. Loss. Analysis. Second Edition. Graduate Studies in Mathematics, AMS.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Benjamin Schlein

Requirements:

Prerequisites:	Analysis 1,2,3
Prior Knowledge:	Previous knowledge of Functional Analysis will be useful.
Grading Scale:	Pass/Fail
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Irregular)
Booking Deadline/Period:	from We 14.01.2026 10:00 to Tu 10.03.2026 24:00

Module M3L 323DP Statistics for Mathematicians
07SMM3L323DP / Lecture with Practical Exercises

Description:

General description:
This course is intended for Mathematics students taking their first course in Statistics. The goal is to provide an introduction to the basic notions of Statistics where essentially all results are proved rigorously. This is not a course on "Mathematical Statistics" but rather on "Statistics for Mathematicians".
We will cover the following topics:

- Regular Probability Models
- Sampling from Probability Distributions
- Point Estimation of Model Parameters
- Tests of Hypotheses for Model Parameters
- Confidence Intervals for Model Parameters

ECTS: 1

Notes:
Mathematical Field: Stochastics

This is the module formerly known as MAT903DP

This is the module to be booked by PhD students.
BSc and MSc students please book M3L323 without DP in the name.

Learning Outcome:
Understanding the basic concepts of Statistics, being able to perform statistical tests and calculate confidence intervals and interpret the results of both.

Target Groups:
BSc and MSc students, PhD students are also welcome (This is the module to be booked by PhD students. BSc & MSc students please book MAT903)

Languages of Instruction:
English

Course Materials:	Panaretos, V. M. (2016). Statistics for mathematicians. Compact Textbook in Mathematics. Birkhäuser/Springer, 142, 9-15. Rice, J. A. (2006). Mathematical statistics and data analysis. Cengage Learning.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Alexandre Bovet

Requirements:

Prior Knowledge:	First year analysis and MAT 901 Stochastics
Assessment:	Written exam

Universität Zürich[UZH]

Grading Scale:	Pass/Fail

Module CHE 722 Biocatalysis
07SMCHE722 / Course

Description:

General description:
In this course, the students will learn to:

- Understand the advantages and disadvantages of biocatalysis compared to traditional chemical catalysis.
- Identify and classify different enzyme classes based on their mechanism/EC numbers and understand the roles of coenzymes in enzyme-catalyzed reactions.
- Interpret enzyme kinetic data to assess enzyme activity and optimize reaction conditions.
- Understand different enzyme engineering techniques, such as rational design and directed evolution, to improve enzyme properties.
- Compare and understand molecular biology techniques, such as epPCR, DNA shuffling, and combinatorial libraries, to engineer enzymes with improved properties.
- Understand high-throughput screening methods, such as display systems in combination with FACS, to identify and select improved enzyme variants.
- Understand enzyme immobilization and kinetic resolution/desymmetrization techniques to specific enzyme classes for improved stability and selectivity.
- Understand the principles of enzyme kinetics, including Michaelis- Menten kinetics, inhibition, promoters, and multi-substrate enzymes, and apply them to optimize enzyme activity and select appropriate metrics for evaluation.
- Design and execute an enzyme engineering project, including the selection of appropriate strategies and methods for optimization.
- Understand the practical applications of biocatalysis and its potential for sustainable chemistry.
- Understand the industrial potential of biocatalysis and biocatalytic cascades for pharmaceuticals, agrochemicals, neutraceuticals, flavors and fragrances.
- Understand the importance of safety and ethical considerations in biocatalysis research and development.

ECTS: 2

Notes:
The exam takes place in the last lesson of the semester.

Learning Outcome:
Understanding and applying the content covered

Target Groups:
Bachelor students in Chemistry/Biochemistry/Chemistry and Business Studies (5th semester and higher)
Master students in Chemistry/Biochemistry PhD students

Languages of Instruction:
english

Course Materials:	distributed via OLAT
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Alexandria Liang

Module Hindi Revision Course
06SM330-014 / Module

Description:

General description:
Das Repetitorium gibt Hindi-Studierenden aller Stufen die Möglichkeit, ihre Übersetzungskompetenz zu verbessern und sich mit den Schritten des Übersetzungsprozesses weiter vertraut zu machen. Anhand ausgewählter Texte werden gängige Probleme des Übersetzens, aber auch individuelle Schwierigkeiten eingehend besprochen und komplexe Grammatikinhalte repetiert.

ECTS: 3

Learning Outcome:
Die Studierenden haben vertiefte Kenntnisse in Grammatik, Syntax und Wortschatz des Hindis.

Languages of Instruction:
Deutsch

Merkmale:

Responsible instructor:	Nicolas Martin

Requirements:

Assessment:	schriftliche Übungen ---

Module EEE 264 Environmental Policy of the EU
07SMEEE264 / Course

Description:

General description:
This lecture begins with the basic question of the importance and development of EU environmental policy, both historically and currently.
Thematically we will consider several aspects of environmental policy but focus on current biodiversity policy. This lecture puts a strong emphasis on getting to know the EU institutions relevant to the policy- making process (the European Commission, the European Parliament and the Council of the EU). Beyond this we study other actors and institutions that affect policy outcomes and impacts, such as interest groups, courts and citizens and learn where, how, and to what extent they can have an influence. To understand the interplay of institutions and actors, we trace a recent piece of legislation through the different stages of the policy cycle from agenda setting to policy formulation, implementation, and evaluation. The lecture concludes with an overview of current and future challenges but also opportunities of EU environmental policy.

ECTS: 3

Notes:
The examination takes place during the last lecture. For repeat examination, see the MNF examination schedule https://www.mnf.uzh.ch/de/studium/pruefungen.html

Learning Outcome:
After successfully completing the module, students should be able to:

- identify the relevant institutions and actors in the policy-making process and explain their role within the political framework of the EU.
- apply the acquired tools to critically engage in current discussions on environmental policy at the EU level.

Merkmale:	Target Group: Suitable for English Speakers Target Group: Open to School Students
Responsible instructor:	Tamaki Ohmura

Requirements:

Assessment:	Written, MC-Exam in English. To participate in the exam, students must contribute to at least 3 times to the forum discussion during the semester
Grading Scale:	1-6, Half Grades Given
Repeatability:	Can be repeated once

Module Principles of Central Bank Law
02SM90WM90 / Course

Description:

General description:
The course is designed to strengthen your understanding of the foundational principles of central banking law with a focus on the European System of Central Banks and ECB, the Swiss National Bank, the Bank of England and US Federal Reserve with comparisons to other selected countries. The course combines a conceptual introduction to the main legal principles, institutional structures and operations of central banks with practical cross-country examples.

ECTS: 6

Learning Outcome:
- Identify the key legal issues in central bank legislation and how international good practices address those issues.
- Understand the institutional structure of central bank operations and how they make decisions
- Understand the design and scope of central bank mandates and their relationship with government policy.
- Identify the key principles of central bank governance based on international good practice?
- Understand the role of the lender of last resort and crisis management functions
- Identify the legal framework governing central bank payment and settlement systems
- Understand the role of central banks in monetary policy, exchange rate policy and macroprudential oversight
- Advise and formulate recommendations on the application of key legal issues and international good practices in domestic legislation.

Target Groups:
Law, social science and humanities students

Languages of Instruction:
English

Course Materials:	Central Banking and Sustainability, K. Alexander and S. Gruenewald (Cambridge University Press, 2026) (the book will be available in February) https://www.cambridge.org/core/books/central-banking-and-sustainability/BC15EC9D6BD764A91EB85D9E7915A077
Merkmale:	
Responsible instructor:	Kern Alexander

Requirements:

Prerequisites:	None
Prior Knowledge:	None
Assessment:	Exam tbd Students are offered the opportunity to give a voluntary extra credit presentation in class. Participation is optional; however, a well-prepared presentation may have a favorable impact on the final course grade.

Module ESS 842 Analyzing the plant-soil system part 2
07SMESS842 / Lecture with Practical Exercises

Description:

General description:
In this module, students will learn about approaches used in biogeochemistry and in situ surveys e.g. in research surveys or extension work. Students will select suitable methods from a variety of presented field and laboratory techniques to address open research questions. In the fall semester, lecturers will present the different methods and their use, and teams will prepare and defend a short project concept.
In the spring semester, teams will practice using techniques, and develop a project concept into a short research plan including all steps, from hypothesis statements through data collection to analysis, using an electronic notebook format and Python or R. They will then conduct 2-3 days of field work at the long-term observation site Lägeren (Baden) to perform measurements and collect plant and soil samples according to their project.
In the following week, the obtained samples will be prepared and analyzed, followed by data evaluation and presentation of the results.
Afterwards, students will submit a report.
Lectures and projects will target current research topics and may be guided by the interest of the students. Examples of previous projects are: 'Nutrients in plants and soils as a function of tree age', 'Spatialvariability of soil properties', or 'Mineralisation of organic matterfallen trees'.

ECTS: 6

Notes:
- Insurance is the responsibility of the participants.
- 8.-12.06.2026: Field course (Lägeren)
- 15.-26.06.2026: Daily practical course in the GeoLabs and Y25-H-38
The schedule will be announced by the module coordinators.

Learning Outcome:
At the end of the module, the students will know:

- how to develop a scientific research project from a question
- how to design a field experiment to test hypotheses
- how to collect soil and plant samples and data in the field
- how to prepare samples for analysis
- how to analyse samples with different lab techniques
- How to analyse and interpret data (including statistics)
- How to present results orally and on paper

Target Groups:

Module Repetitorium Radiologie
04SMRAD23001 / Kurs

Description:

ECTS: 0

Notes:
Kontakt-Email:
tilo.niemann@ksb.ch

Learning Outcome:
Interaktives Teaching klassischer radiologischer Fälle aus der täglichen Routine.
Eigenständige Befundung durch die Stundenten in Kleingruppen unter Anleitung des Dozenten. Anhand dessen Aufarbeitung von Grundlagen zu Röntgen- Einstelltechnik und systematischer Befundung von Röntgenbildern und CT-Schnittbildern.
Erarbeiten des
diagnostischen Vorgehens. Diskussion von Differentialdiagnosen.
Die Unterrichtsform ist online geplant, mittels skype oder zoom Einladung können die Studenten den Rechner des Dozenten direkt steuern und vor der Kleingruppe einzeln Fälle unter Anleitung bearbeiten. Fragen können stets gestellt und diskutiert werden.
Eine Prüfung war bislang nicht vorgesehen.
Der interaktive Kurs richtet sich insbesondere an Stundenten zur Prüfungsvorbereitung oder zum Erlangen von vertieften radiologischen Kenntnissen.

Target Groups:
Studierende im Masterstudium

Module Teaching and Linguistics
06SM390-504 / Module

Description:

General description:
Ce module a pour but d'approfondir et d'améliorer la connaissance et compétences des étudiantes et des étudiants concernant les intersections entre la linguistique et la didactique du français langue étrangère.
L'objectif des cours de ce module est d'étudier de plus près des domaines langagiers et des scénarios didactiques choisis (comme p. ex.
l'orthographe, l'enseignement du vocabulaire, la variabilité de la langue, la lecture de textes authentiques) en demandant quels modèles et explications fournis par la linguistique soutiennent l'enseignant/e et les élèves dans la compréhension et l'explication de problèmes fréquents. En même temps, nous apporterons un regard linguistique critique sur des approches didactiques actuelles en FLE (comme p. ex. les approches immersives, le Cadre Européen Commun de Référence ou la didactique du plurilinguisme).

ECTS: 3

Learning Outcome:
Les étudiantes et les étudiants arriveront à construire des liens entre leurs activités didactiques (présentes ou futures) et les domaines de la linguistique française. Ils seront capables d'identifier dans la pratique de l'ens des problèmes et des scénarios qui méritent de les aborder avec des résultats, des modèles ou des explications fournis par la recherche linguistique.

Languages of Instruction:
Französisch

Merkmale:

Responsible instructor:	Elisabeth Stark

Requirements:

Prerequisites:	Les étudiantes et les étudiants doivent disposer de solides connaissances de base dans les domaines de la linguistique française, en maîtriser la terminologie et les notions fondamentales. Un niveau de langue C1 en français est recommandé. Il est aussi recommandé (mais pas indispensable) de disposer de premières expériences dans l'enseignement du français langue étrangère.
Assessment:	Présentation (60 min env.) d'un sujet. avec documentation de l'exposé (plan, exemplier, bibliographie)
Grading Scale:	Pass/Fail
Repeatability:	repeatable once, book again

Organisation:

Offer pattern:	1 Semester (Every Spring Semester)

Module Philology and Linguistics
06SM390-506 / Module

Description:

General description:
Le module traite une variété de langue médiévale et/ou un ensemble textuel significatifs, en prenant en considération la dimension des genres textuels. Il présente l'état de la recherche, les desiderata et les méthodologies pertinentes pour poursuivre de nouvelles interrogations porteuses. Il introduit les étudiantes et les étudiants à l'analyse thématique de textes médiévaux, à l'extraction de donnéeslinguistiques et à leur interprétation à l'aide de la bibliographie de référence, comprenant des exercices non-notés durant le semestre.

ECTS: 3

Learning Outcome:
Les étudiantes et les étudiants seront en mesure de traiter de manière autonome une thématique ciblée en philologie linguistique. Ils sauront extraire des données pertinentes de sources définies et les interpréter à l'aide de la bibliographie de référence.

Languages of Instruction:
Französisch

Merkmale:

Responsible instructor:	Martin-Dietrich Glessgen

Requirements:

Prerequisites:	Les étudiantes et les étudiants disposent d'une bonne connaissance des domaines du langage, de l'histoire du français et de la méthodologie en linguistique française et galloromane. Ils ont des notions approfondies de français médiéval, et idéalement aussi de l'occitan médiéval. Un niveau de langue C1 en français est recommandé.
Assessment:	Portfolio: Plusieurs exercices à préparer à la maison et à présenter (70%), synthèse écrite (30%). --- La synthèse écrite est à rendre le 25 juin 2026.
Grading Scale:	1-6, Half Grades Given
Repeatability:	repeatable once, book again

General description:
Das Praktikum vermittelt den Studierenden die berufsorientierte Arbeitsweise und die Standards für Akademiker im interdisziplinären, archäologischen Arbeitsfeld. Dabei erarbeiten sich die Studierenden einen breiten Einblick in potentielle zukünftige Arbeitsfelder wie Museen, Labore, Forschungsprojekte, Kulturmanagment und spezialisierte interdisziplinär arbeitende Firmen.

ECTS: 6

Learning Outcome:
Die Studierenden kennen das praxisnahe Arbeiten in Laboren, in Museen, im Kulturmanagment oder in spezialisierten Firmen. Sie wenden ihr Wissen praktisch an: Dazu gehören u. a. das systematische Arbeiten im Labor, die Entwicklung von Ausstellungskonzepten im Museum und die Mitarbeit in interdisziplinären archäologischen Projekten. Das Erlernen von Teamwork, Arbeitsorganisation nach Protokoll und das Einstudieren von Arbeitsprozessen gemäss Arbeitsrichtlinien ist den Studierenden durch die regelmässige praktische Arbeit vertraut.

Merkmale:

Responsible instructor:	Philippe Della Casa

Requirements:

Prerequisites:	eigenständige Organisation des Praktikums
Assessment:	dokumentierte praktische Arbeit --- dokumentierte praktische 1-2 seitige Arbeit bis zum 30. Mai 2026
Grading Scale:	Pass/Fail
Repeatability:	repeatable once, book again

Organisation:

Offer pattern:	1 Semester (Every Semester)
Booking Deadline/Period:	from We 14.01.2026 10:00 to Tu 10.03.2026 24:00
Cancellation Deadline:	from We 14.01.2026 10:00 to Tu 10.03.2026 24:00
Organisation:	Institute for Archaeology, Classical Philology, and Ancient Studies
Offered in:	Spring Semester 2026 Fall Semester 2025 Spring Semester 2025 Fall Semester 2024 Spring Semester 2024 Fall Semester 2023

Module MAT 571 Analysis on Matrix Groups
07SMMAT571 / Lecture with Practical Exercises

Description:

General description:
This course will give an accessible introduction to the theory of Lie groups, which represent continuous symmetries of various objects, like for instance the group of rotations of the sphere or the group of invertible matrices. A Lie group is simultaneously a group and a differential manifold, and interplays between algebraic and geometric structures lead to a beautiful theory that was developed in the first part of the 20th century. In this course, we work in the setting of matrix groups since this allows us to cover crucial ideas with minimal prerequisites.
We introduce the basic definitions of Lie theory and most important examples, namely the "classical groups" such as the general linear and special linear groups, orthogonal groups, symplectic groups, and unitary groups. We discuss basic properties of these groups. Then we define the notion of Lie algebra and develop the fundamental correspondences between Lie groups and Lie algebras and explore structure of general matrix Lie groups and Lie algebras. We also develop integration theory and explore the existence of invariant measures on homogeneous spaces. The remainder of the course will cover some selected more advanced topics such as, for instance, classification of compact Lie groups, finite-dimensional representations, Weyl character formula, lattices in Lie groups, etc.

ECTS: 9

Notes:
Mathematical Field: Analysis, Algebra

Learning Outcome:
The students will learn the foundations of the theory of Lie Groups.

Target Groups:
BSc (from 4th Semester) and MSc students,
PhD students are also welcome.
This is the module to be booked by BSc & MSc students. PhD students please book module with DP in the name MAT571DP.

Languages of Instruction:
English

Course Materials:
- A. Baker, Matrix Groups: An Introduction to Lie Group Theory, Springer Undergraduate Mathematics Series. Springer.
- M. Curtis, Matrix Groups, Universitext, Springer.
- B. Hall, Lie Groups, Lie Algebras, and Representations, Elementary Introduction, Graduate Texts in Mathematics, Springer.
- W. Rossmann, Lie Groups: An Introduction Through Linear Groups, Oxford Graduate Texts in Mathematics, Oxford University Press.

Merkmale: Target Group: Suitable for English Speakers

Responsible instructor: Alexander Gorodnik

Requirements:

Prior Knowledge: Analysis I-III, Linear Algebra I-II;
Geometry/Topology I and Algebra could also be useful, but not mandatory.

At least one should be familiar with the concepts of groups, metric spaces, and manifolds.

Assessment:	- weekly homeworks (exercise testat of at least 50% of homeworks) - Written exam (repetition exam may also be oral) - Language of exam: English
Grading Scale:	1-6, Half Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (One-Time)
Booking Deadline/Period:	from We 14.01.2026 10:00 to Tu 10.03.2026 24:00
Cancellation Deadline:	from We 14.01.2026 10:00 to Tu 21.04.2026 24:00

Module Communication in the Classroom: Developing Core Teaching Practices
06SM222KiK / Module

Description:

General description:
Vor einer Klasse zu stehen verlangt das sichere Beherrschen zentraler Unterrichtspraktiken. Dazu gehören der Einstieg in eine Lektion, das Präsentieren und Erklären, das Führen von Klassengesprächen und der Umgang mit Störungen. Im Seminar werden diese Grundpraktiken des Klassenunterrichts besprochen und in simulierten Situationen eingeübt. Angehende Lehrpersonen reflektieren dabei ihre Praxis und entwickeln diese durch Feedback weiter.

ECTS: 3

Notes:
Die Veranstaltung erfordert regelmässige Präsenz und hohes Engagement. Teilnehmende sollten bereit sein, an wissenschaftlichen Begleitstudien teilzunehmen.

Merkmale:

Responsible instructor:	Dominik Petko

Requirements:

Prerequisites:	Einschreibung im Studiengang "Lehrdiplom für Maturitätsschulen".
Assessment:	Portfolio: praktische Übungen und schriftliche Reflexion. Das Modul wird als bestanden bewertet, wenn alle Elemente des Portfolios bestanden sind. ---
Grading Scale:	Pass/Fail

Module BIO 715 Interdisciplinary research in microbiology
07SMBIO715 / Seminar

Description:

General description:
The IMM seminar is the weekly seminar organized by the Institute of Medical Microbiology, UZH. It is a forum for master and PhD students as well as postdocs and senior researchers to present and discuss their most recent results. In addition, we invite around six external speakers from Switzerland and Europe to present their current research. The covered research topics are: i) cellular microbiology and infection biology of Legionella, ii) Drug resistance and virulence mechanisms of Mycobacterium abscessus, iii) biochemical analysis of ribosome assembly and maturation and RNA biology, iv) AI and multi-omics approaches to predict risk of pathogens and metagenomic investigations of microbiota,
v) structure/function studies of bacterial membrane transporters and protein engineering.

Module EEE 102 Introduction to Ecology
07SMEEE102 / Course

Description:

General description:
The lecture introduces students to all levels of ecological complexity, from responses of individual organisms to the biotic and abiotic environment, via the impact of resources and competition on the structure and dynamics of populations, through to interactions among species and the fluxes of energy and matter in ecosystems.

ECTS: 5

Notes:
Group A is for BSc students in Biodiversity and group B for BSc students in Biology. The excursion will go to the Neeracherried.

Learning Outcome:
After successfully completing the module, students should be able to:

- Describe the scope and goals of ecology
- Understand and remember the most important terms, definitions, and equations.
- Explain the main methods by which data on the abundance and distribution of organisms are collected.
- Identify the fundamental abiotic and biotic factors that affect individuals and determine the structure and dynamics of populations, communities, and ecosystems.
- Describe the laws governing competition, cooperation, predator-prey, parasite-hoste, and other interactions between organisms - from microbes to plants to animals.
- Explain the importance of ecological research for conservation, cro and animal production, havesting (including fishing and hunting), and other applications.
- Interpret results from ecological ecperiments and comparative studies.

Module BIO 149 Introduction to Scientific Writing
07SMBIO149 / Lecture with Practical Exercises

Description:

General description:
Writing is a fundamental competence for students of Biology and Biodiversity, irrespective of their future career path and even now that AI is transforming all aspects of life. In science, writing is the main form of communicating ideas, data, and results to peers as well as to non-expert readers. Outside academia, writing is needed to develop strategies, consult decision makers, or solicit contracts. Either way, good writing skills will be a key asset. This course is rooted in the view that scientific writing is a craft that can be learnt, but that mastering this craft requires substantial and life-long training. Accordingly, this course aims at providing students with the conceptual knowledge and practical experience they need to master the first formal writing tasks in their studies. This aim is achieved through a combination of classroom lectures, individual exercises, text analyses, writing tasks, and peer-feedback. These teaching elements address the major aspects of scientific texts including content, structure, and style, but are also applicable to non-scientific texts. Students are introduced to writing as a multi-staged iterative process conducted by individual writing “personalities”. The course also explores how AI can support scientific writing.

ECTS: 3

Learning Outcome:
Students acquire the following competences in this module:

- Correctly use key elements of English grammar and word usage, including word types, word functions, sentence structure, and tenses.
- Identify and deduce basic properties of a scientific text – content, structure, and academic style; shape and incorporate these properties in their own texts.
- Understand the importance of framing the content to be written as a story; know three techniques for finding a story and apply at least one of these at the start of a writing process.
- Identify the elements of a story in a scientific text and write an abstract that reflects these elements.
- Describe fundamental reader expectations with respect to sentence and paragraph structure; assess if a text meets these expectations; meet these expectations in their own writing.
- Apply standardised ways of ordering sections and paragraphs in a scientific paper and a proposal; understand the reasons underlying these orderings and organise own texts accordingly.
- Distinguish ways of presenting data and assess which way is best for specific types of data.
- Apply principles of organising and formatting figures and tables; know the structure of figure and table captions and write them accordingly.
- Explain why and how to cite literature, to quote and paraphrase, and to integrate references; identify the risk of plagiarism and how to avoid it; adequately quote and paraphrase a given piece of text.
- Know the UZH guidelines on the use of generative AI in teaching and research; assess a scientific text written by generative AI tools with respect to content, structure, and style.
- Explain the major steps in the publication process; state the criteria for authorship and explain strategies for managing co-authorship.
- Explain key elements of text revision; critically assess scientific texts written by themselves and others; pursue an iterative editorial process.
- Adopt a writing routine, explore own writing habits and writing “personality”.

Target Groups:
This module is aimed at students of the Mono- or Major Bachelor programs Biology, Biomedicine, and Biodiversity in the second year of their studies, before starting block courses

Merkmale: Target Group: Suitable for English Speakers

Universität Zürich[UZH]

Responsible instructor:	Simon Aeschbacher

Requirements:

Prerequisites:	Bachelor students in Biology (Single Major 180, Major 150, Minor 60, Minor 30), Biomedicine (Single Major 180, Major 150, Minor 60, Minor 30) and Biodiversity (Single Major 180, Major 150)
Assessment:	One written 90-minute exam at the end of the semester (teaching week 15) consisting of text composition, text analyses, and a selection of multiple-choice questions like those trained in the exercises. The exam performance is graded on a scale from 1 (worst) to 6 (best) in steps of 0.5. A second grade (same scale as before) is based on the performance in homework assignments. This second grade is automatically set to 1 if less than 80% of the exercises are submitted. The final grade is the arithmetic mean of the exam grade and the grade from the exercises. A compulsory formative test that does not count towards the final grade is held in teaching week 6 as an orientation for the students and teachers. In English. This module requires a high degree of on-site presence to facilitate effective peer learning. We accept, at most, 20% unexcused absence time from class meetings.
Grading Scale:	1-6, Half Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Fall Semester)

Module EEE 103 Evolution II
07SMEEE103 / Course

Description:

General description:
Two hours of weekly lectures supplemented with reading and self-study assignments. The class will cover sources and implications of genetic variation, elementary population genetics at two loci, elementary quantitative genetics, the evolution of sex, genome evolution, adaptive landscapes, and evolvability.

ECTS: 3

Learning Outcome:
After successfully completing the module, students should be able to:

- identify different kinds of genetic variation and their evolutionary implications
- describe evolutionary forces that create and destroy genetic variation
- explain key tenets of the neutral theory of molecular evolution
- explain the phenomena of heterozygote superiority, frequency dependent selection, and GxE interactions
- describe key arguments in the neutralist-selectionist controversy
- explain the principles behind tests for positive selection
- name the key differences between linkage disequilibrium and linkage equilibrium
- describe the mechanisms that create linkage disequilibrium
- summarize the effects of recombination on linkage disequilibrium
- name facultatively asexual organisms and their mode of reproduction
- explain the two-fold evolutionary cost of sex
- identify key evolutionary advantages of sexual reproduction
- explain the key principle behind Muller's ratchet an the Red Queen hypothesis
- describe experiments that support the importance of Muller's ratchet and the Red Queen hypothesis
- name key differences between Mendelian and quantitative traits
- explain the principle behind quantitative trait loci (QTL) mapping
- describe how the heritability of a trait can be estimated in a population
- explain how the breeder's equation can help predict a population's response to selection
- distinguish directional, stabilizing, and disruptive selection in their effects on a population.
- name major kinds of non-protein coding DNA in a genome
- describe major classes of mobile DNA and how they replicate
- explain the defense mechanisms of genomes against mobile DNA
- describe the processes that create new genes in evolution
- summarize the different evolutionary fates of gene duplicates
- explain the evolutionary forces that cause mutation rates to vary across genomes
- describe evidence for the role of standing variation and de novo mutations in evolution
- explain the concept of a fitness landscape
- describe experiments that have helped map fitness landscapes
- explain the concept of ruggedness and its implications for adaptive evolution
- explain major factors that affect evolvability
- discuss evidence for the increase or decrease of evolvability during adaptive evolution

Module EEE 104 Biodiversity and Natural Habitats of Switzerland
07SMEEE104 / Lecture with Practical Exercises

Description:

General description:
Der Kurs Biodiversität und Lebensräume der Schweiz gibt einen Überblick der organismischen Biodiversität und der Lebensräume der Schweiz. Es werden die wichtigsten faunistischen und floristischen Elemente der Schweiz vorgestellt, wobei der Fokus auf Arten mit einer weiten Verbreitung, Kennarten, und Arten von grosser ökologischer oder ökonomischer Relevanz liegt. Es werden die wichtigsten Lebensraumtypen der Schweiz vorgestellt, und die ökologischen Zusammenhänge zwischen abiotischen und biotischen Faktoren aufgezeigt, die diese Lebensräume prägen. Anhand ausgewählter Artengruppen werden grundlegende Artkenntnisse vermittelt. Der Kurs gibt eine Einführung in die Bestimmung und Erfassung freilebender Arten, Grundlagen und Regeln für eine systematische Erfassung der Biodiversität sowie eine Übersicht der wichtigsten Biodiversitätsmonitoringprogramme der Schweiz. In drei Praktika wird die Bestimmung von Arten und die systematische Erfassung der Biodiversität selbstständig geübt.

ECTS: 3

Learning Outcome:
Artenkenntnisse: Die Studierenden sind fähig, total rund 500 vorgegebene Arten aus den Gruppen Pflanzen, Säugetiere, Vögel, Amphibien, Reptilien, Fische, Insekten/Invertebraten zu erkennen. Diese Arten können benannt werden und mit den wichtigsten Erkennungsmerkmalen sowie Angaben zu ihrer Ökologie und Verbreitung beschrieben werden.
.
Lebensräume: Die Studierenden sind in der Lage, die in der Vorlesung behandelten Lebensräume der Schweiz zu erkennen. Sie wissen, welche Faktoren in den jeweiligen Lebensräumen wichtig sind und wie sich dadurch die Artvorkommen zusammensetzen.
.
Tools & Methoden: Die Studierenden kennen die Feldtools, um Vegetationsaufnahmen, Artlisten und Forschungsdaten zu erheben und können diese auch anwenden. Sie kennen die behandelten Methoden zur Messung der Biodiversität und können diese beschreiben und/oder anwenden.

Module EEE 204 Biodiversity and Society
07SMEEE204 / Course

Description:

General description:
Diese Vorlesung gibt einen Überblick über ausgewählte Forschungsdisziplinen (unter anderem Umweltpolitik, Umweltpsychologie, Umweltökonomie und transdisziplinäre Forschungsansätze), welche sich mit der Schnittstelle von Umwelt/Natur und Mensch befassen. So wird die Beziehung zwischen Mensch und Natur aus unterschiedlichen Perspektiven beleuchtet, wobei wir die relevantesten Fragestellungen und einige prominente Studien aus jeder behandelten Disziplin kennenlernen.

ECTS: 2

Learning Outcome:
Nach erfolgreichem Abschluss der Lehrveranstaltung sollten Sie die Fähigkeit erworben haben,

- die Grundzüge und Annahmen der behandelten Disziplinen wiederzugeben,
- einige wegweisende und aktuelle Erkenntnisse aus den unterschiedlichen Disziplinen zu verstehen,
- ein gesellschaftliches und umweltrelevantes Phänomen aus unterschiedlichen Perspektiven zu erklären.

Module EEE 267 Science Communication in Zoos
07SMEEE267 / Lecture with Practical Exercises

Description:

General description:
Dieses Modul vermittelt theoretische und praktische Aspekte der Science Communication im Rahmen der Freiwilligenarbeit in Zoos. Zum Kurs gehören die Teilnahme am Einf hrungskurs von 40 Stunden sowie die erfolgreiche Absolvierung der Pr fung. Zentrale Kursthemen sind einerseits betriebswirtschaftliche Aspekte der Zoo Z rich AG und andererseits Basiswissen in Wirbeltierkunde und Zoogeografie. Die einzelnen Kurslektionen werden von Mitgliedern der Geschäftsleitung und des Kaders des Zoos gehalten. Die Kursteilnehmenden lernen vor Ort den Zoo Z rich sowohl fachlich wie auch personell kennen.
Danach wird im Zoo Zürich ein Freiwilligen-Einsatz im Umfang von mind.
100 Stunden innerhalb von 2 Jahren geleistet (dieser Einsatz wird für die erfolgreiche Absolvierung des Moduls vorausgesetzt, ist aber nicht Teil des für die Kreditpunktberechnung erforderlichen studentischen Aufwands).
Für den Erhalt der Kreditpunkte ist die Planung und Umsetzung eines Projekts zur Science Communication im Rahmen der Freiwilligenarbeit im Zoo Zürich inkl. Bericht erforderlich.

ECTS: 4

Notes:
Die gesamte Dauer des Moduls umfasst mindestens 2 Jahre. Das Modul wird in der Leistungsübersicht erfasst und die Kreditpunkte werden vergeben, sobald der Projektbericht akzeptiert wurde.

Zwischen Anfang Januar und Anfang März wird am Zoo eine Informationsveranstaltung durchgeführt. Die Infoveranstaltung findet am 24. Februar 2026 um 18.00 statt. Anmeldung zur Infoveranstaltung via Email an Jacqueline Kauer (jacqueline.kauer@zoo.ch) mit Angabe der Modulnummer EEE 267 bis 23. Februar 2026. Der Besuch der Infoveranstaltung ist obligatorisch für die Anmeldung zum Modul.AnschliessendeModul-Anmeldung via email an Ursina Tobler(ursina.tobler@ieu.uzh.ch)bis31. März 2026.Platzzahl auf 10 Teilnehmer beschränkt. Die Auswahl der Teilnehmer erfolgt nach dem Anmeldeschluss bis 15. April 2026. Die Anmeldung garantiert keinen Kursplatz.

Der Kurs findet jeweils Dienstags/Mittwochs von 19.00-21.15 und Samstags 9-11 zu ausgewählten Daten im Zoo Zürich statt. Für die Daten bitte die Kursausschreibung auf der IEU-Webseite konsultieren (https://www.ieu.uzh.ch/en/teaching/eee267_2024.html). Die Prüfung findet entweder am 3. oder 5. oder 7. Juli 2026 statt (Wahldatum). Abschlussfeier der Zoo-Ausblidung am 8. Juli 2026 abends. Mittagskurs zur Projektarbeit: 16. November 2026

Learning Outcome:
Nach erfolgreicher Absolvierung des Moduls sind Studierende in der Lage:

- Selbständig kompetent Wissen über Arten- und Naturschutzprojekte des Zoos an Besucher*innen zu vermitteln
- Pläne, Anlagen und Tiere im Zoo, sowie deren natürlichen Habitate und In-Situ-Bedrohungsfaktoren allgemeinverständlich zu erläutern
- ein Projekt zur Science Communication im Zoo zu entwerfen, zu planen, durchzuführen und zu dokumentieren:
- Wissenschaftliche Erkenntnisse für ein Laienpublikum aufzubereiten und verständlich zu vermitteln
- Anschauungs- und Vermittlungsmaterial zur Wissenschaftskommunikation zu entwickeln
- Zielgruppengerecht die Neugier von Zoobesuchern für wissenschaftliche Fakten und Zusammenhänge zu wecken

Merkmale:

Module Management von organisationalem Fehlverhalten und Compliance aus einer Multilevel-Governance- und Regulat
03SM22BO0118 / Seminar

Description:

General description:
Korruption und Fehlverhalten von und in Organisationen ist ein vielschichtiges Phänomen, das verschiedene Formen von Governance und Regulierung vor Probleme stellt. Im Kurs werden zentrale theoretische Konzepte und empirische Studien zu Korruption, Devianz, Fehlverhalten auf der Problemseite und Governance, Regulation und Compliance in und durch Organisationen auf der Lösungsseite diskutiert. Dabei wird eine eine Perspektive der Mehrebenen (Staat, Organisation, Individuen) und multipler Akteure (Staat, Industrie, soziale Bewegungen, Verbände, Organisation, Medien) auf verschiedene Governance- und Compliance-Ansätze in der Organisationsforschung eingenommen, um organisationales Fehlverhalten und Korruption einerseits zu verstehen und andererseits, normativ einzuordnen. Ein besonderer Fokus liegt dabei auf der Frage organisationaler Verantwortung, die empirisch am Beispiel internationaler Sportverbände diskutiert wird und dadurch die Theoretisierung von Problemen der Verantwortungsdiffusion in Metaorganisationen ermöglicht. Die Teilnehmenden lernen, sich mit den Theorien kritisch auseinanderzusetzen und über aktuelle Themen der Multilevel-Governance sowie der Korruptionsbekämpfung zu diskutieren.
Parallel dazu werden im Kurs Anleitungen und Hilfestellungen bereitgestellt, um Studenten bei ihrer Seminararbeit zu unterstützen. Die Seminararbeiten bieten eine gute Vorbereitung für eine spätere Bachelorarbeit.

ECTS: 3

Notes:
Der Kurs findet vor Ort statt und ist auf
25 Teilnehmer begrenzt. Die Teilnehmenden können sich im Voraus und spätestens bis zum
2. Februar
2026 per E-Mail an roman.gibel@business.uzh.ch bewerben und ihr Interesse an dem Kurs in einem kurzen Motivationsbeschrieb schildern, um einen Platz zu erhalten.

Learning Outcome:
Die Studierenden lernen verschiedene Governance-Tools und Regulierungsinstrumente kennen, die sowohl für Unternehmen als auch für andere Organisationsformen, wie z. B. öffentliche Verwaltungen, Erklärungskraft haben. Gemeinsam entwickeln wir Theorien und Konzepte, um zu verstehen, wie Korruption und Fehlverhalten von und in Organisationen entstehen und welchen Einfluss Regulierungsbehörden haben. Darüber hinaus erhalten die Studierenden Einblicke in laufende Forschungsprojekte des Lehrstuhls für Betriebswirtschaftslehre und Unternehmenstheorien.

Target Groups:
BA-Studierende

Languages of Instruction:
Deutsch

Course Materials:	Texte, die zwingend zu lesen sind, werden auf OLAT zur Verfügung gestellt.
Merkmale:

Module Education and Innovation: An Introduction to Empirical Foundations (S)
03SM22MO0204 / Seminar

Description:

General description:
In the seminar, we will analyze topics in education and innovation. Using Stata, we will discuss and apply foundations from the empirical literature on these topics.

ECTS: 6

Notes:
Number of participants limited due to Stata capacities. You need to register by sending your CV and current transcript of record to Patrick Lehnert (patrick.lehnert@business.uzh.ch) until February 15th, 2026.

Target Groups:
Master students with an interest in empirical foundations and Stata

Languages of Instruction:
English

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Patrick Lehnert

Requirements:

Prerequisites:	Bachelor's degree
Prior Knowledge:	Successful completion of the following modules (or equivalent ones): ME1: Personnel Economics, Advanced Microeconomics 1 or Advanced Microeconomics for Business Administration, Empirical Methods or Applied Empirical Methods for Business Administration.
Assessment:	Individual and group assignments and presentations. Class attendance and class participation are also considered in the final grade.
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Irregular)
Dates/Times/Deadlines:	Seminar takes place as a block seminar during the Easter break: Tuesday, 07.04.2026, 13:00 - 17:00 Wednesday, 08.04.2026, 09:00 - 17:00 Thursday, 09.04.2026: 09:00 - 17:00 Friday, 10.04.2026: 09:00 - 17:00 A kick-off meeting will be held online on Friday, 27.02.2026, 16:00 - 17:00 Work on individual and group assignments takes place both before and after the block seminar dates.

Module Managerial and Tax Aspects of Transfer Pricing (S)
03SM22MO0206 / Seminar

Description:

General description:
The seminar discusses classical and recent research articles in the area of transfer pricing and provides a comprehensive overview of transfer pricing for managerial and tax purposes.

ECTS: 3

Notes:
Participation is limited to a total number of 24 students. Interested students can apply for participation using the application form to be found on the webpage of the chair until Friday, January 16, 2026. The allocation of seminar places will be finalized until February
2,
2026. Applications via email are not accepted. Please note that the module can only be booked after the allocation of seminar place! Accepted applicants must book the module immediately after the seminar place has been confirmed!

Learning Outcome:
The course provides a thorough understanding of some apparent managerial and taxation problems in transfer pricing and enables students to evaluate the usefulness of different transfer pricing methods as well as potential conflictsof interest among transfer pricing objectives.

Languages of Instruction:

Module Handelsmarketing (S) (Retail Marketing)
03SM22MO0209 / Seminar

Description:

General description:
Die Handelslandschaft und die Aufgaben des Marketingmanagements im Handel verändern sich aufgrund der zunehmenden Digitalisierung und der Forderung nach nachhaltigen Unternehmensstrategien rapide. Der Kurs behandelt strategische und taktische Marketingentscheidungen, die von solchen Veränderungen betroffen sind und stellt Lösungsansätze aus dem Bereich des stationären und Onlinehandels vor.

ECTS: 3

Notes:
Durchführungsart: Die Inhalte werden durch Vorlesungen, Selbststudium, R-Übungen und Gastvorträgen vermittelt und reflektiert. Zusätzlich vertiefen die Studierenden im Rahmen von Gruppenarbeiten während der Veranstaltung die Inhalte, diskutieren diese und präsentieren die Ergebnisse.
Bewerbungsprozess:

- Die Anzahl der Teilnehmenden ist auf
30 beschränkt. Bei einer zu hohen Anzahl an Bewerbungen erfolgt die Auswahl nach dem Zufallsprinzip. Innerhalb des folgenden Zeitfensters: Mo. 05.01.26 bis So. 18.01.26 können Sie sich über das Online-Formular auf der Homepage des Lehrstuhls für Marketing für den Kurs bewerben: siehe Lehrstuhl für Marketing, Prof. Natter - Education, Courses https://tiny.uzh.ch/XK
- Die Bewerbung ist obligatorische Voraussetzung für die Teilnahme und verbindlich. Innerhalb zwei Wochen nach Ablauf der Bewerbungsfrist erfolgt die schriftliche Bestätigung über die Teilnahme. Bei positiver Bestätigung werden Sie aufgefordert, das Modul zu buchen. Bitte überprüfen Sie in diesem Zeitraum unbedingt regelmässig Ihren UZH E-Mail Account.

Veranstaltungsort: Räume und Uhrzeiten werden einige Tage vor Kursbeginn auf der Lehrstuhl Website publiziert (siehe Lehrstuhl für Marketing, Prof. Natter - Education, Courses https://tiny.uzh.ch/XK).
Podcast: Aufgrund des aktiven Kursformats wird die Veranstaltung nicht aufgezeichnet. Es ist kein Podcast vorhanden.
Weitere Informationen: Weitere Informationen zur Veranstaltung werden auf OLAT zur Verfügung gestellt. Kontaktperson für Fragen zur Lehrveranstaltung: Frau Malin Pimper (malin.pimper@business.uzh.ch)

Learning Outcome:
Nach der aktiven Teilnahme an der Veranstaltung Handelsmarketing sind die Studierenden in der Lage:

- aktuelle Herausforderungen des Handels in den Themenbereichen Retailer Change Management und Nachhaltigkeit zu nennen.
- Entscheidungsprobleme im Bereich des Handelsmarketing zu strukturieren und Lösungsansätze anzuwenden.
- wissenschaftliche Daten zu analysieren, interpretieren und Schlussfolgerungen abzuleiten.
- Gruppenarbeit zu strukturieren und Lösungsansätze in der Gruppe zu erarbeiten.
- wissenschaftliche Inhalte vor einem Publikum zu präsentieren und schriftlich auszuformulieren.

Target Groups:
Studierende des Masterprogramms

Languages of Instruction:
Deutsch (Unterrichtssprache) und Englisch (vor allem englischsprachige Literatur).

Course Materials:

Die Vorbereitungsmaterialien werden am 30.01.26 auf OLAT zur Verfügung gestellt. Die Unterrichtsmaterialien und Lesematerialien werden während der Kurswoche auf OLAT zur Verfügung gestellt.

Merkmale:

Responsible instructor: Martin Natter

Requirements:

Prerequisites: Das aktive Kursformat sowie die Bearbeitung von Prüfungsaufgaben während der Veranstaltung, erfordern eine Anwesenheit während der gesamten Blockwoche. Planen Sie nach den offiziellen Veranstaltungszeiten genügend Zeit ein, um die Prüfungsaufgaben zu bearbeiten.

Prior Knowledge: Ein sicherer Umgang mit der Statistiksoftware R wird vorausgesetzt. Am 30.01.26 werden Materialen zur Kursvorbereitung auf OLAT zur Verfügung gestellt. Im Selbststudium sollen sich die Studierenden mit dem Inhalt der Vorbereitungsmaterialen vertraut machen. Die Inhalte der Vorbereitungsmaterialien werden mittels eines Assignments überprüft, das bis zum 08.02.26 über OLAT abgegeben werden muss (siehe Leistungsnachweis).

Assessment: Der Leistungsnachweis erfolgt durch die Bearbeitung von drei Prüfungsaufgaben (Assignments). Die Assignments werden in Gruppen- und Einzelarbeit vor, während und nach der Veranstaltung bearbeitet.

- Assignment 1 (20%, R-Einstiegstest, Einzelarbeit): Das 1. Assignment überprüft die Auseinandersetzung mit den Vorbereitungsmaterialien. Die Bearbeitungszeit des 1. Assignments startet am 30.01.26. Das Assignment muss bis zum 08.02.26 um 23.59 Uhr abgeben werden. Das Assignment wird auf OLAT zur Verfügung gestellt und muss über OLAT abgegeben werden. Für die reine Bearbeitungszeit (ohne Vorbereitungszeit) sollten Sie ca. 3 Stunden einplanen.
- Assignment 2 (40%, Präsentationen, Gruppenarbeit): Das 2. Assignment findet während der Veranstaltung statt und besteht aus einer Zwischenpräsentation (50%) und einer Abschlusspräsentation (50%). Die Studierenden erhalten während der Veranstaltung Zeit, um mit der Bearbeitung des Assignments zu beginnen. Im Anschluss an die offiziellen Veranstaltungszeiten (während der Kurswoche nach
17:00 Uhr) muss das 2. Assignment fertig bearbeitet werden.
- Assignment 3 (40%, schriftliche Arbeit, Gruppenarbeit): Die Bearbeitungszeit des 3. Assignemnts startet nach dem letzten Kurstag. Das
3. Assignment muss bis zum
19.02.26 um
23.59 Uhr über OLAT abgegeben werden.

Informationen zu Assignment 1 und die Vorbereitungsmaterialien werden am 30.01.26 über OLAT zur Verfügung gestellt. Detaillierte Informationen zu Inhalt, Form und Umfang der Assignments 2 und 3 werden während der Veranstaltung bekanntgegeben. Zum Bestehen des Kurses müssen alle Assignments abgeben und alle Aufgaben bearbeitet werden. Die Gruppen für Assignment 2 und 3 werden zufällig durch die Dozierenden während der Veranstaltung eingeteilt.

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Module Business Cycle Analysis: A historical perspective (L+E)
03SM22MO0210 / Lecture with Practical Exercises

Description:

General description:
The course is suited for students with an interest in the history of our discipline in connection with the development of methods relevant for macroeconomics. The focus is on aspects of the history of business cycle analysis from the beginning of the 19th century until the 1960s. The approach is a mixture of rational and historical reconstruction, (unavoidably) taking the viewpoint of modern economics, but, on the other hand, taking the historical background seriously.
Among other topics, we will cover the early underconsumption approach (Malthus), purely exogenous explanations (Jevons, Moore), the contribution of Marx, the accelerator principle (Aftalion, Clark), the concept of the impulse-propagation mechanism (Frisch), the business cycle phenomenon in an equilibrium framework (Hayek), the interaction between multiplier and accelerator (Samuelson), and endogenous business cycles (Kaldor, Goodwin).
The lectures provide an introduction into the topics. In the tutorials, we willuse Python to understand the relevant methods and replicate the results from the literature (solving difference/differential equations, time and frequency domain techniques). Since this is more relevant for the contributions from about 1870 on, the purpose of the first tutorial sessions is to build up a set of base-level skills.

ECTS: 6

Notes:
The module will not be recorded/no podcast.

Languages of Instruction:
English

Course Materials:	Basic reading: Gottfried Haberler (1937) Prosperity and Depression. A complete reading list will be provided on Olat.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Ulrich Woitek

Requirements:

Prior Knowledge:	Material from the introductory math course and basic Python programming skills are necessary (respectively the willingness to acquire these skills during the course).
Assessment:	written exam, 9.06.2026, 2.00-4.00 pm (120 min, essay) The examination takes place onsite.
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Module Doctoral Seminar Dynamic and Distributed Information Systems
03SMDINF1145 / Doktorandenseminar

Description:

General description:
The course has two parts: In one workshop lasting 1-2 days, each doctoral student presents a progress report on his/her PhD thesis. The second part consists of a series of one-hour lunch talks on every Tuesday during the teaching period. These lunch talks present current paper projects, conference reports, presentation rehearsals, research designs and guest lectures. If needed, written material will have to be prepared.

ECTS: 2

Notes:
Registration by E-Mail to: ddis-teaching@ifi.uzh.ch

Learning Outcome:
- The PhD students know how to design and present a scientific publication
- The students know how to manage their PhD project

Languages of Instruction:
English

Course Materials:	Slides and, possibly, additional material will be distributed after the presentations
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Abraham Bernstein

Requirements:

Assessment:	One Presentation of a paper project, conference presentation, or research design. Active participation in both the workshop and talks. If necessary, some written outcome may be required.
Grading Scale:	Pass/Fail
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Semester)
Dates/Times/Deadlines:	Register by the end of the first week of the term

Module Constitutional Law of the Cantons
02SM120WM18 / Course

Description:

General description:
Die Schweiz als Bundesstaat; Verfassungsautonomie der Kantone; Vielfalt der kantonalen Verfassungslandschaft; Kompetenzen der Kantone (Rechtsetzung, Verwaltung); Verhältnis von Bundesrecht zu kantonalem Recht; Gewährleistung derKantonsverfassungen; Organisationsstruktur der Kantone (Behörden und Gerichte);Demokratische Rechte in den Kantonen; Grundrechte; Finanzautonomie der Kantone;Mitwirkung der Kantone im Bund; Beziehungen der Kantone untereinander (Konkordate); Gebietsverschiebungen zwischen den Kantonen; Gemeinden; Gemeindeautonomie

ECTS: 3

Learning Outcome:
Erlangung vertiefter Kenntnisse der rechtlichen Grundlagen der Staatorganisation der Kantone und der diesbezüglichen Vorgaben des Bundesrechts; kritische Reflexion der Rechtsprechung und der rechtlichen Ausgestaltung des Staatsorganisationsrechts der Kantone.

Languages of Instruction:
Deutsch, Materialien teilweise auf Französisch

Course Materials:	Urteile des Bundesgerichts und kantonaler Gerichte, Buchkapitel, Zeitschriftenaufsätze; Gesetzgebungsmaterialien

Module PHY 151 Foundations of experimental physics
07SMPHY151 / Course

Description:

General description:
Dieses Modul gibt eine Vertiefung der experimentellen Grundlagen aus den Vorlesungen Physik I-IV, mit speziellem Augenmerk auf der Vernetzung der verschiedenen Themen. Dies wird an verschiedenen im Alltag wichtigen Phänomenen, sowie einigen grundlegenden Experimenten der Physik- Geschichte diskutiert. Insbesondere gehören dazu Atmosphären- und Klimaphysik, sowie verschiedene Formen der Energie-Umwandlung in verschiedenartigen Kraftwerken.

Das Modul besteht aus einer Vorlesung (2 Lektionen pro Woche) und Selbststudium. Das Modul wird mit einer mündlichen Prüfung abgeschlossen und ergibt im Total 5 ECTS.

Lernziele: Am Ende der Veranstaltung sollten Studierende folgende Fähigkeiten erworben haben:
1. Die Ähnlichkeiten und Unterschiede von klassischer, relativistischer und Quantenmechanik beschreiben und bei der Lösung von Problemen anwenden können.
2. Den Einfluss verschiedener grundlegender Wechselwirkungen und der Thermodynamik auf Enerige-Umwandlungs-Techniken beschreiben und quantifizieren.
3. Optische Himmelsphänomene verstehen und quantitativ beschreiben
4. Grundlegende Experimente der Physik-Geschichte beschreiben und die physikalischen Hintergründe sowohl auf experimenteller wie theoretischer Seite erklären.
5. Ähnlichkeiten und Unterschiede in der mathematischen Behandlung und dem physikalischen Inhalt von Strömungslehre und Elektromagnetismus beschreiben und quantifizieren

ECTS: 5

Notes:

Module Provisional Measures
02SM90WM92 / Lecture with Practical Exercises

Description:

General description:
Inhalt der Veranstaltung ist der einstweilige Rechtsschutz (vorsorgliche Massnahmen, Arrest) einschliesslich grenzüberschreitender Aspekte.

ECTS: 6

Notes:
Weitere Hinweise werden zu gegebener Zeit auf der Website des Lehrstuhls Domej publiziert.

Learning Outcome:
Die Studierenden sind mit dem einstweiligen Rechtsschutz aus theoretischer und praktischer Sicht vertraut und können entsprechende Fälle auf fortgeschrittenemNiveau bearbeiten.

Target Groups:
Masterstudierende

Languages of Instruction:
Deutsch

Course Materials:	Nach Ankündigung
Merkmale:

Module Law, Reproduction and Ethics: Fundamental Debates
02SM90WM93 / Course

Description:

General description:
Advancements in reproductive medicine have given rise to significant legal and ethical dilemmas. Legal frameworks governing this area are heterogenous and often lag behind the rapid pace of scientific progress and societal changes. This has led to legal gaps – often filled in by individual autonomy and practices – or to the imposition of ineffective legal prohibitions – often circumvented by crossing national borders in pursuit of (more) permissive legal regulations. These dynamics highlight the urgent need for deeper reflection on the ethical dimensions of reproductive technologies and practices.

In light of this context, this course adopts a transdisciplinary and interdisciplinary approach to critically examine some of the most pressing issues at the intersection of reproduction, law, and ethics. It begins with a lecture by a reproductive biologist and a visit to a research laboratory working in the field. The curriculum will then examine the legal frameworks governing reproductive medicine in Switzerland and abroad, alongside internationally relevant topics such as trans procreation, ectogestation, and gene editing.

This transdisciplinary approach is further reinforced by welcoming both law and biology students into the course, and by fostering open, interactive dialogue between lecturers and students.

ECTS: 6

Learning Outcome:
Students taking the course will become familiar with the legal frameworks governing reproductive medicine in Switzerland, as well as in a broader comparative context. They will gain in-depth knowledge of some fundamental debates in the fields of ethics, law and reproduction, approached from comparative, international and interdisciplinary perspectives. Throughout the course, students will also learn to critically analyse complex legal and ethical questions arising from societal changes and scientific progress in reproductive medicine. Finally, they will gain insight into how research in this field is conducted and be introduced to some of the latest developments in reproductive medicine.

Target Groups:
Master students

Languages of Instruction:
English

Course Materials:	Mandatory and optional reading materials will be made available on OLAT. https://lms.uzh.ch/url/RepositoryEntry/17818779806
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Alice Margaria

Requirements:

Prerequisites:	Attendance is compulsory for successful completion of the course.
Prior Knowledge:	Prior knowledge in the areas of family law and/or medical law is an asset, but not essential.
Assessment:	The final grade will be determined by:

- Attendance and active participation in class: 1/3 (pass / fail)
- Oral exam: 2/3 (graded)

Grading Scale:	1-6, Half Grades Given
Repeatability:	Can be repeated as necessary

Organisation:

Module EEE 311 Remotely Sensing the Basis of Biodiversity
07SMEEE311 / Block Course

Description:

General description:
In this course, students will learn about the rapidly developing field of research which uses remote sensing to assess and monitor biodiversity, including fundamental aspects such as genetic diversity and chemodiversity. The course will be split evenly into theory and practice. Lectures will introduce fundamental concepts and key literature, and practical sessions will give students hands-on experience generating and analyzing remote sensing data from different platforms for the assessment of biodiversity and its change over time.

ECTS: 6

Notes:
REGISTRATION FOR BLOCKCOURSES HERE
https://www.mybioportal.uzh.ch

Learning Outcome:
At the end of the course, students will be able to:

- Define remote sensing and describe different optical and chemical remote sensing techniques and their applications
- Define genetic diversity and the relationships between DNA sequence variation and trait variation
- Explain the relationship of genetic diversity to species and ecosystem diversity
- Demonstrate how remote sensing data can be leveraged in assessments of genetic diversity and biodiversity alongside data from in-situ observation, sampling, and sample analysis

Course Materials:	Literature will be provided in class
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Meredith Christine Schuman

Requirements:

Prerequisites:	For advanced BSc and MSc students of Biodiversity, Biology and Quantitative Environmental Science
Assessment:	Individual in-class exercises (20%), group research report (40%) and presentation (40%) in English
Grading Scale:	1-6, Half Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Spring Semester)
Booking Deadline/Period:	not bookable
Cancellation Deadline:	not cancelable

Module License Contract and License Cartel Law
02SM90WM94 / Course

Description:

General description:
Der Lizenzvertrag ist die praktisch wichtigste Art der Vereinbarung, um immaterielle Güter - Patente, Marken, Urheberrechte, Design, Know-How - unter dauerhaftem Beizug eines Dritten zu nutzen. Mit Blick auf die wirtschaftliche Wertschöpfung gehört er zu den wichtigsten Vertragstypen überhaupt; dennoch ister gesetzlich nicht geregelt, sondern ein von der Doktrin und der Praxis punktuell entwickeltes rechtliches Gebilde an der Schnittstelle von Immaterialgüterrecht und Vertragsrecht, bei dem in der Praxis auch von ausländischen Parteien sehr oft schweizerisches Recht vereinbart wird. Die Reflexion des Lizenzvertrags im Kontext des geltenden schweizerischen Schuldrechts bildet Kernthema der ersten Modulhälfte, wobei auch die moderne Schuldrechtsentwicklung (europäisches Soft Law) und registerrechtliche Fragestellungen Beachtung finden.
Kartellrechtlich sind Lizenzverträge nicht ganz einfach zu beurteilen. Zum einen können sie - insbesondere im Rahmen sogenannter Technologietransfervereinbarungen - durchaus volkswirtschaftlich positive Wirkungen zeitigen, so etwa Doppelspurigkeiten bei Forschung und Entwicklung vermeiden und den Wettbewerb auf abgeleiteten Märkten intensivieren bzw.
überhaupt erst ermöglichen. Gleichzeitig verursachen die zugrunde liegenden Immaterialgüterrechte aber absolute Schutzpositionen, die - eine entsprechende Marktmacht vorausgesetzt - Missbrauch begünstigen. Dieser kann sich z.B. in derAbschottung von Märkten, in diskriminierenden Lizenzbedingungen oder in der gänzlichen Lizenzierungsverweigerung niederschlagen.
Vor diesem Hintergrund ist die zweite Hälfte des Moduls der Auseinandersetzung mit den Wettbewerbsordnungen der Schweiz und der EU gewidmet.

ECTS: 6

Learning Outcome:
Fähigkeit, Lizenzverträge mit den wichtigsten Kernelementen zu gestalten; Kenntnisse der Grundsätze, um trotz lückenhafter Lizenzverträge konkrete Fragestellungen zu beantworten; Erkennen und Beurteilen kartellrechtlich kritischer Vertragsklauseln.

Target Groups:
Master-Studierende

Languages of Instruction:
Deutsch

Course Materials:	Werden via OLAT (Webseite des Lehrstuhls von Prof. Thouvenin) zur Verfügung gestellt.
Merkmale:	
Responsible instructor:	Florent Thouvenin

Requirements:

Prerequisites:	Besuch der Vorlesung Grundlagen des Immaterialgüterrechts oder Aneignung dieses Stoffes im Selbststudium.
Prior Knowledge:	Kenntnisse im Vertrags- und Immaterialgüterrecht
Assessment:	Schriftliche Prüfung am Ende des Semesters.
Grading Scale:	1-6, Half Grades Given

Module CHE 731 Harmonic Chemistry
07SMCHE731 / Lecture with Practical Exercises

Description:

General description:
In this lecture I will present the mathematical basis of resonance phenomena relevant to chemistry and physical chemistry from a different point of view. We experience resonance phenomena on a daily basis, especially in music and art. The idea of the lecture is to use the positive emotions associated with music and art to gain an intuitive understanding of the sometimes challenging mathematical relationships of resonance phenomena. Active participation including musical performance is welcome. Topics covered will include:

Vibrations:
•   Math: amplitudes in the time and frequency domain, Fourier analysis
•   Some basics of electric AC engineering
•   the guitar: tones and overtones, musical notation, harmonic and anharmonic vibrations, sound pick-ups, distortion, coupling
•   molecular vibrations: harmonic oscillator, anharmonicity, fundamental frequency and over-tones, measurement techniques Infrared and Raman spectroscopy
•   lattice vibrations and reciprocal space o Fourier analysis in measurement techniques: FTIR, NMR
•   Impedance spectroscopy
•   Modulation excitation spectroscopy

Resonance
•   Math: partial differential equations for wave theory and diffusion processes, resonances in 1D, 2D, and 3D
•   The drums, loudspeakers, and room acoustics: resonance effects in 2D and 3D
•   Resonances as the basis of quantum chemistry: Bohr model of the atom (1D), the hydrogen atom (3D)
•   Resonance effects in nano chemistry (plasmons, etc.)
•   Photochemistry explained along photon-electron resonances.
•   Resonances in biology/medicine: the ear (ossicles as impedance converter, how do we hear), signal propagation in nerves (soliton theory), resonances in the brain/heart

ECTS: 2

Learning Outcome:
Understanding and applying the content covered

Module EEE 263 Ecological Economics and Analysis of Economic Growth
07SMEEE263 / Course

Description:

General description:
In diesem Kurs geht es darum, aus einer ökonomisch-ökologischen Perspektive das vorherrschende Wirtschaftssystem zu verstehen, insbesondere die Wachstumsdynamik, und darauf aufbauend einzelne Themen (z.B. Wohlfahrt, Arbeit, Geld, Konsum, Sozialsicherung) zu vertiefen. Im Zentrum stehen Systemverständnis sowie Ansatzpunkte für politische und gesellschaftliche Gestaltung und Wandel.

ECTS: 3

Notes:
Prüfung findet in der letzten Vorlesungsveranstaltung statt. Repetitionsprüfung s. MNF Prüfungsplan https://www.mnf.uzh.ch/de/studium/pruefungen.html

Learning Outcome:
Nach der Veranstaltung sind die Studierenden in der Lage ...

- ökologische Bedingungen und Gesetzmässigkeiten, die für die Ökonomie relevant sind, sowie ökologisch-ökonomische Zusammenhänge zu verstehen
- die ökonomische Wachstumsdynamik zu verstehen und Ansatzpunkte für eine Postwachstumsgesellschaft zu erkennen.

Course Materials: Lesetexte werden abgegeben. Zum Einlesen und Vertiefen:

- Spash, C.L., Ed. (2017). The Routledge Handbook of Ecological Economics: Nature and Society. Abingdon, Routledge.
- 42-Die Antwort auf fast alles (ARTE-Sendung): Brauchen wir Wirtschaftswachstum? https://www.youtube.com/watch?v=2Kl69bWbXnY&list=PLlQWnS27jXh_ofqIJZH7vdOkQ-p_w9gKw&index=8&t=259s

Merkmale: Target Group: Open to School Students

Responsible instructor: Irmengard Seidl

Requirements:

Prerequisites:	Vorbereitung der Vorlesungen durch Lektüre von Texten zu: Gegenstand der Ökologischen Ökonomik und ihrer Position gegenüber Wirtschaftswachstum; Messung und allgem. Bedeutung von Wirtschaftswachstum insgesamt sowie in ausgewählten Wirtschafts- und Gesellschaftsbereichen
Assessment:	Schriftlichen Prüfung am Ende des Semesters auf Deutsch
Grading Scale:	1-6, Half Grades Given
Repeatability:	Can be repeated once

Module EEE 313 What is working in Conservation?
07SMEEE313 / Block Course

Description:

General description:
What can science and management do for conservation? With this question in mind, in this course we will be able to review what is done for conservation in Switzerland. How many species are in danger of extinction? What organizations are working on it? Are they doing well? What could be improved? Then, with a theoretical framework and an exploratory excursion to various places that work for Conservation Biology, such as animal recovery centers, captive breeding stations, zoos and administrations, we will describe, analyze and discuss conservation plans for threatened species, with the aim of being able to evaluate conservation efforts and projects in Switzerland.

ECTS: 6

Notes:
REGISTRATION FOR BLOCKCOURSES HERE
https://www.mybioportal.uzh.ch

Learning Outcome:
By the end of the module students will have a global vision of how recovery plans for threatened wild species are being carried out and will have sufficient knowledge to develop solid judgment when facing real conservation problems in their professional future.

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Eva Albert Blasco

Requirements:

Assessment:	The assessment will be a written research assay on an endangered species in English.
Grading Scale:	1-6, Half Grades Given
Repeatability:	Can be repeated once

Organisation:

Module EEE 351 Conservation Biology
07SMEEE351 / Course

Description:

General description:
In this course, we will look into the central issues of biology conservation. With such important points as the management of small populations, extinction, the contribution of population genetics or the importance of climate change for conservation. All this will be illustrated with examples for a better understanding of the theory. In the end, the impression that the students remain is that the biodiversity crisis is real and alarming. But combining collective and personal efforts, with the addition to the great technological and scientific progress, the student's feeling is that the recovery of our ecosystems is possible and that we have a unique wonderful place to live.

ECTS: 3

Notes:
The examination takes place during the last lecture. For repeat examination, see the MNF examination schedule https://www.mnf.uzh.ch/de/studium/pruefungen.html

Learning Outcome:
After successfully completing the module, students should be able to:

- recognize basic concepts and theories of conservation ecology
- Apply the concepts and theories to practical problems
- Get an overview of policies and conservation strategies

Merkmale:	Target Group: Suitable for English Speakers Target Group: Open to School Students

Module Public Law and Economics
02SM90WM95 / Course

Description:

General description:
How should the law address the problem of excessive CO2 emissions? Why do voting procedures sometimes fail? When should a task be delegated to the administration or courts? How can the law deter corruption and collusion? And why do states comply with international law?
This course will uncover the economic foundations of public law. In doing so, the course will explore a diverse set of topics ranging from bargaining problems, voting mechanisms, the economics of fundamental rights, economic theories of delegation, enforcement and compliance to comparative constitutional law and legal origins.
The course will discuss both the conceptual foundations of the economic analysis of law and more recent developments in public law and economics, in particular recent methodological advancements. Drawing on specific examples from national public law and public international law, the course will shed light on how experimental methods, empirical legal studies and data science caninform our understanding of public law.

ECTS: 6

Languages of Instruction:
English

Module BIO 255 Finding and Solving Interesting Problems in Molecular Life Sciences
07SMBIO255 / Block Course

Description:

General description:
This block course aims to train your critical thinking, creativity, communication, and collaboration skills. To practice these skills, we will explore a research topic connected to molecular life sciences that you find interesting. The topics will be chosen at the beginning of the course by all the participants; you will work in teams on the selected topics. The team size and number of teams will be determined by the class size. You will dissect research papers and reviews on the selected topics to learn how to design experiments, develop research proposals, as well as describe methods and results. You will learn about the principles and challenges of Good Scientific Practice via case studies and reflection. You will find an open question in your research topic and devise strategies to try to answer this question. There is overlap between this course and BIO 557. This course goes deeper into the topics of creativity and collaboration.

ECTS: 6

Notes:
REGISTRATION FOR BLOCKCOURSES HERE
https://www.mybioportal.uzh.ch

Learning Outcome:
Upon successful completion of the course, the students will:

Collaboration

- be able to use the introduced strategies to structure their teamwork;
- be able to use the introduced strategies to structure their brainstorming;

Creativity

- be able to describe the differences between exploratory and confirmatory research;
- be able to identify potential research questions;
- be able to design a research plan to solve a scientific question;
- be able to design an experiment to address a scientific question;

Critical Thinking

- be able to assess how bias can affect experimental design and interpretation;
- be able to use different strategies to minimize the effect of bias;
- be able to assess how given practices conform to the principles of Good Scientific Practice;
- be able to weigh the strengths and weaknesses of their own and others work;
- be able to explain the concept of an Experimental System as defined in the class;
- be able to deduce what controls could strengthen and validate the Experimental System (negative, positive, methodology and reagent).

Communication

- be able to write and present information accurately, briefly, and clearly;
- be able to write an abstract that summarizes data either they or others have generated in the "AND, BUT, THEREFORE" style;
- be able to generate a concise and coherent introduction that gives a proposed/investigated research question context;
- be able to generate a concise and coherent research plan to solve a research question;
- judge how the intended audience and the intended goals affect the content and style of the writing;

- be able to write a clear and concise description of the experimental data.

Merkmale:

Responsible instructor: George Hausmann

Requirements:

Prerequisites: For advanced Bachelor students (Basic studies completed) and Masters students.

Assessment: Graded Tasks

- A research proposal that describes your strategy to solve the interesting question. (50%)

- Document the design of an experiment: Both in the form of an oral presentation and written documentation, detail how you would answer a defined experimental question (50%)

The assessment tasks will be spread throughout the course. The final assessment task will be the research proposal, which will be due on at the end of the course. The percentage of the final grade is indicated in (x%).

In addtion to the graded tasks, to pass the course you will need to sastisfactorly complete all homework tasks and in class activities. Failure to do so will result in a deduction of grades.

Grading Scale

1-6, Half Grades Given

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Module Interdisciplinary spatial analysis: GIS as a digital method
10SMSTS-510 / Module

Description:

General description:
DIESES MODUL FINDET IM FS26 NICHT STATT.

Der Kurs bietet eine interdisziplinäre Einführung in die Arbeit mit Geographischen Informationssystemen (GIS) als vielfältig einsetzbarer Methode. Räumliche Daten spielen in fast jeder Disziplin eine Rolle. Sie eröffnen ein breites Spektrum an Einsatzmöglichkeiten, um räumliche Zusammenhänge zu erkennen. Welchen Nutzen hat die Arbeit mit GIS für verschiedene Fächer? Welche Art von Erkenntnissen oder innovativen Fragestellungen sind mit GIS möglich? Welche Besonderheiten stellen sich bei der Arbeit mit räumlichen Daten und welche digitalen Werkzeuge stehen dafür zur Verfügung? Wie geschieht der Transfer von der wissenschaftlichen Fragestellung zur technischen Umsetzung und welche grundlegenden Punkte gilt es dabei zu beachten? Diese Punkte werden theoretisch beleuchtet, an Fallbeispielen erläutert und in selbständigen Übungen gemäss Anleitung während des Semesters vertieft. Dabei werden sowohl theoretische Konzepte als auch praktische Umsetzungskompetenzen vermittelt.

ECTS: 3

Notes:
Onlinekurs im betreuten Selbststudium. Die Dozierenden stehen während des Semesters für Rückfragen und Feedback zur Verfügung. Der OLAT-Kurs ist das ganze Jahr über für Studierende der UZH frei zugänglich. Ein Einstieg ist jederzeit möglich - wer bereits vor Beginn der Modulbuchungsfrist starten möchte, kann sich direkt bei daniel.ursprung@hist.uzh.ch melden.
Die Inhalte können selbstständig während des laufenden Semesters oder vorab in den Semesterferien erarbeitet werden. Um das Modul jedoch regulär zu absolvieren und im jeweiligen Curriculum anrechnen zu lassen, ist eine Modulbuchung während der offiziellen Buchungsfrist zwingend erforderlich. Die Anrechnung erfolgt am Ende jenes Semesters, in dem das Modul gebucht wurde und alle Leistungsnachweise fristgerecht und mit mindestens ausreichender Qualität eingereicht wurden.

Learning Outcome:
Die Teilnehmer:innen kennen verschiedene Einsatzszenarien von GIS und können eigene Beispiele aus ihrer Disziplin skizzieren. Sie sind in der Lage, räumliche Daten selbst zu erheben oder bestehende Daten kritisch zu bewerten und wissen, worauf dabei jeweils zu achten ist.
Sie können einfache GIS-Projekte konzipieren, verschiedene Visualisierungsmethoden anwenden und deren jeweilige Vor- und Nachteile benennen. Ausserdem verstehen sie, was ein Geoinformationssystem (GIS) ist und wie es fachspezifische Methoden sinnvoll ergänzen kann.

Target Groups:
Bachelor, Master

Languages of Instruction:
Deutsch

Merkmale:

Responsible instructor:	Andreas Victor Walser

Requirements:

Prerequisites:	Keine besonderen Voraussetzungen
Assessment:	Kurze Selbstlernübungen zu jeder Lektion vertiefen fortlaufend die Inhalte und dokumentieren die eigene Auseinandersetzung mit der Materie. Die Ergebnisse

bestehen aus schriftlichen Dokumentationen und eigenen kleinen GIS-Anwendungen. Abgabefrist ist ca. 2 Wochen nach Vorlesungsende.

Module BIO 212 Language evolution: insights from animal communication
07SMBIO212 / Course

Description:

General description:
This module examines the extent to which cognitive and communicative components of human language exist in non-human animal species.
Comparative studies of both wild and captive, as well as closely and distantly related animal species are summarized and placed in a broad framework to examine the phylogenetic age of human language abilities and the socio-ecological conditions underlying the emergence of language.

ECTS: 3

Learning Outcome:
By the end of the course students should:
-Have a thorough understanding of how the comparative approach can be used to reconstruct the evolution of human language
-Have detailed knowledge on the key hallmarks of language and what evidence exists for similar abilities in animals
-Develop independent and critical thinking and hone presentation skills

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Simon William Townsend

Requirements:

Prerequisites:	Basics in evolutionary biology and animal behaviour (e.g. BIO 115, BIO 113, and BIO 122)
Assessment:	25% paper presentation 25% active participation in lectures and seminars 50% Essay based final exam
Grading Scale:	1-6, Half Grades Given
Repeatability:	Can be repeated once

Module BIO 202 Comparative Communication and Cognition
07SMBIO202 / Block Course

Description:

General description:
This course will give students the opportunity to gain insight into the practicalities of comparative research through working directly with observational and experimental animal data sets collected in the field or in captivity. Students will embark upon self-contained projects where they will generate a research question, process data, conduct analyses and interpret the results within a broader comparative and evolutionary context.

ECTS: 6

Notes:
Bookable via Block course application tool: https://www.mybioportal.uzh.ch

Learning Outcome:
By the end of this course students should:
-Have a thorough understanding of the comparative approach and its relevance in unpacking the evolutionary history of human cognitive and communicative skills.
-Have an understanding of the scientific method and how it can be used to address questions in the field of animal communication and cognition
-Gain competence using various research methods and approaches vital to the study of animal communication and cognition
-Gain experience working collaboratively and disseminating research to peers in groups

Merkmale:

Responsible instructor:	Simon William Townsend

Requirements:

Prerequisites:	Basic studies completed.
Assessment:	1. A short initial group research proposal presentation (25%) 2. A research poster summarising clearly your project and findings (50%) 3. A longer group presentation of the final submitted poster (25%)
Grading Scale:	1-6, Half Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Spring Semester)
Booking Deadline/Period:	not bookable
Cancellation Deadline:	not cancelable
Organisation:	Institut für Evolutionäre Anthropologie
Offered in:	Spring Semester 2026 Spring Semester 2024

Module Linguistic Methods
06SM360-542 / Module

Description:

General description:
Das Modul dient der Vertiefung und Erweiterung der Methodenkenntnisse in ausgewählten Forschungsfeldern der synchronen und/oder diachronen Sprachwissenschaft. Dabei werden die Studierenden an die selbständige wissenschaftliche Beschäftigung mit dem Deutschen, seinen Varietäten und Nachbarsprachen und/oder seiner historischen Entwicklung herangeführt. Im Vordergrund stehen die Lektüre und kritische Diskussion älterer wie neuerer Beiträge zu methodischen Fragestellungen, die Aneignung entsprechender Begriffsinventare sowie die intensive Beschäftigung mit methodischen Zugängen zur Analyse des Zusammenhangs von Sprache und Gesellschaft.

ECTS: 9

Learning Outcome:
Die Studierenden können durch selbständige und intensive Beschäftigung mit linguistischen Methoden ihre Kenntnisse exemplarisch in einem ausgewählten Forschungsfeld der synchronen und / oder diachronen Sprachwissenschaft anwenden und in einer eigenständigen wissenschaftlichen Arbeit umsetzen. Sie sind in der Lage, aktuelle Forschungsarbeiten unter methodischen Gesichtspunkten kritisch zu reflektieren.

Module Narratives and contexts in the history of photography
06SM640-523 / Module

Description:

General description:
Fotografie als dokumentarisches und künstlerisches Medium wird in historischen sowie globalen Kontexten und mit Bezug auf die Gegenwart analysiert.

ECTS: 9

Learning Outcome:
Die Studierenden erwerben sowohl Grundkenntnisse als auch vertiefte Kenntnisse zur Geschichte der Fotografie. Dabei werden die verschiedenen Narrative der Fotografiegeschichte erörtert. Studierende sollen befähigt werden, subjektive Denkansätze selbstkritisch zu relativieren und parallel objektivierte Analysen zu betreiben, damit sie die Geschichte der Fotografie angemessen erläutern und wissenschaftlich durchdringen können.

Module Change and variation: structural aspects
06SM360-543 / Module

Description:

General description:
Das Modul vermittelt vertiefte Einblicke in strukturelle Aspekte von sprachgeschichtlichem Wandel und Sprachvariation in Phonologie, Morphologie, Syntax und/oder grammatischer Semantik. Das Modul führt die Studierenden an die selbständige wissenschaftliche Beschäftigung mit älteren oder jüngeren historischen Sprachstufen, aktuellen oder historischen Nichtstandardvarietäten und Dialekten, verwandten Sprachen oder Kontaktvarietäten heran. Es vermittelt Kenntnisse zum Zusammenhang von Variation und diachronem Wandel, die auf sprachwandel- und grammatiktheoretische sowie auf sprachtypologische Konzepte bezogen werden. In methodischer Hinsicht geht es hierbei sowohl um die Aneignung und kritische Auseinandersetzung mit theoretischen Konzepten der einschlägigen grundlegenden und aktuellen wissenschaftlichen Literatur als auch um die Anwendung dieser Konzepte bei der Analyse und Erklärung primärer Sprachdaten,
z.B. unter Rückgriff auf umfassende Korpora und/oder von Sprecher*innen gewonnene Daten.

ECTS: 9

Learning Outcome:
Die Studierenden können durch selbständige und intensive Beschäftigung mit der Forschungsliteratur ihre Kenntnisse der sprachstrukturorientierten diachronen Linguistik und Variationsforschung vertiefen, exemplarisch in einem ausgewählten empirischen Forschungsfeld anwenden und in einer eigenständigen wissenschaftlichen Arbeit umsetzen. Sie sind in der Lage, Theorien und Forschungsarbeiten zu sprachstrukturellem Wandel und Variation kritisch zu reflektieren, Sprachdaten selbständig zu analysieren und das Erklärungspotenzial theoretischer Konzepte bei der Datenanalyse zu nutzen. Sie können sprachstrukturelle Veränderungs- und Variationsphänomene im Deutschen treffsicher diagnostizieren und Zusammenhänge herstellen mit Entwicklungen in verwandten Sprachen und Varietäten, grammatiktheoretischen Ansätzen und sprachtypologischen Befunden. Sie entwickeln ein Verständnis für die Wechselwirkungen zwischen sprachlicher Variabilität und Wandlungsfähigkeit und können Variationsphänomene vor dem Hintergrund sprachgeschichtlicher und sprachvergleichender Perspektiven kontextualisieren.

Module Present-day language: Structures
06SM360-545 / Module

Description:

General description:
Das Modul dient der Vertiefung und Erweiterung der Theorie- und Methodenkenntnisse in Forschungsfeldern, die sich mit unterschiedlichen Perspektiven der Struktur der deutschen Gegenwartssprache und ihrer Varietäten auseinandersetzen (im Kontext
z.B. von Interaktionslinguistik, Textlinguistik, Medienlinguistik, Variationslinguistik). Das Modul hat zum Ziel, die Studierenden an die selbständige wissenschaftliche Beschäftigung mit ausgewählten linguistischen Themenbereichen heranzuführen.

ECTS: 9

Learning Outcome:
Die Studierenden können durch selbständige und intensive Beschäftigung mit Theorien und Fragestellungen ihre Kenntnisse in der synchronen Sprachwissenschaft exemplarisch in einem ausgewählten Forschungsfeld anwenden und in einer eigenständigen wissenschaftlichen Arbeit umsetzen. Sie sind in der Lage, aktuelle Forschungsarbeiten kritisch zu reflektieren und fachlich fundiert zu aktuellen gesellschaftlichen Fragen von Norm und Sprachvariation im schulischen/beruflichen Kontext Stellung zu nehmen.

Module EEE 353 Field Course in Biodiversity Assessment and Monitoring
07SMEEE353 / Block Course

Description:

General description:
For practical purposes, the most urgent need in protecting biodiversity is to assess how biodiversity is distributed in space and how it changes over time. Because biodiversity is not homogeneously distributed, its measurement is difficult and requires a multitude of tools and methods.
For example, flowering plants may easily be counted but butterflies are constantly moving and may be hard to see when a site is being visited.
Different groups of invertebrates, which play an important role in all ecosystem and food webs, must be collected with specific means (e.g., transect counts, pit falls, light traps, kicknetting) and identified appropriately. Good statistical design of assessment and monitoring programs maximizes accuracy for a given cost.

ECTS: 2

Notes:
Dates of the course: Sunday 16 to Friday 21 August 2026. The course takes place in the Swiss Alps (Elm, canton GL), and participation for the whole week (incl. staying over night) is mandatory. A financial contribution of 250 CHF to cover the meals will be asked for. Travelling costs need to be covered individually by the participants.

Learning Outcome:
By the end of the module, students

- are able to plan, conduct and present small research projects on current topics in Ecology and Biodiversity sciences
- know and have applied different field techniques to monitor biodiversity of different taxa (such as terrestrial insects, vascular plants, aquatic invertebrates)
- are familiar with the most important aspects of planning and conducting biodiversity monitoring
- have a first overview on the faunistics and identification of a few major taxonomic organismal groups (such as plants, butterflies, aquatic invertebrates)

Target Groups:
Can be booked by BSc and MSC students with priority given to students of Biodiversity, Biology and Earth System Sciences. Second priority is given to second and third year Bachelor students in Biodiversity.

Languages of Instruction:
English

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Florian Altermatt

Requirements:

Prerequisites:	Strongly recommended: contents of module EEE104 are required. Mandatory: to participate, BIO 111 passed and completed with a grade of at least 4.5 (major students), or BIO 113 passed and completed with a grade of 4.5 (minor students).

Assessment:

Active participation, oral and/or written short presentations, completing of field notebook in English. 10 % Active participation, 60 % Scientific presentations, 30 % Field notebook.

Grading Scale:	1-6, Half Grades Given
Repeatability:	Can be repeated once

Module BIO 144 Data Analysis in Biology
07SMBIO144 / Lecture with Practical Exercises

Description:

General description:
This course will help you develop a solid foundation in answering biological questions with quantitative data. The approaches you will learn are, however, generally applicable to using data to solve problems, an increasing important skill in a world more and more dominated by data.

ECTS: 4

Learning Outcome:
By the end of the course you will be able to: Plan how to make use quantitative data to solve a biological problem.
arrange data for efficient processing.
Reliably, accurately and efficiently manage and manipulate data.
Make clear and informative visualisations of data.
Select, fit, validate and interpret an appropriate statistical model, in particular for linear regression and ANOVA.
Perform analyses for binary and count data.
Research and learn about other tools for data analysis.
Clearly communicate the answer to your biological question.

Course Materials:	Ein eigener Laptop muss mit gebracht werden.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Owen Petchey

Requirements:

Assessment:	Graded (Numbers, in half steps) Module exams July, exam results in September. Written exam on the computer (BYOND), in English.
Grading Scale:	1-6, Half Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Fall Semester)
Booking Deadline/Period:	from We 14.01.2026 10:00 to Tu 10.03.2026 24:00
Cancellation Deadline:	from We 14.01.2026 10:00 to Tu 21.04.2026 24:00
Organisation:	Division IV Biology
Offered in:	Spring Semester 2026 Spring Semester 2025 Spring Semester 2024

Component of:

Module BIO 402 Philosophy of Science with a Focus on Biology
07SMBIO402 / Course

Description:

General description:
The lecture starts with a reflection on the discipline of biology. We address questions such as: What is the aim and achievement of this discipline? What kind of question does it address? What methods does it use to address them? How do biological explanations work? What are the basic assumptions on which biological research builds? How is it different from other sciences such as physics? We will look at the particular role of the theory of evolution in biological explanations and analyse key concepts in biology such as 'life' or 'gene&apos of the lecture, we will also address the connection between biology and ethics in the contexts of the difference between facts and values, evolutionary ethics and the transition from science to technology.

ECTS: 3

Learning Outcome:
On successful completion of the lecture, the students should:

- Know central concepts and theories in the philosophy of science.
- Understand the particular lens through which biology studies the world and be aware of background assumptions and limitations.
- Understand the role of evolutionary theory for research and explanations in biology.
- Understand the connection between biology and ethics.

Target Groups:
Addresses MD-PhD students, PhD students, Master students advanced Bachelor students

Languages of Instruction:
English

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Anna Deplazes Zemp

Requirements:

Assessment:	Form, duration and timing of the assessment(s): (if several, define how the final grade is composed) Written answers to different tasks, final examination, in English
Grading Scale:	1-6, Half Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Fall Semester)
Booking Deadline/Period:	from We 14.01.2026 10:00 to Tu 10.03.2026 24:00

Module BME 333 From Bench to Bedside – Examples from Immunology and Beyond
07SMBME333 / Course

Description:

General description:
This course covers biological concepts and findings that have led to therapies used in the clinics today.
Each lesson will revisit the biological concept, the path into clinical application and the context in which the therapy is used today. Many of the therapies discussed have their origins in immunological discoveries such as e.g. Immune Checkpoint Inhibitors, but the course also covers important concepts in gene editing, infectiology and endocrinology that have shaped modern medicine.

ECTS: 3

Learning Outcome:
Students who successfully complete this course should be able to:
    - name biological ideas that have shaped modern treatment
    - explain the biological concepts behind modern therapies
    - understand the biological background of side effects of different therapies
    - outline the path from the biological idea to successful implementation in the clinics
    - idenity promising future treatment approaches
    By the end of the module, students should be able to:
    - discuss the likelihood of new biological concepts becoming therapies
    - name important considerations when planning clinical trials
    - identify possible pitfalls in the process of developing novel treatments

Merkmale:	Target Group: Suitable for English Speakers

Module Cross-curricular Competencies and Digital Media
06SM222ÜfK / Module

Description:

General description:
Im Hinblick auf die zu erzielende allgemeine Studierfähigkeit und vertiefte Gesellschaftsreife sollen an Gymnasien überfachliche Kompetenzen vermehrt im Fachunterricht gefördert werden. Ein besonderer Schwerpunkt dieser Lehrveranstaltung liegt auf der Förderung des selbstregulierten Lernens (SRL) als zentraler überfachlicher Kompetenz.
Angesichts der zunehmenden Digitalisierung aller Lebensbereiche gewinnen digitale Medien auch im Unterricht an Bedeutung. Sie werden in dieser Lehrveranstaltung punktuell als didaktische Werkzeuge zur Unterstützung der Förderung thematisiert (exkl. KI).
Zentrale Bestandteile sind folglich die Auseinandersetzung mit SRL und Möglichkeiten zu dessen gezielter Förderung im Unterricht. Zudem werden die professionellen Kompetenzen der Lehrpersonen in den Blick genommen, die für die Umsetzung einer reflektierten Förderung überfachlicher Kompetenzen wesentlich sind.
Die Veranstaltung findet hauptsächlich in Präsenz statt und wird durch Online-Sitzungen sowie Selbstlernphasen ergänzt. Die Teilnehmenden werden durch Peerfeedback und Coaching begleitet und unterstützt.

ECTS: 3

Merkmale:

Responsible instructor:	Yves Karlen

Requirements:

Prerequisites:	Für die Teilnahme an der Veranstaltung bestehen keine verbindlichen Voraussetzungen. Der Besuch der Vorlesung «Pädagogische Psychologie: Bedingungen und Wirkungen erfolgreichen Lehrens und Lernens» von Prof. Dr. Yves Karlen wird jedoch empfohlen. Vorherige und/oder aktuelle Unterrichtstätigkeit ist keine Voraussetzung für die Teilnahme am Seminar.
Assessment:	Entwicklung und Posterpräsentation eines konkreten Szenarios zur Förderung überfachlicher Kompetenzen unter Einbezug digitaler Medien, Peerfeedbacks ---
Grading Scale:	Pass/Fail
Repeatability:	repeatable once, book again

Organisation:

Offer pattern:	1 Semester (Every Spring Semester)

Module Problems of Art and Art Theory
06SM640-030 / Module

Description:

General description:
Aus der permanenten Transformation aktueller Kunst, mit dem Wandel technologischer, gesellschaftlicher oder ideologischer Voraussetzungen, entstehen auch für das Fach Kunstgeschichte neue Anforderungen. Bis heute fordert die Theorie-Produktion im Feld visueller Kulturen auch Paradigmenwechsel kunstwissenschaftlicher Methodik ein. Das Modul erarbeitet wichtige Positionen im kunsttheoretischen und methodischen Bereich über gemeinsame Lektürearbeit.

ECTS: 6

Learning Outcome:
Ziele sind die Erweiterung der Lektürekompetenz und das Verständnis für historische Zusammenhänge und kunstspezifische Textquellen. Die Studierenden erwerben Grundlagenkenntnisse über zentrale kunst- und kulturwissenschaftliche Theoriefelder und lernen wichtige Debatten der Kunstwissenschaft kennen.

Languages of Instruction:
Deutsch

Merkmale:

Module Media Education in Times of Generative AI
06SM222MEAI / Module

Description:

General description:
Generative AI is transforming how media is created, circulated, and interpreted, challenging teachers to rethink media education. This course equips upper secondary preservice teachers to critically explore AI's impact on media culture while fostering creativity, ethics, and critical literacy. Through theory and hands-on practice, participants learn to design activities that prepare students to navigate and shape an AI-driven world.

ECTS: 3

Languages of Instruction:
Englisch (Leistungstungsausweis darf auch auf Deutsch verfasst werden)

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Dominik Petko

Requirements:

Prerequisites:	Das Seminar wird auf Englisch gehalten. Der Leistungsnachweis kann auch in deutscher Sprache verfasst werden.
Assessment:	Portfolio (written reflection, written assignment). The module is considered passed if all elements of the portfolio are passed. DE: Portfolio (schriftliche Reflexion, schriftliche Arbeit). Das Modul wird als bestanden bewertet, wenn alle Elemente des Portfolios bestanden sind. ---

Module Advanced Text Analysis Using Natural Language Processing
10SMSTS-603 / Module

Description:

General description:
This online course is designed for beginners who are curious about how to analyze and make sense of large amounts of text data, especially in the field of health research. No previous knowledge in text analysis is required- just an interest in learning new ways to work with data.

In this course, students will explore how to uncover hidden topics in text in data-driven fashion (like finding themes in health articles) using a technique called topic modeling. They will also learn how to create simple tools (called classifiers) that can automatically sort and categorize text into different groups. The course will cover some basic ideas from natural language processing (NLP), which is the engine behind e.g. chatbots and search engines. Throughout the course, students will work with real examples from health research, but are also welcome to bring their own data if they have it.

ECTS: 1

Notes:
The course consists of four online sessions, supplemented by project-based work between sessions. It will combine short lectures, group discussions, and hands-on, large-scale text analysis. We will work with open source language models from the Hugging Face AI platform (https://huggingface.co/). We will use the BERTopic Python library for topic modeling and the Transformers Python library for classifier training. Throughout the course, students will work on a group project that they will present in the final session.

Zoom Link for the online sessions: https://tinyurl.com/4v543nsz

Learning Outcome:
By the end of the course, participants will have a basic understanding of language models, how they can be leveraged to mine public opinion in the media, and what to consider for the responsible use of language models. Specifically, participants will:
1. Discuss the potential and risks of using language models for digital health research
2. Evaluate the suitability of different language models for a particular opinion mining task using freely available AI resources
3. Develop competencies for responsible use and critical evaluation of language AI

Target Groups:
Master, Doktorat

Languages of Instruction:
English

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Viktor von Wyl

Requirements:

Prerequisites:	This course requires students to have basic Python skills, including familiarity with the 'pandas' and 'numpy' libraries for datamanipulation. They will also need to set up and be familiar with Jupyter Notebook (https://jupyter.org/) prior to the course. Please note that there will be no introductory session on Python.

Assessment:	Presentation of the data analysis project at the last session. ---
Grading Scale:	Pass/Fail
Repeatability:	Can be repeated once

Organisation:

Module Unternehmerische Nachhaltigkeit: Theoretische Grundlagen und ausgewählte Praxisfälle (VL) Corporate Sustaina
03SM22BO0123 / Course

Description:

General description:
Die Vorlesung bietet eine Einführung in Nachhaltigkeit, Governance, Risikomanagement sowie Kontrollprinzipien und -praktiken aus einer ganzheitlichen Perspektive. Es wird die Rolle von Unternehmen bei der Förderungeiner nachhaltigen Entwicklung, die Bedeutung effektiver Governance-Strukturen,die Identifizierung und das Management von ESG (environment, social, governance) Risiken sowie die Einrichtung von Kontrollsystemen zur Minderung dieser Risiken untersucht.
In der ersten Hälfte des Semesters werden die relevanten Grundlagen vermittelt,die in der zweiten Hälfte des Semesters anhand interessanter Fallstudien und aktueller Ereignisse veranschaulicht und vertieft werden.

ECTS: 3

Notes:
Das Modul findet vor Ort statt und wird zeitgleich via Zoom übertragen. Es wird ein Podcast angeboten.

90% Prüfungspunkte und 10% Attendance-Points

Learning Outcome:
- Verständnis der Grundprinzipien der Nachhaltigkeit und der Bedeutung von Unternehmen für die Förderung einer nachhaltigen Entwicklung.
- Untersuchung der Rolle von Governance-Strukturen bei der Gewährleistung ethischer und verantwortungsvoller Geschäftspraktiken (einschliesslich der Rolle des Verwaltungsrates).
- Identifikation verschiedener Arten von Risiken und Verständnis der Bedeutung des Risikomanagements im Geschäftsbetrieb.
- Kenntnisse über Kontrollsysteme und ihre Rolle bei der Risikominderung und der Sicherstellung der Einhaltung von Vorschriften und ethischen Standards.
- Präsentation relevanter Fallstudien und aktueller Ereignisse, um die im Kurs erlernten Prinzipien auf reale Situationen anzuwenden.

Target Groups:
BA-Studierende

Languages of Instruction:
deutsch

Course Materials:	Skript (Folien), Fallstudien
Merkmale:	Target Group: Open to School Students
Responsible instructor:	Reto Eberle

Requirements:

Assessment:	90% Prüfungspunkte und 10% Attendance-Points Die Prüfung zum Modul findet vor Ort statt. Schriftliche Prüfung am 11.06.2026, 14:00 -15:30 Uhr (90 Minuten) - openbook

- Erlaubte Hilfsmittel: Vorlesungsunterlagen, empfohlene Literatur (s.o.), Zusammenfassungen, netzunabhängiger Taschenrechner
- Nicht erlaubt sind kommunikationsfähige elektronische Hilfsmittel.

Module Topics in Money and International Finance (S)
03SM22BO0124 / Seminar

Description:

General description:
In this seminar, we will study current topics in monetary macroeconomics and international finance, such as central banking, exchange rates and their assessment, capital flows, and US dollar dominance, among others. At the end of the course, you will have a good understanding of how exchange rates can be assessed, why global imbalances can be good, which capital flows may be risky, and how central banks set their monetary policies in today's financially integrated world, among many other issues.
The first part of the course will lay the macroeconomic foundations and provide definitions and data sources, while the second part will consist of students' presentations on current policy issues. A list of reading material will be provided during the kick-off meeting.

ECTS: 3

Notes:
This seminar is held by an external lecturer, Dr. Pinar Yesin, who is currently working as an Economic Advisor at the Swiss National Bank (SNB). More info: https://www.pinaryesin.com.
This seminar is limited to 25 participants and requires an application. Allocation is handled via the module booking tool.
If demand exceeds capacity, priority is given to Economics majors.
Important: Seminar booking periods differ from regular lecture module booking periods. Attendance is mandatory at all sessions.
More information on the process can be found on our website: https://www.econ.uzh.ch/en/study/undergraduate/ma/seminar.html

Application for this seminar is the module booking tool:https://studentservices.uzh.ch/uzh/launchpad

Learning Outcome:
Get familiar with current research and policy issues in money and international finance.

Target Groups:
Third-year students majoring in Economics (BA)

Languages of Instruction:
English

Course Materials:	Slides and course notes available on OLAT; academic papers and policy columns available online
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Mathias Hoffmann

Requirements:

Prior Knowledge:	Intermediate macroeconomics and econometrics
Assessment:	Active participation (30%) and a presentation (70%)
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Module Sports Data-Based Management and Economics (L)
03SM22MO0212 / Course

Description:

General description:
Sports data are increasingly employed in management and economic research. This data is highly objective, granular, and generated under ideal laboratory conditions due to standardized rules. Through the analysis of data from varioussports, including soccer, baseball, American football, and basketball, this module offers an introduction to utilizing sports data for advancing managementand economic research.

ECTS: 3

Notes:
This module takes place on-site.

Learning Outcome:
Students have a thorough understanding of the most pertinent methods in sports data analytics and how sports data can be used to advance management and economic research.

Languages of Instruction:
English

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Raphael Flepp

Requirements:

Prerequisites:	Admission to Master's program
Assessment:	The examination of the module takes place on-site. Written exam on Thursday, 18.06.2026, 16:15-17:45 (90 min).
Grading Scale:	1-6 Quarter Grades Given

Module Doctoral Seminar in Interactive Visual Data Analysis
03SMDINF1148 / Seminar

Description:

General description:
The course consists of two parts: In a two-day workshop, each doctoral student presents a progress report on his/her PhD thesis and a reflection on recent developments in the specific research field.
The second part consists of regular meetings which include researchers and doctoral students presenting their PhD research progress, current paper projects, conference reports, presentation rehearsals, new research projects, guest lectures, as well as the review and evaluation of other student projects.

ECTS: 2

Notes:
Registration by E-Mail to bernard@ifi.uzh.ch
BIN 2.A.24 (if not announced differently)

Learning Outcome:
The PhD students learn to create, write, and present scientific publications, how to manage their PhD project, and how to manage, supervise, and evaluate student projects.

Target Groups:
PhD students in Interactive Visual Data Analysis research.

Languages of Instruction:
English

Course Materials:	Slides will be distributed after the presentations
Merkmale:	Target Group: Suitable for English Speakers

Module Introduction to Speech Processing
06SM521-023 / Module

Description:

General description:
The module consists of lectures and practical exercises in the field of automatic speech processing. Students will learn the fundamentals of speech processing systems such as speech recognition and speech generation (e.g., text-to-speech synthesis), along with their technical implementations, and apply them in practical exercises.

ECTS: 6

Learning Outcome:
Students will gain practical experience and a deeper understanding of techniques in the field of automatic speech processing.

Languages of Instruction:
Englisch

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Volker Dellwo

Requirements:

Prerequisites:	Required programming knowledge equal or equivalent to that taught in "Programmiertechniken in der Computerlinguistik 1". Recommended background knowledge to the following courses: "Maschinelles Lernen in der Computerlinguistik" and "Einführung in die Computerlinguistik 1".
Assessment:	Portfolio --- Take-home assignment 1 - 20% Take-home assignment 2 - 20% Take-home assignment 3 - 20% Final project and report - 40%
Grading Scale:	1-6, Half Grades Given
Repeatability:	repeatable once, book again

Organisation:

Offer pattern:	1 Semester (Every Spring Semester)
Request period:	from Mi 14.01.2026 10:00 to Di 27.01.2026 24:00
Place allocation at the latest:	Sa 31.01.2026 22:00
Waiting list progression period:	from Sa 31.01.2026 22:00 to Do 12.02.2026 24:00

Module Advanced Machine Learning
06SM521-533 / Module

Description:

General description:
This course examines advanced methods in supervised and unsupervised machine learning, with a focus on deep learning architectures. Topics include state-of-the-art models such as Transformers, Graph Neural Networks, Diffusion Models, and State Space Models, with attention to both their theoretical principles and practical implementation.

ECTS: 6

Notes:
The module may not be booked if the module "MI0034 Advanced Machine Learning" has already been attended.

Learning Outcome:
Students will acquire theoretical knowledge of state-of-the-art machine learning techniques and the practical skills to apply these methods to different kinds of problem settings.

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Lena Ann Jäger

Requirements:

Prerequisites:	Solid knowledge of supervised and unsupervised machine learning, probability theory, linear algebra, multivariate calculus as well as fluent Python programming skills are required.
Assessment:	Portfolio (20% practical assignments, 80% written exam) --- Written exam: Tue, 9 June 2026, 14:00 - 15:30 (90 min)
Grading Scale:	1-6, Half Grades Given
Repeatability:	repeatable once, book again

Module BME 248 Basics in Immunology
07SMBME248 / Course

Description:

General description:
This course discusses basic immunology including fundamental characteristics of the innate and adaptive immune systems and the cell types involved, discrimination of self and non-self, as well as the interplay of immune cells in health and disease.

ECTS: 4

Learning Outcome:
Upon completing this lecture series, students gain a basic understanding in immunology.

By the end of the module students should be able to:

- demonstrate basic knowledge of immunological processes and define central immunological principles and concepts
- outline and compare the key mechanisms and cellular players of innate and adaptive immunity in health and disease
- understand and explain the principles governing the innate immune response and the role of phagocytosis, inflammation, and cytotoxicity in this context
- outline key events and cellular players in antigen presentation, and how the nature of the antigen will shape resulting effector responses
- understand the genetic basis for immunological diversity and the generation of adaptive immune responses
- identify different types of T cells and explain their role in adaptive immune responses against infections and cancer
- understand and explain the principles of humoral immunity and its role in vaccinations and allergies
- understand and explain the basis of immunological tolerance and autoimmunity

Languages of Instruction:
English

Module Law, Reproduction and Ethics: Fundamental Debates (PhD)
02SMBMRM03 / Course

Description:

General description:
Over the last several decades, developments in reproductive science and medicine have posed ethical dilemmas and complex questions to existing legal frameworks. Legal systems often fail to keep pace with scientific developments, resulting in legal vacuums - often filled in by individual autonomy and practice - or ineffective legal prohibitions - often circumvented by crossing national borders to benefit from (more) permissive legal frameworks. This shows that (state) law is just one of the multiple sources of normativity at play in regulating reproduction, and further reflection on the ethical dimensions of reproductive technologies is needed within the legal domain. Against this background, this course will adopt a trans- and interdisciplinary approach and critically delve into some of the most topical themes around reproduction, law and ethics, such as uterus transplantation, ectogestation, trans* procreation, surrogacy, and genome editing.

ECTS: 6

Learning Outcome:
Students taking the course will acquire in-depth knowledge of some fundamental debates in the fields of ethics, law and reproduction, from comparative, international and interdisciplinary perspectives. They will also learn to critically investigate complex legal and ethical questions posed by societal changes and developments in reproductive medicine.

Target Groups:
BmEL Students

Languages of Instruction:
English

Course Materials:	Mandatory and optional reading materials will be made available. Students will receive information on course materials via email. They will include case-law, legal as well as non-legal scholarship.
Merkmale:	
Responsible instructor:	Julian Mausbach Alice Margaria

Requirements:

Prerequisites:	Attendance is compulsory for successful completion of the course.
Prior Knowledge:	Prior knowledge in the areas of family law and/or medical law is desirable, but not essential.
Assessment:	Oral or written examination, depending on the number of students
Grading Scale:	1-6, Half Grades Given
Repeatability:	Can be repeated as necessary

Organisation:

Offer pattern:	1 Semester (Irregular)

Module Betriebswirtschaftliche Steuerlehre (V+Ü) (Taxation of Companies)
03SM22BO0125 / Lecture with Practical Exercises

Description:

General description:
Steuern sind die wichtigste Einnahmequelle für den Bund, die Kantone und Gemeinden. Gleichzeitig sind sie ein grosser Kostenfaktor bei Unternehmen und somit auch ein zentraler Aspekt bei der Standortwahl und der finanziellen Unternehmensführung. Für Unternehmen ist es deshalb wichtig, ihre Steuerbelastung zu planen und zu kontrollieren.
Die Vorlesung betriebswirtschaftliche Steuerlehre gibt eine Einführung in das Steuersystem, die steuerlichen Grundbegriffe und die Unternehmensbesteuerung (mit Fokus auf Kapitalgesellschaften und Personenunternehmen) in der Schweiz. Zudem werden einzelne Themen wie Finanzierung und Sanierung, Umstrukturierung, interkantonale und internationale Steuerfragen sowie weiteren Themen vertieft betrachtet. Zahlreiche Veranschaulichungen und Beispiele aus der Praxis zeigen dabei spannende Anwendungsfälle. Zudem werden aktuelle steuerpolitische Themen aufgegriffen. Die Vorlesung vermittelt damit die Grundlagen der betriebswirtschaftlichen Steuerlehre.

ECTS: 6

Learning Outcome:
- Sie verstehen die Grundzüge der Unternehmensbesteuerung mit den wichtigsten Steuerarten und die Themenrelevanz in der «Praxis».
- Sie verstehen die unternehmenssteuerlichen Themen der «öffentlichen Diskussion» und können diese steuertechnisch einordnen.
- Sie gewinnen vertiefte Kenntnisse über alltägliche Steuerthemen, welche für Unternehmen von grosser Bedeutung sind und Sie verstehen die «steuerlichen Schnittstellen» zu Ihnen als Privatperson (und Unternehmer/-in).
- Sie erarbeiten die steuerlichen Themen anhand zahlreicher Praxisbeispiele.

Target Groups:
Bachelorstudierende im 4. oder 6. Semester

Languages of Instruction:
Deutsch

Course Materials:	Unterlagen werden über OLAT zur Verfügung gestellt.
Merkmale:

Module ESC 415 Internship in Computational Science
07SMESC415 / Praktikum

Description:

General description:
This module allows students to pursue independent research within the context of an internship (possibly during the summer break), within industry, medicine or academics. The internship must involve a high degree of application of computational science techniques to a research topic.

ECTS: 6

Notes:
Permission to register must be obtained from the Module Coordinator, prior to booking!

Learning Outcome:
Hands-on independent research experience using Computational Science methods in real-world applications.

Target Groups:
Masters Students after completing 2 semsters of course work

Languages of Instruction:
English

Merkmale:

Responsible instructor:	Robert Feldmann

Requirements:

Prior Knowledge:	2 semesters of MSc course work
Assessment:	Written Report on Research Work
Grading Scale:	Pass/Fail
Repeatability:	Can be repeated once

Organisation:

Module AST 233 The Sun and its surface activity (astronomy practicum)
07SMAST233 / Praktikum

Description:

General description:
In this practicum you will use a special purpose telescope to image the photosphere of the Sun. You will observe solar flares, rising and sinking convective cells, sunspots and patches of magnetic energy. This is a new practicum offered to take advantage of the maximum in solar activity that will take place in 2024-2025.

ECTS: 3

Learning Outcome:
Solar observations, doppler imaging in H-alpha, physics of stars, stellar activity and the impact of stars on nearby habitable worlds.

Target Groups:
Only for students of the minor programs "Astronomy & Astrobiology "Astrophysics".

Languages of Instruction:
English or German

Merkmale:

Responsible instructor:	Ben Moore

Requirements:

Assessment:	You will write a detailed report detailing your observations and the physical processes that you observe taking place on the Sun's surface. You will include high resolution images and timelapse videos of the surface of the Sun and solar flares.
Grading Scale:	1-6, Half Grades Given
Repeatability:	Can be repeated once

Module Topics in Neuroeconomics and Social Neuroscience (S)
03SMDOEC1141 / Doktorandenseminar

Description:

General description:
This is an internal seminar for the course instructor's doctoral students.

ECTS: 3

Notes:
This course will take place in BLU-003 (Blümlisalpstrasse 10, 8006 Zurich).
If you wish to attend this course, please send an e-mail with your name and student ID number (Matrikelnummer) to cornelia.schnyder@econ.uzh.ch.

Learning Outcome:
In-depth study of the materials presented

Target Groups:
Course instructor's doctoral students. Suitable for English speakers.

Languages of Instruction:
English

Course Materials:	The seminar organizer will distribute the readings electronically on a regular basis.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Philippe Tobler

Requirements:

Prerequisites:	Successful completion of all compulsory modules in the Doctoral Program in Neuroeconomics.
Assessment:	- Regular prepared class attendance (read focus papers; 10%) - Active class participation (discuss focus papers and others' presentations; 10%) - Oral presentation (30%) - Completed manuscript* of a review article or empirical report (50%) *Note that the manuscript written for this course may not be used as one of the three papers in the PhD thesis. However, it may be included in the PhD thesis if there are at least three other papers included as well.
Grading Scale:	Pass/Fail
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Semester)
Dates/Times/Deadlines:	Wednesday 14:00-16:00

Module Scientific Writing and Oral Communications
07SMZIHP / Block Course

Description:

General description:
This course is designed to help scientists with academic writing and communication. Among other topics, the lectures will cover dissertation writing and manuscript publication, including preparation (structure, scientific style, linguistic strategies to express opinions, summarize, show disagreement, etc.) and submission (choosing a journal, the peer review process, correspondence with editors, etc.). Additionally, the course aims to foster skills in delivering effective poster and slide presentations, featuring preparation (structure, design, rehearsals, etc.) and delivery (engaging the audience, body language, handling questions, etc.). Participants can expect down-to-earth advice and readily usable resources that are a crucial part of a scientist's toolkit.

ECTS: 1

Notes:
Registration by e-mail to andrea.schmitz-derron@uzh.ch until 2 weeks before the course starts.

Merkmale:	Target Group: Suitable for English Speakers

Module Quantitative Asset Management and Systematic Investing (S)
03SM22MO0214 / Seminar

Description:

General description:
The block course introduces students to the theoretical foundations of quantitative asset management, as well as the empirical methods employed in the industry, including a practitioner's talk. Students can choose a topic from a curated list of academic papers for their end-of-semester presentation of their empirical project. The goal is to equip students with the necessary skills, knowledge and ideas to embark on a master thesis project in this field.

ECTS: 3

Notes:
The number of participants is limited. Registration is required until 09. Februar 2026 . Further information is available at:
https://www.df.uzh.ch/en/studies/bachelor-master/master/ma-seminars.html

(https://www.df.uzh.ch/en/studies/bachelor-master/master/ma-seminars.html)This module takes place on-site

Learning Outcome:
The aim of this lecture is to provide students with the theoretical foundations and latest empirical findings of capital markets research and to introduce them to advanced tools for quantitative investment solutions.

Target Groups:
Master's students with an interest in quantitative investments and portfolio management with a focus on empirics and implementation/coding.
Open for Quantitative Finance and Faculty of Business, Economics and Informatics master students.

Languages of Instruction:
English

Course Materials:	Slides and papers with bibliographical references
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Marc Paolella

Requirements:

Prior Knowledge:	BA degree, ideally with focus on Finance, Economics or Quantitative Methods
Assessment:	Writing of an empirical project paper during the semester including an oral presentation. 70% written report, 30% Presentation
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Spring Semester)

Module BME 389 Clinical Neuroscience
07SMBME389 / Course

Description:

General description:
The lecture series "Clinical Neuroscience" presents a comprehensive, condensed overview of the most important neurological diseases, their clinical presentation, diagnosis, therapy options and possible causes.

ECTS: 3

Notes:
The course is taught in English
All students must book the module via the UZH booking tool

Learning Outcome:
By the end of this module students should be able to:

- demonstrate their understanding and deep knowledge concerning the main neurological diseases

- identify and explain the different clinical presentation of these diseases, the methodology of diagnosis and the current therapies available

- summarise disease mechanisms and ongoing/future therapeutic approaches

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Magdalini Polymenidou

Requirements:

Prerequisites:	Basic studies completed
	For UZH students: BIO143; For ETH students: 376-1305-01L
Assessment:	written final exam 26.05.2025
Grading Scale:	1-6, Half Grades Given

Module CHE 321 Advanced Synthesis
07SMCHE321 / Lecture with Practical Exercises

Description:

General description:
This course aims to deepen students' understanding of advanced concepts in organic synthesis, focusing on retrosynthetic analysis, synthetic strategies, tactics, and modern methods. By the end of the course, students will be able to develop synthetic routes for complex organic molecules and critically assess the feasibility and practicality of different synthetic approaches. In addition, computational tools, AI and data-driven strategies will be utilized and their performance critically assessed.

ECTS: 4

Learning Outcome:
Upon successful completion of the course, students will be able to:

1. Apply retrosynthetic analysis to break down complex target molecules into simpler precursors.

2. Develop multiple synthetic pathways for a given target and assess their relative merits.

3. Understand and utilize advanced synthetic strategies and tactics, such as chemo-, regio-, and stereoselectivity, in the design of organic syntheses.

4. Employ modern synthetic methods and reagents effectively in constructing molecules.

5. Develop protecting group strategies.

6. Integrate mechanistic reasoning into synthetic planning to predict potential challenges and solutions.

7. Employ computational and data-driven strategies for synthesis planning.

Module CHE 322 Crafting Functional Organic Molecules
07SMCHE322 / Lecture with Practical Exercises

Description:

General description:
Organic molecules are not only attractive synthetic targets. They also have their function. Benzaldehyde binds into a biological receptor in our body, resulting in a scent of marzipan. cis-Retinal absorbs light and isomerizes to trans-retinal, initiating a signal that ultimately leads to vision. Polyacetylene possesses conjugated skeleton, through which an electron can be transported from one end to another, giving rise to conductivity. Rubrene emits yellow light in its excited state and can serve as a light-emitting diode (LED) material in displays. And the list goes on, and we can even think about artificial molecular motors, which can move in one direction or perform work when fueled. Where does molecular function originate? What structural features are responsible for a specific function? How do molecules interact with light, how do they interact with one another, and how can their subunits work in unison? How to design and craft a molecule that should perform a particular task? Join this course and find out! Together we will dive into the fascinating world of molecular design and craft functional organic molecules :-)

ECTS: 4

Notes:
The mid-term exam takes place on April 1st during lecture hours.

The final exam takes place on June 10th (10-12h).

Learning Outcome:
Including but not limited to: Knowing how to apply the principles of physical organic chemistry in the design and realization of a molecular function, understanding non-covalent interactions in supramolecular recognition and binding for catalysis, property tuning or purification, modulating solubility in different media and stability of compounds and reactive intermediates in light, air and solvent, design principles related to electrical conductivity, magnetism and light-emission, control of molecular stereodynamics, design of molecular switches, motors and machines.

Languages of Instruction:
English

Module CHE 329 Bioorganic Chemistry
07SMCHE329 / Lecture with Practical Exercises

Description:

General description:
This class will give an introduction to the structure, function, biosynthesis and chemical synthesis of various biomolecules, such as nucleic acids, peptides & proteins, carbohydrates, lipids, polyketides and terpenes.

ECTS: 4

Notes:
The mid-term exam takes place on April 17th during lecture hours.

Learning Outcome:
The aim of this class is to provide students with the fundamentals of the molecules of life. At the end of this class you should:

- Know the structure of various biomolecules, and understand how basic chemical principles translate into shape, dynamics and function
- Understand how biomolecules are produced naturally and chemically
- Have a basic understanding of the biological function of all discussed biomolecules
- Design chemical syntheses of biopolymers, such as DNA, RNA, peptides, proteins, glycans, and derivatives thereof

Target Groups:
Advanced bachelor students, as well as Master students and PhD students with an interest in (bio)organic chemistry

Languages of Instruction:
English

Course Materials:	Main textbook: D. Van Vranken, G. Weiss. Introduction to Bioorganic Chemistry and Chemical Biology. Lecture script, problem sets and additional resources will be available via OLAT.
Merkmale:

Module M3L 323 Statistics for Mathematicians
07SMM3L323 / Lecture with Practical Exercises

Description:

General description:
This course is intended for Mathematics students taking their first course in Statistics. The goal is to provide an introduction to the basic notions of Statistics where essentially all results are proved rigorously. This is not a course on "Mathematical Statistics" but rather on "Statistics for Mathematicians".
We will cover the following topics:

- Regular Probability Models
- Sampling from Probability Distributions
- Point Estimation of Model Parameters
- Tests of Hypotheses for Model Parameters
- Confidence Intervals for Model Parameters

ECTS: 6

Notes:
Mathematical Field: Stochastics

This is the module formerly known as MAT903

If you have already passed the old STA402 Likelihood (pre-fall 24) you are excluded from taking M3L323 If you took STA402 Likelihood and Regression I (starting fall 24), you are allowed to take M3L323

This is the module to be booked by BSc and MSc students.
PhD students please book M3L323DP

Learning Outcome:
Understanding the basic concepts of Statistics, being able to perform statistical tests and calculate confidence intervals and interpret the results of both.

Target Groups:
BSc and MSc students

Languages of Instruction:
English

Course Materials:	Panaretos, V. M. (2016). Statistics for mathematicians. Compact Textbook in Mathematics. Birkhäuser/Springer, 142, 9-15. Rice, J. A. (2006). Mathematical statistics and data analysis. Cengage Learning.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Alexandre Bovet

Requirements:

Prior Knowledge:	First year analysis and MAT 901 Stochastics
Assessment:	Written exam

Language of Assessment: English

Grading Scale:	1-6, Half Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Irregular)
Booking Deadline/Period:	from We 14.01.2026 10:00 to Tu 10.03.2026 24:00
Cancellation Deadline:	from We 14.01.2026 10:00 to Tu 21.04.2026 24:00
Organisation:	Department of Mathematical Modeling and Machine Learning
Offered in:	Spring Semester 2026 Spring Semester 2025 Spring Semester 2024

Component of:

Mathematics		
Single Major 180	Bachelor of Science Faculty of Science (2021)	Lectures, 2nd and 3 year of studies Mathematics
Major 150	Bachelor of Science Faculty of Science (2021)	Lectures, 2nd and 3 year of studies Mathematics
Major 120	Bachelor of Science Faculty of Science (2021)	Lectures, 2nd and 3 year of studies Mathematics
Major 90	Master of Science Faculty of Science (120) (2021)	Lectures Mathematics
Single Major 90	Master of Science Faculty of Science (90) (2021)	Lectures Mathematics
Minor 60	BA UZH in Study of Religions Bologna 2020	Lectures, 2nd and 3 year of studies Mathematics
Minor 60	Bachelor of Arts (RVO19)	Lectures, 2nd and 3 year of studies Mathematics
Minor 60	Bachelor of Arts in Social Sciences (RVO 19)	Lectures, 2nd and 3 year of studies Mathematics
Minor 60	Bachelor of Science Faculty of Science (2021)	Lectures, 2nd and 3 year of studies Mathematics
Minor 60	Bachelor of Science UZH in Informatics (RVO22)	Lectures, 2nd and 3 year of studies Mathematics
Minor 60	Bachelor of Science in Psychology (RVO19)	Lectures, 2nd and 3 year of studies Mathematics
Minor 60	Bachelor of Theology UZH Bologna 2020	Lectures, 2nd and 3 year of studies Mathematics

Module BME 339 Biomedical Informatics
07SMBME339 / Course

Description:

General description:
Biomedical informatics is the discipline that studies how data is collected, analyzed, and communicated in the fields of medicine and biology. The course will teach the students about

- Understanding the standardized terms and classifications used in biomedical data.
- Principles and processes involved in making informed medical decisions using biomedical data.
- Exploration of the standards used to represent genomic data
- Insights into how genomic data is translated into clinical practice as well as techniques and methodologies used in analyzing genomic data.
- Approaches for merging data from various sources,

such as genomic repositories and hospitals.

- The role of informatics in clinical settings and how

information systems are evaluated.

Understanding the regulatory aspects and best practices for implementing biomedical informatics technologies in clinical environments.

ECTS: 3

Notes:
This module is jointly offered for students of the Faculty of Science (advanced Bachelor and Masters students) and students of the Medical Faculty (Mantelstudium) to further communication and interdisciplinary collaboration of future medical experts and scientists in the field of Digital Health.

Course materials will be provided on OLAT. Note that the course appears in OLAT only at the start of the semester. For questions, please contact the DQBM Managing Director (head.department@dqbm.uzh.ch).

Learning Outcome:
On completion of the module, students should be able to:

- Recognize the fundamental role and privacy aspect of data in biomedicine
- Master the different types of biomedical data and standards
- Conceive a basic data analysis plan for processing biomedical data
- Develop own code to process biomedical data
- Describe the role of special technologies (NLP, Wearables) in biomedical informatics
- Understand the technical and ethical challenges of clinical AI
- List the fundamental steps in developing a clinical-grade biomedical informatics tool

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Michael Krauthammer

Requirements:

Prerequisites:	Participants must have completed basic biology studies.

Assessment:	Form, duration and timing of the assessment(s): (if several, define how the final grade is composed) To pass, students are required to A. Complete at least two coding-exercises and comment on the results obtained. The general code structure will be given to the students, and they will fill in the missing parts of the code. Comments on the results obtained can be written in Colab Notebooks and students will submit the Notebooks for grading; and B. Complete two quizzes about topics covered during the course. Small mini quizzes (multiple choice questions, open questions or exercise) will be given to the students during the course period and they must submit them completed for grading; and C. Individually deliver a final presentation on a subtopic of the course. During the course, students will form small groups (2-4 persons) and conduct in-depth research on a course topic that will be assigned during the weeks. Students will present their results in 15 minutes. This will be followed by a discussion session with the professors; and D. Hand-in one written exam
Grading Scale:	1-6, Half Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Spring Semester)
Request period:	from Mi 14.01.2026 10:00 to Di 27.01.2026 24:00
Place allocation at the latest:	Sa 31.01.2026 22:00
Waiting list progression period:	from Sa 31.01.2026 22:00 to Do 12.02.2026 24:00
Cancellation period:	from Sa 31.01.2026 22:00 to So 15.02.2026 24:00

Module Efficient Algorithms for Frequently Asked Questions (L+E)
03SM22BMI010 / Lecture with Practical Exercises

Description:

General description:
This course gives a unifying overview of the latest research in efficient computation over relational data, with applications spanning databases, artificial intelligence and machine learning, theoretical computer science, and linear algebra. Besides their theoretical interest, algorithms overviewed in this course also represent the key differentiator for commercial database and relational AI engines. They represent essential knowledge for data system engineers.
Syllabus: Computation over commutative (semi)rings; Functional aggregate queries (FAQ); Applications: database queries, constraint satisfaction problems, (count)SAT, inference in probabilistic graphical models, einsum expressions, gradients and cost functions for machine learning over relational data; Decompositions: hypertree decompositions, acyclic hypergraphs, join trees; Width measures: treewidth, fractional edge cover number, fractional hyper tree width, FAQ width; Solving joins optimally: Yannakakis algorithm, LeapFrog TrieJoin algorithm, Suboptimality of state-of-the-art join algorithms, optimal join algorithms, preprocessing time versus enumeration delay; Worst-case optimal size bounds for joins: Shannon inequalities, Shearer's lemma, linear program for fractional edge cover number; Solving SAT: The DP and DPLL procedures, acyclic SAT; Solving FAQ: Functional aggregate queries over several semirings, the InsideOut algorithm.

ECTS: 3

Notes:
If you have already taken the course "Efficient Algorithms for Frequently Asked Questions (DINF1132)" in spring 2021, 2022 or 2023 you are not allowed to book this course.

Learning Outcome:
The students will learn how to formalise computational problems, analyse their computational complexity using a toolbox of techniques that exploit the algebraic and combinatorial structure of the problem, understand connections between different areas of computer science, familiarise themselves with simple yet powerful algorithms that exploit such structure, and implement and benchmark these algorithms.

Target Groups:
MSc in Data Science; MSc in Software Systems; BSc in Informatics

Languages of Instruction:
English

Course Materials:	Slides and research publications will be provided during the semester.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Dan Olteanu

Requirements:

Prerequisites:	Foundations of Computing I, Foundations of Computing II, Informatics II, Database Systems
Prior Knowledge:	Familiarity with a programming language is necessary for the practical task.
Assessment:	Written exam onsite: 16.00 - 18.00 on 15 June 2026. The examination has three components: written examination onsite; exercise

sheets and practical task whose satisfactory completion can provide additional bonus points.

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Module FIM 201 Computational Finance
07SMFIM201 / Course

Description:

General description:
This lecture explores computational finance, where mathematical theory is translated to algorithms that are later implemented efficiently to solve problems in finance. Examples of applications include pricing of financial derivatives and quantification of financial risks. The lecture will not only focus on the mathematical aspects but also involve programming.
Content:

- Generating Random Numbers with Specified Distributions
- Monte Carlo Simulation with Stochastic Differential Equations
- Partial Differential Equations for Options: foundations for finite difference methods, Crank-Nicholson method, boundary conditions, American options as free boundary problems, error control, analytic methods.
- Methods for Model Calibration

ECTS: 3

Notes:
Mathematical Field: Numerics, Stochastics

Learning Outcome:
The lecture will follow:

- Rudiger U. Seydel, "Tools for Computational Finance", Universitext, Springer Berlin Heidelberg New York, Third edition, 2005.
- Paul Glassermann "Monte Carlo Methods in Financial Engineering", Springer, 2003.
- Yves Achdou, Olivier Pironneau, "Computational Methods for Option Pricing", Cambridge University Press, 2005.

Target Groups:
Advanced BSc and MSc students

Course Materials:	The lecture will follow: - Rudiger U. Seydel, "Tools for Computational Finance", Universitext, Springer Berlin Heidelberg New York, Third edition, 2005. - Paul Glassermann "Monte Carlo Methods in Financial Engineering", Springer, 2003. - Yves Achdou, Olivier Pironneau, "Computational Methods for Option Pricing", Cambridge University Press, 2005.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Delia Coculescu

Requirements:

Prior Knowledge:	Mathematical Finance II
Assessment:	- Weekly homework projects (40%)

- Written exam (60%)
Testat: Having a grade of at least 4 for the project is necessary for attending the written exam

Grading Scale:	1-6, Half Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Spring Semester)
Booking Deadline/Period:	from We 14.01.2026 10:00 to Tu 10.03.2026 24:00
Cancellation Deadline:	from We 14.01.2026 10:00 to Tu 21.04.2026 24:00
Organisation:	Department of Mathematical Modeling and Machine Learning
Offered in:	Spring Semester 2026 Spring Semester 2025 Spring Semester 2024

Module Elective Module: Biomedical Informatics
04SM24MAS001 / Sonstiges

Description:

General description:
Biomedical informatics is the discipline that studies how data is collected, analyzed, and communicated in the fields of medicine and biology. The course will teach the student about

- the history and key developments of the field (EHR, genomic technologies, Apps, medical AI)
- the various types of biomedical data (genomic, clinical, imaging) and the standards that are used to represent them, including ICD, SNOMED or HGVS
- introduction to key analysis methodologies, including NLP and bioinformatics pipelines, as well as data pre-processing approaches for dealing with often sparse biomedical data
- data integration approaches for merging data across various data silos (such as genomic repositories, hospitals)
- the legal and technical aspect of working with confidential health data
- the process and regulatory aspects of moving biomedical informatics technologies into the clinics.

ECTS: 4

Notes:
This module is jointly offered for students of the Faculty of Science (advanced Bachelor and Masters students) and students of the Medical Faculty (Mantelstudium) to further communication and interdisciplinary collaboration of future medical experts and scientists in the field of Digital Health.

Course materials will be provided on OLAT. Note that the course appears in OLAT only at the start of the semester. For questions, please contact the DQBM Managing Director (head.department@dqbm.uzh.ch).

Learning Outcome:
On completion of the module, students should be able to:

- Recognize the fundamental role and privacy aspect of data in biomedicine
- Master the different types of biomedical data and standards
- Conceive a basic data analysis plan for processing biomedical data
- Develop own code to process biomedical data
- Describe the role of special technologies (NLP, Wearables) in biomedical informatics
- Understand the technical and ethical challenges of clinical AI
- List the fundamental steps in developing a clinical-grade biomedical informatics tool

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Michael Krauthammer

Requirements:

Assessment:	Form, duration and timing of the assessment(s): (if several, define how the final grade is composed) To pass, students are required to A. Complete at least two coding-exercises and comment on the results obtained. The general code structure will be given to the students, and they will fill in missing parts of code. Comments on the results obtained can be written in Colab Notebooks and students will submit the Notebooks for grading; and

B. Present to class a topic in medical AI (flipped classroom format), after two hours of self-study about the topic. Extra material regarding the topic will be given to the students in the form of scientific papers/recorded lectures. The presentation will then take place in class in oral form and students will be assessed on their overall understanding of the topic; and
C. Individually deliver a final presentation on a subtopic of the course. During the course, students will form small groups (2-4 persons) and conduct in-depth research on a course topic that will be assigned during the weeks. Students will present their results in 15 minutes. This will be followed by a discussion session with the professors; and

D. Hand-in two written exams (midterm, final)

Grading Scale:	Pass/Fail
Repeatability:	Can't be repeated

Module Optimizing Digital Therapeutics for Women’s Health
03SM22MI0040 / Sonstiges

Description:

General description:
Lecturers Prof. Dr. Tobias Kowatsch, Institute for Implementation Science in Health Care, Universitätstr. 84, 8006 Zürich, tobias.kowatsch@uzh.ch

Content The following topics are covered:
1.   Introduction to precision digital therapeutics (motivation, definition, application areas)
2.   Introduction to women's health (gap, challenges, opportunities)
3.   Introduction to design and evaluation frameworks for digital therapeutics
4.   Introduction to optimization strategies for digital therapeutics and corresponding study designs
5.   Workshop on optimization trial designs (in groups)
6.   Design of an optimization trial (in groups)
7.   Technical implementation of an optimisation trial for a smartphone-based and chatbot-delivered digital therapeutic (in groups)
8.   Data collection and analysis (in groups)
9.   Presentation and discussion of optimisation trial results (in groups)

Methodology The module consists of live input sessions with interactive group exercises and discussions. Complementary online learning material is provided. Additional coaching sessions are offered to support the groups with the design of their optimization trials in women's health, the technical implementation of the study designs and with the preparation of the final group presentations. A design and trial service for precision digital therapeutics will be used for the implementation of the optimization trial. Programming skills are not required.

ECTS: 4

Notes:
Room and timing details are to be found here: https://tinyurl.com/4r879hy4 The allocation of students to this course will be done through the department via the new module booking tool.
A short motivation statement (3 - 5 sentences should be added in the text field in the module booking tool)
Application for this module is via the module booking tool: https://studentservices.uzh.ch/uzh/launchpad

Learning Outcome:
1.   Students understand design and evaluation frameworks for digital therapeutics.
2.   Students can explain optimization strategies for digital therapeutics.
3.   Students can draft study designs for optimisation trials.
4.   Students can implement an optimisation trial for a smartphone-based digital therapeutic.
5.   Students can critically assess the results of an optimisation trial.
6.   Students can discuss the opportunities and challenges of optimisation trials for digital therapeutics.
7.   Students understand the main challenges within Women's Health and can draft digital therapeutics to tackle them.

Target Groups:
MA Students

Languages of Instruction:
Englisch

Module MAT 911 Seminar Mathematical Game Theory
07SMMAT911 / Seminar

Description:

General description:
Game theory is the study of strategic interactions between rational decision-makers. It provides a formal framework for analyzing and understanding these interactions, and has important applications in various fields, including economics, political science, biology, and computer science.

In this seminar, we will explore this subject from a mathematical perspective, focusing on the development of theorems, proofs, and rigorous methods for studying games. Time permitting, we plan to cover the following topics:

° Decision theory: utility, uncertainty, risk.
° A basic model of knowledge.
° Nash equilibrium and its refinements.
° Static vs dynamic games.
° Games with complete vs incomplete information.
° Non-cooperative vs cooperative games.

ECTS: 3

Learning Outcome:
- A foundational understanding of game theory.
- Learn how to prepare a talk and present in front of an audience.
- Learn how to write a mathematical report in LaTex.

Target Groups:
Math Students Bsc and MSc who need a seminar

Course Materials:	"An Introductory Course on Mathematical Game Theory" by J. González- Díaz, I. García-Jurado and M. G. Fiestras-Janerio.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Artur Avila

Requirements:

Prior Knowledge:	No specific prior knowledge required. Only a certain level of mathematical maturity.
Assessment:	- Prepare a talk and present it in class. - Hand in a written (LaTeX) version of the talk - Be present throughout the semester and participate actively in discussions Language of Assessment: English
Grading Scale:	Pass/Fail
Repeatability:	Can be repeated once

Organisation:

Module Enterprise Software (L+E)
03SM22MI0041 / Lecture with Practical Exercises

Description:

General description:
The most important corporate functions such as Enterprise Resource Planning (ERP), Supply Chain Management (SCM), or Customer Relationship Management (CRM) are now executed in most companies using Enterprise Software solutions, also sometimes referred to as Packaged Software or Standard Software. How can we explain this growing proportion of standard software systems? What are the advantages and disadvantages of the widespread use of packaged software? And what considerations and efforts must companies make before a new off-the-shelf solution can be implemented? The aim of this lecture is to critically examine the differences between buy software and custom software, and to present the success factors of using standard software. At the end of this lecture, you will be able to explain and illustrate the implementation processes of packaged software from recognizing a need, through evaluation and customization, to going live. You will also be familiar with the challenges of introducing and replacing packaged software.
Numerous practical examples and guest lectures from international and Swiss leading providers and users demonstrate the high relevance of the topic in industry and service sector (especially banks and insurance companies).
The integrated exercise is intended to deepen the understanding of the lecture in practical application and with hands-on examples. Each business standard software manufacturer implements the functionality of its product using different technology and software architecture concepts. Therefore, understanding such concepts and the practical application of standard software such as customizing, and parameterization is a very important part to gain a complete understanding of a packaged software.
In the exercises, there are three well-known packaged software products. Last year it was Adcubum, Microsoft and SAP together with Agilita AG. Students are trained in groups on these software systems and create running software examples. All students must attend at least
2 software product exercises.

ECTS: 3

Notes:
This lecture is conducted on-site. Additionally, the practical exercises associated with this module will partly take place as block course at the locations of the company providing the software systems, but mostly as online or hybrid session. These locations are all within the Greater Zurich area and attendance is required. The detailed sessions will be announced at the latest at the first lecture.

IMPORTANT: The Adcubum product exercise is in German only and has a seat capacity of 12 students.

Learning Outcome:
- Know the differences between enterprise packaged software / in-house development / custom software.

- Know the success factors / benefits / advantages and disadvantages / lifecycle of packaged software.

- Know the steps of implementing packaged software, challenges, and peculiarities.

- Understand and apply customizing, parameterization, and integration concepts.

- Get familiar with software architectures of enterprise software.

- Deepen understanding of various typical basic concepts such as multi- tenancy, multilingualism, auditability, layered models, release capability, internationalization, etc., of business standard software.

- Gain practical experience (hands-on) with at least 2 leading software products.

Target Groups:
Master students in Informatics, Business Informatics

Languages of Instruction:
English

Course Materials:	All materials and recordings related to the module will be made available online. More details will be announced at the beginning of the lecture.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Gerhard Schwabe

Requirements:

Prerequisites:	Bachelor Degree
Prior Knowledge:	Bachelor Degree
Assessment:	The examination has 4 parts: - Conduct and pass e-learning modules. 10% - Attend the courses, conduct and pass 2 customizing work packages within the exercises. 10% - Group presentation and/or deliver a homework assignment. 60% - The individual contribution in each group 20%
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Spring Semester)
Dates/Times/Deadlines:	To get the dates of the exercises as early as possible, please write an email to ralph.mogicato@hixon.ch.

Module PHY 253 Computer-assisted Experimentation II
07SMPHY253 / Lecture with Practical Exercises

Description:

General description:
Bei diesem Kurs geht es darum, ein Verständnis für die Planung, den Aufbau und die Durchführung von Experimenten zu erlangen, die Computer benötigen für das Steuern der Experimentierparameter, für das Erfassen von Messdaten und für die Onlineanalyse.
Die Gruppeneinteilung findet in der ersten Vorlesung statt.

Module Behavioral Corporate Governance, Ethics, and Compliance (S)
03SM22BO0127 / Seminar

Description:

General description:
This seminar will provide students with an in-depth understanding of the evolving field of behavioral ethics and its increasing role in modern corporate governance, risk management and compliance practices, particularly relevant for heavily regulated industries like banking and more generally for supporting responsible and sustainable business behavior. Through a combination of academic literature review, case study evaluation, quantitative research method application, and participation in expert-led discussions, students will gain insights into the psychological and organizational factors influencing ethical behavior in companies.
The seminar's subtopics encompass a range of issues related to behavioral ethics within corporate environments, such as ethical dilemmas, common and emerging approaches to corporate ethics along with their underlying presumptions, and empirical assessments of behavioral interventions. The proposed research designs will explore a spectrum of methodologies, from qualitative interviews and quantitative surveys to identify compliance issues, to A/B testing and randomized controlled trials to evaluate the efficacy of proposed solutions.
Students have the option to work in groups of 2-3 and to select one of the provided topics (or a related subtopic) to:

- Prepare a concise 10-15 page paper (3'500-5'000 words) describing a corporate governance failure, summarizing selected academic literature shedding light on that failure, and suggesting a relevant corporate study approach (50% of grade).
- Deliver a presentation of 25-30 minutes with a subsequent Q&A session of 10-15 minutes (30% of grade).
- Actively engage in seminar discussions, ask and answer questions (20% of grade). Please only take the course if you intend to actively participate in discussions.

ECTS: 3

Notes:
Registration via the system by March 10, conditional upon submitting an application with a motivation statement and CV to: baiba.renerte@df.uzh.ch.

Learning Outcome:
Practical insight into the foundations of and current trends in behavioral corporate ethics and compliance; general understanding of the state of the art academic literature; methodological understanding of various approaches to examining related topics in the field.

Languages of Instruction:
English

Course Materials:	The seminar will not follow a specific textbook. We will review academic papers and other resources that are available online. A reading list will be distributed at the beginning of the seminar.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Alexander Wagner

Requirements:

Assessment:	Written seminar paper (50%), presentation (30%), and active participation in the seminar (20%).

Universität Zürich[UZH]

Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Spring Semester)
Dates/Times/Deadlines:	One whole-day block lecture with academic theories and evidence, practitioner case studies and guest lecture(s) on March 20th, 2026, two whole-day block seminar(s) with student paper presentations and discussions on May 7 and 8, 2026. Deadline for the final seminar paper submission is on May 29th, 2026. All sessions are mandatory to attend in person. Whether or not the second day of paper presentations takes place (fully) depends on the number of students.

Module Strategic Management of Innovation (S)
03SM22MO0221 / Seminar

Description:

General description:
This seminar offers an in-depth exploration of how innovation can be strategically managed, focusing on key areas like industry dynamics, innovation processes, and the strategic positioning of firms in technologically evolving markets. Students will engage in analyzing case studies and theoretical frameworks to understand the intricacies of innovation strategy and the role of innovation in maintaining competitive advantage.

ECTS: 3

Notes:
1. Admission: Admission to the seminar is limited. To apply for participation book this seminar through the module booking system (https://studentservices.uzh.ch/uzh/launchpad). Please upload a letter to the booking system stating your interest in the seminar and your CV and last transcript of records by Ende Modulbuchungsfrist FS 2026 at the very latest.
Participant confirmations will be sent out within one week after that deadline. Reading material and all documents to this seminar will be shared via email.

2. Kick-off session (19.02.2026, 10:15 – 12:00):
This session will provide an overview of the seminar's content, details on organization and grading, and guidelines on how to prepare summaries and presentations.

3. Topic Presentations:
Topics will be assigned to student teams of two. The teams will summarize reading material which they receive at the beginning of the seminar. They will explore and select research publications and current examples that are relevant to their topic.

4. Each student team will deliver two 4-5 page papers that summarize the respective research papers and examples and that tie those to their topic.

5. Each student team will deliver two presentations introducing to the class their topic summary, the summary of the research publications, and of the examples they selected. Beyond presenting, teams will actively engage their classmates by leading an interactive discussion. The whole class will meet 10:15-12:00 for these presentations and discussions on the following days: 12.3., 19.3., 26.3., 23.4., 30.4., and 7.5.

6. Students will actively participate in class by engaging in the discussion of their own and of other student teams' topics.

The seminar takes place on site. Attendance is compulsory.

Learning Outcome:
- understanding the sources and types of innovation
- exploring the role of industry dynamics in innovation
- gain insights into innovation strategies, structures, and processes
- understanding the impact of technological change on competitive advantage
- develop the ability to analyze real-world examples of how companies manage technological innovation and understand challenges faced and the strategies employed by these companies
- improving writing, presentation, assessment, and discussion skills

Target Groups:
Suitable for English Speakers

Languages of Instruction:
English

Course Materials:	The list of readings for the seminar will be introduced during the introductory session and will be distributed electronically.
Merkmale:	Target Group: Suitable for English Speakers

Module BME 683 Wagi Lunch Seminar
07SMBME683 / Seminar

Description:

General description:
Discover the latest in translational biomedical research through our interdisciplinary seminar series. Presented by PhD students or young researchers, these seminars showcase advancements in biomedicine and methodological updates from multiple areas such as cardiology, rheumatology, oncology, immunology, neurology, dermatology, etc. Engage in insightful questions & answers followed by discussions and an informal lunch, offering networking opportunities.

ECTS: 1

Notes:
The course is taking part also during the “non-lecture” time of the semesters.

Application by email to wagilunchseminar@cmc.uzh.ch

Learning Outcome:
A presentation in an interdisciplinary environment to broaden the chance to confront your data with other young researchers. Discussion around scientific presentations by other PhD students and early researchers.

Languages of Instruction:
English

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Giovanni Camici

Requirements:

Prerequisites:	Open to all PhD students of the UZH, ETH and USZ.
Assessment:	- Active participation in minimum 10 weekly seminars on site (10 hours) - 1 poster presentation (10 hours preparation + 8 hours of poster session) during the Day Schlieren Research held on site at the end of each FS semester (first Wednesday of July each year) Seminar and poster presentation will be done in English language.
Grading Scale:	1-6, Half Grades Given

Module BIO 547 Bayesian regression models in R
07SMBIO547 / Lecture with Practical Exercises

Description:

General description:
This course introduces PhD students to Bayesian regression models with the goal of developing a flexible modelling framework that can handle almost any kind of data structure. Topics include basics of Bayesian inference, generalized linear models (binomial, poisson, multinomial, etc.), multilevel modelling, mixture models, phylogeny and other sources of covariance, as well as missing data, measurement error, censoring, and other complications.

ECTS: 1

Notes:
5 x 2 hours. For PhD students only. Registration by email to evobio@aim.uzh.ch

Learning Outcome:
After completing this course, students should be able to:

- Understand and apply Bayesian inference
- flexibly adapt modelling approaches to the data

Target Groups:
PhD Studierende aus dem PhD Program in Evolutionary Biology haben Priorität.

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Adrian V. Jaeggi

Requirements:

Prerequisites:	Experience with statistics in R
Assessment:	Weekly exercises, final paper describing data analysis + annotated R code
Grading Scale:	Pass/Fail
Repeatability:	Can be repeated once

Organisation:

Module Thematic Approaches
06SM390-006 / Module

Description:

General description:
Le module introduit dans le travail pratique de l'analyse linguistique en ciblant ou bien un domaine précis de la langue ou bien une méthodologie essentielle (philologie linguistique ou lexicographie diachronique).

ECTS: 3

Learning Outcome:
Les étudiantes et les étudiants apprendront à analyser des sources primaires afin d'en extraire des données linguistiques et se familiariseront avec des méthodologies essentielles en linguistique synchronique et diachronique.

Languages of Instruction:
Französisch

Merkmale:

Responsible instructor:	Martin-Dietrich Glessgen

Requirements:

Prerequisites:	Les étudiantes et les étudiants connaissent tous les domaines de description de la linguistique (française), en maîtrisent la terminologie et les notions fondamentales, et ont de bonnes connaissance de l'histoire du français. (Ces notions sont acquises dans le groupe de modules "Introduction aux études du français".) Niveau de langue B2 recommandé.
Assessment:	Portfolio: Exercices (50%), travail écrit (50%) --- Devoirs hebdomadaires (p.ex. lecture d'article, analyses à préparer à la maison). Travail écrit (ca. 10 pages), remise le 20 juin 2026.
Grading Scale:	1-6, Half Grades Given
Repeatability:	repeatable once, book again

Organisation:

Module EEE 301 Professional Internship
07SMEEE301 / Praktikum extern / Berufspraktikum

Description:

General description:
Within the Biodiversity Bachelor's program at the University of Zurich, students engage in a practical internship as part of the Mono program. This internship serves as a bridge between theoretical university education and hands-on professional experience, offering students an initial glimpse into the working world. The minimum duration for the internship is three months, with a full-time commitment of 100%. Alternatively, students may opt for a part-time arrangement over an extended period, but not longer than one year.

The internship opportunities are available in institutions actively involved in biodiversity-related activities. Various sectors provide potential internship positions, including nature conservation organizations, zoos, museums, environmental consulting firms, public administrations like BAFU, Grün Stadt Zürich, cantonal departments, and research institutions such as WSL, EAWAG, Agroscope. Opportunities also exist in national and international private sector companies. A comprehensive list of potential institutions is accessible in the OLAT folder "EEE301 Internship" (https://lms.uzh.ch/dmz/). It's important to note that this list is not exhaustive, and students are encouraged to explore additional relevant institutions in the field of biodiversity.

Internship positions should align with UZH's values and objectives, focusing on institutions, companies, or NGOs in the field of biodiversity. Acceptance of a position is contingent upon approval from the module leader, who ensures compatibility with UZH's mission.

Students are accountable for both applying for the internship and establishing the framework conditions. Additionally, students and institutions share the responsibility for securing insurance coverage.

ECTS: 12

Notes:
The professional internship must be discussed with and approved by the module coordinator in advance.
During the semester, students can attend a meeting on Mondays from
11:00 a.m. to 12:30 p.m. with the completed registration form without prior appointment in the study coordination office Y13-G-40. More information on the professional internship and the report can be found in the professional internship information sheet here: https://www.biodiversitaet.uzh.ch/de/bachelor/berufspraktikum.html.

Learning Outcome:
After successfully completing the module, students should be able to ...

- gain insight into the professional realm
- cultivate experience in independently managing a project
- develop communication, teamwork, and organizational skills as a complement to university instruction
- enhance their understanding and orientation toward future career choices
- identify prospects for targeted furter training
- initiate initial connections with stakeholders in the field of biodiversity

- practice report-writing skills:

- adhere to the correct formal structure of a scientific paper
- situate the contribution within a broader context and classify it appropriately

Languages of Instruction:
German or English

Merkmale:

Responsible instructor: Claudia Hegglin Braun

Requirements:

Prerequisites: Basic studies must be completed

Assessment: Students are required to consolidate the activities conducted during the work placement into an 8 to 10 pages report. This comprehensive report must be digitally submitted within three months of completing the internship to the module coordinator, along with the signed registration form. Written feedback on the report will be provided to students within two months of submission. Upon approval of the report, 12 ECTS credits will be allocated to the EEE301 Professional Internship module (this module is not available for individual booking).

Module EEE 500 Master Thesis in Biodiversity
07SMEEE500 / Master Paper / MA-Arbeit MNF

Description:

General description:
The master thesis project comprises 12 months (full time) of scientific research, in which a research question in the field of ecology, evolutionary biology, behavioral biology or environmental science is tackled under the guidance of the supervisor. Further information https://www.biodiversitaet.uzh.ch/de/master.html

ECTS: 60

Learning Outcome:
After successfully completing the module, students should be able to fully implement a research project (planning, data collection, analysis, writing a scientific paper, presentation of this paper), by

- independently identifying a current research topic in the field of ecology, evolutionary biology, behavioral biology or environmental science for a scientific project and formulating appropriate research questions,
- developing methodological approaches to answer these research questions,
- independently collecting, evaluating and interpreting data,
- putting the results in the context of current research and critically questioning the validity and reliability of the data and methods of their own and other studies.

Languages of Instruction:
The thesis is written in English (or German with prior permission)

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Arpat Ozgul

Requirements:

Prerequisites:	To start with the MSc thesis project, module EEE 520 must have been successfully completed
Assessment:	At the end of the MSc thesis project work, the student writes a thesis and designs an accompanying research poster. The written thesis has to comply formally with the common standards applied to scientific publications. The research poster has to be added to the thesis pdf and include the names and affiliations of the collaborators. Additionally, students must present their final work to their peers in group or departmental meetings or conferences. Their performance in these presentations, including handling of Q&A, will be a part of the final grading. This addition aims to assess the student's ability to communicate their research effectively to a broader audience. In English.
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Semester)

Universität Zürich[UZH]

Dates/Times/Deadlines:	Students arrange their research project with their chosen supervisor. The project and supervisor are entered onto a Learning Agreement, which also lists the taught courses (20 ECTS points) and plan for the Masters Exam (10 ECTS points). The needs to be checked and signed by the Masters Coordinator (Prof. Ozgul)
Booking Deadline/Period:	not bookable
Cancellation Deadline:	not cancelable

Module EEE 520 Integrated Knowledge of Biodiversity
07SMEEE520 / Mündliche Prüfung

Description:

General description:
This module comprises a total of 300 hours (corresponding to about 6-8 weeks) of self-study and has to be taken before thesis work. At the beginning of the module, the MSc Supervisor assigns study material (e.g., chapters from selected books, series of scientific articles) to the student. The MSc Supervisor suggests a scope and related reading material to the MSc Coordinator who will evaluate and approve the study material.

ECTS: 10

Learning Outcome:
After successfully completing the module, students should be able to demonstrate comprehensive understanding of the assigned learning material - including relevant facts, concepts, and methods - and to review scientific literature efficiently and critically.

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Arpat Ozgul

Requirements:

Prerequisites:	Only for students of MSc Biodiversity
Assessment:	The certificate of achievement for the compulsory module EEE 520 consists of an oral examination of 30 minutes. The examination date will be arranged directly with the examiner. EEE 520 is considered passed if at least a grade of 4 is achieved. In English. If the examination is failed (grade below 4), the supervisor decides whether a repetition on the same topic/ with the same supervisor is feasible or not. A failed examination can be repeated once. The exam has to be scheduled before the main thesis period.
Grading Scale:	1-6, Half Grades Given

Module Acting morally? Ethical Competencies in Theory and Practice
10SMSTS-110 / Seminar

Description:

General description:
Politische, ökonomische, technische und klimatische Entwicklungen verändern globale, gesellschaftliche, berufliche und private Handlungsanforderungen. Der Bedarf an moralischer Orientierung und ethischer Entscheidungsfindung ist in zahlreichen beruflichen Praxisfeldern und im Alltag gestiegen und gefragt. Innerhalb des Rahmens legaler Möglichkeiten bleibt die Spanne der Wahlmöglichkeiten mit jeweiligem moralischem Gehalt groß und erfordert weitsichtiges und verantwortliches Handeln auf Grundlage ethischer Reflexion. In diesem Kurs lernen Sie die eigene moralische Involvierung zu erkennen und erwerben durch die Verknüpfung von Theorie und Praxis die Kompetenz, sich verantwortlich ein ethisches Urteil zu bilden. Das Modul zielt zwar auf die Vermittlung ethischen Grundlagenwissens, fokussiert dabei aber auf die Anwendung in verschiedenen Praxisfeldern, aus denen Berufstätige anschaulich berichten.

ECTS: 3

Notes:
Theoretisches Wissen erarbeiten sich die Teilnehmenden anhand von Onlinematerial (Texte, Podcasts, Videos, Quizzes) im Selbststudium zur Vorbereitung der Präsenzsitzungen, in denen dann die praktische Einübung und Anwendung der Theorie im Vordergrund stehen. Die Vorbereitung im Selbststudium ist obligatorisch. Das Material wird über OLAT bereitgestellt. Die erste Sitzung ist am 17.02.25.

Kurz erklärt: https://t.uzh.ch/1Pn

Learning Outcome:
Die Teilnehmenden werden für moralische Fragestellungen in ihren jeweiligen Fächern und angestrebten Berufsfeldern sensibilisiert und befähigt, eigenständig eine verantwortbare ethische Position zu entwickeln und zu vertreten. Ein Fokus liegt auf der Darstellung der Alltäglichkeit von moralischen Phänomenen, den persönlichen Einflussmöglichkeiten und der Tragweite des eigenen Handelns. Hierfür erwerben die Teilnehmenden Kenntnis über die jeweiligen fachspezifischen ethischen Themen und üben Strukturen ethischer Entscheidungsfindung praktisch ein.

Target Groups:
BA, MA

Languages of Instruction:
Deutsch

Merkmale:

Responsible instructor:	Michael Coors

Requirements:

Prerequisites:	Für die Teilnahme gibt es keine Voraussetzungen.
Assessment:	Vorbereitung der einzelnen Sitzungen mit dem auf OLAT bereitgestellten Material. Aktive Mitarbeit in den Sitzungen. Erarbeitung eines Essays in 2-3er Gruppen zu einer berufsfeldspezifischen ethischen Herausforderung: Interview plus Auswertung, 8-10 Seiten Umfang, Abgabe 21.06.26. Die dafür notwendigen Arbeitsschritte werden in der Lehrveranstaltung erlernt und es wird während der LV Zeit zur Erarbeitung zur Verfügung stehen.

Module Strengthening Mental Health Together: Well-being in Studies and Work
10SMSTS-108 / Module

Description:

General description:
Studierende sind während ihres Studiums und beim Übergang ins Berufsleben vielfältig gefordert. In diesem interaktiven Modul lernen die Studierenden individuell und in der Gruppe Grundlagen der mentalen Gesundheit kennen sowie zentrale, positive Ressourcen zur Stärkung der eigenen mentalen Gesundheit. Die fachlichen Grundlagen werden inter- und transdisziplinär wissenschaftlich fundiert auf Basis von Erkenntnissen aus Psychologie, Medizin, Theologie und Sportwissenschaften vermittelt. Das Modul besteht aus zwei Präsenzvorlesungen jeweils am Anfang und Ende des Semesters, wöchentlichen Online-Vorlesungen, Selbststudium und zwei Präsenzworkshops (jeweils dienstagnachmittags). Die Studierenden lernen darin die theoretischen Grundlagen kennen und können diese praktisch durch Übungen, Eigenanwendung und Austausch in der Gruppe anwenden und praktische Kompetenzen für die Stärkung der mentalen Gesundheit im Studium und Beruf aufbauen.

ECTS: 3

Notes:
Das Modul befasst sich mit den Grundlagen der mentalen Gesundheit und zentralen Ressourcen zu deren Stärkung im herausfordernden Alltag von Studium und Beruf.
In den Online-Vorlesungen werden die theoretischen Inhalte aus unterschiedlichen Perspektiven vermittelt. In den Workshops werden Übungen zur Eigenanwendung durchgeführt und Erfahrungen in Kleingruppen reflektiert. Im Vordergrund stehen ein ressourcenorientierter Ansatz und die Förderung eines positiven Gesundheitserlebens. Es geht in diesem Modul nicht darum, psychische Erkrankungen im Detail zu beschreiben, zu diagnostizieren oder ihre Ursachen zu ergründen. Das Modul ist daher nicht als Anlaufstelle für akute Krisen oder als Ersatz für eine Psychotherapie zu verstehen. Bei persönlichen Krisen empfehlen wir die psychologische Beratungsstelle der UZH (https://www.pbs.uzh.ch/de) aufzusuchen oder Fachpersonen in der Nähe (https://www.psychologie.ch/psychologensuche) zu kontaktieren.

Kurz erklärt: https://www.sts.uzh.ch/de/about/videos.html

Learning Outcome:
Lernziel ist die Aneignung der theoretischen Grundlagen, die Selbsterfahrung und der Kompetenzaufbau zum Umgang mit Belastungen und Förderung der mentalen Gesundheit im Studium und Beruf. Die wichtigsten Aspekte und Bestandteile der mentalen Gesundheit aus verschiedenen Fachperspektiven werden kennengelernt und in Bezug auf die eigene Person reflektiert. Der Fokus liegt dabei auf Ressourcen für die Bewältigung der Herausforderungen im Studium. Evidenzbasierte Aktivitäten zur Stärkung dieser Ressourcen und zur Steigerung des eigenen Wohlbefindens während des Studiums werden kennengelernt, ausprobiert und kritisch reflektiert. Indem Studierende ein besseres Verständnis und konkrete Handlungsstrategien im Umgang mit den Belastungen und der Förderung der Ressourcen im Studium entwickeln, soll ein nachhaltiger Kompetenzerwerb für künftige berufliche Herausforderungen entwickelt werden.

Target Groups:
BA, MA

Languages of Instruction:
Deutsch

Merkmale:

Responsible instructor: Moritz Daum

Requirements:

Prerequisites:	Es gibt keine fachlichen Voraussetzungen. Das Modul ist für Bachelor- und Masterstudierende aller Fakultäten der UZH offen. Verfügbarkeit an den zwei Präsenzvorlesungen sowie an zwei Präsenzworkshops wird vorausgesetzt. Studierende können eine der vier Workshopgruppen wählen: Gruppe 1 (10.03. & 17.03.2026), Gruppe 2 (24.03. & 31.03.2026), Gruppe 3 (14.04. & 21.04.2026) oder Gruppe 4 (28.04. & 05.05.2026). Die Zuteilung zu der Workshopgruppe erfolgt nach den individuellen Präferenzen am ersten Präsenzvorlesungstermin.
Assessment:	Der Leistungsnachweis beinhaltet folgende Elemente: - Aktive Teilnahme an der ersten und der letzten Präsenzvorlesung sowie an zwei Präsenzworkshops - Selbstständige Erarbeitung der Online-Vorlesungen bzw. Screencasts - Eigenständiges Ausprobieren der Übungen zur Selbstanwendung - Führung eines individuellen Lerntagebuchs zu jedem inhaltlichen Thema. Das Lerntagebuch ist bis spätestens 07.06.2026 einzureichen. - Abgabe von vier Gruppenprotokollen. Drei Protokolle werden zu den inhaltlichen Themenblöcken Einleitung, Ressourcen und Herausforderungen verfasst. Das vierte Protokoll dokumentiert die Reflexion nach zwei Präsenzworkshops. Die Gruppenprotokolle sind bis spätestens am 07.06.2026 einzureichen. ---

Module Current Topics in the Reception of East Asian Art
06SM642-024 / Module

Description:

General description:
Das Modul untersucht die Rezeption von Kunst, wobei der Schwerpunkt auf den Praktiken der Interpretation, und auf dem Verständnis von Kunstobjekten liegt, die sich in verschiedenen kulturellen und sozialen Kontexten und historischen Epochen bewegen und dementsprechend verändern. Darüber hinaus werden die institutionellen Formen der Rezeption von ostasiatischer Kunst erläutert und die komplexen Beziehungen zwischen historischen und zeitgenössischen Praktiken des Kunsthandels, des Sammelns und des Kuratierens sowie deren Rolle in den Prozessen der Wissensproduktion untersucht. Dieses Modul mit dem Schwerpunkt Kunstrezeption ergänzt die Inhalte des Moduls «Kritische Ansätze zu Kunstschaffen in Ostasien».

ECTS: 6

Learning Outcome:
Die Studierenden erwerben Kenntnisse über die Rezeptionsprozesse von Kunst in verschiedenen zeitlichen, räumlichen und soziokulturellen Kontexten. Sie sind in der Lage, sich in mündlicher und schriftlicher Form mit aktuellen Debatten über ethische Dimensionen des Sammelns, Kuratierens und Ausstellens von Objekten aus verschiedenen kulturellen, insbesondere einem spezifischen ostasiatischen Kontext, auseinanderzusetzen.

Languages of Instruction:
Englisch oder Deutsch - siehe Kursbeschreibung. Die Lektüre englischsprachiger Literatur wird vorausgesetzt.

Module Subjects and Themes in Art and Visual Culture in East Asia
06SM642-524 / Module

Description:

General description:
This module delves into thematic approaches that complement the chronological, spatial, and material perspectives employed in art history. Thematic studies enable comparative analysis of similar themes and subjects across different cultures and historical periods. By focusing on major subjects and themes in art and visual culture in East Asia, it facilitates the exploration of interconnectedness among diverse works of art, artists, and artistic practices in the region and beyond. As the modules aims to foster an understanding of commonalities and differences between subjects across historical eras and cultural boundaries, it encourages a more nuanced understanding of global art production. Through its focus on the content-based study of art, this module complements the materials explored in «Material and Meaning in East Asian Art», which explores the role of materiality in artistic and meaning making processes.

ECTS: 9

Learning Outcome:
Upon successful completion of the course, students will be familiar with the key subjects and themes in East Asian art and visual culture, and will demonstrate the ability to conduct insightful comparative analyses of themes or subjects across diverse cultures, regions, and historical periods. Furthermore, students will develop the skill to critically assess and articulate, both verbally and in writing, the commonalities and differences inherent in these subjects across historical eras and regional boundaries, enabling them to engage in nuanced discussions on East Asian art and its global connections.

Languages of Instruction:
English or German - see course. The reading of relevant literature in English and one
East Asian language is required.

Merkmale:

Responsible instructor:	Ewa Machotka

Requirements:

Assessment:	Portfolio (oral presentation 1/3 and research paper 2/3) --- The course will be assessed through an oral presentation and a research paper. The deadline for submitting the research paper is on June 18th 2026.
Grading Scale:	1-6, Half Grades Given
Repeatability:	repeatable once, book again

Organisation:

Offer pattern:	1 Semester (Every Second Spring Semester)
Booking Deadline/Period:	from We 14.01.2026 10:00 to Tu 10.03.2026 24:00
Cancellation Deadline:	from We 14.01.2026 10:00 to Tu 10.03.2026 24:00

Module EEE 300 BSc Thesis in Biodiversity
07SMEEE300 / Bachelor Paper / BA-Arbeit MNF

Description:

General description:
For the bachelor thesis project, including writing the thesis, you should work approximately 360 hours (equivalent to 12 ECTS credits). The thesis must be written in English. The length of the main text should be between 5000 and 10000 words (not including references and appendices).
Scope, format and formatting must be agreed upon with the supervisor.
Students are required to attend introductory seminars.

ECTS: 12

Notes:
The module EEE 300 is not bookable. You have to book the module EEE 299 in the spring term.

Learning Outcome:
After successfully completing the module, students should be able to:

- develop a scientific question, plan a project, and implement it.
- collect data and analyse them.
- write a scientific report.
- take relevant scientific literature into account, cite systematically and correctly.
- argue logically and present the results clearly and correctly, including tables and graphs.
- interpret your results in a scientific context.

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Kentaro Shimizu

Requirements:

Prerequisites:	You have to be registered in module EEE 299 'Application BSc Thesis in Biodiversity'.
Assessment:	BSc thesis (performance and report each 50%)in English
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Semester)
Booking Deadline/Period:	not bookable
Cancellation Deadline:	not cancelable
Organisation:	Inst. f. Evolutionsbiol. u. Umweltwiss.

Module Macroeconomic Forecasting (S)
03SM22MO0236 / Seminar

Description:

General description:
This seminar will explore the methods, tools and challenges involved in forecasting the future path of macroeconomic variables. Participants will gain an insight into the key economic indicators, statistical models and data analysis techniques used by professional forecasters, including machine learning. A key component of the seminar will be to refine your skills in presenting data and reporting the results of a forecasting exercise to superiors or peers. We will review key time series techniques and discuss common challenges in macroeconomic forecasting. We will then introduce univariate and multivariate forecasting models and consider various issues suchas forecasting evaluation and combination. We will also cover issues such as variable selection, hierarchical forecasting and trend cycle decomposition. Alltopics covered will be illustrated with real-world empirical applications. The final list of topics will be chosen by the participants.

ECTS: 3

Notes:
This seminar is limited to 20 participants and requires an application. Allocation is handled via the module booking tool.
If demand exceeds capacity, priority is given to Economics majors.
Important: Seminar booking periods differ from regular lecture module booking periods. Attendance is mandatory at all sessions.
More information on the process can be found on our website: https://www.econ.uzh.ch/en/study/undergraduate/ma/seminar.html

Application for this seminar is the module booking tool:https://studentservices.uzh.ch/uzh/launchpad

The seminar will take place on May 6 and May 7, 2026, in room SOF-E-09.

Learning Outcome:
This course aims to provide a comprehensive understanding of macroeconomic forecasting methods and the exploration of a variety of applications of practical forecasting problems. It will also help to refine skills in presenting data and reporting the results of forecasts to superiors.

Languages of Instruction:
English

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Mathias Hoffmann

Requirements:

Prior Knowledge:	Basic knowledge of econometrics and time series analysis is an advantage but not essential.

Module EEE 299 Application BSc Thesis in Biodiversity
07SMEEE299 / Bachelor Paper / BA-Arbeit MNF

Description:

General description:
This module indicates that the Bachelor thesis project is ongoing. In the records, EEE 299 will be replaced by EEE 300 after the BSc thesis has been completed. Students are required to attend introductory seminars.

ECTS: 0

Notes:
Information event will take place Thursday 19 March 2026 12.15 to 12.45 in the lecture hall Y21-D-68a. Booking time 19 March until 19 April 2026. After acceptance students can prioritise 5 options form the OLAT list between 1 to 15 May 2026. First meeting of students and supervisors in June, completing the form ‘Application Bachelor Thesis’. Introduction seminar on last Friday before autumn term starts, Friday 11 September 2026 9.00 to 17.00 in Y17-M-05. Submission dates of Thesis: Short version 30 November, Long version 15 June.

Learning Outcome:
See EEE 300

Merkmale:

Responsible instructor:	Rie Shimizu Inatsugi

Requirements:

Prerequisites:	To register for the module "Application BSc Thesis in Biodiversity" (EEE 299), you must have successfully passed the compulsory modules of the first year of studies, and at least booked the compulsory modules of the second year of studies. All compulsory modules of the first and second year must be successfully completed before the start of the BSc thesis project.
Assessment:	See EEE 300
Grading Scale:	1-6, Half Grades Given
Repeatability:	Can be repeated once

Module Strukturierte Lehrmodule PANN-Shadowing
04SMPED24001 / Kurs

Description:

General description:
PANN-Shadowing
Die Unterassistierenden/Masterstudierenden erhalten das strukturierte Angebot des Shadowings in den Sprechstunden der pädiatrischen Spezialfächern Pneumologie, Allergologie, Neurologie und Nephrologie (PANN)

- Jeweils ½ d im Ambulatorium der Kinderklinik
- Während ihres 2-monatigen Aufenthaltes im Wahlstudienfach Pädiatrie auf der Kinderklinik am KSB dürfen sich die Masterstudierenden 2-3 der obengenannten Spezialfächer auswählen (mindestens 2 Fächer sind obligatorisch), um anhand des Shadowings einen vertieften Einblick in diese pädiatrischen Fächer zu erhalten.
- Lernziele allgemein:
- Aneignung vertiefter fachlicher Kenntnisse, sowie Fähigkeiten und Fertigkeiten zum selbstständigen praktischen Arbeiten der Studierenden.
- Umsetzung des Leitgedanken: ‚Vernetztes Denken und interprofessionelles Arbeiten sind Kernkompetenzen, um den raschen Wissenszuwachs und die fortschreitende Spezialisierung in der Medizin zu meistern' mittels Vertiefung der longitudinalen Schwerpunkte vernetztes Denken und Grundversorgung/Spezialisierung.
- Die Studierenden verstehen die Bedeutung von "patient empowerment" und des mündigen, informierten Patienten, sowie deren Eltern für die Behandlung und können diese adäquat berücksichtigen, beispielsweise im Rahmen von "Shared Decision Making".
- Die Studierenden erhalten einen vertieften Einblick in die Zusammenarbeit zwischen einer Spezialistin / einem Spezialisten und einer Grundversorgerin / einem Grundversorger, die die jeweils Setting- spezifische unterschiedliche Herangehensweise und die Synergie der Akteure deutlich machen.
- Allergologie:
Lerninhalte/Lernziele: allergologische Anamneseerhebung, Diagnostik (Pricktestung, nasale Provokation, Schleimhautprovokation, orale Provokation (Nahrungsmittel, Medikamente), serologische Diagnostik), Therapie allergischer Erkrankungen (Akut- und Langzeitmanagement) in Theorie und Praxis (Anwendung Adrenalinpen mittels Uebungspen, Abgabe und Instruktion Notfallbehandlungsplan). Einsicht in die interprofessionelle Zusammenarbeit mit der Pflege, der Ernährungsberatung, der Pharmazie und der Küche/Gastronomie und in die interdisziplinäre Zusammenarbeit, speziell mit der Pneumologie und Dermatologie.
- Neuropädiatrie:
Lerninhalte/Lernziele: neuropädiatrische Anamneseerhebung, neuropädiatrischer Status mit Untersuchung der Hirnnerven, Koordination, Kraft, Sensibilität, Reflexe und der kindlichen Entwicklung inklusive Kennenlernen von Entwicklungs-Assessments. Einblick in die neurologische Diagnostik, wie z.B. MRI, EEG mit Erarbeitung der Fragestellungen, EEG- Interpretation und Einblick in die Durchführung. Therapien verschiedener neuropädiatrischer Erkrankungen. Einsicht in die intensive interprofessionelle und interdisziplinäre Zusammenarbeit mit der Entwicklungspädiatrie und der Neuropsychologie mit Abdeckung aller Aspekte der kindlichen Entwicklung.
- Pädiatrische Nephrologie
Lerninhalte/Lernziele: pädiatrisch nephrologische Anamneseerhebung, Kindernephrologische Untersuchung, im speziellen Blutdruck, Ödeme, Rachitiszeichen, Zeichen der chronischen Niereninsuffizienz etc. Nephrologische Diagnostik und deren Interpretation (Urinanalysen, Retentionsparameter, Ultrasonographie). Kennenlernen der häufigsten diagnostischen Krankheitsbilder (Fehlbildungen, erworbene Krankheiten und genetisch bedingte Nierenkrankheiten). Therapieoptionen verschiedener nephrologischer Krankheiten. Einsicht in die interprofessionelle und interdisziplinäre Zusammenarbeit mit der Pflege, der Urodynamik und den Sprechstunden Kinderurologie, Kinderkardiologie, Kinderneurologie, sowie der Adipositassprechstunde.
- Kinderpneumologie:
Lerninhalte/Lernziele: pneumologische Anamneseerhebung (Rauchexposition, Luftqualität, bisherige Infekte wie RSV), die Rolle von Impfungen in der Prävention pneumologischer Erkrankungen, pneumologischer Status mit Inspektion des Thoraxes, der Wirbelsäule, Untersuchung der Lunge und ORL. Pneumologische Diagnostik mit

Spirometrie, Bodyplethysmographie, FeNO und Nasale NO Messung (Durchführung und Interpretation), Beurteilung Thorax Röntgen. Theorie von direkter (Methacholinprovokation) und indirekter (Belastungslungenfunktion) Provokation mit Erlernen der Fragestellungen. Einsicht in die interprofessionelle Zusammenarbeit mit der Pflege und die interdisziplinäre Zusammenarbeit, speziell mit der Allergologie und Kinderkardiologie.

Module Biochemistry of reactive oxygen species
04SMCHE24001 / Course

Description:

General description:
Reactive oxygen species (ROS) are a collective of chemical entities of various degrees of reactivity that are derived from oxygen, and serve as intra- and intercellular messengers.
ROS buildup and inactivation is determining the cellular redox status that, together with ROS signaling role, is a prerequisite for all basic cellular processes such as: cell cycle progression, proliferation, migration, angiogenesis, self-renewal, autophagy and cell death. Cellular metabolism, gene expression and activation of cell signaling cascades are also modulated though ROS signaling. In developing embryo, ROS are also important for orchestrating and fine-tuning the processes of a proper development.
In disease, the most visible role of ROS is pathogen elimination through different types phagocytic cells such as leukocytes as a first line of defense. However, their implication in the onset and progression as well as the outcome of therapy is all-present having been documented for every disease and pathology.
This course is addressing a fast growing enormous but overlooked knowledge on the role of ROS, specifically:

- The role of oxygen in the maintenance of aerobic life on Earth with the emphasis on its role in metabolic reactions and its signaling products - ROS
- Biochemistry of ROS in detail with its implications for biological processes and disease pathology.
- Sources of ROS production, in particular NADPH oxidases
- Oxygen sensing and hypoxia. The role of the family of hypoxia- inducible factors
- Therapeutic potential of ROS inhibition

Module BIO 517 Master Thesis in Cancer Biology “BCi”, at the crossroad of basic and clinical research
07SMBIO517 / Master Paper / MA-Arbeit MNF

Description:

General description:
This module represents the Master Thesis in Cancer Biology for the students enrolled in the “BCi” subprogram (Basic + Clinical Research; complemented with an internship in industry, i.e. BIO527 as Optional Core Module). It comprises 52 weeks of practical activity on a research project co-supervised by a PI in basic cancer research and a PI in clinical cancer research. Such co-supervised projects are specifically available for the “BCi” subprogram, after having been identified and approved by the MSc coordinator. A written thesis documents the research and is the basis of assessment.

ECTS: 60

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Massimo Lopes

Requirements:

Prerequisites:	Bachelor degree in Biology, Biomedicine, or Biochemistry completed.
Assessment:	Master thesis
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Organisation:

Offer pattern:	1 Semester (Every Semester)
Booking Deadline/Period:	not bookable
Cancellation Deadline:	not cancelable

Module BIO 527 Internship in Industry on Experimental Cancer Research (6-months)
07SMBIO527 / Praktikum extern / Berufspraktikum

Description:

General description:
The internship comprises 26 weeks of experimental cancer research within a biotech company in Switzerland, which has expressed interest in hosting students and has sufficient personnel and infrastructure to offer direct supervision. The internship takes place after completion of the MSc thesis within the BCi subprogram of the MSc in Cancer Biology (BIO517 + BIO520 exams). A written, confidential report (ca. 5 pages) documents the research during the internship and is the basis for assessment by the MSc coordinator.

ECTS: 6

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Massimo Lopes

Requirements:

Prerequisites:	Only for students of the sub-program Basic/Clinical – internship of the MSc Biology concentration Cancer Biology.
Assessment:	Written report

Module Seminar in Smart Contracts and Blockchain Technology
03SM22BO0129 / Seminar

Description:

General description:
Stable coins are crypto assets that are designed to reflect the value of fiat currencies such as the USD, the EUR, or the CHF. By solving the volatility problem of native coins such as Bitcoin and Ether, stable coins are a crucial element of the global blockchain infrastructure. In this seminar, we will investigate the economics of stable coins from a variety of perspectives.

ECTS: 3

Notes:
This seminar is limited to 20 participants and requires an application. Allocation is handled via the module booking tool.
If demand exceeds capacity, priority is given to Economics majors.
Important: Seminar booking periods differ from regular lecture module booking periods. Attendance is mandatory at all sessions.

Application for this seminar is the module booking tool:https://studentservices.uzh.ch/uzh/launchpad

Learning Outcome:
Mutual knowledge of the candidates topics, their approaches, and their results. Ability to present blockchain-related material in a clear, convincing, and understandable way. Using the team to leverage one's own work progress.

Target Groups:
Bachelor students comfortable with using their analytical skills. A background in banking or financial markets is an advantage.

Languages of Instruction:
English

Course Materials:	Slides prepared by course participants, online material
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Christian Ewerhart

Requirements:

Assessment:	(i) slides (due before Easter), (ii) presentation, (iii) closed-book exam on April 18, 4 PM (to ensure attentiveness to the other presentations), each counts 1/3 of the grade.
Grading Scale:	1-6 Quarter Grades Given
Repeatability:	Can be repeated once

Module Operations Management (L+E)
03SM22BO0131 / Lecture with Practical Exercises

Description:

General description:
In this course basic concepts and techniques in operations management will be introduced. The topics that will be covered include process flow, capacity management, forecasting, inventory management, variability and its impact, risk-pooling strategies to reduce and hedge uncertainty, supply chain management, and sustainable operations management.

ECTS: 6

Notes:
This module takes place on-site and online (podcast).
Principal lecturer for this course is Prof. Tarkan Tan.

Learning Outcome:
Upon successful completion of the course, the student should be familiar with the basics of operations management. In specific, the objectives of the course are

- Understanding the concepts and concerns in operations management, and
- Quantitative and qualitative comprehension and application of operations management techniques.

Target Groups:
Bachelor's students

Languages of Instruction:
English

Course Materials:
Textbook
Matching Supply with Demand: An Introduction to Operations Management, G. Cachon and C. Terwiesch, 5th edition, McGraw-Hill, ISBN 978-1-260-08461-0.
Recommended Textbooks

- Inventory and Production Management in Supply Chains, E. A. Silver, D. F. Pyke, D. J. Thomas, 4th ed., Taylor & Francis, ISBN 978-1-032-17932-2, eBook ISBN 978-1-315-37440-6.
- Bouchery, Y., Corbett, C. J., Fransoo, J., and Tan, T. (2024), Sustainable Supply Chains: A Research-based Textbook on Operations and Strategy, 2nd & nbsp; edition, Springer, ISBN 978-3-031-45564-3.

Merkmale:
Target Group: Suitable for English Speakers

Responsible instructor:
Tarkan Tan

Requirements:

Prior Knowledge:
Basic knowledge in probability theory.

Assessment:
- Homework Assignments (20%) - Three assignments, submitted online via

Inspera.
- Final Written Exam (80%) - Conducted online on campus. Bring Your Own Device (BYOD). Open-book format. (Tuesday, 09.06.2026 14:00-15:45)
- In-Class Participation (Bonus up to 10%) - Based on personal attendance at lectures on campus. Full bonus awarded for attending at least 6 lectures (excluding review sessions).

Module R/Python - a non-technical overview of big data techniques, team work and interactive visualization with applicati
03SM22MO0239 / Lecture with Practical Exercises

Description:

General description:
Data-driven decision making gets increasingly important in today's fast-paced business environment. Three aspects are key to succeed in data- driven decision making: handling "big data", team collaboration and (interactive) visualization.
In detail, this class will show you in an easy and non-technical way how to deal with questions such as: How to speed up your code? How to use Cloud Computing technology to crunch your data? How to automatically analyze data and summarize the results in an interactive report? What is the best tool to work in teams on code?
This class will apply a non-technical approach by starting every unit with "real-world" problem and providing you solution strategies to tackles those problems. The class is a lecture with integrated exercises. For every session, you are required to bring your laptop with the latest R/Python version installed. The skills learned in this class are not only useful for a job in the data science industry but also for your master thesis.

ECTS: 3

Notes:
Students who have already taken "R - a non-technical introduction to big data techniques, team work and interactive visualization with applications to Marketing (MO0120) are not permitted to book the current module.
This course will be held on-site with digital elements. Students must bring a laptop (iPads and other tablets are not permissible) with R (cran.r-project.org/) & R-Studio (rstudio.com/rstudio.com/) or Python(https://www.python.org) and Spyder (https://www.spyder-ide.org) installed (latest version).
This course integrates an AI assistant as a learning companion. The custom AI chatbot, trained on course materials and embedded within the OLAT platform, provides on-demand guidance to help students understand the core programming concepts and apply them to the marketing research problems discussed in class.

Learning Outcome:
Get to know and apply advanced R or Python topics

Target Groups:
MA

Languages of Instruction:
Englisch

Course Materials:	All course materials will be provided on OLAT.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	René Algesheimer

Requirements:

Prerequisites:	You must have a laptop with the latest version of the applicable operating system installed. Please remember to bring your charger.
Prior Knowledge:	This course requires basic R/Python knowledge. You should know how to: - write a loop - use "if-else" statements - write your own function

- ask a question on stackoverflow and actually get an answer.

Assessment:	The following components comprise the final grade: 1. Daily coding exercises (days 1-5) (36%): on-site assessments (computer-based, BYOD format; bring a charger) 2. Final exam on 06.02.2026 (44%): on-site, written examination, multiple choice format 3. Online exercises on DataCamp (20%). Exercises are made available on the OLAT page of the course two weeks before the course starts and are due three weeks after the course ends. Students with little previous coding experience are recommended to complete part of the exercises already before the course starts. More details will be provided on the OLAT page.
Grading Scale:	1-6 Quarter Grades Given
