Module Standard of Living in Switzerland, 1750-1850 (S)
03SM22MO0240 / Seminar

Description:

General description:
Based on newly collected data for Switzerland, this course explores methods for constructing historical measures of economic activity and welfare. We will also review and demonstrate new machine-learning techniques for extracting information from historical documents and tabulated sources.

A key component of the course involves analyzing data on human stature as an indicator of the biological standard of living, with particular attention to challenges posed by defective height samples, such as truncation, heaping, and selection bias. Because we will work extensively with archival materials, the ability and willingness to read historical documents in German is essential.

Finally, we will cover the fundamental steps required to set up a reproducible research project. The final output will be a package containing the essay, the programs, and the analyzed data.

Module EEE 203 Ecosystems and Climate
07SMEEE203 / Lecture with Practical Exercises

Description:

General description:
Die Vorlesung bietet eine Einführung zu Interaktionen von Ökosystemen und Klima. Welchen Effekt hat das Klima auf die Vielfalt, Verteilung und Physiologie von Lebewesen auf der Erde? Welche Wechselwirkung haben Ökosysteme über Energie- und Stoffflüsse mit dem Klima? Auf welchen räumlichen und zeitlichen Skalen interagieren Ökosysteme und Klima? Welche Rolle spielt dabei die taxonomische und funktionelle biologische Diversität? Was sind geeignete Methoden und Daten, um solche Interaktionen zu erfassen und modellieren? Welche Auswirkungen haben diese Interaktionen auf die Effektivität von naturbasierten Lösungen? Diese Fragen werden anhand existierender Theorien und Beispiele besprochen, insbesondere auch am Beispiel der Arktis, die besonders stark von der Klimaveränderung betroffen ist. Zusätzlich vertiefen die Studierenden einige Themen der Lektionen mittels wissenschaftlichen Artikeln, die durch die Dozentin angegeben werden.

ECTS: 3

Learning Outcome:
Nach einem erfolgreichen Abschluss des Moduls haben Sie folgende Lernziele erreicht:

- Sie kennen wichtige Komponenten des Klimasystems und wie sich diese auf die globale Verteilung, Physiologie, das Verhalten und die Diversität von Lebewesen auswirken.
- Sie können beispielhaft erklären, wie sich biologische Vielfalt auswirkt auf die Interaktion zwischen Ökosystemen und Klima.
- Sie sind in der Lage, exemplarisch Energie- und Stoffflüsse von Ökosystemen in Interaktion mit dem Klima grafisch darzustellen.
- Sie sind in der Lage, aufgrund der theoretischen Grundlagen der besprochenen Ökosystemmodelle ein passendes auszusuchen, mit dem sich eine gegebene Aufgabenstellung lösen lässt.
- Sie können naturbasierte Lösungen anhand von wissenschaftlichen Kriterien kritisch evaluieren.

Module EEE 202 Ecology of Communities
07SMEEE202 / Lecture with Practical Exercises

Description:

General description:
This course will address the patterns in the diversity and composition of species within ecological communities. There are three distinct characteristics of this course. First, it is very much rooted in a general framework based on physics. Second, it has a strong emphasis on cooperation, to balance the traditional focus on predation and competition. Third, it embraces the notion that ecology and evolution are deeply intertwined.

ECTS: 3

Learning Outcome:
After successfully completing the module, students should be able to leverage the conceptual ideas introduced through the course to answer questions such as:

- Why the world is green?
- How the high levels of diversity in nature can be supported?
- How common are rare species?
- How to measure diversity?
- What is the relationship between the number of species in an island and its area?
- How the different processes of selection, drift, speciation, and dispersal jointly shape communities?
- How to measure the resilience of ecological communities?

Der Kurs bietet eine Einführung in die globale Biodiversität und die systematische Biologie der wirbellosen Landtiere, limnischen und marinen Tiere. Die Teilnehmer werden morphologische Methoden und eine Vielzahl von Hilfsmitteln (Bestimmungsschlüssel, Apps, Webressourcen, Originalliteratur) für die Identifizierung von Exemplaren verwenden. Sie werden eine eigene Belegsammlung von Insekten anlegen, die Teil des Leistungsnachweises ist, sowie Kurzvorstellungen zur Biologie und Ökologie ausgewählter Arten erstellen.

Teilnehmende müssen einen Insektenkasten und Präparationsmaterial besitzen (kann zu Kursbeginn per Sammelbestellung für ca. 40 CHF erworben werden).

Geeignet für Studierende, die sich für eine Karriere im Naturschutzmanagement (z. B. Ökobüro, Behörde, Rote-Liste-Bewertungen), für Biodiversitätsbewertungen und -management durch Nichtregierungsorganisationen weltweit sowie für die Wissenschaft interessieren (z.B. auch Museen; empfohlen für alle Bereiche, die mit Nicht-Modellarten arbeiten).

ECTS: 4

Notes:
Prüfung findet in der letzten Vorlesungsveranstaltung statt. Repetitionsprüfung s. MNF Prüfungsplan https://www.mnf.uzh.ch/de/studium/pruefungen.html

Module EEE 321 Ecological Networks
07SMEEE321 / Block Course

Description:

General description:
This block course---aimed at bachelor (3rd year) and master students--- will be articulated around morning lectures and afternoon exercises. The lectures will provide an introduction to complex networks and their application to characterizing the structure and robustness of species interaction and spatial networks. The exercises will use a public repository of ecological networks that will be analyzed quantitatively by means of open-source code using an interactive platform. Overall, this course will provide a way to look at old ecological topics such as community robustness or habitat fragmentation with novel quantitative approaches. The course may also be of interest for students interested in applying network theory to other fields.

ECTS: 6

By the end of this course, students should be able to:

- Be acquainted with techniques to represent and visualize networks.
- Understand measures of network structure such as degree distribution, modularity, and nestedness.

Module EEE 323 Field Methods and Quantitative Analyses in Wildlife Management and Research
07SMEEE323 / Block Course

Description:

General description:
The course is aimed at building a bridge between data collection in the field and quantitative analyses. The students will learn both theory and application of different field methods for direct and indirect detection of various animal species. This includes practical exercises to gain hands-on experience in the field. During lectures the students will be introduced to the statistical concepts of analysing demographic data relevant in wildlife management and research. The concepts learnt will be consolidated during “R”-tutorials. A significant part of the course entails conducting a research project in small groups during which the students will formulate their own research question and choose an appropriate field method to collect and analyse their data. In the end each group will present their findings and write a short final report in the form of a scientific publication.

Module EEE 331 Kalahari Field course: Becoming a (Field) Biologist!
07SMEEE331 / Block Course

Description:

General description:
Students conduct their own ecological or behavioural research projects in the field at the Kalahari Research Centre, South Africa. They learn to develop testable research hypothesis on their own and to design experiments or observational data collection to test them. The data gathered are analysed statistically and presented to the course participants in scientific presentations and short reports. In the first part of the course, students work in small groups. In the second part of the course, the students all work on their own research project individually. In the third week they are taken to the close by National Parks to experience the Kalahari wildlife and flora. In the 2 Saturdays before the field course, methods (experimental design, statistics and techniques) used by field biologists will be introduced within lectures and on the 2nd day students will be requested to lead a seminar on specific topics related to field work and the Kalahari environment (e.g., fauna, flora, culture, nature conservation, …).

ECTS: 6

Notes:
Block course, with 2 Saturdays during FS and 3 weeks during the semester break in summer. The exact date will be published in the course announcement which becomes available in autumn/fall.

Registration via email to Ursina Tobler ursina.tobler@ieu.uzh.ch (ursina.tobler@ieu.uzh.ch). See the dates in the link section.

Learning Outcome:
The students learn to discuss scientific research and to communicate their ideas to other scientists. By sharing their research ideas and results the students will become more confident in a scientific environment.

Module Elective Module: Pregnancy, fetal therapies and preterm birth
04SM25MAS004 / Sonstiges

Description:

General description:
Die Entstehung, der Aufbau und die Funktion der Gewebe (Gebärmutter, Eihäute, Plazenta, Nabelschnur, Fruchtwasser, Beckenboden), welche für die normale Schwangerschaft und Geburt von zentraler Bedeutung sind, werden beschrieben. In einem nächsten Schritt werden schwangerschaftsbezogene klinische Probleme und deren derzeitige Behandlung diskutiert. Basierend darauf werden Forschungsanstrengungen besprochen werden, welche darauf abzielen, die aktuellen Behandlungsmethoden zu verbessern. Insbesondere werden gegenwärtig ungelöste klinische Probleme und bestehende Wissenslücken diskutiert. Schliesslich recherchieren Student/innen anhand einer vorgegebenen Fragestellung den aktuellen Stand des Wissens und erarbeiten eigene Vorschläge zu neuen Forschungsansätzen. Diese Arbeiten werden von Kliniker/innen und Wissenschaftler/innen eng betreut, so dass das Wissen der Teilnehmenden durch aktive Interaktionen mit den Betreuungspersonen gezielt vertieft werden kann.

ECTS: 4

Learning Outcome:
Die Studierenden können den Aufbau und die Funktionen von Gebärmutter, Plazenta und Fruchtwasser beschreiben und sie kennen den Ablauf einer normalen Geburt und die Rolle des Beckenbodens während der Geburt.
Sie kennen mögliche Auslöser von Wehen und molekulare Mechanismen, welche für die Tokolyse verwendet werden können.
Sie kennen Faktoren, welche die postpartale Hämorrhagie beeinflussen und neue Ansätze, diese zu behandeln.
Sie können die wichtigsten fetalchirurgischen Eingriffe beschreiben und kennen Risiken, welche mit diesen Eingriffen verbunden sind.
Sie können verschiedene Forschungsansätze, welche den frühzeitigen Blasensprung verhindern sollen erklären.
Sie können Eigenschaften von verschiedenen Biomaterialien und deren Einsatz im "Tissue Engineering" beschreiben.

Module DSA 102 Lab Automation and Accelerated Chemistry
07SMDSA102 / Lecture with Practical Exercises

Description:

General description:
Modern instrumental analysis, advanced experimental techniques and automated processes are indispensable tools in the laboratories of modern-day life sciences. This module comprises three interlinked courses over the course of one semester:

-    DSA 102.1 Good Practice in Chromatography
-    DSA 102.2 Introduction to Lab Automation
-    DSA 102.3 Basics in Flow Chemistry

Combining a lecture part (2h per week) and practical exercises (4h per week), this module will cover sample preparation techniques and background, chromatography theory and methods, qualitative and quantitative analysis, concepts of lab automation, automating workflows using a liquid handling robot, the fundamentals of flow chemistry and its applications in organic synthesis.

More detailed contents can be found in the descriptions of the three courses.

ECTS: 6

Notes:
Due to the practical part, the number of participants is limited depending on the available resources.

If the requirements are not met, no place will be allocated. Preference is given to those students for whom DSA 102 is mandatory. All other students will be admitted according to the date of booking.

The three parts of this module are also available separately. Students who want to participate only in one or two of the three parts need to book the DSA 102 module and additionally send a mail to sabine.stockhause@chem.uzh.ch stating which part(s) they would like to attend.

The final exam takes place on June 1st (10-12h).

Learning Outcome:
Understanding and applying the content covered

Languages of Instruction:
English

Merkmale:

Responsible instructor:	Johannes Schörgenhumer Laurent Bigler Nina Hartrampf

Requirements:

Prerequisites:	Prerequisite for admission is the successful completion of the fundamental chemistry courses CHE 170 and CHE 171 or equivalent knowledge and laboratory skills. Basic knowledge in organic chemistry is recommended (CHE 172 or similar).

Assessment:	The grade will be based on the lab reports for DSA 102.1 and the written exam at the end of the semester in English consisting of two parts (DSA 102.2, DSA 102.3). Completion of intermediate reports and presence in all practical sessions is required for entrance to the final exam [unless explicitly arranged otherwise based on valid grounds such as illness].

Module Quantitative Portfolio Management with Python (L)
03SM22MO0244 / Course

Description:

General description:
The course covers data preparation, modeling (including risk, return, objective functions, constraints, and transaction costs), and optimization and regularization techniques. It examines factors influencing performance, explores backtesting methods, and includes hands-on projects in index tracking and machine learning. The curriculum aims to equip students with practical skills in applying quantitative methods to portfolio management, emphasizing the subtle but crucial details necessary for successfully implementing theoretical concepts in practice.

ECTS: 3

Learning Outcome:
Students learn to apply theoretical concepts to manage efficient portfolios by working with high-dimensional datasets of stock market data and company characteristics. This includes modeling optimization problems from both economic and mathematical perspectives, drawing on portfolio/utility theory andoperations research. They learn geometric interpretations and regularization techniques from statistics and machine learning. The course features hands-on programming exercises, where students use open-source solvers and develop backtesting and simulation functionalities. Additionally, econometric and machine learning models for risk and return estimation are discussed and applied.

Module BIO 256 Precision Oncology and Functional Tumor Pathology
07SMBIO256 / Block Course

Description:

General description:
Precision oncology aims to diagnose cancers more precisely and to detect tumor-specific changes. Based on the precise characterization of tumor tissue, precision oncology seeks to provide tailored, highly efficient therapies against cancer with fewer side effects. Genomicsbased precision oncology has revolutionized oncology but also has inherent limitations. Functional precision oncology is emerging as a complementary approach that aims to bridge the gap between genotype and phenotype by modelling individual tumours ex vivo, taking into account functional tumor pathology. These patient-derived ex vivo models largely preserve several tumour characteristics that are not captured by genomics approaches and enable the functional dissection of tumour vulnerabilities in a personalized manner.

ECTS: 6

Notes:
REGISTRATION FOR THE BLOCK COURSES CAN BE MADE AT: https://www.mybioportal.uzh.ch

Learning Outcome:
In this course, the students will gain theoretical knowledge and hands-on experience of state-of-the-art methods in precision oncology as well as functional tumor profiling. The experimental section will include various patient derived cell models (3D tumor organoids) and areas of molecular biology and cell biology. The experiments will make use of a variety of techniques such as for example drug screening with cell viability assays, CRISPR/CAS9 technology, invasion assays, western blotting depending on the laboratories set up. The students will gain experience in experimental designs and data analysis as well as data interpretation and presentation.

Module Speaking Skills (C1/C2)
06SM427-024 / Module

Description:

General description:
En este curso, cuyo principal objetivo consiste en proporcionarles a los estudiantes la oportunidad de practicar el español hablado y mejorar su capacidad de expresión, mediación e interacción orales, emplearemos una metodología basada en la concepción de la lengua como instrumento de comunicación. Se utilizarán distintas dinámicas de trabajo y se realizarán gran cantidad de actividades, tales como llevar a cabo presentaciones, debatir temas de actualidad, comentar titulares de prensa, argumentar sobre asuntos controvertidos y un largo etcétera. Salvo que se indique lo contrario, se esperará un registro académico y formal en el aula. La participación en clase será esencial y deberá complementarse con un intenso trabajo previo: las intervenciones durante el aprendizaje en grupo serán mucho más productivas cuanto más hayan sido preparadas de antemano. Los estudiantes recibirán retroalimentación para mejorar su capacidad de expresión oral. Deseamos ofrecer una plataforma que permita a los participantes emplear el idioma oralmente e incrementar su caudal léxico sobre los temas que se traten.

ECTS: 3

Notes:
Ya que se trata de un módulo de ejercitación, resulta imprescindible asistir a clase regularmente para poder aprobar la asignatura. Max. Teilnehmendenzahl: 12

Learning Outcome:
El objetivo principal de este curso de lectorado consiste en brindarles a quienes ya posean un nivel C1 o C2 del MCER o a quienes estén participando en los módulos Lengua Española (C1) o (C2) la oportunidad de practicar con el idioma, de modo que potencien y mejoren su capacidad de expresión, mediación e interacción orales. A través de una gran variedad de actividades, los estudiantes se esforzarán por desarrollar la habilidad de comunicarse oralmente de manera clara, detallada, adecuada, precisa, eficaz y fluida en español. Asimismo, incrementarán el acervo léxico sobre los temas que se aborden y aumentarán su autonomía en el proceso de aprendizaje. Puesto que se trata de un módulo de ejercitación, la asistencia a clase será indispensable para aprobar la asignatura.

Languages of Instruction:
Spanisch

Merkmale:

Responsible instructor: Johannes Kabatek

Requirements:

Prerequisites: Nivel C1 o C2 del MCER o estar cursando los módulos Lengua Española (C1) o (C2). Es indispensable demostrar que se cumplen los requisitos de acceso (nivel C1 o C2 o estar cursando los módulos Lengua Española [C1] o [C2]). Para ello, disponemos de tres posibilidades: 1. En caso de haberse obtenido el DELE C1 o C2, subir una copia del diploma. 2. Si se está cursando el módulo Lengua Española (C1) o (C2), indicárselo a la docente. 3. Si no se da ninguno de los casos anteriores, entrar en contacto con la lectora con la mayor celeridad posible (mcmunoz@rom.uzh.ch).

Assessment: Portafolio

Portafolio: diversos trabajos a lo largo del semestre. La asistencia regular a clase

será esencial para aprobar el módulo, pues muchas de las actividades que contarán para la evaluación se realizarán en el aula.

Module BIO 694 Single Cell RNA course
07SMBIO694 / Lecture with Practical Exercises

Description:

General description:
Single-cell sequencing is revolutionizing our understanding of essential biological processes, including development, immunity, and pathology. Contemporary techniques empower us to delineate gene expression, cell surface proteins, TCR/BCR receptors, and chromatin accessibility profiles of thousands of cells at remarkable resolution, facilitating comprehensive characterization of diverse cell populations, such as tumors or entire organisms.
As a state-of-the-art research and training facility, jointly operated by ETH and the University of Zurich, the Functional Genomics Center Zurich (FGCZ) offers a five-day hands-on course to help participants master rapidly developing single-cell transcriptomic techniques. The practical component includes library preparation on the 10x Genomics platform using live single-cell suspensions, with the library prep following the kit manual. Sequencing will be conducted on a benchtop sequencer, and participants will receive an introduction to the analysis of the resulting data along with exercises.
The lectures will cover single-cell and spatial multiomic technologies, their applications, and data analysis principles. An entire module has been added for single-cell transcriptomics, encompassing both experimental techniques and data analysis.

ECTS: 2

Notes:
For further information please check our website: https://fgcz.ch/education.html

at FGCZ Y59

Learning Outcome:
By the end of this course, participants should be able to:

-Summarize the principles of current single cell Sequencing technologies
-Critically evaluate sequencing and analysis results
-Design an appropriate scRNA-seq workflow to apply to their own research project

Module ChatGPT and Beyond: Interdisciplinary Approaches to AI Literacy
10SMSTS-604 / Module

Description:

General description:
This course addresses the rapidly evolving field of generative AI and its applications. Students will learn the essential principles of how generative AI models function and explore the opportunities of various tools and techniques. It also encourages critical discussion of the technology's limitations-legal, technical, and ethical-alongside potential dangers such as bias and information loss. Through examples from different disciplines, students will gain a purposeful understanding of generative AI, emphasizing transparency and responsible use. The course features lecturers from various UZH departments, each providing unique insights and use cases from their fields. By the end of the course, students will have acquired the knowledge and skills to critically and effectively apply AI tools, preparing them to navigate and innovate responsibly in the complex landscape of generative AI.

ECTS: 2

Notes:
Please note: This module focuses on practical applications of AI. For a theoretical introduction to Machine Learning, book the module "Interdisciplinary Introduction to Machine Learning - Theory". The Theory module is supplemented by "Interdisciplinary Introduction to Machine Learning - Exercises" and provides students without in-depth mathematical or statistical knowledge with practical exercises (programming and non-programming) corresponding to the lectures of the Theory course. For students with in-depth prior knowledge of math and statistics, we recommend the course "Foundations of Data Science" by Dan Olteanu.

Students are required to ensure that they can login to OLAT.

Learning Outcome:
After the course, students will be able to
1. Understand the fundamental principles of how generative AI tools work.
2. Recognize the possibilities and chances offered by generative AI tools in various contexts.
3. Identify and critically assess the limitations and dangers, including legal, technical, cost, and ethical considerations, of using generative AI.
4. Successfully and responsibly apply generative AI tools in their studies.

Module Storytelling for Digital Transformation
10SMSTS-605 / Module

Description:

General description:
Communicating complex, abstract concepts is a major challenge of the digital era, yet essential for enabling meaningful participation in the digital economy, democracy, and society. Storytelling offers a powerful way to translate complex ideas into relatable, engaging narratives, helping to address the widespread lack of digital literacy. In this course, we will equip students with communication skills to enable others to make informed decisions. Drawing on examples from tech journalism, digital literacy campaigns, and science communication, we show how these fields play a crucial role in enabling the public to critically evaluate the opportunities and risks of emerging technologies such as artificial intelligence, cryptocurrencies, and social media. Using cybersecurity-often perceived as a technical and intimidating field-as a case study, students will learn how to craft their own compelling stories around a digital topic of their choice.

ECTS: 3

Learning Outcome:
(1) Understanding how complex digital facts can be conveyed by engaging stories; (2) Understanding and applying storytelling in the fields of digital transformation; (3) evaluating the benefits and limitations of storytelling for specific formats or topics, and (4) creating relatable and comprehensible narratives.

Module Teamwork on Digital Transformation Challenges II
10SMSTS-203 / Seminar

Description:

General description:
In this module, interdisciplinary questions on challenges in the field of digital transformation are addressed in various projects.
Under the guidance of a researcher from the Digital Society Initiative (DSI) network, students work in an interdisciplinary team of around 4 people, with each team member taking on defined tasks and also contributing specific digital skills.
The challenges run over two semesters, starting in the fall semester to develop a project concept, followed by this module in the spring semester to realize the projects. It is aimed at Master's students from all disciplines who either continue in the same challenge team or apply for a challenge to bring their specific skills to the team.

ECTS: 6

Notes:
This course is offered at the Digital Society Initiative (DSI), which is supported by all faculties of the UZH. With interdisciplinary activities in research, education and outreach, the DSI is the University of Zurich's (UZH) centre of excellence on digital transformation. https://www.dsi.uzh.ch/ The current challenges are described on the DSI webpage: https://t.uzh.ch/1SK

Please apply for this course by completing the following survey by Friday, February 13, 2026:

https://forms.office.com/e/Q0c8DZaeXd

The End-of-Semester Celebration including presentations together with Module: "Digital Transformation - an Artistic Reflection" takes place on Mon, May 18, 2026, 12:15-17:00.

Learning Outcome:
The students ...

- are able to work successfully in interdisciplinary groups with innovative approaches on interdisciplinary challenges in the field of digital transformation.
- understand traditional research in individual disciplines and new approaches made possible by digitalization.
- thereby also acquire a cross-disciplinary understanding of different questions, approaches and methods.
- learn to appreciate the different approaches of those involved.
- evaluate their goals, the process and the results of the projects according to ethical, legal and social principles.
- consider specific additional aspects, such as reproducibility and data protection, depending on the project.
- apply digital skills beneficially in the project.
- are able to prepare and present their project results.

Module The Crisis and the City: Challenges and Crisis Competence in Urban Zurich
10SMSTS-111 / Seminar

Description:

General description:
In diesem Seminar untersuchen wir am Beispiel der Stadt Zürich, wie Städte mit Krisen umgehen. Zuerst beleuchten wir Massnahmen und Kompetenzen, die für die Bewältigung von Krisen erforderlich sind, insbesondere die Governance von Krisen und die Stärkung der städtischen Resilienz. Anschliessend befassen wir uns mit den spezifischen Herausforderungen, die sich in Krisenzeiten für Zürich und darüber hinaus zeigen: soziale Herausforderungen wie gesellschaftliche Polarisierung oder die Unterbringung von Geflüchteten, wirtschaftliche Herausforderungen, ökologische Herausforderungen wie die nachhaltige Stadtentwicklung sowie infrastrukturelle Herausforderungen der 'Smart City Zürich', beispielhaft an der Cybersicherheit. Im letzten Seminarblock diskutieren wir die Auswirkungen von Krisen und gehen der Frage nach, wie aus Krisen neue Formen des urbanen Zusammenlebens entstehen können.

ECTS: 3

Notes:
Die Seminarblöcke werden gemeinsam von Dozierenden des CCC (Center for Crisis Competence) aus verschiedenen Fachrichtungen und Dozierenden der Stadt Zürich meist im Co-Teaching unterrichtet. Durch Exkursionen erhalten die Studierenden Einblicke in krisenrelevante Arbeitsbereiche der Stadt Zürich, etwa in die Krisen-Kommandoposten und die Betreuung von Geflüchteten. Zudem nehmen die Studierenden einmalig an einer "Agora" teil, die sich mit dem Thema der Antizipation von Krisen befasst. Die Agora ist ein transdisziplinärer Dialog zwischen leitenden Angestellten der Stadt Zürich und Professor:innen der UZH, in dem städtische Praxisfelder und wissenschaftliche Forschung zu Krisen und aktuellen Herausforderungen miteinander in Austausch treten. Gegen Ende des Semesters findet ein Austausch mit Studierenden der Universität Calgary (The Urban Lab) zum Vergleich aktueller urbaner Herausforderungen in Calgary und Zürich statt.

Learning Outcome:
Die Studierenden erwerben grundlegendes Wissen im Bereich urbaner Herausforderungen und Krisen und verstehen, wie Praxis und Forschung wirkungsvoll ineinandergreifen. Des Weiteren ermöglicht die Teilnahme an der Agora und die einmalige Anmoderation der Diskussion in einem Studierenden-Tandem, die anschliessend auf die jeweiligen Co-Referate folgt, sich aktiv in transdisziplinäre Diskussionen einzubringen.

Target Groups:
Master, Doktorat

Languages of Instruction:
Deutsch

Merkmale:

Responsible instructor: Frank Jakobus Rühli

Requirements:

Prerequisites: Interesse am inhaltlichen Seminarthema; Interesse an Transdisziplinarität und Offenheit für andere Disziplinen sowie Bereitschaft, sich aktiv am Seminar zu beteiligen.

Assessment: Der Leistungsnachweis setzt sich neben der aktiven Seminarteilnahme aus zwei Teilen zusammen:
1. Zur Halbzeit des Seminars (1. April 2026) beantworten die Studierenden 2-3 Fragen zu den bisherigen Veranstaltungen (max. 2 Seiten).

2. Der Hauptleistungsnachweis (Abgabe Ende Juni 2026) besteht aus einer ca. 10-seitigen Reflexion, die von einem interfakultären Studierenden-Tandem zu einem im Seminar behandelten urbanen Krisenthema verfasst wird.

Module Digital Transformation - an Artistic Reflection
10SMSTS-205 / Module

Description:

General description:
In this module, students are given the opportunity to reflect on the digital transformation from an artistic perspective and to produce their own artistic work using digital means.
For inspiration, students receive academic input from various DSI professors and learn to critically examine the social implications of the digital society.

Students then develop their own artistic idea in the context of digital transformation, which they can reflect on with Jonathon Keats, artist and advisor for meta-disciplinary studies at the DSI. Each student has two individual 15-minute online meetings with Jonathon Keats via Zoom.

The UZH MELS team provides advice for the production of e.g. a film.

Students meet weekly at the DSI to support each other ideationally and technically in order to successfully produce their artistic work.

Successful projects will be presented to a wider audience at the End-of-Semester Celebration (this is part of the assessment).

ECTS: 3

Notes:
As part of the assessment, students must present their artistic work during the End-of-Semester Celebration on Mon, May 18, 2026, from 12:15-17:00 (Apéro from 17:00 on).

Learning Outcome:
The students ...

- reflect on the digital transformation from an artistic point of view
- critically consider the social implications of the digital society
- practice self-reflection in the context of digital transformation and gain insights from this at the level of the individual
- produce their own artistic work using digital means (e.g. a film)

Module Interdisciplinary Introduction to Machine Learning - Theory
10SMSTS-201 / Module

Description:

General description:
This course on machine learning is designed to provide a comprehensive understanding from a multi-disciplinary perspective. Throughout the course, we will delve into the algorithms and techniques that constitute machine learning, while also considering its applications and limitations across various fields - Medicine, Law, Linguistics, Physical Sciences, and Robotics, to name a few. The aim is to equip students with the knowledge to critically assess the suitability of machine learning solutions for different types of challenges. By the end of this course, students should have a nuanced understanding of machine learning's capabilities and restrictions, informed by examples across multiple sectors.

ECTS: 3

Notes:
This interdisciplinary module is designed for students from all faculties with an interest in machine learning.

Please note: This module provides students without in-depth mathematical or statistical knowledge with a theoretical approach to machine learning. The module can be supplemented by the module "Interdisciplinary Introduction to Machine Learning - Exercises". Practical applications will be discussed in the module "ChatGPT and Beyond". For students with in-depth prior knowledge of math and statistics, we recommend the course "Foundations of Data Science" by Dan Olteanu.

Learning Outcome:
After passing the module, the students are able to: - name fundamentals about functionality and limitations of both supervised and unsupervised machine learning algorithms - list different data types and problem types, such as classification and regression, and match them to the appropriate algorithms - discuss about the vulnerability of and adversarial attacks on machine learning algorithms - give an overview about the wide variety of applications of ML across many disciplines as well as discipline-specific challenges - reflect on machine learning, the promise of artificial intelligence, and big data from a legal, ethical, as well as philosophical perspective

Module Start! Coaching Accessibility
10SMSTS-503 / Module

Description:

General description:
Menschen mit physischen, sinnesbezogenen, kognitiven oder psychischen Beeinträchtigungen sind im Alltag mit verschiedenen Barrieren konfrontiert. Auch im universitären Kontext bestehen Barrieren für Mitarbeitende und Studierende mit einer Behinderung oder chronischen Krankheit. Das Modul beschäftigt sich mit unterschiedlichen Formen von technologischen, kulturellen und organisatorischen Barrieren im Lehr- und Lernkontext (z.B. erschwerte Zugänglichkeit von Lehrveranstaltungsunterlagen) und der Frage, wie solche Barrieren verhindert bzw. reduziert werden können sowie wie barrierefreies Lehren und Lernen möglich ist. Weiter sollen die Teilnehmenden dazu befähigt werden, um zukünftig als Accessibility Coaches für Dozierende tätig zu sein. Das Modul ist als Blendend Learning-Veranstaltung konzipiert. Es besteht aus einem asynchronen E-Learning-Kurs mit Podcasts und weiteren Lernmaterialien. Daneben werden an einzelnen Terminen Kurse vor Ort und synchrone online-Kurse angeboten.

ECTS: 1

Notes:
Die Referate der Dozierenden in den vor Ort- bzw. online-Kursen werden aufgezeichnet. Die diskursiven Anteile der vor Ort- bzw. online-Kurse werden jedoch nicht aufgezeichnet. Es empfiehlt sich daher eine aktive Teilnahme an den vor Ort- bzw. online-Kursen.
Für Fragen zum Modul kann Bettina Kunz (bettina.kunz@ife.uzh.ch) kontaktiert werden.
Für Tutor:innen, die die erworbenen Kenntnisse zur Unterstützung der Dozierenden während des Kurses bzw. nach Abschluss des Kurses konkret anwenden, wird ein Beratungsangebot zur Verfügung gestellt.

Die Termine vom 9.3., 4.5. & 11.5.2026 finden als Präsenzveranstaltungen vor Ort und die Termine vom 16.3. & 13.4.2026 als online-Präsenztermine statt.

Learning Outcome:
Das Modul setzt sich zum Ziel, (angehenden) studentischen Tutor:innen ein Bewusstsein für verschiedene Dimensionen der Barrierefreiheit in der Lehre und die Bedürfnisse von Studierenden mit Behinderung bezüglich barrierearmem Lernen und Inklusion zu vermitteln. Weiter sollen (angehende) studentische Tutor:innen dazu qualifiziert werden, um als Accessibility Coaches Dozierende der Universität Zürich bei der Implementierung barrierearmer Lehrmethoden und Materialien zu unterstützen. In diesem Zusammenhang erwerben die Teilnehmenden Kenntnisse in den folgenden Bereichen:

- Kulturelle und organisationale Aspekte der Inklusion und Umsetzung des Konzepts des "Designs for all"
- Barrierefreiheit und Ziele barrierearmer Lehre
- Technologische Unterstützung und e-Accessibility
- Entwicklung bzw. Erstellung barrierefreier Lehr- und Lernmaterialien
- Vermittlung der erworbenen Kenntnisse zur barrierearmen Lehre an Dozierende, zu deren Unterstützung

Target Groups:
Bachelor, Master

Languages of Instruction:
Deutsch

Merkmale:

Responsible instructor: Franziska Felder

Sarah Ebling

Requirements:

Prerequisites: Es sind keine Vorkenntnisse notwendig. Dieses Modul ist insbesondere geeignet für (angehende) Tutor:innen. Es steht aber allen Studierenden offen, die sich für die Themen Barrierefreiheit und Inklusion interessieren. Die Unterlagen zum E-Learning-Kurs werden auch in englischer Sprache bzw. mit englischen Untertiteln zur Verfügung gestellt. Die vor-Ort- bzw. online-Kurse finden jedoch in deutscher Sprache statt. Der Leistungsnachweis kann in deutscher oder englischer Sprache verfasst werden.

Assessment: Der Leistungsnachweis besteht aus einer schriftlichen Übung zur Erstellung von barrierefreien Dokumenten sowie einer schriftlichen Reflexion des eigenen Lernprozesses, die sich auf alle Themenbereiche des Moduls bezieht. Die Details zur schriftlichen Übung und zur schriftlichen Reflexion des eigenen Lernprozesses werden zu Semesterbeginn bekannt gegeben.
Die Abgabe der schriftlichen Übung sowie der Reflexion des eigenen Lernprozesses hat bis spätestens zum 15. Juni 2026 zu erfolgen. Es müssen sowohl die schriftliche Übung als auch die schriftliche Reflexion des eigenen Lernprozesses erfolgreich erbracht werden, damit das Modul als "Bestanden" gilt.

Description:

General description:
Der neue Rahmenlehrplan für Gymnasiale Maturitätsschulen räumt den überfachlichen Unterrichtsbereichen einen hohen Stellenwert ein. In diesem Modul setzen wir uns mit folgenden transversalen Unterrichtsbereichen auseinander und suchen nach Möglichkeiten, diese in fachliche und fächerübergreifende Kontexte zu integrieren und allenfalls zu kombinieren: Digitalität, Bildung für nachhaltige Entwicklung und politische Bildung. Besonderes Gewicht wird auf folgende Themen gelegt: Zukunftskompetenzen, digitale Nachhaltigkeit, digital citizenship, informationelle Selbstbestimmung, Medienkompetenz, Wahrnehmung und Reflektion eigener Gefühle im Umgang mit digitalen Medien.

ECTS: 3

Learning Outcome:
Die Studierenden können... (a) drei transversale Unterrichtsbereiche beschreiben und kennen Möglichkeiten, diese in ihren Unterricht zu integrieren. (b) verschiedene Schlüsselbegriffe aus den drei Unterrichtsbereichen beschreiben. (c) Unterrichtspläne und -materialien entwickeln, die sich auf einen oder mehrere transversale Unterrichtsbereiche beziehen.

Module EEE 333 Conservation Science and Practice of Swiss Amphibians
07SMEEE333 / Block Course

Description:

General description:
The course gives an introduction to animal conservation in Swiitzerland. Amphibian conservation will be used as a case study. After an introduction to the diversity and ecology of Swiss amphibians, the students will learn about the science and practice of animal conservation in Switzerland. We will discuss the elements population, metapopulation and landscape ecology that matter for conservation. We will study how science can contribute to better conservation and how the success of conservation work can be assessed. We will analyse how real-world conservation is done. Excursions, field work and data analysis are an integral part of the course.

ECTS: 6

Notes:
REGISTRATION FOR BLOCKCOURSES HERE
https://www.mybioportal.uzh.ch

Students should have a keen interest in practical nature conservation and ideally be good naturalists. Because excursions and field work depend on weather conditions, great flexibility is required as we may have to shift the days when we are in the field. Field work may also include work at night. Students should be mobile but all sites can be reached by public transport.

Learning Outcome:
After successful completion of the course, the students will be able to determine the Swiss amphibian species and they will know their habitats. They know the elements of ecology that are relevant to conservation, and they are aware of the various threats to amphibians. They know examples how scientific research can contribute to better conservation. The legal bases for conservation in Switzerland are known and they know how practical conservation is done in Switzerland. They know how to collect and analyse data relevant for conservation.

Module Modern Literature: Didactics and Cultural Transfers
06SM390-501 / Module

Description:

General description:
Ce module se déroule sur deux semestres. Il se compose d'un volet (Ue), accompagné généralement par une lectrice ou un lecteur, qui consolide le savoir culturel acquis, aide à reconnaître le potentiel de transfert d'un thème littéraire spécifique (une œuvre, une époque, un genre) et développe les compétences permettant de traduire des contenus complexes en unités plus facilement accessibles à des apprenants de divers intérêts, niveaux et tranches d'âges. Le second volet (Se), dirigé normalement par un professeur, vise à élaborer un projet de transmission de la littérature comportant une analyse approfondie du sujet choisi et des propositions concrètes en vue de son transfert dans l'enseignement ou dans un autre contexte professionnel ; il assure la qualité scientifique, perfectionne les compétences pédagogiques et évalue la praticabilité didactique du dossier qui est à rendre à la fin du module.

ECTS: 9

Learning Outcome:
Les étudiantes et les étudiants seront capables de transmettre leur savoir historique, théorique et méthodologique en l'adaptant à un contexte pratique, notamment à l'enseignement gymnasial du français et à la médiation culturelle. Ils et elles maîtriseront des stratégies pédagogiques et didactiques leur permettant de communiquer à différents types d'apprenants et de publics leurs connaissances de l'histoire des idées et des œuvres littéraires, des modèles et des instruments d'analyse de texte. Sur la base de solides compétences acquises, ils élaboreront des projets concrets réalisables dans les classes du gymnase ou dans des institutions publiques qui sont au service du transfert culturel.

Module Security and Police Law
02SM90WM64 / Course

Description:

General description:
Zu den Kernaufgaben des Staates gehört die Aufrechterhaltung bzw.
Wiederherstellung der öffentlichen Sicherheit und Ordnung. Erst durch eine wirkungsvolle Abwehr von Gefahren und die Gewährleistung der inneren und äusseren Sicherheit wird eine freiheitlich demokratische Grundordnung überhaupt ermöglicht. Die Suche nach der richtigen Balance zwischen Sicherheit und Freiheit stellt für den Rechtsstaat, die Behörden und die Gesellschaft eine permanente Herausforderung dar.
Der Kurs «Sicherheits- und Polizeirecht» nähert sich der Thematik primär aus einer verwaltungsrechtlichen Perspektive an. Bezüge gibt es aber auch zum Staatsrecht (Föderalismus, Kompetenzaufteilung, Grundrechte) und zum Verfahrensrecht (Rechtsschutz, Aufsichtsrecht).
Hierzu wird in einem ersten, allgemeinen Block Grundlagearbeit geleistet, indem der Polizeibegriff sowie das Sicherheits- und Polizeirechtsverständnis besprochen werden. Diese Themen werden im zweiten Block anhand ausgewählter Polizeiaufgaben vertieft. In einem abschliessenden Block werden die Aufgaben und Rechtsgrundlagen ausgewählter Sicherheitsbehörden des Bundes besprochen. Den Praxisbezug wird durch externe Gastreferierende sichergestellt. Begleitend zur Vorlesung werden ein Reader und eine Gesetzessammlung abgegeben.

ECTS: 6

Module Method and methodology in human science research
06SM226-531 / Module

Description:

General description:
Das Modul beschäftigt sich mit der Frage, wie Theorien und Methoden den Blick auf den Untersuchungsgegenstand mitbestimmen. Während die Kultur- und Geisteswissenschaften seit der Mitte des 19. Jahrhunderts mit unterschiedlichen methodischen Zugängen versucht haben, den "Wahrheitsanspruch" der naturwissenschaftlichen Forschung zu erreichen, hat sich im 20. Jahrhundert die Überzeugung durchgesetzt, dass weder natur- noch geistes- oder kulturwissenschaftliche Forschung absolut objektiv oder "richtig" sein kann. Forschungsresultate können immer nur vorläufig und unter bestimmten Bedingungen zutreffend sein. Sind sie damit aber beliebig? Vor diesem Hintergrund beschäftigt sich das Modul mit unterschiedlichen Positionen, die der Frage nachgehen, wie wissenschaftliches Wissen auch nach dem Zeitalter der Objektivität generiert werden kann. Das Modul wird ab FS 2026 alle drei Semester angeboten (FS 2026, HS 2027, FS 2029, HS 2030).

Module Law and Anthropology: Introduction
02SM120WM20 / Course

Description:

General description:
This course invites students to engage with a broad, legally pluralist understanding of law—one that extends beyond written legal texts to consider the roles of diverse social and legal actors in shaping the law. After exploring foundational questions—What is anthropology? What is law?—the course proceeds to address key themes such as kinship, litigation, human rights, and legal education, engaging with seminal works that have influenced the intellectual development of the field.

Students will gain hands-on experience with anthropological methods for studying law and legal practice through a mini-fieldwork project, which involves observing court proceedings or law classes. Subject to the schedule of the European Court of Human Rights, there will also be an optional field trip to Strasbourg to attend and observe a hearing. Some sessions will feature guest anthropologists—conducting research mostly in Global South contexts—who will share their empirical insights related to the course themes.

ECTS: 3

Learning Outcome:
Students with a legal background will experiment with new, empirically-grounded approaches to studying law, gaining an appreciation for its multifaceted and fuzzy nature. They will also learn to ‘decenter’ law, viewing it as one of many normative systems that guide and shape human experience. Students with an anthropological background will gain familiarity with how the law as an institution functions from an internal perspective, exploring its formal procedures, logics and modes of reasoning.

Module PHY 474 Advanced Topics in Medical Imaging
07SMPHY474 / Lecture with Practical Exercises

Description:

General description:
The domain of Medical Imaging is in rapid development and new technologies and methods are continuously being introduced in the clinical routine. In this course we will analyze the mathematical and physical foundations of some advanced diagnostic imaging techniques, some of which have just recently crossed the boundary between research and clinical use or are about to do so. The relevance of each technique in the diagnostic process will also be discussed.
Three lessons will take place at USZ in the form of hands-on sessions (one each for X-rays/CT, Ultrasound, Magnetic resonance).

Module EEE 363 Field Class: Biodiversity of Insects
07SMEEE363 / Kurs

Description:

General description:
This course is planned to take place every summer, with changing destinations around Europe. Destination of 2026: Biological Station of Verlika, Ježević, Croatia from 14 to 22 July 2026.

We will travel to the course destination with stopovers and conduct the following activities there in collaboration with local collaborators:

- Collect and preserve insects and other invertebrates using various methods.
- Identify and curate the collected specimens.
- Excursions on wildlife and forestry management and nature conservation.

Participants will work in groups of two. Each group focuses on an insect order and will present the identification results of this order. Each group will also be responsible for an insect trap or plot. Every individual student will deliver a protocol of all activities of the course.

Further details will be communicated to registered participants via e-mail and in an advance meeting via Zoom: Tuesday 28 April 2026, 12:15 h.

Follow-up meeting (mandatory) to process the collected material: Tuesday 28 July 2026, 13-17 h.

Suitable for students interested in careers in conservation management (e.g., Ökobüro, Behörde, Red List assessments), biodiversity assessments and management by NGOs worldwide, academia (recommended for all fields working with non-model species).

ECTS: 3

Notes:
Travelling will be conducted using UZH vehicles. A financial contribution from participants will be required, probably - if the course is fully booked - around 350 CHF (covering travels and housing but not food).

Protocol due 28 July 2026

Learning Outcome:
After successfully completing the module, students should be able to:

- Collect, preserve, and identify insects and other vertebrates with routine.
- Estimate the importance of certain species and habitats from a biodiversity, landscape, and conservation point of view.
- Compare the biodiversity of regions around Europe.

Module Optimization Methods in Finance (L)
03SM22MO0249 / Course

Description:

General description:
Optimization is a branch of applied mathematics that derives its importance both from the wide variety of its applications and from the availability of efficient algorithms.
In the last fifty years, optimization became the cornerstone of computational finance. Modern financial institutions must process terabytes of market data and execute complex decisions within microseconds, making efficient optimization methods not just desirable but essential.
In this course we introduce the main classes of optimization problems (linear, quadratic, convex, integer, stochastic, and robust) and the algorithms to efficiently compute optima in each case. We ground the theory into practice by discussing, for each optimization class, one or more applications to problems from computational finance, including cash management, portfolio optimization, arbitrage detection, or the construction of index funds.

ECTS: 3

Learning Outcome:
On completion of this course, the student will be able to:

- Formulate and solve practical problems arising in finance using modern optimization methods.
- Demonstrate familiarity with selected deterministic and stochastic formulations, their purpose, strengths and weaknesses.

Module Joint Journal Club (University of Zurich, Karolinska Institutet)
04SM24CR_507 / Module

Description:

General description:
For Doctoral students, it is fundamental to improve their reading skills and gain practice in critiquing and appraising research. One common method to enhance skills in interpreting research results and evaluating research designs is participating in journal clubs. Virtual journal clubs can be a safe space where Doctoral students can also improve their presentation and communication skills and expand their professional network. The club may serve to connect researchers and students, which is particularly beneficial for those practitioners who have few local peers. Connecting with peers globally via online journal clubs is a natural in today's world of medical and health care education, which will accelerate knowledge transfer and become an increasingly important tool in continuing medical education and research.

Methodology:
A group of Doctoral students will meet virtually via Zoom to discuss articles from the health and rehabilitation science literature, their study designs and choice of methods (quantitative / qualitative / mixed-methods), and their interpretation of results under the guidance of senior researchers (activity leaders). The virtual format provides a safe learning environment and allows Doctoral students to engage with each other locally as well as abroad. One predefined article will be discussed per meeting, which all participants are required to read and study in detail beforehand.
To inspire the exchange, one of the participating Doctoral students (or a group depending on the number of participants) will be assigned to present their view of the article at the beginning of each meeting using prepared slides (approx. 12 minutes). A maximum of two slides may be dedicated to summarizing the article (background, methods, results, conclusions made by the authors), while the main focus (minimum of three slides) must lie on the students' own thought process on the "discussion points" listed below pertaining to the article's method, validity, interpretation and limitations. Factual criticism is encouraged. The activity leaders will then add further methodological discussion points, followed by in-depth breakout group discussions during which every participant is required to share their thought process. Each meeting concludes with a plenary discussion in which members of each breakout group convey the most important insights from their breakout group discussion.

ECTS: 0

Notes:
The course extends over two semesters, with three sessions in the fall semester and three sessions in the spring semester.

Learning Outcome:
To promote the development of critical appraisal skills among Doctoral students and the ability to articulate these accurately, covering

- Geographically different research practices and topics.
- Quantitative / qualitative / mixed-methods empirical study designs.
- Useful insights for own research activities and competencies as a scholar.

Target Groups:
Doctoral students Care & Rehabilitation Sciences

Languages of Instruction:

Requirements:

Assessment: Successful participation in the Journal Club is graded pass/fail based on the individual presentation and active contribution to the discussion in each session. Virtual participation is mandatory, although one justified absence is permitted.

Module STA 406 Likelihood & Regression II
07SMSTA406 / Lecture with Practical Exercises

Description:

General description:
Concepts developed in Part I are applied to the analysis of censored outcomes. Interval-, left-, and right-censoring as well as the concept of truncation are introduced and corresponding formulations of the likelihood discussed. Transformation models, such as proportional hazards or proportional odds models, for the analysis of right-censored observations are recapitulated from Part I. Time-varying effect models, frailty models, cure models, and competing risk approaches complete the treatment of models for censored outcomes.

Module EEE 225 Biodiversity-Excursions into Aquatic and Terrestrial Systems
07SMEEE225 / Field Trip

Description:

General description:
Exkursion 1: Kleingewässer im Wald, Landwirtschaftsland und Siedlungsgebiet (Mittwoch 22. April 2026; Exkursionsleitung Dr. Roman Alther); Treffpunkt: Bahnhof Stettbach (individuelle Anreise, Rückreise ab Bahnhof Wallisellen), 09:15–16:30
Diese Exkursion am Nordrand der Stadt Zürich führt durch ein Siedlungs- und Gewerbegebiet, das im letzten Jahrhundert stark urbanisiert und verdichtet wurde. Der Streifzug durch dieses Agglomerationsgebiet beginnt im Wald, wo Sie ein typisches Kleingewässer des Schweizer Mittellandes kennenlernen. Im urban geprägten Gebiet lernen Sie die Nutzungskonflikte an der Schnittstelle zwischen Wasser und Land sowie verschiedene Elemente der blau-grünen Infrastruktur kennen.

Exkurison 2: Seeufer und Verlandungszonen im Mittelland (Mittwoch 13. Mai 2026; Exkursionsleitung Prof. Dr. Florian Altermatt); Treffpunkt: Bahnhof Aathal (individuelle Anreise, Rückreise ab Bahnhof Pfäffikon ZH), 09:15–16:30.
Diese Exkursion führt um den Pfäffikersee im Zürcher Oberland. Die Landschaft ist durch die Verlandung eines nacheiszeitlichen Sees entstanden. Sie ist ein Hotspot der Biodiversität und eine der artenreichsten Seeufer- und Moorlandschaften des Mittellandes, mit einer spezialisierten Fauna und Flora. Auf der Exkursion begehen Sie die typischen Lebensräume von verlandenden Seen im Schweizer Mittelland, wie Schilfröhricht, Flach- und Hochmoore, Feuchtwiesen und Bruchwälder.

ECTS: 1

Learning Outcome:
- Sie kennen die Funktionsweise wichtiger aquatischer und terrestrischer Lebensräume, deren Verknüpfung und Biodiversität.
- Sie verstehen den Einfluss der Landnutzung auf Lebensräume und Gewässerqualität.
- Sie können verschiedene Organismen (Pflanzen, Gewässerinsekten), die für die besuchten Lebensräume typisch sind, ansprechen.

Course Materials:	Altermatt F, Güsewell S & Holderegger R. 2024. Biodiversität zwischen Wasser und Land: Exkursionen zu Gewässern, Mooren und Auen der Schweiz. Haupt Verlag, Bern. (Einleitung sowie Kapitel 3, 4 und 5; das Buch kann vorgängig zum Vorzugspreis von 25 CHF bezogen werden).
Merkmale:	
Responsible instructor:	Florian Altermatt

Requirements:

Prerequisites:	- EEE104 vorgängig erfolgreich abgeschlossen. - Die Exkursionen finden zu Fuss statt (4–8 km Wanderung). Mitnehmen: Witterungsfeste Kleidung (Sonnen- resp. Regenschutz), Verpflegung, Schreibmaterial, (Feldnotizbuch, inkl. Scotch-Tape um Pflanzen einzukleben), Feldstecher, Handlupe, Bestimmungsbücher für Pflanzen (z.B. Flora Helvetica).
Assessment:	Aktive Teilnahme an beiden Exkursionen (D). Für den erfolgreichen Abschluss des Moduls müssen beide Exkursionen absolviert werden.

Module BIO 403 Superbugs - The Global Crisis of Antimicrobial Resistance in Humans, Animals, and the Environment
07SMBIO403 / Lecture with Practical Exercises

Description:

General description:
This class aims to spotlight the rise of superbugs—bacteria resistant to antibiotics—that are a growing threat to human health, animal health, and the environment. We will explore the medical, ecological, and economic drivers behind the rise of superbugs and present potential solutions to reduce the impact of AMR worldwide. The course takes a multidisciplinary (“One Health”) approach to this emerging health threat and will present medical case studies, as well as large-scale ecological, epidemiological, and policy analyses on AMR, with a strong focus on the animal-human interface. If you want to learn about a silent pandemic that makes more victims than HIV and malaria combined, this course is for you.

ECTS: 3

Learning Outcome:
At the end of the module you should be able to
-    understand the historical and contemporary context of infectious diseases and antibiotics in animals and humans.
-    analyze global epidemiological and sector-specific trends in Antimicrobial Resistance (AMR).
-    critically evaluate policies and economic models addressing AMR.
-    propose and communicate solutions for reducing AMR.

Module Software Systems Reliability Lab (MSc)
03SM22MI0044 / Praktikum

Description:

General description:
Software systems have become deeply embedded in nearly every aspect of modern life, from healthcare and finance to transportation and communication. Their reliability is critical, as failures can result in significant financial losses, safety risks, and diminished trust. However, as these systems grow increasingly complex, ensuring their reliability becomes a greater challenge. Managing and understanding this complexity is a vital skill for today's software engineers.
This laboratory bridges theory and practice by combining hands-on projects with an exploration of industry-leading principles and practices. Participants will gain insights into both the technical aspects and operational strategies essential for maintaining and enhancing software reliability in real-world scenarios.

ECTS: 3

Notes:
The laboratory course is limited to 24 participants. Students interested in joining must email the course instructor and include the following:
1. A letter of motivation (maximum 300 words).
2. A list of completed courses along with their grades.
3. Either a CV or a link to an active GitHub account (the GitHub account is preferred if available).

The instructor will review the submissions and select students based on the provided information. Invitations to participate in the course will be sent to those selected.
Co-lecturer: Luca Bigliardi (Google)

Learning Outcome:
Defining and understanding the key concepts of software reliability.

- Understanding patterns and operational principles that enhance system reliability.
- Knowing techniques to ensure high availability.
- Developing skills in setting up effective monitoring systems to detect and diagnose issues.
- Applying theoretical software reliability knowledge to practical problems.

Target Groups:
Master students

Languages of Instruction:
English

Responsible instructor:	Alberto Bacchelli

Requirements:

Prerequisites:	Software Construction
Prior Knowledge:	In addition to python and web development skills, knowledge of Unix administration and Shell scripting may be advantageous
Assessment:	The grade will be based on three components: - Assignments handed out during the semester (50%) - final report and submitted artifacts (25%) - an oral presentation of the work in the plenum, with knowledge questions from the instructor (25%) To pass the course, all components must receive a "pass" grade (i.e., 4 or higher). In case either grade is lower than 4.0, the final grade for the course is the highest grade below the passing grade.

Module Commodities Trading and Finance (S)
03SM22BO0137 / Seminar

Description:

General description:
The course studies commodities trading and finance. The course has a Corporate Finance rather than an Investment Management or a Business Strategy focus: we shall for example consider the decision to hedge gold production (Barrick Gold) rather than the contribution an investment in gold can make to the performance of a portfolio or trace the supply chain for gold. The course mainly uses case studies to introduce important concepts and illustrate important issues in commodities trading and finance. The course considers commodities in the wide sense; for example, we consider a startup's decision whether to proceed with the development of a growth hormone for farmed salmon to illustrate the concept and use of real options (Aqua Bounty). In addition to these two cases, we consider risk management and financing by a commodities trading firm (Noble), betting on the winter-summer spread in the natural gas market (Amaranth), and new vessel ordering by a shipping company (Ocean Carriers). We shall also study two academic papers, to examine the effects of storage and convenience yield on the dynamics of spot and forward commodities prices, and one report on illicit financial flows.

ECTS: 3

Notes:
Group work.
Compulsory attendance.

Learning Outcome:
The students should acquire an understanding of the commodities industry that prepares them for employment with one of the many commodities trading firms present in Switzerland (or elsewhere).

Target Groups:
Bachelor Students

Languages of Instruction:
English

Course Materials:	There is no specific textbook for the present course. There are lecture notes to be downloaded from and cases to be purchased through OLAT. Please make sure to do so, and to bring them to class on the relevant days.
Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Michel Habib

Requirements:

Prior Knowledge:	Corporate Finance.
Assessment:	Assessment is based on four case write-ups. I have assigned the first three cases; you will choose the fourth. Work is to be done in groups; groups of four to five persons are preferred. Each of the first three cases accounts for 15% of the course grade. The fourth case accounts for 55% of the grade. The write-up of each of the first three cases need be no longer than 10 pages; it should not exceed 15 pages. The write-up of the fourth case need be no longer than 25 pages; it should not exceed 30 pages.

Description:

General description:
The course provides an overview of advanced programming techniques that can be found in modern programming languages. It covers a selection of topics with examples in different programming languages.
Modern type systems,
e.g., ownership types in Rust, Java/Scala generics in depth, typeclasses, dependent types. Languages for AI and prompting. Functional programming, immutability, purity,
e.g., Haskell, Java streams, functional Python. Managed environments,
e.g., WebAssembly. Concurrency, Akka's Actor model, Kotlin and Go corutines and async/await). The course gives particular emphasis on techniques to ensure program efficiency and correctness.

ECTS: 3

Notes:
This course is designed to complement the course Understanding Programming Languages. While each course can be taken individually, together they offer a comprehensive learning experience, integrating theoretical foundations with practical applications.

Learning Outcome:
Students will learn the mechanisms offered by different programming languages to increase developers productivity and software quality. They will be able to choose the right programming language for a software project. They will be able to understand the implications of different language designs. They will be able to concretely apply such techniques to develop practical projects.

Module Understanding Programming Languages (L)
03SM22MI0047 / Course

Description:

General description:
By building a programming language step-by-step, the course provides an overview of the fundamental concepts in programming, includ-ing various types of functions (high-order, first-class), lexical/dynamic scoping, binding, state and mutability, objects, continuations, lazy evaluation, dynamic and static type systems.
Starting from a minimal interpreter for arithmetic expressions, the students develop interpreters of increasing complexity that support languages with more sophisticated abstractions.

ECTS: 3

Notes:
This course is designed to complement the course Advanced Programming.
While each course can be taken individually, together they offer a comprehensive learning experience, integrating theoretical foundations with practi-cal applications.
Students who already took "Foundations of Programming Languages and Program Analysis" (MI0024) are not allowed to take this course.

Learning Outcome:
Students will learn the foundations of the ab-stractions used in the design of programming languages (e.g., scope, functions, state, types) and how they interact. They will be able to implement interpreters for languages of grow-ing complexity that support the abstractions above.

Module Shaping Global Futures: Practices, Policies and Public Engagements
06SM722-502 / Module

Description:

General description:
This course focuses on the ways in which policies, projects and intervention practices in the fields of development, sustainability and social justice make and shape global futures. Students reflect critically about these policies, practices and interventions. They learn how policies have emerged within certain historical, political, and geographical settings and reflect the perspectives of global key actors and institutions. They analyze how the design, planning and implementation of policies and projects is contested and negotiated between different actors, institutions, and states. Students explore these questions through analysis of selected policies and their current applications

ECTS: 6

Learning Outcome:
Students
1. reflect critically about policies, practices and engagements that seek to make and shape global futures,
2. contextualize policies in their historical, political and geographical settings,
3. dissect power relations that shape design, planning and implementation of policies and projects,
4. critically analyze selected contemporary policies and their applications.
5. produce policy briefs on selected themes of contemporary policy debates.

Module SDS 210 Programming with Spatial Data (Grundlagen zur Arbeit mit digitalen räumlichen Daten II)
07SMSDS210 / Lecture with Practical Exercises

Description:

General description:
The modules SDS 210, GEO 876 and ESS 341 have been combined.

- MSc GEO students should register for the module GEO 876.
- BSc ESS students should register for ESS 341.
- Students in the SDS minor should register for SDS 210.

This course focuses on computational thinking and Python programming for geospatial applications. In an increasingly data-driven and automated world, the ability to design, write and organise code for spatial analysis is an essential skill for addressing environmental, social and urban challenges. Through a hands-on and problem-based learning approach, this course introduces the tools and techniques needed to programmatically understand, analyse, and visualise spatial data. You will develop a strong foundation in Python programming, progressively applying it with key geospatial libraries such as GeoPandas, RasterIO and Matplotlib. The course emphasises writing modular, well-documented and reproducible code, supported by Jupyter Notebooks and Git to enable transparent and collaborative workflows. The course concludes with an individual programming project in which you will design and implement your own solution to a spatial data problem. Upon completion of SDS210, you will be well-prepared to take on more advanced spatial data science challenges in research and industry.

ECTS: 5

Notes:
Bring your own laptop to practical exercises (labs). Book this module before the semester starts to ensure access to the computer lab infrastructure.

Learning Outcome:
In this course you can acquire foundational programming skills and practical expertise in spatial data analysis. On completion of this course, you will be able to:

- Apply core Python programming concepts, including variables, loops, functions, and data structures.
- Develop a conceptual outline and workflow before implementing a coding solution.
- Write well-documented, modular, and reproducible Python code following best practices.
- Design and implement object-oriented programming solutions that can read, store, manipulate, visualize, and export spatial data.

Description:

General description:
This is the second part of the Interdisciplinary Reading Seminar (start in Fall Semester 2025) in the first year of the Excellence Program. The course focuses on meaningful communication between different disciplines, fostering interdisciplinary thinking and exchange. In all sessions, each student will present his/her selected paper and will comment on a paper presented by a student from another discipline. The presentation and the comments will launch the interdisciplinary discussion integrating the view of all students participating in the course.

ECTS: 2

Notes:
(Limited to) PhD candidates participating in the DSI Excellence Program. No auditors.

Learning Outcome:
Participants can effectively explain key research ideas, themes, and methods of their own discipline to people with varied disciplinary backgrounds. The paper discussions shall foster deeper understanding of state-of-the-art research themes, approaches, and methods, from a varied set of disciplines, and provide interdisciplinary views on the discussed topics. Participants will be able to more easily switch perspectives between disciplines to foster greater understanding of the discussed issues.

Target Groups:
DSI Excellence Program participants only.

Course Materials:	The participants will identify and provide selected papers, that are understandable for other disciplines, to course participants.

Learning Outcome:
Der SurgeAHEAD-Kurs, der am neuen OR-X des Balgrist stattfindet, ist eine umfassende Lernerfahrung, verteilt auf vier Tage in sieben Blöcken zu je vier Stunden, für 24 Studierende.
Jeder Kursblock wird von einer anderen Institution organisiert – verschiedenen Kliniken universitärer Lehrspitäler sowie dem Careum. Diese Institutionen stellen die Tutoren bereit und legen das Thema des jeweiligen Blocks fest.
Der Kurs legt seinen Schwerpunkt auf die praktische Anwendung: Über 75% der Kurszeit sind für praktische Übungen vorgesehen, während bis zu 25% der Zeit der theoretischen Wissensvermittlung gewidmet sind.
Die Studierenden lernen und üben Grundlagen zum Verhalten im OP-Saal (aseptische Techniken, steriles Arbeiten, Lagerung und Abdeckung von Patienten), Naht- und Knüpftechniken, die Kameraführung in der minimalinvasiven Chirurgie sowie die Durchführung einfacher Eingriffe, die sie später als Unterassistenten entweder unter Supervision selbst ausführen oder bei denen sie assistieren können. Diese praktischen Erfahrungen bereiten die Studierenden auf ihre zukünftigen Aufgaben in der chirurgischen Unterassistenz vor.
Das Hauptziel des Kurses ist es, besonders motivierte und an der Chirurgie interessierte Studierende frühzeitig mit praktischen Fertigkeiten in grundlegenden chirurgischen Techniken auszustatten und sie für verschiedene chirurgische Fachrichtungen zu begeistern.
Eine formale Prüfung ist für diesen Kurs nicht vorgesehen. Stattdessen müssen die Teilnehmenden eine Kursevaluation ausfüllen, um ihren Lernerfolg selbst zu bewerten und zur kontinuierlichen Verbesserung des Kurses beizutragen.

Module Einführung in die Ethik für Wirtschaftswissenschaftler/innen (S) (Ethics for Economists)
03SM22BO0139 / Seminar

Description:

General description:
Unternehmerisches Handeln steht zunehmend im Rampenlicht des öffentlichen Interesses. Dabei geht es bei weitem nicht mehr ausschließlich um Fragen ökonomischen Leistungsfähigkeit oder der betrieblichen Mitbestimmung. Zunehmend häufiger rückt die Frage der moralischen Integrität von Unternehmen in den Vordergrund bei der Beurteilung unternehmerischer Aktivitäten. Die Aufmerksamkeit der kritischen Öffentlichkeit gilt dabei ökologischen und sozialen Problemen der Unternehmen ebenso, wie Fragen fairer Produktions-und Geschäftsbedingungen. Im Hinblick auf ein adäquates Verständnis von ethischen Problemen im Kontext der Wirtschaft ist es daher nötig, entsprechende theoretische Kompetenzen auszubilden. Diese Kompetenzen sind zudem von Vorteil für diejenigen, die im gesellschaftlich-politischen Diskurs über Wirtschaft, Unternehmen und Manager sachkundig argumentieren wollen.

ECTS: 3

Notes:
Zu dem Seminar werden maximal 24 Studierende zugelassen. Um sich zu bewerben, senden Sie bitte eine E-Mail an david.sieber@business.uzh.ch mit Lebenslauf und Leistungsausweis bis spätestens 30. Januar 2026. Teilnehmende erhalten eine Zusage bzw. Absage bis zum 6. Februar 2026.
Dieses Modul wird als Präsenz- und Blockveranstaltung durchgeführt.
Studierende, welche die Vorgänger-Vorlesung unter dem selben Titel bereits besucht haben, werden nicht zugelassen.
Mehr Informationen finden Sie hier:
https://www.business.uzh.ch/de/research/professorships/as/teaching/overview.html

Learning Outcome:
Die Besucher/innen des Seminars sollen imstande sein, ethische (im Unterschied zu rechtlichen oder ökonomischen) Fragen zu identifizieren.
Sie sollen die relevanten ethischen Theorien und ihre Bedeutung für die Wirtschaft und ihre Akteure sowie ethische Grundkonzepte der aktuellen Debatten kennenlernen.

Module EEE 600 Evolutionary Genomics Journal Club
07SMEEE600 / Seminar

Description:

General description:
The Journal Club is dedicated to cutting-edge journal articles in evolutionary genomics, including the subfields of population genetics, speciation and domestication genetics, phylogenetics, quantitative genetics, and the extension of these fields to the genomics era. We encourage a mix of theoretical, methodological, and empirical papers across all taxonomic groups. At the start of a session, one participant presents a summary of the paper and suggests points for discussion. Then all participants discuss the paper. Students are given priority as presenters and during the discussion. PhD students may earn 1 ECTS per semester by presenting one paper and by active participation.

ECTS: 1

Notes:
The seminar will be held in Y13-J-51 and via zoom

Learning Outcome:
Participants will

1) Keep up with cutting-edge literature in evolutionary genomics as a source of innovation and inspiration for our own research

2) Learn and practice how to summarise scientific content effectively:

- Understand and report a narrative
- Identify and reflect the objectives of a study
- Sketch the idea underlying an approach or method
- Identify and reflect the main results and conclusions of a study

 3) Learn and practice how to assess the science done by peers:

- Put a piece of scientific work into context
- Identify key innovations contributed to the field
- Critically assess the quality and quantity of data, methods, and scientific writing
- Identify the significance and implications of a piece of scientific work

Module EEE 220 Practical Population Ecology: Studying Snow Voles in the Alps
07SMEEE220 / Field Trip

Description:

General description:
This is a hands-on field experience with an Alpine snow vole population study through an overnight field trip to Churwalden. Students will learn capture-mark-recapture techniques, write reports on field methodology, and have the option to analyze long-term data for personal projects. Transportation and accommodation will be arranged and costs covered by the course. Field trips will take place in June-July and in October-November.

ECTS: 1

Notes:
4 days in June or 4 days in October. Registration by email to arpat.ozgul@uzh.ch. There is no deadline for registration.
4 places.

Learning Outcome:
Master Fieldwork Techniques: Learn and apply the capture-mark-recapture method for population studies in the field, enhancing practical skills in ecological research.

Interpret Real-World Data: Develop abilities to gather, interpret, and analyze real-world ecological data, focusing on snow vole populations in the Alpine region.

Apply Theoretical Knowledge: Apply theories learned in the classroom to understand and solve real-world ecological challenges in fieldwork situations.

Conduct Independent Research: Have the possibility to carry out independent research projects as a research intern, utilizing long-term data sets for in-depth analysis

Adaptability in Field Conditions: Learn to effectively adapt to varying field conditions between early and late summer, thereby enhancing overall fieldwork skills.

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Arpat Ozgul

Requirements:

Prerequisites:	at least EEE 104 must be successfully completed
Assessment:	Students will be required to write a report detailing the field methodology used during the field trips. This will involve a description of the capture-mark-recapture design, the reasons for its selection, and how it was executed in the field. Part of the report should reflect upon the potential issues faced during the execution of the methodology and suggest improvements for future fieldwork. This will develop students' problem-solving skills and their ability to enhance fieldwork techniques. Students will also identify and discuss interesting research questions that could be addressed using the data collected. They should also propose the methodology that could be used to explore these questions. This will encourage students to think analytically and design potential future research studies. In English.

Module DSA 105 Automation and Chemical Data Science in Practice
07SMDSA105 / Praktikum

Description:

General description:
Lab automation and data science are powerful tools in the modern-day life sciences. This course will serve as capstone for the minor program "Lab Automation and Chemical Data Science". In a two-semester student project all the content of the program lectures and exercises will be utilized: Selected data sets will be processed and analysed, ML models will be applied and experiments will be performed using lab automation tools to complement the data collection or validate predictions and classifications.

While the preparation of the data sets will be performed as home assignment, the practical work will be done in small groups upon arrangement. The research infrastructure of the Department of Chemistry, such as the HTEL, will be made available for the experimental part of the project.

The module is supposed to be done in parallel with or after the courses DSA 103 and DSA 104 and can be started in either the fall or spring semester.

Module BIO 698 Mass Spectrometry-based Proteomics Training Course at FGCZ
07SMBIO698 / Lecture with Practical Exercises

Description:

General description:
Proteomics aims to investigate the entire content of proteins present in cells, tissues, body fluids, whole organisms, or in any type of biological sample. Mass spectrometry-based proteomics is currently the most comprehensive approach for quantitative profiling of proteins, their interactions and spatial localizations, and for the identification of protein modifications.

The objective of this course is to introduce the field of proteomics, focusing on fundamental concepts in sample preparation, peptide and protein identification, and quantification. These concepts are reinforced through the practical training using state-of-the-art mass spectrometers and open-source software for data analysis.

The course is designed to provide the participants with the knowledge necessary to access the resources and infrastructure of the proteomics unit at the Functional Genomics Center Zurich.

ECTS: 2

Notes:
for further information please check our webiste https://fgcz.ch/education/proteomics-courses/msproteomics-course.html

Learning Outcome:
By the end of this course, participants will be able to

- Summarize the principles of current high-resolution mass spectrometry (MS) technologies
- Understand basics proteomics sample preparation workflows
- Conduct basics hands-on operations on the LC-MS systems and run quality control procedures
- Perform basic data analysis for the evaluation of the MS results (with a focus on identification and quantification)
- know what to expect - understand the opportunities and limits of a proteomics experiment
- formulate a well designed proteomics experiment for a meaningful research question
- know about the FGCZ proteomics infrastructure and how to use it

Module Capstone: Proposal Enhancing Legislative Transparency
06SM615n535 / Module

Description:

General description:
DemoSquare is a Swiss-based AI-driven platform designed to track and monitor political developments in Swiss and European politics. As businesses and citizens become increasingly overwhelmed by legislative information, DemoSquareleverages cutting-edge artificial intelligence to filter out the noise and highlight what truly matters, providing clear, efficient, and insightful analyses of parliamentary activities.
Founded two years ago, DemoSquare is a research spin-off from two post doc in Machine learning from EPFL (Victor Kristof and Jeremie Rappaz). As a fast-growing startup, it offers students the opportunity to engage with real-world AI applications in politics while working alongside a team at the forefront of legislative analysis and transparency.

ECTS: 12

Notes:
Please apply via the module booking system and also upload your application documents (CV, as well as any material that could demonstrate relevant skills for the project, such as writing samples, marketing content, proof of interest in politics, or code you have produced).

Learning Outcome:
Project Goal How can we make Swiss and European politics more transparent? Most citizens have little insight into how their representatives vote, and despite the growing digitalization of politics, there is still a lack of accessible reporting and analysis on voting patterns in Western democracies. This capstone, in collaboration with DemoSquare, will explore new ways to make legislative information clearer and more available to the public. Through pre- and post-session analyses, data visualizations, and public reports, students will help close this transparency gap.
Learning Objectives By the end of this capstone, students will be able to:

- Gain experience working in a startup environment.
- Learn how to extract key insights from legislative data.
- Develop an understanding of Swiss and European politics.
- Create informational content based on parliamentary activities.
- Understand how to effectively communicate political information online.

Languages of Instruction:
Deutsch/Englisch - siehe Sprache der Lehrveranstaltung(en)

Merkmale:	Target Group: Suitable for English Speakers
Responsible instructor:	Simon Bornschier

Requirements:

Prerequisites:	Students participating in this capstone should meet the following criteria - Strong interest in Swiss and/or European politics, public affairs, and political transparency. - Python skills for data analysis (a strong plus). - Familiarity with Figma or similar marketing/design tools (a plus). - A good understanding of political institutions and decision-making processes. - Experience or interest in political analysis and communication strategies.

- Willingness to learn, take initiative, and collaborate on interdisciplinary projects.
Whether you are a political geek looking to deepen your understanding, a Python crack eager to work with real-world data, or a marketing genius seeking practical applications, you are welcome in this Capstone. As you will be working in teams, your skills can be complementary.
Please do not hesitate to apply, even if you are unsure whether you meet all the above criteria.

Assessment:	Portfolio Bitte beachten: Alle Elemente des Portfolios müssen absolviert werden. Wird ein Element nicht absolviert, gilt das gesamte Portfolio als nichtabsolviert und das Modul damit als nicht bestanden. Please note: All elements of the portfolio must be completed. If an element is not completed, the entire portfolio is deemed not to have been completed and the module thus failed. --- In terms of investment, participation will be steady over the two semesters as we follow the parliamentary calendar. The idea is that, in the first sessions, the instructor will show you how to proceed, and gradually, students will gain independence and shape the outputs based on their interests. To be more concrete, at the end of each session, students will receive a CSV file with the votes. Their task will be to extract the key information from thesession. An existing Python script is already available; the goal is to extend and optimize it to provide the general public with more information and enhancethe transparency of our institution. In terms of grading, there will be no final deliverable, as students are expected to participate through- out the year in the publication. The grading will be based on an aggregation of all these posts (40%), the ability to expandon their original format (30%), and the capacity to take initiative (30%).

Module Introduction to Romanian Paleography
06SM430o050 / Module

Description:

General description:
Angesichts seiner strukturellen Eigenschaften stellt sich das Rumänische als Schlüsselsprache für das Studium der vergleichenden romanischen Sprachwissenschaft dar. In dieser Vorlesung wird eine klare Beschreibung dieser Eigenschaften in einer diachronen Perspektive angeboten. Nach einer Einführung über die Entstehung und die Ausbreitung der dakoromanischen Varietäten werden die einzelnen strukturellen Ebenen analysiert (mit schwerpunktmässiger Berücksichtigung auf die phonologischen bzw. morphologischen und syntaktischen Phänomene). Diese Aspekte werden stets auch im Vergleich mit den anderen romanischen und den nicht-romanischen benachbarten Sprachen betrachtet.

ECTS: 3

Learning Outcome:
Die Studierenden können die im Rahmen der Lehrveranstaltung behandelten Themen diachron und komparativ einordnen. Das Verfassen einer schriftlichen Kurzarbeit trägt dazu bei, die strukturelle Metareflexion sowie die analytische Fähigkeit zu fördern, um aus historisch besonders komplexen Sprachlagen Tendenzen und Regelmässigkeiten wahrzunehmen. Dieser Text kann auf Deutsch oder in einer beiliebigen romanischen Sprache verfasst werden.

Module Paper on Historical Rumanian Linguistics
06SM430o051 / Module

Description:

General description:
Neben der Vorlesung in historischer rumänischer Sprachwissenschaft bietet dieses Modul die Möglichkeit, einzelne Aspekte der historischen dakoromanischen Phonologie, Morphologie und Syntax anhand einer Bibliographie, die mithilfe des Dozierenden zusammengestellt wird, zu vertiefen. Wie im parallelen Modul ist der Vergleich mit den anderen romanischen Varietäten (sowie mit den Sprachen des sogenannten Balkansprachbundes) von zentraler Relevanz.

ECTS: 3

Learning Outcome:
Die Studierenden sind in der Lage, das ausgewählte Thema selbstständig zu entwickeln. Insofern sollte die Betreuung des Dozierenden in erster Linie dazu beitragen, die autonome Reflexion der Studierenden innerhalb eines kohärenten Textes zu strukturieren. Prioritär ist die Vertiefung der historisch-komparatistischen Kompetenzen im Rahmen der Romanistik.

Module CHE 746 Photochemistry in Synthesis
07SMCHE746 / Lecture with Practical Exercises

Description:

General description:
When molecules absorb photons in the ultraviolet or visible region, they are promoted to electronically excited states that behave in ways completely different from their ground-state counterparts. These fleeting yet powerful states define the essence of photochemistry, a field where light becomes a reagent.

This course introduces the fundamental principles that govern light–matter interactions, beginning with the basic laws governing photon absorption and the nature of electronic excited states. Building upon this foundation, it explores the application of light-induced reactions in modern synthetic chemistry. While photophysical concepts such as fluorescence and phosphorescence are introduced briefly to set the stage, the main focus lies on chemical reactivity, i.e. how molecules can form, break, or rearrange bonds under the influence of light.

The course consists of lectures intertwined with hands-on experimental sessions. Students will transform their mobile phone into a simple, home-made spectrophotometer and apply it to real experiments in photolabeling, photoswitching, and photoredox chemistry. Through these activities, they will directly experience how light can drive innovation across the chemical sciences.

ECTS: 4

Learning Outcome:
Photon absorption can generate highly reactive intermediates, which are often associated with photodegradation or “destructive” chemistry. A central theme of the course is how chemists can harness these processes constructively to achieve selective and efficient synthesis of complex and functionally relevant molecules, or to turn them into tools useful in chemical biology. The objective is to provide students with a broad understanding of how photochemical principles and mechanisms can be applied in organic synthesis and chemical biology. The course aims to move beyond the traditional Jablonski diagram and demonstrate how light-driven methodologies have become indispensable tools for molecular design, photoactivation, and biological applications.

Module KRI 207 Materials Characterization II
07SMKRI207 / Lecture with Practical Exercises

Description:

General description:
The main aim of the course is to enable the students to independently choose a suitable material characterization methods to address a specific materials science question. Subject areas are: light microscopy, diffraction methods (X-rays, neutrons, electrons), electron microscopy, atom probe tomography and atomic force microscopy. Depending on lecturer, lectures and practicals in German or English.

In the first part of the semester, different lecturers will present the fundamentals of the materials characterization methods mentioned above. This is the lecture part of the course. In the second half of the semester, the students, grouped in teams, will apply selected methods. These laboratory works are at the heart of the course, where the students are faced with practical problems and the limitations of the different methods, and where they have to independently elaborate solutions within the teams. Special: some practical courses are offered at the Paul Scherrer Institute, where the students can make use of the neutron and synchrotron X-ray facilities. These courses will take place after the end of the semester and occupy half and full days.

ECTS: 4

Notes:
Module together with ETH (Lerneinheit 327-0413-00L), takes place at ETH.
This module can't be booked at the UZH. Students of the UZH, please, register at the ETH and book the module through the ETH-system: ethz.ch/de/studium/non-degree-angebote/fachstudierende/fachstudierende-uzh.html

After completion of the module your grade and ECTS will be transfered automatically to the UZH-system.

Learning Outcome:
- Being able to explain the fundamentals of basic and advanced materials characterization methods based on microscopy and diffraction modalities.
- Being able to identify and solve practical problems of selected characterization methods based on corresponding laboratory work.
- Being able to advice non-experts why, how and when these methods can be used to assess what type of information, and to draw awareness to possible problems and limitations of these methods.

Languages of Instruction:
English

Course Materials:

Lecture notes:

- Slides of the lectures (in English) will be distributed electronically.
- Depending on the laboratory course, additional documentation will be made available.
- In laboratory journals, the students are asked to compose their own documentation of the laboratory courses.

Literature:

- B. Fultz, J. Howe, Transmission Electron Microscopy and Diffractometry of Materials, 2nd ed., Springer, 2009.

Module Impact evaluation for business economists (L + E)
03SM22BO0144 / Lecture with Practical Exercises

Description:

General description:
In this course, students will learn empirical methods for conducting impact evaluations (e.g., of policies or management practices). The course focuses on both basic econometric techniques and modern methods from the causal inference literature. Various applications from the management and economics literature will be presented and discussed.
Exercise sessions will emphasize the practical application of these methods. The emphasis of the course is the intuition behind causal inference. The course is less technical than Intermediate Econometrics.

ECTS: 6

Notes:
Students who already took Intermediate Econometrics (Intermediate Econometrics (L+E) (03SM22BO0060)) cannot take part in this course. There will be no podcast/recordings of the lecture and the tutorial sessions. We limit the number of participants to
50 students.

Learning Outcome:
After the course, students will be able to conduct independently empirical impact evaluations in all kinds of business contexts.

Module Designing Interventions for Social Impact (L+E)
03SM22MO0261 / Lecture with Practical Exercises

Description:

General description:
Solving today's most urgent global challenges often requires not only effective technological or behavioral solutions, but also ensuring their widespread adoption and lasting societal impact. This course examines how to design interventions that enable the large-scale adoption of innovations that deliver positive societal benefits.
Students will be guided through the three main steps involved in the design and implementation of interventions for social impact: (1) mapping the social and behavioral context of the target population; (2) selecting context-appropriate interventions by means of behavioral and social network models; (3) implementing the selected interventions in real-world settings, including ethical considerations.
Students will gain hands-on experience by designing surveys, implementing simulations of behavioral change, and analyzing data from real-world field experiments. Drawing on insights from marketing, behavioral economics, network science, and complexity theory, this interdisciplinary course provides students with the tools to design and evaluate impactful social impact strategies.

ECTS: 3

Notes:
This course integrates an AI assistant as a learning companion. The custom AI chatbot, trained on course materials and embedded within the OLAT platform, provides on-demand guidance to help students understand the core concepts and apply them to the problems discussed in class.

Learning Outcome:
Students will gain both theoretical and practical skills in designing and evaluating social change interventions.
Theoretical competencies:

- Understanding the key concepts and mechanisms underlying social change interventions
- Identifying key factors for the design of social change interventions
- Navigating ethical challenges in social change interventions

Practical skills:
- Programming in R or Python
- Designing and conducting surveys (e.g., conjoint analysis)
- Analyzing data from surveys and field experiments
- Building and running simulations of behavioral change.

Target Groups:
This course is designed for master's students from a wide range of disciplines who are interested in behavioral change, social networks, and diffusion processes.

Languages of Instruction:
English

Course Materials:	All materials will be made available on OLAT.
Merkmale:	Target Group: Suitable for English Speakers

Module Solving Large Dynamic Problems using Linear Programming (L+E)
03SM22MO0262 / Lecture with Practical Exercises

Description:

General description:
This course introduces the linear programming approach for intractably large optimal control problems. After recapitulating the basics of linear programming and Markov decision processes, we focus on using linear programs to compute approximate solutions. Applications entail queuing and revenue management, and students will also learn how to implement solution techniques in AMPL.

ECTS: 3

Learning Outcome:
Based on a given Markov decision process, students will be able to derive the corresponding Bellman equation and formulate approximate linear programs. Furthermore, students will know the basic techniques such as column generation and constraint sampling for solving these linear programs and can implement them in AMPL.

Module Analysis of Microdata (L+E)
03SM22MO0263 / Lecture with Practical Exercises

Description:

General description:
The use of microdata in the analysis of decision making by consumers, firms, and political authorities is widespread. For example, supermarket scanner data are used to assess the effectiveness of a marketing campaign. Credit data are used to predict the future default risk of an applicant. Administrative data collected by employment agencies allow to evaluate the success of a training program for unemployed workers. In many applications, the data are qualitative and discrete, in others, the sample is not randomly drawn from the population of interest. Hence, models and methods that go beyond the standard linear regression model and OLS are needed. The purpose of this course is to introduce such models and illustrate them in numerous applications.

ECTS: 6

Notes:
This will be a "flipped class-room" course: students read the assigned chapter of the book before class, and the material is then presented and discussed by students, following a number of "discussion questions". Tutorials are exclusively devoted to hands-on-exercises using real data and the statistical software R.

This module will not be recorded/ no podcast.

Learning Outcome:
Students understand the advantages and limitations of micro-econometric models, and can apply their knowledge to assess and interpret findings reported in the empirical economic literature, as well as conduct own analyses using the software R.

Module Economics of Training (L)
03SM22MO0264 / Course

Description:

General description:
This course provides economic perspectives on individuals' and firms' decisions to invest in training, drawing on a rich body of theoretical and empirical literature. It also examines public policies aimed at increasing training provision and participation and evaluates their effectiveness. Finally, the course provides evidence-based insights into the effects of training on a range of outcomes, including firm productivity and profits, innovation, individual earnings, employment, and job-skill match.
Tutorial sets include a mix of tasks that require students to extend or apply the theoretical and empirical knowledge gained during lectures.
As part of the course assessment, each student will be assigned a working paper related to the economics of training and asked to write a fictional referee report, critically discussing its strengths and weaknesses.

ECTS: 3

Learning Outcome:
Throughout the course, students will:

- Develop a comprehensive economic perspective on training decisions made by individuals and firms
- Understand key theoretical models that explain training investments
- Critically engage with empirical and experimental studies on training participation, provision, and outcomes
- Deepen their theoretical and empirical understanding through tutorial assignments that challenge them to extend and apply course material
- Strengthen their ability to evaluate academic research by writing a fictional referee report, focusing on the quality, methodology, and contribution of a working paper

Course Materials:

This is a paper-based course. Your primary learning resources will include lecture slides, assigned research papers, and your own lecture notes. A list of relevant papers will be provided throughout the course.
For students interested in recent developments in training research, the study by Gathmann et al. (2024) offers a valuable example. It examines the complementarity between firms' training and investment in new technologies:
Gathmann, C., Kagerl, C., Pohlan, L., & Roth, D. (2024). The pandemic push: Digital technologies and workforce adjustments. Labour Economics, 89, 102541.
Part of the course is devoted to apprenticeship training. The importance of apprenticeships extends beyond academic inquiry, with real-world relevance for labor markets. A recent episode of the OECD podcast Top Class highlights the role of apprenticeships in addressing job-skill mismatches for both individuals and firms:

06SM410o031 / Module

Description:

General description:
Il seminario affronta un ambito di fenomeni definito in termini storici o strutturali sulla base di una bibliografia che raccorda letture manualistiche e letture avanzate di linguistica dell'italiano.
Le sedute introduttive, condotte dal docente, presentano gli strumenti analitici e forniscono esempi della loro applicazione, propedeutici all'applicazione autonoma da parte dei/delle discenti che si concretizza nel contributo previsto dal portfolio. Il secondo semestre è dedicato alla stesura di un lavoro scritto.

ECTS: 6

Learning Outcome:
Gli studenti e le studentesse sono capaci di analizzare autonomamente fenomeni linguistici - in sé considerati o in quanto riflessi entro testi - applicando le nozioni apprese in precedenza. Sono capaci di comunicare contenuti scientifici complessi entro un discorso coerente in base agli strumenti di riferimento e ad un vaglio critico delle fonti.

Module ESS 341 Programming in Remote Sensing
07SMESS341 / Lecture with Practical Exercises

Description:

General description:
The modules ESS 341, GEO 876, and SDS 210 have been combined.

- MSc GEO students should register for the module GEO 876.
- BSc ESS students should register for ESS 341.
- Students in the SDS minor should register for SDS 210.

This course focuses on computational thinking and Python programming for geospatial applications. In an increasingly data-driven and automated world, the ability to design, write and organise code for spatial analysis is an essential skill for addressing environmental, social and urban challenges. Through a hands-on and problem-based learning approach, this course introduces the tools and techniques needed to programmatically understand, analyse, and visualise spatial data. You will develop a strong foundation in Python programming, progressively applying it with key geospatial libraries such as GeoPandas, RasterIO and Matplotlib. The course emphasises writing modular, well-documented and reproducible code, supported by Jupyter Notebooks and Git to enable transparent and collaborative workflows. The course concludes with an individual programming project in which you will design and implement your own solution to a spatial data problem. Upon completion, you will be well-prepared to take on more advanced spatial data science challenges in research and industry.

ECTS: 5

Notes:
Bring your own laptop to practical exercises (labs). Book this module before the semester starts to ensure access to the computer lab infrastructure.

Learning Outcome:
In this course you can acquire foundational programming skills and practical expertise in spatial data analysis. On completion of this course, you will be able to:

- Apply core Python programming concepts, including variables, loops, functions, and data structures.
- Develop a conceptual outline and workflow before implementing a coding solution.
- Write well-documented, modular, and reproducible Python code following best practices.
- Design and implement object-oriented programming solutions that can read, store, manipulate, visualize, and export spatial data.

Module GEO 876 Introduction to Programming for Spatial Problems
07SMGEO876 / Lecture with Practical Exercises

Description:

General description:
The modules GEO 876, ESS 341, and SDS 210 have been combined.

- MSc GEO students should register for the module GEO 876.
- BSc ESS students should register for ESS 341.
- Students in the SDS minor should register for SDS 210.

This course focuses on computational thinking and Python programming for geospatial applications. In an increasingly data-driven and automated world, the ability to design, write and organise code for spatial analysis is an essential skill for addressing environmental, social and urban challenges. Through a hands-on and problem-based learning approach, this course introduces the tools and techniques needed to programmatically understand, analyse, and visualise spatial data. You will develop a strong foundation in Python programming, progressively applying it with key geospatial libraries such as GeoPandas, RasterIO and Matplotlib. The course emphasises writing modular, well-documented and reproducible code, supported by Jupyter Notebooks and Git to enable transparent and collaborative workflows. The course concludes with an individual programming project in which you will design and implement your own solution to a spatial data problem. Upon completion, you will be well-prepared to take on more advanced spatial data science challenges in research and industry.

ECTS: 5

Notes:
Bring your own laptop to practical exercises (labs). Book this module before the semester starts to ensure access to the computer lab infrastructure.

Learning Outcome:
In this course you can acquire foundational programming skills and practical expertise in spatial data analysis. On completion of this course, you will be able to:

- Apply core Python programming concepts, including variables, loops, functions, and data structures.
- Develop a conceptual outline and workflow before implementing a coding solution.
- Write well-documented, modular, and reproducible Python code following best practices.
- Design and implement object-oriented programming solutions that can read, store, manipulate, visualize, and export spatial data.

Target Groups:
All students minoring in Spatial Data Science.
Bachelor students majoring and minoring in Geography, Earth System Science and related subjects.

Module Advanced Greek Prose Composition
06SM321o007 / Module

Description:

General description:
Dieses Modul schliesst an die griechischen Sprachübungen an und setzt diese auf höherem Niveau fort. Ausgewählte Themen der Grammatik werden repetiert und vertieft; neu hinzu kommen die Idiomatik und die Phraseologie. Einerseits werden Originaltexte klassisch-attischer Prosaautoren hinsichtlich ihrer sprachlichen und stilistischen Ausgestaltung untersucht. Andererseits werden zusammenhängende deutsche Texte in ein möglichst authentisches klassisches Attisch übersetzt. Die Übersetzungen werden gemeinsam in der Stunde oder als Hausaufgabe angefertigt und korrigiert. Ein bis zwei Übersetzungen pro Semester können unter denselben Bedingungen wie die Sprachkompetenzprüfung für das Lehrdiplom gelöst werden und dienen insofern als Vorbereitung für dieses Examen. Ein mehrmaliges Absolvieren des Moduls wird empfohlen.

ECTS: 3

Learning Outcome:
Vertiefte Kenntnis ausgewählter Themen der Grammatik; Vertrautheit mit altgriechischen Idiomen, Phrasen und rhetorischer Stilistik; Verständnis für die unterschiedlichen Stile griechischer Prosaautoren.

Module Tyrants in the Histories of Herodotus (Proseminar Greek Literature)
06SM321o009 / Module

Description:

General description:
Das Proseminar vermittelt die ersten Einblicke in das wissenschaftliche Arbeiten. Im Zentrum des Moduls steht ein bestimmter Text oder eine Textsammlung. Eine aktive Mitgestaltung des Unterrichtsgeschehens ist unabdingbar. Gelegentliche Zusatzaufgaben (Kurzreferat/Sitzungsleitung etc.) unterstützen dies. Die Studierenden üben sich darin, die grundlegenden fachwissenschaftlichen Fähigkeiten der Gräzistik anzuwenden, die sie im Rahmen des dazugehörigen Proseminararbeitsmoduls vertiefen können.
Das Proseminar nimmt die Darstellungen von Alleinherrschaft in Herodots Historien in den Blick. Auch der Verbindung von Tyrannis und Philosophie (Solon-Kroisos) sowie weiblichen Herrscherinnen (Tomyris, Artemisia) werden wir Beachtung schenken. Insgesamt beleuchtet das Proseminar die tragende Rolle von Herrscher-Figuren für Herodots Erzählung und die geschichtstheoretischen sowie ethischen und religiösen Implikationen von Aufstieg und Fall bestimmter Tyrannen im Rahmen seiner historíe.

ECTS: 3

Learning Outcome:
Erwerb der grundlegenden gräzistischen Fertigkeiten und Kenntnisse im Bereich der Literatur; dazu gehören u. a.: Erfahrung im wissenschaftlichen Übersetzen von Primärliteratur, erste Anwendung der massgeblichen Hilfsmittel (z. Module GEO 441 Remote Sensing Application: Making Impact
07SMGEO441 / Seminar

Description:

General description:
The course focuses on the analysis of remote sensing data in the context of a group project. Each group will examine prepared data sets and develop and present a concept for the analysis. The choice of specific hypotheses to be tested on the data set is more open than in other courses. After the complete analysis (including the processing steps developed in the group), the results will be summarized in a project report and presented in a mini-colloquium. In addition to the content of the work, scientific writing and presentation skills are also assessed and discussed. In the first lecture, the groups are formed and the topics are distributed. Presence and active participation in all sessions is the essential basis for successfully passing the course.

ECTS: 5

Notes:
The Sustainable Development Goals (SDGs (https://sdgs.un.org/goals)) are a collection of 17 global goals interacting with each other, which are designed to be the blueprint to achieve a better and more sustainable future for all. The 2030 Agenda for SDGs is adopted by all United Nations Member States.

These SDGs are covered in this module: 6, 13,15

Learning Outcome:
The course is a platform for conducting a group project, which emphasizes the need for teamwork and collaboration in most working environments. Students will be able to use all previously acquired skills to develop concepts, analyze data sets and discuss results. They will also improve their scientific writing and presentation skills.

Module Cicero, Pro Caelio (Proseminar Latin Literature)
06SM323o008 / Module

Description:

General description:
Das Proseminar vermittelt die ersten Einblicke in das wissenschaftliche Arbeiten. Im Zentrum des Moduls steht jeweils ein bestimmter Text oder eine Textsammlung. Jede Woche wird eine vorbereitete Passage übersetzt, analysiert und in der Gruppe diskutiert. Eine aktive Mitgestaltung des Unterrichtsgeschehens ist dabei unabdingbar. Gelegentliche Zusatzaufgaben (Kurzreferat/Sitzungsleitung etc.) unterstützen dies. Die Studierenden üben sich darin, die grundlegenden fachwissenschaftlichen Fähigkeiten der Latinistik anzuwenden, die sie im Rahmen des dazugehörigen Proseminararbeit-Moduls vertiefen können.
In diesem Semester werden wir Ciceros Rede pro M. Caelio lesen, die zu Recht als eine der bewundernswertesten Reden Ciceros gilt. Besonderes Augenmerk werden wir auf einige Höhepunkte dieser Rede legen, wie etwa Ciceros Darstellung des Charakters von Catilina, seine Imitation verschiedener Charaktere, die mit Clodia sprechen und über sie reden, und seine Beschreibung eines angeblichen Giftmordversuchs, dessen man Caelius beschuldigt hatte. Das römische Gerichtswesen und die römische Rhetorik, ihre Verbindung zur Schauspielkunst und die gender-Aspekte der Darstellung Clodias werden einige der übergreifenden Themen sein, die uns bei der Lektüre beschäftigen werden.

ECTS: 3

Learning Outcome:
Erwerb der grundlegenden latinistischen Fertigkeiten und Kenntnisse im Bereich der Literatur; dazu gehören u. a.: Erfahrung im wissenschaftlichen Übersetzen von Primärliteratur, erste Anwendung der massgeblichen Hilfsmittel (z. B. Wörterbücher, Kommentare und Bibliographien), erste Einblicke in das fachspezifische Publikationswesen, erste Übung darin, wissenschaftliche Sachverhalte zu analysieren, fremde Forschungsresultate publikumsgerecht zu präsentieren und kritisch zu hinterfragen sowie traditionelle und moderne, für den jeweiligen Text geeignete Interpretationsansätze anzuwenden; Fähigkeit, eine eigene Meinung fundiert zu vertreten.

Module Tacitus, Histories (Seminar Latin Literature)
06SM323o010 / Module

Description:

General description:
Die Seminare setzen die Proseminare auf höherem Niveau fort und erfordern inhaltlich die Kenntnisse des BA-Moduls Akzess. Jede Woche wird eine vorbereitete Passage übersetzt, analysiert und in der Gruppe diskutiert. Eine aktive Mitgestaltung des Unterrichtsgeschehens ist dabei unabdingbar. Gelegentliche Zusatzaufgaben (Kurzreferat / Sitzungsleitung etc.) unterstützen dies. Allgemein festigen die Studierenden in den Seminaren ihre fachwissenschaftlichen Fähigkeiten.
In den erhaltenen Büchern der Historien schildert Tacitus eindrucksvoll die dramatischen Ereignisse des Vierkaiserjahres 69 n. Chr. Die Zeit zwischen dem Ende der julisch-claudischen Dynastie mit dem Tod Neros und der Gründung der neuen Dynastie der Flavier mit der Herrschaft Vespasians ist geprägt vom Bürgerkrieg. Was bedeutet römische Identität in einer Zeit, in der Römer gegen Römer kämpfen und die Bewohner der Stadt ihr eigenes Kapitol in Schutt und Asche legen? Wie wirksam sind gute Vorbilder in einem Umfeld, in dem Tugenden einen Weg ins Verderben darstellen können? Wie kann aus der allgemeinen Unordnung heraus eine neue stabile Herrschaft errichtet werden, und welche Rolle kommt der Geschichtsschreibung in diesen Zeiten zu? Diesen und ähnlichen Fragen wollen wir in diesem Seminar gemeinsam nachgehen.

ECTS: 3

Learning Outcome:
Konsolidierung der latinistischen Kompetenzen und Kenntnisse; Sicherheit in der Übersetzung auch schwierigerer Texte; souveräner Umgang mit latinistischen Hilfsmitteln; Kenntnis der einschlägigen Sekundärliteratur; kompetente Analysen wissenschaftlicher Sachverhalte; selbständige Präsentation und Hinterfragung fremder Forschungsresultate; Fähigkeit zur Teilnahme an wissenschaftlichen Diskussionen; sicheres Anwenden traditioneller und moderner, für den jeweiligen Text geeigneter Interpretationsansätze.

Module Notker Balbulus and Literary Life in St. Gall (Lecture Medieval Latin)
06SM324o004 / Module

Description:

General description:
Notker Balbulus (ca. 840-912) zählt zu den herausragenden Autoren des Klosters St. Gallen. Er wurde durch seine Sequenzen berühmt, in denen er diese poetische Form zur Vollkommenheit führte. Mit den Gesta Karoli Magni verfasste er eine Sammlung lebendiger Episoden über Karl den Großen, die Mentalität, Alltagsleben und Herrschaftsverständnis der Karolingerzeit spiegeln. Besonders bemerkenswert ist das unvollendete Metrum de vita sancti Galli, das Notker gemeinsam mit seinen Schülern Hartmann und Ratpert schrieb - ein einzigartiges Beispiel kollektiver Autorschaft und ein gelungenes literarisches Experiment. Die Vorlesung analysiert diese und weitere Werke im Kontext der klösterlichen Bildungs- und Schriftkultur St. Gallens. Dabei werden auch die literarischen Netzwerke, die Rolle des Skriptoriums und die kulturellen Verflechtungen mit anderen karolingischen Zentren thematisiert.
Das Thema kann in einer begleitenden Lektüre vertieft werden. Im HS 26 schließt sich eine Übung zur Vorbereitung einer Notker-Ausstellung in St. Gallen an.

ECTS: 3

Learning Outcome:
Die Studierenden erwerben vertiefte Kenntnisse über Bereiche der lateinischen Schriftlichkeit im Mittelalter.

Module Isidor of Seville, Etymologiae (Seminar Medieval Latin)
06SM324o001 / Module

Description:

General description:
Mit seinen Etymologiae schuf Isidor von Sevilla (gestorben 636) die erste Enzyklopädie des Mittelalters, ein monumentales Werk in 20 Büchern, das naturkundliches, historisches und sprachliches Wissen systematisch ordnet. Isidors Ziel war es, das gesamte verfügbare Wissen seiner Zeit zu bewahren und zugänglich zu machen. Die Etymologiae prägten das mittelalterliche Wissen tiefgreifend und wirkten bis in die Frühe Neuzeit fort. Im Seminar erarbeiten wir uns einen Überblick über Aufbau und Inhalte des Werks, analysieren ausgewählte Abschnitte im Detail und untersuchen Isidors Methoden der Wissensvermittlung. Zudem widmen wir uns der vielfältigen Rezeption des Textes in Handschriften, Glossen und Bearbeitungen. Das Seminar bietet damit einen Einstieg in die Welt mittelalterlicher Enzyklopädik und in zentrale Fragen der Wissensorganisation im Frühmittelalter

ECTS: 3

Learning Outcome:
Im Seminar sollen die Studierenden die unterschiedlichen methodischen Zugänge zu einem konkreten Text kennen lernen und anwenden. Sie lernen, mit der Forschungsliteratur umzugehen sowie die eigenen Hypothesen und Forschungsfragen angemessen darzustellen.

Module Latin Grammar in the Middle Ages
06SM324o005 / Module

Description:

General description:
In der Übung beschäftigen wir uns mit den lateinischen Grammatiken, die im Mittelalter im Unterricht verwendet wurden, sowohl für Anfänger als auch für Fortgeschrittene. Diese Texte vermitteln ein spezifisches Verständnis von Sprache und Grammatik, das nicht nur das Erlernen des Lateinischen prägte, sondern auch später als Modell für die Grammatikschreibung in den Volkssprachen diente. Anhand ausgewählter Beispiele lernen wir die Struktur und Inhalte dieser Grammatiken kennen und analysieren ihre didaktischen Konzepte. Zugleich wird deutlich, wie mittelalterliche Autoren ihr wichtigstes Werkzeug - die lateinische Sprache - erlernten und reflektierten. Da die mittelalterliche Grammatiktradition auf spätantiken und antiken Vorbildern beruht, ist die Übung auch für Studierende der lateinischen Philologie von besonderem Interesse

ECTS: 3

Learning Outcome:
In der Übung wird die Kenntnis der sprachwissenschaftlichen und sprachhistorischen Methoden vertieft.

Module Speculative Fiction of the Early Modern Period in Latin
06SM324o006 / Module

Description:

General description:
Die Veranstaltung soll einen Überblick über phantastische neulateinische Romanliteratur geben. Nach einem kurzen Überblick über Neulatein und antike und mittelalterliche Vorbilder betrachten wir zehn fiktive, phantastische narrative Werke genauer. Viele davon sind sehr wenig bekannt und oft auch bislang kaum wissenschaftlich untersucht worden. Dabei kommen vor: neu entdeckten Weltteile (wie Amerika) und in die Ferne projizierte Kritik der eigenen Gesellschaft (Thomas Morus oder Gian Vittorio Rossi), Vorläufer des Abenteuerromans (Samuel Gott und Johannes Bissel) oder der Science Fiction (Kepler). Die Hintergründe, der Gesamtplot, die Wirkung der Werke werden in den Stunden besprochen, anschließend werden kurze Ausschnitte des lateinischen Originals gemeinsam gelesen und analysiert.

ECTS: 3

Learning Outcome:
In der Übung wird die Kenntnis der literaturwissenschaftlichen und sprachhistorischen Methoden vertieft.

Module Notker Balbulus (Medieval Latin Reading)
06SM324o007 / Module

Description:

General description:
Notker I. von St. Gallen (gestorben 912), besser bekannt unter seinem Beinamen 'Balbulus', ist ein vielseitiger Autor des frühen Mittelalters. Aus seiner Feder sind Werke in einer Reihe von Formen und Gattungen erhalten, die teilweise weite Verbreitung fanden. Wir werden in seine Gesta Karoli Magni (Geschichtsschreibung in Prosa), in die Sequenzen (neuartige Gesänge für die Liturgie) und weitere Texte hineinlesen.
Die Lektüreübung ist als Ergänzung zur Vorlesung «Notker Balbulus und das literarische Leben in St. Gallen» von Frau Prof. Cardelle im selben Semester angelegt, jedoch können die beiden Veranstaltungen problemlos auch unabhängig voneinander besucht werden.
In der Übung werden Auszüge der Texte gelesen und vor dem Hintergrund des Gesamtwerks kommentiert. Der Fokus liegt auf der zielsprachenorientierten Übersetzung ins Deutsche.

ECTS: 3

Learning Outcome:
Angemessenes Übersetzen für verschiedene Zielgruppen, Verfestigen der Sprachkenntnisse und der Kenntnisse über Literatur.

Module Between Muse and Mania: Forms and Functions of Inspiration (Seminar Greek Literature)
06SM321o011 / Module

Description:

General description:
Die Seminare setzen die Proseminare auf höherem Niveau fort und erfordern inhaltlich die Kenntnisse des BA-Moduls Akzess. Im Zentrum steht erneut ein bestimmter Text oder eine Textsammlung. Eine aktive Mitgestaltung des Unterrichtsgeschehens ist unabdingbar. Gelegentliche Zusatzaufgaben (Kurzreferat/Sitzungsleitung etc.) unterstützen dies. Allgemein festigen die Studierenden in den Seminaren ihre fachwissenschaftlichen Fähigkeiten. Im Seminar behandeln wir die Rolle und Darstellung von Inspiration in einzelnen Texten der griechischen Dichtung sowie der philosophischen Literaturkritik. Dafür nehmen wir zunächst die Prooimia der homerischen Epen, die Musenweihe bei Hesiod sowie Passagen der griechischen Lyrik und Elegie in den Blick (z.B. Sappho, Solons Musen-Elegie), in denen ein poetisches Ich seine Kommunikation mit einer Inspirations-Instanz thematisiert. In diesem Zuge gehen wir auch auf die Darstellung religiöser Inspiration von Sehern, Propheten oder Pythien ein. In einem zweiten Schritt behandeln wir dann philosophische Texte, die sich teils kritisch mit dem Konzept dichterischer Inspiration auseinandersetzen und diese mit weiteren Modellen poetischer Autorschaft kontrastieren, etwa Fragmente Heraklits sowie die platonischen Dialoge Phaidros und Ion; wir wollen auch Passagen aus Aristoteles und Ps.-Longin lesen, die wie Platon nach dem Verhältnis von externer Inspiration und intrinsischer Kunstfertigkeit des Dichters fragen und hier jeweils verschiedene Antworten finden. Ausgehend von der Dichtung sowie Literaturkritik und Philosophie wollen wir insgesamt den facettenreichen antiken Inspirationsdiskurs aus verschiedenen Blickwinkeln beleuchten.

Module The Greek Novel, from its Predecessors to Byzantium (Lecture on Greek Literature)
06SM321o010 / Module

Description:

General description:
Im Zentrum der Vorlesung stehen die in der Antike sehr populären griechischen Abenteuer- und Liebesromane, allen voran die fünf überlieferten Werke des Chariton von Aphrodisias, Xenophon von Ephesos, Longos, Achilles Tatios und Heliodor, die von der frühen Kaiserzeit bis in die Spätantike datieren. Neben den Vorläufergattungen des Romans, allen voran Epos, Historiographie, Drama und Liebeslyrik, wollen wir auch die frühen fragmentarischen Romane des Hellenismus in den Blick nehmen, die bereits von Themen wie Liebe, Abenteuer und kulturellen Begegnungen im Mittelmeerraum handeln. Anhand bestimmter Beispiele werden wir dann die Motive und erzählerischen Muster der kaiserzeitlichen Romane besprechen. Ein Seitenblick gilt griechischen wie lateinischen Roman-Parodien, die die Gattung in stereotyper Zuspitzung aufgreifen. Insgesamt bietet die Vorlesung vertiefte Einblicke in eine beliebte literarische Gattung der Antike und wirft zudem Schlaglichter auf die weitere Wirkung des antiken Romans in der byzantinischen sowie der europäischen Literatur.

ECTS: 3

Learning Outcome:
Erfahrung im Lesen und Analysieren von Primärtexten; bessere Kenntnis der wichtigsten Sekundärliteratur, Gattungen und Epochen; Einblicke ins Anwenden traditioneller und moderner literatur- und kulturwissenschaftlicher Interpretationsansätze; Bewusstsein für kulturelle und gesellschaftliche Differenzen; Erkennen anthropologischer Konstanten durch Vergleich Antike-Moderne.

Module Chariton of Aphrodisias, Callirhoe (Greek Reading Class)
06SM321o013 / Module

Description:

General description:
Unter Anleitung der Lehrperson übersetzen die Studierenden einen längeren griechischen Text zügig ins Deutsche und erwerben dabei Routine im Lesen von Primärtexten. Im Zentrum jeder Sitzung steht die Lektüre einer selbständig vorbereiteten Passage, bei der grammatikalische, lexikalische, stilistische und übersetzungstechnische Fragen besprochen werden. Der Kurs eignet sich besonders für Studierende, die sich auf die Akzess-Prüfung im Bachelor vorbereiten.
Lust auf einen Liebesroman voller Abenteuer, Intrigen und überraschender Wendungen? Wo es an Zutaten wie erotischer Leidenschaft, Eifersucht, Rivalität, scheinbaren Todesfällen und Piraten nicht fehlt? Dann sind Sie hier genau richtig! Durch die Lektüre der Liebesgeschichte zwischen Kallirhoe und Chaireas haben wir die Gelegenheit, den ältesten vollständig erhaltenen griechischen Liebesroman zu entdecken und ein literarisches Genre näher kennenzulernen, das in der Antike sehr beliebt war. Dieses πάθος ἐρωτικόν, das uns von einem mysteriösen Autor namens Chariton von Aphrodisias erzählt wird, gibt uns ausserdem Anlass, über Themen wie z.B. die Stellung der Frau in der Antike, geschlechtsspezifische Gewalt, Schicksalsschläge oder Sklaverei und Freiheit nachzudenken. Der Kurs eignet sich als Ergänzung zur Vorlesung von Prof. Markus Hafner über den Griechischen Roman.

ECTS: 3

Notes:
Nach einer kurzen Einführung werden wir in der ersten Sitzung mit der Lektüre anfangen. Als Vorbereitung für die erste Sitzung übersetzten Sie bitte Buch 1 Kapitel 1.

Learning Outcome:
Verbesserung der Lese- und Übersetzungskompetenzen sowie der passiven Sprachkenntnisse, besonders in den Bereichen Grammatik und Wortschatz; Grundkenntnisse zu verschiedenen Arten und Problemen des Übersetzens.

Module Lecture Series of the Zurich Center for the Study of the Ancient World
06SM322o003 / Module

Description:

General description:
Ob Sklave, Handwerkerin oder Literat - Arbeit war in der Antike immer mehr als Broterwerb, Produktion nie nur Technik: Herstellen und Gestalten bedeutet immer auch Wirken - materiell, sozial und symbolisch, in Gemeinschaft oder allein, frei oder unfrei. Die Ringvorlesung vereint Beiträge, die Arbeit als mehrdimensionale soziale Praxis verstehen - geprägt von ökonomischem Zweck, sozialer Einbindung und kreativer Gestaltung. Der Blick fällt dabei auch auf Räume der Arbeit, in denen geschafft und geschaffen wird: manchmal erschöpfend, manchmal schöpferisch, konfliktgeladen und produktiv.

ECTS: 3

Learning Outcome:
Vertrautheit mit der inhaltlichen und methodischen Vielfalt der Altertumswissenschaften anhand einer bestimmten Fragestellung; Bewusstsein für kulturelle und gesellschaftliche Differenzen; Erkennen anthropologischer Konstanten durch Vergleich Antike-Moderne.

Module Roman Epic (Lecture Latin Literature)
06SM323o009 / Module

Description:

General description:
In dieser Vorlesung werden wir uns diachron mit dem römischen Epos beschäftigen, von den Anfängen bis Claudian. Wir werden verfolgen, wie sich die Gattung im intertextuellen Dialog mit den griechischen und römischen Vorgängern und im jeweiligen historischen und kulturellen Kontext entwickelt, dabei aber auch immer wieder den Blick auf übergreifende Themen legen, wie beispielsweise die Darstellung von Krieg, Gewalt und Verwundung, die Rolle von Frauen im Epos, der Blick auf das zeitgenössische Rom, die Gestaltung von Raum und Zeit, oder das Verhältnis von Mythos und Geschichte. Punktuell werden wir auch die Rezeption der Epen diskutieren. Alle Texte werden in Übersetzung besprochen, Lateinkenntnisse sind nicht erforderlich.

ECTS: 3

Learning Outcome:
Erwerb von Überblickswissen über Gattungsgeschichte, einzelne Epochen oder übergeordnete Fragestellungen; Fähigkeit zur Lektüre von kleineren, exemplarischen Primärtext-Passagen im grösseren kultur- und literaturgeschichtlichen Kontext.

Module The Ancient Egyptian Book of the Dead
06SM322o001 / Module

Description:

General description:
Das altägyptische Totenbuch gehört neben den Pyramidentexten des Alten, den Sargtexten des Mittleren und den königlichen Unterweltstexten des Neuen Reiches zu den wichtigsten religiösen Textkorpora der alten Ägypter. Es wurde nicht nur von Privatleuten, sondern auch von Königen verwendet und sollte dem Verstorbenen in Form einer variablen Spruchsammlung Orientierung und mannigfache Hilfestellung in seiner jenseitigen Existenz garantieren. In dieser Veranstaltung wird ein Abriss über Bedeutung, Inhalt und Entwicklungsgeschichte dieses heterogenen Textkorpus vermittelt. Dabei werden neben den bekannten Papyri auch andere Textträger berücksichtigt wie etwa Leichentücher, Grabwände, Särge etc. Da noch immer viele Originalquellen unpubliziert sind, werden die Teilnehmenden auch von aktueller Forschung und bislang unveröffentlichtem Material profitieren können.

ECTS: 3

Learning Outcome:
Vertiefte Kenntnisse zu wissenschaftlichen Zugangsweisen allgemein und zum jeweiligen Thema im Besonderen; Vertrautheit mit fachlichen Hilfsmitteln und Referenzwerken; fremde Forschungsresultate publikumsgerecht präsentieren; Fähigkeit zur Teilnahme an wissenschaftlichen Diskussionen; selbständige bibliographische Recherche zu bestimmten Fachthemen; selbständige Analyse wissenschaftlicher Sachverhalte und kritische Hinterfragung von Forschungsmeinungen.

Module Pharaonic Personalities – an Overview of Egyptian History
06SM322o002 / Module

Description:

General description:
Die ägyptische Kultur vermittelt die Entstehung und Strukturen des sakralen Königtums als untrennbare Einheit von Staat und Religion. Die Könige des Alten Ägypten verkörperten ein transzendentales Wesen zwischen Gott und Mensch. Anhand ihrer Hinterlassenschaften in Form von Tempelbauten, Grabanlagen, Textzeugnissen und Statuen lassen sich die Regierungen der einzelnen Pharaonen nachzeichnen. Die Übung vermittelt einen fundierten Überblick über die Geschichte Ägyptens, beginnend mit dem ersten fassbaren König der Frühgeschichte, der Amarnazeit unter Echnaton, bis hin zur griechisch-römischen Herrschaft ab Alexander dem Grossen und unter Kleopatra VII.

Module Social-cognitive development
06SM200o202a / Module

Description:

General description:
Das Seminar beschäftigt sich mit der Entwicklung sozial-kognitiver Fähigkeiten im Säuglings- und Vorschulalter. Hierzu gehören die Entwicklung von exekutiven Funktionen, prosozialem Verhalten, Theory of Mind und Perspektivenübernahme. Die Studierenden vertiefen ihr Wissen und gestalten basierend auf aktueller Literatur ein Spiel zur Wissensvermittlung an Laien (z.B. Eltern/ Bezugspersonen, Kinder, Lehrpersonen). Des Weiteren werden im Seminar Basisfähigkeiten des wissenschaftlichen Arbeitens (z.B. Literaturrecherche, -kritik, Präsentieren) und der Science Communication vermittelt. Die Studierenden recherchieren entwicklungspsychologische Theorien und empirische Studien um bestimmte, praktisch relevante Fragen im Rahmen des Seminarthemas zu beantworten (z.B. «Heute bin ich hässig - Emotionserkennung und -regulation im Vorschulalter fördern»). In Gruppen erarbeiten die Studierenden darauf basierend ein Konzept für ein Spiel und testen entsprechende Prototypen an Zielstichproben. Dieser Prozess wird von mehreren Peerfeedbackrunden in den Seminarsitzungen begleitet.

ECTS: 4

Learning Outcome:
Studierende bekommen einen vertieften Einblick in die aktuelle entwicklungspsychologische Forschung zur frühkindlichen sozialen Kognition. Die Studierenden entwickeln ihre Fähigkeit weiter, komplexe wissenschaftliche Inhalte zu verstehen und zu kommunizieren.

Module Perceptions of ageing, health, and longevity
06SM200o202c / Module

Description:

General description:
Altersbilder umfassen unsere Vorstellungen vom Altsein, vom Alternsprozess und von älteren Menschen als soziale Gruppe. Altersbilder sind ein multidimensionales Konstrukt, welches u.a. Altersselbst- und -fremdbilder, Alterssterotype und -normen, sowie Altersdiskriminierung (Ageism) einschliesst. Unsere individuellen und gesellschaftlichen Vorstellungen zum Alter(n) sind teilweise widersprüchlich, wenn man bereichsspezifische Bilder berücksichtigt. Sie entwickeln sich über die Lebensspanne als Funktion verschiedener externer und interner Faktoren und Prozesse, wie der Repräsentation älterer Menschen in den Medien und in der Sprache, sowie eigene Erfahrungen mit dem Entwicklungs- und Alternsprozess über die Lebensspanne.
Sowohl die Perspektive auf und Wahrnehmung des eigenen Alter(n)sprozesses als auch der Blick auf das Alter(n) anderer Menschen beeinflussen unsere Gesundheit auf körperlicher und mentaler Ebene - und zeigen zudem Effekte auf Langlebigkeit und Sterberisiko.
Im Rahmen dieses Seminars werden sich die Studierenden mit verschiedenen Theorien zu Altersbildern beschäftigen und empirische Befunde zu Zusammenhängen zwischen verschiedenen Altersbild-Facetten mit körperlicher, kognitiver und emotionaler Gesundheit betrachten. Ausserdem werden mögliche Interventionen für ein ressourcenorientiertes Altersbild diskutiert und entworfen.

ECTS: 4

Learning Outcome:
Die Studierenden:
a) kennen wichtige theoretische Modelle zum Thema «Altersbilder»
b) kennen den aktuellen Wissensstand zum Zusammenhang von Altersbildern und verschiedenen Gesundheits-Outcomes über das Erwachsenenalter und Alter
c) haben sich mit den eigenen Altersbildern auseinandergesetzt und Möglichkeiten der Intervention für ein differenziertes Altersbild kennengelernt.

Module Interpersonal Psychology
06SM200o303a / Module

Description:

General description:
Interpersonal theory integrates personality, relational processes, psychopathology, and psychotherapy into a model that can be useful for research and clinical practice. Originating in the work of Harry Stack Sullivan and organized around the meta-dimensions of Agency and Communion, interpersonal theory is relatively unique among contemporary personality or clinical theories in its focus on dynamic processes that occur between people, rather than static attributes that exist within people. This course will cover the historical origins, methodological approaches, major concepts, and applications of interpersonal theory for psychological science.

ECTS: 4

Learning Outcome:
1. Understand the historical development of interpersonal theory. 2) Become familiar with major concepts of interpersonal theory. 3) Learn the methodological approaches that are used to study interpersonal processes. 4) Critically read psychological research papers.

Module Diagnostic Assessment and Case Conceptualization in Cognitive Behavioral Therapy: A Practice-Focused Semin
06SM200o703l / Module

Description:

General description:
Das Seminar vermittelt praxisorientiert die zentralen Schritte von der psychologischen Diagnostik bis zur Erstellung individueller Fallkonzepte mit Schwerpunkt auf kognitiv-behavioralen Verfahren und Interventionen. Neben der Einführung in theoretische Grundlagen (z. B. Klassifikationssysteme, SORKC-Modell, kognitive Modelle) liegt der Fokus auf der praktischen Anwendung in Rollenspielen, Fallarbeit und Gruppenübungen. Ziel ist es, fundierte Kenntnisse in Diagnostik und Fallkonzeption zu erwerben, die als Basis für die Ableitung zielgerichteter, evidenzbasierter Therapiepläne dienen.

ECTS: 4

Notes:
Dieses Modul steht nur Studierenden des Master of Science in Psychologie (RVO19) offen. This module is only open to students of Master of Science in Psychology (RVO19).

Learning Outcome:
Die Studierenden 1) kennen die theoretischen Grundlagen der psychologischen Diagnostik sowie zentrale Klassifikationssysteme (ICD, DSM) und störungsspezifische Modelle (z. B. SORKC, kognitive Modelle). 2) Sie sind in der Lage, diagnostische Informationen strukturiert zu erheben, einzuordnen und für die Fallarbeit nutzbar zu machen. 3) Sie wenden die erlernten Konzepte und Methoden praxisorientiert in Rollenspielen, Fallarbeit und Gruppenübungen an.

Module Neurodivergent Minds in Clinical Psychology: From Experimental Psychotherapy to Neuro-informed care
06SM200o703m / Module

Description:

General description:
This course examines neurodivergence- the natural variation in cognitive, emotional, and sensory processing that underlies diverse developmental and psychological profiles(ADHD, ASD, dyslexia/dyspraxia/dyscalculia, giftedness)- and its relevance for contemporary clinical psychology. Students should take away from this course a comprehensive foundation for understanding neurodivergence across research and practice. Specifically, students will examine foundational concepts in neurodivergence and its assessment/diagnosis, experimental psychotherapy approaches to understanding neurodivergent traits, and the neurobiological and cognitive mechanisms underlying such interindividual differences, as well as psychological comorbidities and perspectives of lived experience experts(including Dr. Elizabeth Frei, founder of NSNS). The course will also cover clinical approaches, practical accommodations in academic and workplace settings, stigma, and evidence-based interventions.

Module Introduction to machine learning with R
06SM200o800a / Module

Description:

General description:
This course is an introduction to machine learning methods and their applications with R. The general goal is to provide students with a toolbox of methods they can then apply in their own field of study. In this course, different methods of regression, classification, and dimension reduction are presented through didactical lectures, readings, and videos. The students apply the presented methods to real and simulated dataset using the software R. A special emphasis is put on the best practices for analysis via machine learning methods, that is, how to properly build a model, test a model, and avoid common pitfalls. If time allows, the following topics are covered: 1) Introduction to statistical learning, 2) Classification, 3) Resampling methods, 4) Linear Regression with Dimension Reduction Methods, 5) Moving beyond linearity, 6) Deep learning

ECTS: 4

Notes:
Dieses Modul steht nur Studierenden des Master of Science in Psychologie (RVO19) offen. This module is only open to students of Master of Science in Psychology (RVO19).

Learning Outcome:
At the end of the course, the students are able to analyse datasets, build models, make predictions, and reduce the dimension of a dataset using the methods presented using the statistical software R. They are able to select one or several methods that are appropriate for given datasets and tasks. They are able to describe intuitively the methods presented in the course and can apply them with R. Module Dirty Data: Outliers and Missing Values in Statistics and Psychology
06SM200o800b / Module

Description:

General description:
This seminar focuses on two practical issues that are commonly encountered in the statistical analysis of real-world psychological data, namely outliers and missing values. If addressed improperly, such "messy" data can invalidate the findings of any empirical study. The course's goal is to provide students with a toolbox of methods that they can use in their master theses and beyond to properly address outliers and missing values. The course adopts a "hands-on" approach in the sense that the students will learn how to deal with these issues from a practical perspective through computer exercises on real-world data, using the statistical programming environment R. If time permits, the following topics will be covered:
1) Mechanisms and methods for missing values, 2) Outlier-robust methods for mean, variance, and correlation, 3) Outlier-robust linear regression, 4) Robustness in psychometrics

ECTS: 4

Notes:
Dieses Modul steht nur Studierenden des Master of Science in Psychologie (RVO19) offen. This module is only open to students of Master of Science in Psychology (RVO19).

Learning Outcome:
At the end of the course, students are able to analyze datasets containing missing values and/or outliers using the methods covered. In particular, they can use software for outliers and missing values in the statistical programming environment R and know the "do"s and "don't"s of working with messy data. They are able to identify possible issues stemming from missing values and outliers, know how to overcome them methodologically, intuitively describe the covered methods, and know how apply them in practice by using software in R.

Module Advanced methods in current cognitive psychology research
06SM200o800d / Module

Description:

General description:
In this seminar, we will discuss advanced methods used in current cognitive psychology research. Each week, we will discuss a research article that applies these methods in contemporary studies. You will learn how we can study cognition at both the group and individual-differences level through study designs and analytic techniques that go beyond the basics, and how we can use computational modelling to formalize theories and simulate behavior. We will explore a range of topics and several measures of cognitive function suitable to answer different research questions, with emphasis being placed on understanding the strengths and limitations of the methods used. By the end of the seminar, you will be able to use, not just understand, these methods. To that end, you will develop a proposal for your own research project, applying what you've learned to design a study that could contribute to the field. Evaluation will be based on oral and written presentations of the research project as well as class engagement. The seminar will be held entirely in English.

ECTS: 4

Notes:
Dieses Modul steht nur Studierenden des Master of Science in Psychologie (RVO19) offen. This module is only open to students of Master of Science in Psychology (RVO19).

Learning Outcome:
By the end of this seminar, you will be able to: 1) Understand and compare advanced methods in cognitive psychology, including different study designs, analytic approaches, and computational modeling. 2) Critically evaluate research articles that apply these methods and discuss their implications. 3) Apply these methods appropriately to design a research proposal addressing a novel question in cognitive psychology. 4) Communicate your ideas effectively in oral and written presentations.

Module Planning and conducting statistical simulation studies in R
06SM200o800h / Module

Description:

General description:
Simulationsstudien sind ein zentrales Werkzeug zur Untersuchung statistischer Verfahren. In diesem Seminar lernen die Teilnehmenden, wie sich mit Hilfe von Simulationen praktisch relevante Fragestellungen der Statistik systematisch untersuchen lassen - etwa, wie zuverlässig statistische Tests sind, wenn deren Annahmen verletzt werden. Neben der Planung und Durchführung von Simulationsstudien besprechen wir die Parallelen zur Versuchsplanung in klassischen Experimenten. Darüber hinaus werden grundlegende Arbeitstechniken aus dem Bereich Data Science eingeübt, zum Beispiel die Visualisierung von Daten und das Programmieren eigener Funktionen. Im Rahmen einer individuellen Projektarbeit wenden die Teilnehmenden das Gelernte praktisch an. Dabei werden aus Statistik 1 und Statistik 2 bekannte Verfahren wie t-Tests und lineare Regressionsmodelle untersucht. So entwickeln die Teilnehmenden durch eigenes Experimentieren im Rahmen von Simulationsstudien ein tieferes Verständnis für statistische Methoden.

ECTS: 4

Notes:
Dieses Modul steht nur Studierenden des Master of Science in Psychologie (RVO19) offen. This module is only open to students of Master of Science in Psychology (RVO19).

Learning Outcome:
Nach erfolgreichem Abschluss des Seminars verstehen die Teilnehmenden die grundlegenden Konzepte von Simulationsstudien und können eigenständig Simulationsstudien durchführen einschliesslich der Schritte: 1) Planung der Simulation, 2) Schreiben des R Codes und 3) Berichten und Diskutieren der Ergebnisse. Darüber hinaus lernen die Teilnehmenden einen flexiblen Umgang mit der Programmiersprache R kennen und erwerben Kenntnisse grundlegender Programmierkonzepte, die sich bei Bedarf auch auf andere Programmiersprachen wie zum Beispiel Python übertragen lassen.

Module Dishonesty, corruption, and unethical behavior: An introduction to behavioral ethics
06SM200o303d / Module

Description:

General description:
Social norms and ethical principles play an essential role for the coordination of social life. Yet, norms and ethical rules often demand to restrict self-serving behavior and violating them can lead to personal benefits. For example, cheating on an exam can be seen as an unfair shortcut for properly preparing for the exam and go through the effort of studying. Several high-profile corruption scandals, like the Diesel emission scandal in which authorities and consumers were misled on car emissions or the Panama Papers, revealing widespread practices of tax evasion, illustrate the societal damage that unethical behavior can have. In this seminar, we will discuss recent findings from the field of behavioral ethics that attempts to understand why people follow ethical principles and social norms and under what circumstances they violate them for personal profit. We will learn about different experimental paradigms that have been designed to confront participants with a conflict between following socially appropriate behavior or engaging in self-serving behavior that clashes with principles of honesty or fairness. Such experiments can reveal psychological mechanisms behind norm following and help to understand why people follow social norms and why and when they do not.

Module Social Behavior and Cognition in a Comparative Perspective
06SM200o303z / Module

Description:

General description:
What distinguishes humans from other animals in their social behavior? How can we design comparative studies to understand social behavior in humans and their closest relatives, the primates? This course provides an overview of research on sociality, ranging from our nearest living relatives, apes and monkeys to humans. Topics include social learning, prosociality, conformity, and the development of social relationships. We will discuss key literature together, and video materials from relevant research will be provided when appropriate.

ECTS: 4

Learning Outcome:
1. Gain knowledge of current theories and empirical findings on the evolution of social behavior, including social relationships, social learning, conformity, prosociality, and cooperation, in humans and non-human primates (particularly apes such as chimpanzees, bonobos, gorillas, orangutans, and gibbons). 2) Learn to develop a theoretical framework focusing on specific research questions within the range of social behaviors introduced in this course. 3) Strengthen skills in scientific presentation and discussion.

Module Development in the context of school and education
06SM200o703a / Module

Description:

General description:
Children and adolescents spend a significant part of their lives at school. This context helps children to develop. They learn to read, to write, to work together or alone. In short, they learn to learn. At the same time, children's development also proceeds independently of this context. Their bodies grow, their brains mature, their social and motor skills are refined. In this seminar, development in childhood and adolescence will be examined specifically in the context of the school. To this end, theoretical perspectives (e.g. how children learn) and their practical applicability will be related. The range of topics includes fundamental aspects such as intelligence, learning and motivation, but also more applied and complex phenomena such as bullying, school skipping, cultural diversity in the classroom, and their connection to school behaviour and performance.

ECTS: 4

Notes:
Dieses Modul steht nur Studierenden des Master of Science in Psychologie (RVO19) offen. This module is only open to students of Master of Science in Psychology (RVO19).

Learning Outcome:
1. Students are able to discuss the role of individual and contextual developmental factors in the school context from a theoretical, empirical and practical perspective. 2) Students are able to discuss the concepts from the course in groups, present them briefly and concisely in class, and evaluate and assess their practical implications. 3) Students learn about different forms of seminar design and are able to apply them in their presentation of an individual topic. 4) Students integrate and (critically) reflect on what they have learned in a learning diary on the basis of guiding questions. 5) Students are able to communicate research findings to a lay audience.

Module Identifying, understanding, and promoting motivation to change
06SM200o703h / Module

Description:

General description:
Änderungsmotivation bezeichnet die Bereitschaft und Motivation, aktiv etwas zu tun, um den eigenen Zustand zu verändern, festgefahrene Muster des Erlebens und Verhaltens zu durchbrechen oder gezielt persönliche Weiterentwicklung anzustossen. Das Seminar widmet sich diesem Konzept aus theoretischer und anwendungsbezogener Perspektive. Dabei werden sowohl konzeptionelle Grundlagen als auch aktuelle empirische Befunde aus der Motivationspsychologie sowie angrenzenden Disziplinen wie der Persönlichkeits-, Klinischen und Beratungspsychologie einbezogen. Inhaltlich wird es um drei zentrale Fragestellungen gehen: (1) Was ist Änderungsmotivation und wie lässt sie sich individuell erfassen oder identifizieren? (2) Wie entsteht Änderungsmotivation, wie wirkt sie und welche Einflussfaktoren spielen eine Rolle? (3) Welche Strategien, Techniken und Programme eignen sich, um Änderungsmotivation gezielt zu fördern? Dazu werden praxisnahe Ansätze zur Förderung und gezielten Stärkung der Änderungsmotivation in Anwendungsfeldern wie Bildung, Beratung, Coaching und beruflichen Kontexten erörtert. Das Format des Seminars basiert auf Referaten der Teilnehmenden und des Dozenten, Diskussionen in Kleingruppen und im Plenum sowie Übungen und Illustrationen der Themen. Das Seminar findet als Blockveranstaltung statt.

Module Mind the gap: From science to practice in psychotherapy
06SM200o703k / Module

Description:

General description:
Psychotherapy research aims to address a variety of questions related to clinical practice, particularly in the areas of psychopathology and clinical interventions. Specifically, it seeks to understand the factors and mechanisms that influence the onset, presentation, and maintenance of mental disorders, as well as their impact on the course and responsiveness to psychotherapy. This research establishes empirical foundations for assessing the effectiveness and efficacy of interventions, which not only support ethical clinical practice but also inform decision-making in public policy development (e.g., concerning reimbursement for specific treatments). Despite the crucial importance of implementing evidence-based interventions, a notable gap exists between clinical practice and research. Through the examination of different research designs, this course will address the potential strengths and limitations of interventions when applied in clinical practice. The importance of effectiveness studies will be highlighted, with a focus on how interventions are implemented in real-world settings and their impact on patient care. Participants will gain insight into the efficacy of various therapeutic approaches and interventions across common mental health disorders. Throughout the seminar, we will explore some of the most evidence-supported interventions and treatments for mental health, such as the Safety Planning Intervention for suicidal ideation, Mindfulness-Based Stress Reduction (MBSR), Cognitive Behavioral Therapy (CBT) for insomnia, and Dialectical Behavior Therapy (DBT) for borderline personality disorder, among others. Using these examples, students acquire the knowledge and skills to better understand and evaluate the theoretical and empirical basis of psychotherapeutic interventions and their research. Using these examples, the main goal of this seminar is to give students the knowledge and skills to understand evidence-based interventions and their research, helping them to improve the quality of mental health care and patient outcomes.

Module Applying Social Psychology to Social Problems
06SM200o701g / Module

Description:

General description:
The seminar deals with applied problems in social psychology. Current findings on prejudices and intergroup relationships (e.g., ethnicity, social class, gender, sexual orientation, and gender identity) are first discussed and deepened. Then, participants will learn about survey methods such as questionnaire design and sampling to assess, which will provide them with some relevant tools to study social inequalities. The imparted knowledge should be used to answer a practical question regarding prejudice and intergroup relationships. In small groups, the participants will develop a research proposal (from theoretical framing to data collection) to answer a given question, which will then be presented and discussed.

ECTS: 4

Notes:
Dieses Modul steht nur Studierenden des Master of Science in Psychologie (RVO19) offen. This module is only open to students of Master of Science in Psychology (RVO19).

Learning Outcome:
1. The students acquire/deepen their knowledge of intergroup relationships. 2) The students acquire/deepen their methodological skills. 3) The students are able to independently address a practical question in groups. 4) The students learn to draft a proposal and to reflect it critically: a) name, define, and illustrate relevant concepts of social and organizational justice b) summarize, analyze, compare, and contrast complex real-life cases in light of relevant concepts and theories c) propose coherent strategies to remedy to, and/or prevent real-life cases as well as weigh in the potential (dis)advantages of these strategies d) integrate theoretical propositions and empirical findings, and articulate them to derive hypotheses in a structured scientific report e) critically appreciate scientific evidence related to the seminar through the formulation of constructive discussion questions.

Module Mental disorders in children and adolescents
06SM200o701j / Module

Description:

General description:
Die Veranstaltung führt in die psychosozialen Grundbedürfnisse von Kindern und funktionale Entwicklungsbedingungen, welche es zu schaffen gilt, ein. Insbesondere wird der Frage der Resilienz nachgegangen. Nach einer Definition von psychischen Störungen im Kindes- und Jugendalter werden einige besonders zu berücksichtigende Aspekte der Diagnostik und Klassifikation vertieft Im Hauptteil werden vier Störungsbilder besprochen welche zu den insgesamt häufigsten Störungen bei Kindern und Jugendlichen gehören und entsprechend besonders häufig von Psychologinnen und Psychologen in der Praxis behandelt werden: Angststörungen, affektive Störungen, Störungen des Sozialverhaltens und Aufmerksamkeits- und Hyperaktivitätsstörungen. Es werden Diagnosekriterien, verschiedene theoretische Ansätze und Erklärungsmodelle, Verlauf und Prognose der vier Störungsbilder vorgestellt und anhand von Video- und Fallbeispielen illustriert. Im Vordergrund steht dabei, die Störungen in ihrem interpersonellen Kontext zu verstehen und die Wichtigkeit systemisch-verhaltenstherapeutischer Interventionen (Ansatzpunkte bei der Familie, in der Schule, bei Peers) zu erkennen. Die Studierenden sollen die Diagnostik, Klassifikationskriterien nach DSM-5 und ICD-11, die wichtigsten theoretischen Ansätze bei Angststörungen, affektiven Störungen, Störungen des Sozialverhaltens und ADHS kennenlernen und diese Störungsbilder in ihrem interpersonellen Bezugsrahmen verstehen lernen.

ECTS: 4

Notes:
Dieses Modul steht nur Studierenden des Master of Science in Psychologie (RVO19) offen. This module is only open to students of Master of Science in Psychology (RVO19).

Learning Outcome:
Die Studierenden werden mit folgenden Störungsgruppen des Kindes- und Jugendalters vertraut gemacht: Angststörungen, affektive Störungen, ADHS und Störungen des Sozialverhaltens. Sie lernen diese Störungsgruppen vertieft kennen und setzen sich mit theoretischen Erklärungsmodellen und diagnostischen Möglichkeiten (insbesondere im Rahmen der Verhaltensbeobachtung) auseinander.

Module Memory through the ages: A neuropsychological perspective on memory dynamics
06SM200o702b / Module

Description:

General description:
This course offers a neuropsychological perspective on different memory systems in the human brain, their neural implementation (with a special focus on neural oscillations) and their changes through diseases (such as dementia), training or healthy aging across the lifespan (from childhood to older adulthood). After an introduction to the topic and relevant research methods (such as EEG or TMS), the course contents will be conveyed based on central research papers, which will be evaluated in student presentations and panel discussions. The acquired knowledge will be compiled in short summaries throughout the course.

ECTS: 4

Notes:
Dieses Modul steht nur Studierenden des Master of Science in Psychologie (RVO19) offen. This module is only open to students of Master of Science in Psychology (RVO19).

Learning Outcome:
Upon successful completion of this seminar, students will have gained a deeper understanding of different memory processes, their neural signatures and their development over time, diseases and training and will have cultivated their ability to understand complex research papers (including typical neurophysiological methods to record and/or manipulate brain activity) and to present, discuss and summarize them in a concise and critical manner.

Module Diagnostics and prevention with couples
06SM200o702j / Module

Description:

General description:
Das Seminar ist eine Einführungsveranstaltung und richtet sich insbesondere an Studierende, die über geringe Kenntnisse im Bereich der Partnerschaftsforschung verfügen. Die Veranstaltung gibt einen Überblick über den aktuellen Stand mit Fokus auf diagnostische Messinstrumente, welche in der Forschung und Therapie mit Paaren Verwendung finden, und der Prävention von Partnerschaftsstörungen, welche vor dem Hintergrund hoher Scheidungsraten in westlichen Gesellschaften eine wichtige Rolle spielen. Basierend auf internationaler Grundlagenforschung zu Beziehungsstörungen und deren Determinanten, wurden Präventionsprogramme entwickelt, die vor allem darauf abzielen Kompetenzen zu fördern. Die Dozentin führt im ersten Teil in die Thematik ein und stellt zentrale Grundlagen der Paarforschung und der Prävention von Partnerschaftsstörungen vor. Die Studierenden werden nach dem ersten Kurstermin gebeten, sich in ein Präventionsprogramm für Paare (Paarlife, PaarBalance, Triple P und die Apps PAARADIES und Paired) einzuarbeiten und bis zum zweiten Kurstermin eine dreiseitige Hausarbeit darüber zu verfassen. Beim zweiten und dritten Termin werden die selbständig erarbeiteten Kenntnisse vertieft. Das Seminar enthält sowohl interaktive Teile als auch Inputreferate der Dozentin.

ECTS: 4

Notes:
Dieses Modul steht nur Studierenden des Master of Science in Psychologie (RVO19) offen. This module is only open to students of Master of Science in Psychology (RVO19).

Learning Outcome:
Die Studierenden können nach der Veranstaltung verschiedene Präventionsprogramme beschreiben, gegenüberstellen und kritisch reflektieren. Sie kennen zudem wichtige diagnostische Methoden und sind mit deren Auswertung und Interpretation vertraut.

Module Understanding the social determinants of mental health: Interventions to close the global treatment gap
06SM200o702k / Module

Description:

General description:
Mental health problems develop as a result of interconnected biological, psychological, and social processes. Increasing attention is now paid to the social determinants of health, which are structural factors that influence health and well-being. Some examples of social determinants include socioeconomic status, food security, neighborhood characteristics, and social support. These social determinants are also major risk factors for the onset and maintenance of mental health problems and underscore the necessity of addressing these factors when trying to reduce the mental health burden at a population level. This course will therefore address the following topics: (1) what are the major social determinants of mental health affecting populations around the world, (2) evidence-based interventions addressing the social determinants of mental health, and (3) key steps involved in developing these interventions.

ECTS: 4

Notes:
Dieses Modul steht nur Studierenden des Master of Science in Psychologie (RVO19) offen. This module is only open to students of Master of Science in Psychology (RVO19).

Learning Outcome:
At the end of this course, students will be able to:
(1) explain how structural factors (i.e., the social determinants of health) influence mental health
(2) describe an array of evidence-based interventions addressing social determinants of mental health
(3) apply key evidence-based intervention principles to address the social determinants of mental health
(4) compare and contrast the social determinants of mental health and their associated interventions in high- and low-income settings

Module Psychotherapy of Emotional Disorders
06SM200o702l / Module

Description:

General description:
Fokus des Seminars liegt auf der psychotherapeutischen Behandlung von Angst und affektiven Erkrankungen und aktuellen, neuen Entwicklungen in diesem Bereich, vor allem im Bereich der Kognitiv- verhaltenstherapeutischen, Erinnerungsbasierten, aber auch integrativen Ansätzen. Nach einem kurzen Einblick in Modell und Symptome einer ausgewählten emotionalen Störung werden im Seminar unterschiedliche aktuelle therapeutische Ansatzpunkte vorgestellt und innovative Methoden zu deren Erforschung und Weiterentwicklung diskutiert. Verschiedene Therapieansätze, z. B. "klassische" kognitive Verhaltenstherapie, Achtsamkeit, Transdiagnostische Therapieprogramme bis hin zu blended und eMental Health Interventionen, werden vorgestellt und diskutiert. Dabei sollen neben theoretischen Konzepten und aktuellen empirischen Befunden v.a. Interventionen demonstriert und innovative Methoden in Kleingruppen bearbeitet werden. Kleingruppen von Studierenden bereiten jeweils eine Sitzung vor, die gemeinsam und interaktiv gestaltet sein wird. Die Sitzungen bestehen somit aus Input-Referat sowie interaktiven Übungen, bei denen ausgewählte Therapieformen und deren empirische Evidenz vorgestellt und diskutiert werden. Anschliessend erfolgt eine Gruppendiskussion. Aktive Teilnahme der Seminarteilnehmer ist die Voraussetzung für ein stimulierendes und lehrreiches Seminar und sehr erwünscht!

Learning Outcome:
1. Die Studierenden können zentrale Symptome und psychologische Modelle ausgewählter Angst- und affektiver Störungen (z.B. Phobien, Panikstörung, Major Depression, PTBS) erläutern und deren Relevanz für die Auswahl und Begründung spezifischer psychotherapeutischer Behandlungsansätze ableiten. 2) Die Studierenden sind in der Lage, verschiedene psychotherapeutische Verfahren (z.B. kognitive Verhaltenstherapie, interpersonelle Therapie, CBASP, transdiagnostische Programme) theoriegeleitet zu analysieren, hinsichtlich ihrer klinischen Anwendung zu reflektieren und kritisch anhand aktueller empirischer Evidenz zu bewerten. 3)Die Studierenden können Forschungsansätze zur Wirksamkeit und zu Wirkmechanismen psychotherapeutischer Interventionen beschreiben, unterschiedliche Studiendesigns (z.B. RCTs, Prozessforschung, Einzelfallstudien) einordnen und deren Aussagekraft im Kontext evidenzbasierter Psychotherapie kritisch diskutieren.

Module Psychotherapy Research – Concepts, Methods, Evidence
06SM200o702m / Module

Description:

General description:
Infolge der zunehmenden Digitalisierung und Verbreitung digitaler Kommunikationsmedien eröffnen sich neue Möglichkeiten zur Verbesserung der psychosozialen Versorgung. Gleichzeitig sieht sich die klinische Psychologie und Psychotherapie vor neue Herausforderungen gestellt. Internetgestützte Interventionen und therapeutische Apps erhalten Einzug in die Versorgungspraxis und werden als Ergänzung oder gar Alternative zur Behandlung psychischer Störungen diskutiert. Zum anderen treten infolge exzessiven Mediengebrauchs neue Störungsbilder in Erscheinung, die als problematisch und klinisch behandlungsbedürftig erachtet werden. Im Seminar werden Modelle und Ansätze digital vermittelter Interventionen zur Prävention und Behandlung psychischer Störungen vorgestellt. Anhand praktischer Anwendungsbeispiele werden Besonderheiten, Chancen und Grenzen der digitalen Ansätze diskutiert, wobei der Fokus auf eine kritische Reflektion der empirischen Forschung zur Wirksamkeit der Interventionen gelegt wird. Im Weiteren werden aktuelle Entwicklungen im Hinblick auf die klinische Einordnung, Diagnostik und Behandlung neuerer Störungskonzepte, wie bspw. Online- Spielsucht, behandelt.

ECTS: 4

Notes:
Dieses Modul steht nur Studierenden des Master of Science in Psychologie (RVO19) offen. This module is only open to students of Master of Science in Psychology (RVO19).

Learning Outcome:
Vermittlung eines Überblicks über Konzepte und Ansätze internetbasierter Interventionen und therapeutischer Apps in der klinischen Psychologie und Psychotherapie, über die grundlegenden Prozesse der computer-vermittelten Kommunikation und ethisch-rechtliche Grundlagen zur kritischen Einordnung der Ansätze. Vermittlung von Kenntnissen zur Bewertung der empirischen Befundlage im Hinblick auf die Wirksamkeit der Interventionen. Erwerb von Kenntnissen zur Epidemiologie, Diagnostik und Behandlungsansätzen des pathologischen Gebrauchs digitaler Medien.

Module Methods of cognitive-behavioral therapy with children and adolescents
06SM200o702n / Module

Description:

General description:
In diesem Seminar werden respondente, operante und kognitive Methoden zur Behandlung von Ängsten, Depressionen, ADHS und Störungen des Sozialverhaltens bei Kindern und Jugendlichen aufgezeigt, in Rollenspielen geübt und zuhause in Übungen vertieft. Bei den respondenten Methoden werden die systematische Desensibilierung und Expositionsverfahren in vivo besprochen. Innerhalb der operanten Methoden werden Verfahren zur Erhöhung positiven Verhaltens (Token economies) und solche zur Reduktion von störendem Verhalten (Stiller Stuhl, Time out) behandelt. Bei den kognitiven Verfahren steht die kognitive Umstrukturierung im Vordergrund. Schliesslich wird in die Möglichkeiten des Modelllernen und der Technik des Promptings vorgestellt. Nach kurzen Einführungsvorträgen der Studierenden werden die Methoden im Plenum anhand von Beispielen vertieft. Dabei wird aufgezeigt, dass Therapie mit Kindern/Jugendlichen zum einen immer systemisches Vorgehen auch innerhalb der Verhaltenstherapie bedeutet (Einbezug von Eltern, Lehrpersonen etc.), und zum anderen anhand einer sorgfältigen funktionalen Bedingungsanalyse (SORCK) massgeschneidert, d.h. individuell angepasst werden muss.

ECTS: 4

Notes:
Dieses Modul steht nur Studierenden des Master of Science in Psychologie (RVO19) offen. This module is only open to students of Master of Science in Psychology (RVO19).

Learning Outcome:
Die Studierenden lernen verschiedene therapeutische Methoden der Verhaltenstherapie mit Kindern und Jugendlichen theoretisch und praktisch kennen und sollen diese in begleiteten Übungen selber anwenden lernen.

Module Obsessive–compulsive spectrum - between comparing, checking, and impulse control problems
06SM200o404b / Module

Description:

General description:
Waschen, kontrollieren, zählen, grübeln, vergleichen, den Glücksbringer zur Klausur mitnehmen - wir alle kennen in unserem Erleben und Verhalten verschiedene Aspekte, die mit Zwangsstörungen assoziiert sind - doch ab wann werden diese zu einem Zwang, dem sich nicht oder nur schwer widersetzt werden kann? Wann sind Rituale hilfreich, wann führt ritualisiertes Verhalten zu mehr Leidensdruck? Neben den Zwangsstörungen (Zwangshandlungen oder/und Zwangsgedanken) gibt es weitere Störungsbilder, bei denen die Betroffenen unter einem hohen inneren Druck leiden, bestimmte Verhaltensweisen oder Gedanken immer wieder wiederholen zu müssen, hierzu zählen z.B. pathologisches Stehlen (Kleptomanie) oder die Körperdysmorphe Störung. Diese Störungsbilder werden seit dem DSM-5 unter dem Oberbegriff Zwangsspektrumsstörungen zusammengefasst. Inhaltliche Schwerpunkte des Seminares sind - neben Diagnostik und Differentialdiagnostik - begriffliche Klärungen, sowie Theorien und Modelle zur Erklärung und Entstehung von Zwangsspektrumsstörungen. Anschliessend werden wir uns mit der Psychopathologie einzelner Zwangsspektrumsstörungen auseinandersetzen, um so gemeinsame und differenzierende Merkmale herauszuarbeiten, die Ansatzpunkte für die Psychotherapie sind. Als Ausblick werden in einem letzten Teil zentrale Behandlungsmethoden der modernen kognitiven Verhaltenstherapie im Überblick dargestellt.

ECTS: 4

Learning Outcome:
1. Abgrenzung: Was ist normal, was ist pathologisch? Kriterien von pathologischen Zwangsspektrumsstörungen kennen.
2. Wichtigste Erklärungsmodelle für Zwangsstörungen erklären und anwenden können.
3. Störungsbilder und Diagnosekriterien diverser Zwangsspektrumsstörungen kennen.
4. Evidenzbasierte Behandlungsmöglichkeiten und deren Grundprinzipien im Überblick kennen.

Module Clinical research on trauma-related disorders
06SM200o404e / Module

Description:

General description:
In der Folge von psychischen Extrembelastungen, sogenannten Traumatisierungen, kann sich das Störungsbild einer (Komplexen) Posttraumatischen Belastungsstörung ((K)PTBS) herausbilden. Die (K)PTBS ist ein gut erforschtes Störungsbild mit klaren Empfehlungen zur Behandlung. Dennoch gibt es gerade aufgrund einer neuen Definition der diagnostischen Kriterien im Rahmen des ICD-11 viele Fragen hinsichtlich Diagnostik, Phänomenologie und therapeutischen Ansätzen. Um praxisrelevante Aussagen treffen zu können, ist es wichtig, das Störungsbild und ihre Behandelbarkeit in einem psychotherapeutischen Versorgungskontext zu erforschen, wobei es hier spezifische Herausforderungen gibt. Dieses Seminar vertieft parallel die zwei Schwerpunkte (K)PTBS und klinische Forschungsmethoden. Die Unterrichtsform ist eine Mischung aus online- bzw. Selbststudium-Terminen und Blockseminaren in Präsensform und soll die Teilnehmenden dazu befähigen, selbst das Spannungsfeld dieser beiden Themenbereiche zu erleben. Das Seminar ist geeignet für Teilnehmende, die sich für das Störungsbild der Traumafolgestörungen interessieren und motiviert sind, ihre Kenntnisse im Bereich Forschungsmethoden auszubauen.

ECTS: 4

Learning Outcome:
Die Teilnehmenden ...
1. ... kennen die Grundlagen der Klassifikation und Diagnostik von Traumafolgestörungen sowie die Grundlagen von Psychotherapie von Traumafolgestörungen
2. ... vertiefen eigenständig einen Aspekt der klinischen Forschung von Traumafolgestörungen
3. ... kennen die Herausforderungen, die klinische Forschung im Versorgungskontext mit sich bringt
4. ... können ein Forschungskonzept im Bereich klinische Forschung erstellen und präsentieren

Description:

General description:
In diesem Seminar wird die innovative Netzwerkperspektive auf psychische Störungen vorgestellt. Anstatt psychische Erkrankungen als Ausdruck verborgener Ursachen zu betrachten, werden sie als dynamische Netzwerke miteinander interagierender Symptome verstanden. Auf Basis aktueller Literatur werden Störungsübergreifende Netzwerke, neue methodische Ansätze und Implikationen für Diagnostik, Therapie und Prävention diskutiert. Ziel ist es, ein tieferes Verständnis psychischer Störungen zu fördern und innovative klinische Anwendungen zu erschließen.

Module Psychopathology of body image: disorders, assessment, and psychotherapeutic interventions
06SM200o404x / Module

Description:

General description:
Störungen des Körperbildes stellen einen zentralen psychopathologischen Faktor bei verschiedenen psychischen Erkrankungen (z.B. Körperdysmorphe Störung, Essstörungen) dar und sind mit erheblichem Leidensdruck, funktionellen Einschränkungen sowie einem erhöhten Risiko für Komorbiditäten verbunden. Das Seminar vermittelt einen systematischen Überblick über die Psychopathologie des Körperbildes, dessen Ätiologie sowie diagnostische und therapeutische Zugänge.
In einer Einführung werden grundlegende Konzepte des Körperbildes, seine dimensionalen Komponenten (perzeptiv, kognitiv-affektiv, behaviorale Ebene) sowie entwicklungspsychologische und soziokulturelle Einflussfaktoren vorgestellt. Darauf aufbauend werden zentrale Körperbildstörungen und körperbildbezogene Symptome bei unterschiedlichen psychischen Störungsbildern betrachtet. Ein besonderer Fokus liegt auf der diagnostischen Einordnung, Abgrenzung und Komorbidität der Störungen.
Im weiteren Verlauf des Seminars werden evidenzbasierte psychotherapeutische Interventionen zur Behandlung von Körperbildstörungen vorgestellt und diskutiert, insbesondere aus kognitiv-verhaltenstherapeutischer Perspektive. Die Studierenden setzen sich kritisch mit empirischen Befunden zur Wirksamkeit dieser Interventionen auseinander.

Module The effects of monolingual and bilingual language acquisition
06SM200o701a / Module

Description:

General description:
In diesem Seminar tauchen wir in die faszinierende Welt der Mehrsprachigkeit ein und beleuchten, wie der Erwerb von zwei oder mehr Sprachen das menschliche Leben prägt. Dabei beschäftigen wir uns mit den grundlegenden entwicklungspsychologischen Aspekten des Spracherwerbs und untersuchen die Unterschiede und Gemeinsamkeiten zwischen monolingualem und bilingualem Spracherwerb. Ein zentraler Schwerpunkt des Seminars ist der mehrsprachige Spracherwerb im Laufe des Lebens. Welche Veränderungen zeigen sich im Kindes-, Jugend- und Erwachsenenalter? Und wie lassen sich die Erkenntnisse über Mehrsprachigkeit in verschiedenen Lebenskontexten sinnvoll anwenden? Gemeinsam mit dem Co-Seminarleiter Dr. Sebastian Sauppe fokussieren wir auf Themen wie die Rolle der Gebärden- und Lautsprache, die Bedeutung von Dialekten in der Schweiz. Der Einfluss linguistischer Distanz auf Sprachkompetenz steht ebenso im Fokus wie die Veränderungen des multilingualen Spracherwerbs über die Lebensspanne. Das Seminar ist interaktiv aufgebaut. Im Vordergrund steht die kritische Reflexion von Forschungsergebnissen und Alltagswissen zum Thema Mehrsprachigkeit. Das Seminar bietet dementsprechend eine Plattform für Diskussionen, wissenschaftliche Analysen und praxisnahe Einblicke in ein Thema, das nicht nur in der Schweiz, sondern weltweit von grosser Bedeutung ist.

Module Methods of a lifespan developmental psychology
06SM200o701b / Module

Description:

General description:
Ab 2024 werden in Zürich und einigen weiteren Standorten zunehmend mehr Längsschnittstudien mit Daten verfügbar, die über 70 und mehr Jahre psychologische Entwicklungsdaten erhoben haben. Gleichzeitig erlauben neuste technische Entwicklungen die Verknüpfung von unterschiedlichsten Datenquellen, die retrospektive Rekonstruktion von Längsschnittdaten («Retro-Harvesting») und die analytische Integration einer Vielzahl von Informationsquellen über die menschliche Entwicklung. Damit kann in naher Zukunft Entwicklung nicht nur in einzelnen Lebensabschnitten empirisch untersucht werden, sondern tatsächlich über die gesamte Lebensspanne. Damit wird sich die entwicklungspsychologische Forschung grundlegend verändern und ganz neue Erkenntnis- und Interventionsmöglichkeiten bieten. Um für diese Zukunft gerüstet zu sein, sind Kenntnisse über eine Reihe von Methoden erforderlich. Das Seminar vermittelt einen grundlegenden Überblick über die wichtigsten Methoden für eine an der gesamten Lebensspanne ausgerichteten Forschung.

2. Fähigkeit zur kritischen Bewertung von an der Lebensspanne ausgerichteten Forschungs- und Interventions-Designs.
3. Fähigkeit zur Formulierung eigenständiger Vorhersagemodelle über psychologische Entwicklung über mehrere Jahrzehnte.

Module An Introduction to Social Dilemmas and Human Cooperation
06SM200o701e / Module

Description:

General description:
Humans cooperate with one another daily, whether by respecting traffic lights, paying taxes, or sharing the last piece of their favorite cake with a friend. Cooperation can be defined as a behavior that benefits someone else at a cost to oneself. This poses a puzzle in evolutionary biology: if the fittest survives and cooperation is a net loss in fitness, cooperative behavior should never have evolved. This idea is supported by game theory and traditional economic theories, which investigate cooperation with the use of so-called social dilemmas. A social dilemma is a situation in which individual interests conflict with the well-being of the collective. While mutual cooperation yields the best outcome for the group, each individual is better off free-riding on the efforts of the others. Therefore, it is expected that individuals should not cooperate with each other. Yet, empirical studies reveal that we cooperate at remarkably higher rates than initially predicted. In this seminar, we will examine the unique aspects of human cooperation through the findings of experimental research, using social dilemmas within a behavioral economics framework. We will cover the proposed mechanisms that might make cooperation evolutionarily feasible, as well as their limitations. Then, we will examine the roles of reputation, sanctions, communication, social norms, culture, and emotions. Finally, we will explore current research directions in the field. This seminar is designed to be highly interactive and collaborative, with the success of each session relying on the active engagement and preparation of all participants. It will typically follow this structure: 1) an introduction of the topic from the lecturer, 2) a student-led presentation and discussion of additional research findings, 3) a student-led class discussion on the session's topic, 4) a brief summary by the lecturer.

ECTS: 4

Notes:
Dieses Modul steht nur Studierenden des Master of Science in Psychologie (RVO19) offen. This module is only open to students of Master of Science in Psychology (RVO19).

Learning Outcome:
Students that successfully complete this course will be able to describe the literature on social dilemmas, from seminal papers to recent research trends. Specifically, they will be able to present research papers on the subject, as well as combining the topics in order to facilitate a discussion in the class.

Description:

General description:
In der Forschung besteht ein wachsendes Interesse daran, Gesundheit im natürlichen Umfeld und alltäglichen Leben von Personen zu verstehen. Zur Datenerfassung von Gesundheit im Alltag, werden sogenannte Ambulatory Assessment Methoden (z.B. Tagebücher, Experience Sampling, Aktivitätsmonitore), die als ökologisch valide gelten, eingesetzt. Gegenstand dieses Seminars werden verschiedene Methoden des Ambulatory Assessments und deren Einsatz für gesundheitsrelevante Prozesse sein. Dabei wird die Anwendung solcher Erfassungsmethoden in verschiedenen Kontexten illustriert. Zudem sollen die methodischen Grundlagen der Auswertung solch zeitintensiver Daten erarbeitet werden.

Module Typical and atypical brain development
06SM200o572 / Module

Description:

General description:
This seminar will provide an introduction into the field of typical and atypical brain development. The human brain is a product of various complex and interacting processes. It is influenced by genetic and environmental factors alike. We will work through the literature of typical brain development from the moment of conception (in utero) throughout infancy, early childhood, adolescence and into young adulthood. This may include a background of different methods and techniques, though our focus will lay on functional and structural neuroimaging (MRI) studies. We will consider practical and technical aspects of pediatric neuroimaging. The seminar includes a combination of theoretical background and cutting-edge, novel research reviews on articles providing thought-provoking ideas on various factors influencing typical brain development. It will be discussed how, when and why they may result from deviations of the mechanisms known to guiding healthy brain development. Course topics may include: paediatric neuroimaging, brain plasticity in childhood/adolescence, early adversity and the brain, stress, developmental disoders, adolescence, the learning brain, brains vs. machines.

Learning Outcome:
1. Knowing and exploring the major steps and theories of human brain development.
2. Knowing the current literature on typical and atypical brain development.
3. Knowing some of the most common developmental and mental health disorders that have a suggested neurobiological foundation

Description:

General description:
The seminar consists of three parts: 1) In the first part, we will discuss how time is perceived in the brain across different cognitive processes and corresponding neural mechanisms. 2) In the second part, we will discuss neural signatures of cognitive control with a particular focus on plasticity (also in applied contexts, for instance, related to video gaming, flight performance, etc.). 3) In the third part, we will look at the brain's ability to handle distracting events during memory processes in healthy as well as atypical development samples.

Module Neurophysiological Experimentation: Implementation and Analysis
06SM200o576 / Module

Description:

General description:
In diesem Blockkurs werden Daten einfacher neurophysiologischer EEG-Experimente erhoben und ausgewertet. Die praktische Arbeit der Datenerhebung im Labor, sowie die Signalvorverarbeitung, statistische Auswertung und Datenvisualisierung soll den Teilnehmenden eine Einführung in den Ablauf einer experimentellen Studie gewähren. Die Veranstaltung richtet sich daher insbesondere an Studierende, die eine Masterarbeit im Bereich eines neurophysiologischen Experiments anstreben. Da ein Teil des Leistungsnachweises darin besteht, eigene Analyseskripte zu programmieren, werden die Studierenden vor und während des Kurses in die Programmiersprache MATLAB eingeführt.
Voraussetzung für die Teilnahme am Kurs ist daher das Absolvieren eines kurzen Online-Vorbereitungskurses (ca. 2h), in dem die Studierenden mit den Grundlagen des Programmierens in MATLAB und digitaler Signalverarbeitung eingeführt werden.

Module New Frontiers in Youth Research: Risky and Unhealthy Behaviors During Adolescence
06SM200o579 / Module

Description:

General description:
The developmental period of adolescence involves many biological, psychological, and social transitions. Indeed, with its manifold transitions, adolescence constitutes a period of unique opportunity and vulnerability. For example, adolescence is characterized by heightened vulnerability to several forms of psychopathology, and increases in risky (e.g., problematic substance use, violence, self-harm) and unhealthy (e.g., poor sleep) behaviors. In this seminar, we review recent empirical work on adolescents' risky and unhealthy behaviors and their links with mental health.

ECTS: 4

Notes:
Dieses Modul steht nur Studierenden des Master of Science in Psychologie (RVO19) und des Master of Arts (RVO19) in Fachwissenschaft Pädagogik und Psychologie offen. This module is only open to students of Master of Science in Psychology (RVO19) and of Master of Arts (RVO19) in Educational Science and Psychology.

Learning Outcome:
In this course, your primary mission is to become an expert on the challenges and opportunities of adolescence and, more specifically, to gain an understanding of common forms of risky and unhealthy behaviors during adolescence from a developmental perspective. By the end of the course, you should be able to: 1) Understand key constructs in the scientific study of adolescence. 2) Demonstrate knowledge of conceptual models and methodological approaches that are used in this field of research. 3) Demonstrate a thorough understanding of the opportunities and challenges that adolescents encounter with respect to risky and unhealthy behaviors. 4) Clearly express/articulate your ideas and knowledge about class topics in class, in group discussions, in presentations, and in writing.

Module Self-control and self-regulation
06SM200o550 / Module

Description:

General description:
Die Themenbereiche Selbstkontrolle und Selbstregulation befassen sich mit dem zielgerichteten Handeln von Personen. Dies beinhaltet nicht nur das Setzen von Zielen und warum man sich auch manchmal von (wichtigen) Zielen ablöst, sondern auch, wie im alltäglichen Leben diese Ziele durch das eigene Verhalten, Denken und Fühlen erreicht bzw. vorangetrieben werden, oder warum dies leider auch scheitern kann (und man den Cookie eben doch isst, auch wenn man eigentlich abnehmen möchte). Ziel dieses Seminars ist es, wichtige Modelle und Theorien zu Selbstkontrolle und Selbstregulation zu verstehen und sich im Lesen, Verstehen und Präsentieren von wissenschaftlichen Artikeln zu üben.

Description:

General description:
Personality is usually thought about as a stable tendency for people to be different from one another. But underneath this stability are processes that characterize and drive behavior. These include how people interact and are affected by their environment, how people change over time, and how people vary from one situation to the next. Understanding personality processes requires wrestling with issues involving theory, timescale, assessment, and data analysis, and these issues are front and center in contemporary personality psychology science, In this course we will review theories of personality processes and the methods used to study them, with a focus on contemporary perspectives.

ECTS: 4

Notes:
Dieses Modul steht nur Studierenden des Master of Science in Psychologie (RVO19) und des Master of Arts (RVO19) in Fachwissenschaft Pädagogik und Psychologie offen. This module is only open to students of Master of Science in Psychology (RVO19) and of Master of Arts (RVO19) in Educational Science and Psychology.

Learning Outcome:
1. Understand theoretical models of personality processes.
2. Be familiar with empirical methods used to study personality process.
3. Know the empirical evidence regarding the importance of personality processes for individual differences and real-world outcomes.

Module Using Real-World Data to facilitate Wellbeing and Health
06SM200o555 / Module

Description:

General description:
In der Psychologie und Medizin spielt die empirische Forschung eine sehr wichtige Rolle bei der Untersuchung von Verhalten, für das Verständnis von Erkrankungsmechanismen und die Entwicklung neuer Behandlungsmethoden. Durch Experimente und klinische Studien haben wir in der Vergangenheit viele neue Erkenntnisse gewonnen, sie können jedoch nicht alle Fragen beantworten. Abseits der Forschung sammeln Menschen mithilfe von Apps und Wearables heutzutage so viele Daten über sich wie noch nie und dokumentieren damit ihr alltägliches Leben im Hinblick auf Schlaf, Bewegung, Vitalität, Ernährung, Stress etc. Diese wertvolle Datenressource wird bislang durch die Forschung zu Gesundheit und Wohlbefinden kaum genutzt. Das Ziel dieses Seminars besteht darin aufzuzeigen, wie die Nutzung von alltagsbasierten Real-World-Daten (z.B. Sensordaten von Smartwatches) zu einem höheren individuellen Erkenntnisgewinn und somit zur Entwicklung von individualisierten, kontextualisierten Vorhersagen und «just-in-time»-Interventionen beitragen kann. Die Studierenden werden sich mit der Fülle an Informationen, die gesundheitsrelevante Real-World-Daten und Kontexte bieten, auseinandersetzen und das Potential und die Herausforderungen, die diese Datenressource mit sich bringt, kennenlernen. Darüber hinaus soll das Seminar zur Entwicklung von Ideen anregen, wie die Nutzung von Real-World-Daten optimiert werden kann, um sowohl für das Individuum als auch für die Gesellschaft einen Mehrwert zu schaffen.

Learning Outcome:
1. Kennen grundlegende Konzepte der Entwicklung über die Lebenspanne sowie aktuelle Definitionen von "Gesundem Altern" bzw. von «Gesunder Langlebigkeit».
2. Entwickeln ein Verständnis der grossen Heterogenität des Entwicklungs-/Alterungsprozesses.
3. Kennen das Konzept von Just-in-time Adaptive Interventions.
4. Kennen die Vielfältigkeit und Charakteristika von gesundheitsrelevanten, Real-World-Daten.
5. Wissen, dass gesundheitsrelevante Real-World-Daten zu einem höheren individuellen Erkenntnisgewinn und zur Entwicklung von individualisierten, kontextualisierten Interventionen zur Erhaltung von Gesundheit und Wohlbefinden beitragen können.
6. Entwickeln Ideen zur optimierten Nutzung gesundheitsrelevanter Real-World-Daten.

Module Introduction to programming and scientific computing
06SM200o557 / Module

Description:

General description:
This course provides a comprehensive introduction to programming and scientific computing tailored for master's students in psychology. It is designed to equip students with foundational programming skills and the computational tools necessary for modern research and data analysis in both academic and industry settings. Students will learn core programming concepts, including data structures, control statements, loops, custom function creation, code optimization, and debugging. The course will emphasize practical skills, such as working with a command-line terminal, implementing version control with Git and GitHub, and structuring and organizing coding projects for clarity and reproducibility. Advanced topics will include parallelization techniques and deploying code on high-performance computing clusters. Good coding practices, including documentation, testing, and maintaining clean, efficient code, will be a central focus, ensuring students are prepared for collaborative and reproducible research environments. The skills developed in this course will lay the groundwork for more advanced courses in the program and are directly applicable to coding psychological experiments, implementing advanced analytic techniques, and developing computational models. By the end of the course, students will have the confidence and competence to apply programming to solve complex research problems and bridge the gap between computational methods and psychological inquiry. The course will interleave lecture and lab sessions. Students should come with laptops with the R language installed.

Die Studierenden nehmen frühzeitig - am besten im Vorsemester und vor allem vor der Buchung des Moduls - mit dem/der Prüfer/in Kontakt auf, um die Themen- und Literaturliste abzusprechen und einen Prüfungstermin festzulegen. Der Richtwert zum Umfang der Literaturliste umfasst drei wissenschaftliche Monografien/Herausgeberwerke plus vier Zeitschriftenartikel/Beiträge aus Herausgeberbänden verteilt auf ein oder zwei Prüfungsthemen. Die Prüfung wird innerhalb der vorgegebenen Bewertungsfristen und zu einem mit der Betreuungsperson individuell vereinbarten Termin abgelegt. Idealerweise findet die Prüfung zu Beginn der Vorlesungszeit statt.

This module is initiated by students and conducted in groups (from two to a maximum of three students). In reading and learning groups, a jointly selected topic from the focus on Education and Working Environment is worked on in cooperation. The oral examination lasts 30 minutes and is taken with a professor or private lecturer of your choice who is involved with a module in the focus on Education and Working Environment. The content and details of the oral examination are to be agreed upon with the examiner prior to booking. Students contact the examiner early - preferably in the pre-semester and especially before booking the module - to agree on the list of topics and literature and to set an examination date. The guideline for the scope of the literature list comprises three scientific monographs/editorial works plus four journal articles/contributions from edited volumes distributed over one or two examination topics. The examination will be taken within the given assessment deadlines and on a date individually agreed with the supervisor. Ideally, the exam will take place at the beginning of the lecture period.

Um die aktuelle archäologische Forschung ebenfalls zu erleben, ist u.a. ein Besuch der Zürcher Ausgrabung auf dem Monte Iato geplant, aber auch Orte wie Palermo, Agrigent, Segesta, Piazza Armerina und Syrakus werden auf unserem Reiseplan stehen.

Module EEE 317 Species Interactions: Theory, Experiments and Field Surveys
07SMEEE317 / Block Course

Description:

General description:
On this course, you will study the many forms of species interaction, such as competition and predation, and how these influence species abundance and distributions, as well as coexistence and stability.

This research-based course involves working in small teams to conduct a research project. You will learn how to pose a research question, formulate hypotheses and predictions, conduct experiments or surveys (including managing their logistics), analyse and manage data, synthesise and critically assess the available literature on your topic, and communicate your results effectively in reports and presentations.

We will review the basics of survey and experimental design, and literature management. For the rest of the course, you will carry out research projects in the field and laboratory.

One of our projects will involve studying the distribution of salamander larvae in response to resource availability and top predators across the canton of Zurich. For the second project, we will study the foraging behaviour of salamander larvae in the laboratory.

ECTS: 6

Module «Doing transitions» in working life
06SM233-505 / Module

Description:

General description:
Erwerbsbiografien gestalten sich ausgehend vom Übergang von der Schule ins Erwerbsleben als eine Folge von grossen und kleinen Übergängen. Einige dieser Übergänge sind institutionalisiert und werden - insbesondere für Zielgruppen, die an diesen Übergängen erhöhten Risiken ausgesetzt sind - häufig auch pädagogisch begleitet, z.B. die Berufsorientierung und -wahl. Aber auch andere Übergänge sind konstitutiv für den Verlauf der Erwerbsbiografie und werden in der Regel von informellen Lernprozessen sowie teilweise auch von pädagogischen Angeboten begleitet, z.B. der Wechsel des Arbeitgebers, die Übernahme einer speziellen Funktion oder einer Führungsaufgabe oder die Qualifizierung für ein neues oder erweitertes Tätigkeitsfeld. Auch die Weiterführung der Erwerbstätigkeit nach Unterbrüchen, z.B. durch Sorgearbeit, Krankheit, Arbeitslosigkeit oder ein Sabbatical, ist häufig durch pädagogische Angebote begleitet. Mit dem Konzept des «doing transitions» wird die Vielfalt der erwerbsbiografischen sichtbar und die damit verbundenen Praktiken des Lebenslangen Lernens analysierbar. Das Modul legt hierauf den Schwerpunkt und im Seminar werden verschiedene erwerbsbiografische Übergänge und ihre Verbindung mit Praktiken des Lebenslangen Lernens auf der Basis wissenschaftlicher Texte und ergänzender Zugänge erarbeitet.
Das Modul wird ab FS 2026 jedes zweite Frühjahrssemester angeboten.

ECTS: 6

Learning Outcome:
- Die Studierenden kennen das Konzept des «doing transitions» und können es anwenden, um Übergänge in der Erwerbsbiografie zu analysieren.
- Sie können die Initiierung, Bewältigung und Gestaltung dieser Übergänge als Praktiken des Lebenslangen Lernens im Kontext von Erwerbstätigkeit analysieren und sie in Bezug auf Rahmenbedingungen und Subjektpositionen diskutieren.
- Sie können über ein thematisch fokussiertes Gespräch einen Einblick in das subjektive Erleben von Übergängen gewinnen und eigene Lernerfahrungen im Kontext von Übergängen reflektieren

Module Hearing and listening – historical and anthropological perspectives on auditory perception
06SM760o002 / Module

Description:

General description:
Auf eine der Kernfragen der Anthropologie des 18. Jahrhunderts, jene nach dem Zusammenspiel von Leib und Seele, antwortet Johann Georg Sulzers «Allgemeine Theorie der schönen Künste» anhand einer Gegenüberstellung von auditiver und visueller Wahrnehmung. Das Ohr sei weit tauglicher als das Auge, Leidenschaft zu erwecken. Aus welchem Grund? Die Luft, welche die Nerven des Gehörs anrege, sei als Element sehr viel gröber als das Licht, das auf das Auge wirke. «Daher können die Nerven des Gehörs, wegen der Gewalt der Stöße, die sie bekommen, ihre Würkung auf das ganze System aller Nerven verbreiten»; und so werde begreiflich, «wie man durch Töne gewaltige Kraft auf den ganzen Körper, und folglich» - nämlich mittels Resonanz - «auch auf die Seele ausüben» könne (Sulzer, Zweyter Theil, Leipzig 1774, Artikel «Musik», S. 781). Dieses Beispiel, aber auch Johann Gottfried Herders Überlegungen zu Wesen und Bedeutung des Hörsinns bilden den historischen Ausgangspunkt des Seminars, in dem es im Grundsatz darum geht, eine Geschichte der Auseinandersetzung mit menschlichem Hören - und zwar in erster Linie dem Hören von Musik oder musikalischen Parametern - anhand ausgewählter Stationen nachzuzeichnen. Hierzu greifen wir auf Quellentexte zurück, die sich unterschiedlichen Disziplinen zuordnen lassen: insbesondere der anthropologisch akzentuierten Ästhetik und Philosophie, aber auch der Sinnesphysiologie, Musikpsychologie oder -soziologie. Dabei spannen wir den Bogen bis in die zweite Hälfte des 20. Jahrhunderts, wo wir uns ausgehend von Raymond Murray Schafers Klassiker «The tuning of the world» (1977) mit dem Menschen in seiner akustischen Umwelt bzw. seiner Beziehung zu verschiedenen «Soundscapes» und dem Verhältnis von «Hören» und «Zuhören» befassen. In diesem Kontext widmen wir uns auch verschiedenen Konzepten einer «Ambient Music».

Learning Outcome:
Kenntnisse in musikwissenschaftlichen Themen, Darstellung und Diskussion wissenschaftlicher Fragestellungen und Gegenstände.

Module Music and Artificial Intelligence
06SM760o001 / Module

Description:

General description:
This course explores the evolving role of artificial intelligence in music, with particular attention to their historical development and cultural implications. Students will examine the use of artificial intelligence and algorithms in all aspects of music: creation, production, distribution, and cultural consumption. The course will provide a historical context of the use of AI and automated processes in music composition, from early examples of algorithmic composition to today's advanced generative systems. The course invites students to reflect on how AI reshapes important questions around how we create music and how we hear and value it. Issues of authoriality and attribution (who or what can be called a composer) will be examined alongside ethical concerns such as intellectual property, cultural appropriation, and bias and representation in AI systems.

ECTS: 3

Learning Outcome:
By the end of this course, students will be able to demonstrate an understanding of the main concepts about artificial intelligence as applied to music and other arts, both from a historical perspective and in relation to contemporary practices. They will show an awareness of current debates and trends on the role of AI in the humanities, particularly within the cultural and creative industries. Students will be able to critically engage with current philosophical, sociocultural, and musicological issues related to these technologies, including issues of authorship, creativity, and the ethical and societal implications of AI-generated music. They will also have acquired the ability to critically reflect on the broader cultural significance of AI and machines in contemporary society.

Module Operas of the 20th Century: a Zurich Perspective
06SM760o006 / Module

Description:

General description:
Im Seminar werden exemplarisch wichtige Opern des 20. Jahrhunderts behandelt, um einen Überblick über Entwicklungen im Musiktheater der Moderne zu erhalten. Die Auswahl der Werke orientiert sich dabei an den Zürcher Ur- und Erstaufführungen und wirft dadurch einen Blick in die lokale Musiktheatergeschichte, die über die «Internationalen Festwochen» bzw. die «Juni-Festspiele» in den 20er- und 30er-Jahren international wahrgenommene Produktionen bot. Dazu zählen bekanntermassen Alban Bergs «Lulu», Paul Hindemiths «Mathis der Maler» und Arnold Schönbergs «Moses und Aaron», aber auch andere Werke von Alexander Zemlinsky und Othmar Schoeck über Rudolf Kelterborn und Boris Martinů bis Heinz Holliger werden besprochen.

Module Arabic Music - from oral tradition to multimedia
06SM760o007 / Module

Description:

General description:
In diesem Seminar geht es zunächst um die historischen, philosophischen und theoretischen Hintergründe der arabischen Musik.
Ein Hauptaugenmerk soll jedoch auch auf den Veränderungen der letzten Jahrzehnte liegen, da sich das Verhältnis der arabischen Gesellschaften zur Musik sehr stark verändert hat. Dafür sind einerseits Einflüsse der Neuen Medien, welche sich insbesondere in der Popularmusik niedergeschlagen haben, verantwortlich. Nicht unbedeutend ist aber auch die Tatsache, dass viele Musiker und Musikerinnen Erwartungshaltungen eines an westlicher Musik geschulten Publikums erfüllen möchten. Dadurch wich u. a. die ursprüngliche Improvisation mehr und mehr der Komposition, welche in manchen Fällen zu klischeehaften Formeln zu gerinnen drohte. Strategien von arabischen Musikern und Musikerinnen (z. T. live via zoom dazugeschaltet), diesen Entwicklungen entgegenzuwirken und u. a. an genuin arabischen Traditionen anzuknüpfen, sollen dabei im Seminar diskutiert werden.

Module Thomas Nagel: Mortal Questions
06SM160o001 / Module

Description:

General description:
Thomas Nagels Buch "Mortal Questions" - auf Deutsch "Letzte Fragen" - ist eine Sammlung von 14 Essays sowohl zu fundamentalen Lebensfragen als auch zu grundlegenden Begriffen und methodologischen Themen der analytischen praktischen Philosophie. Deshalb verspricht eine Auseinandersetzung mit dieser inspiriert und einladend verfassten Lektüre nicht nur gedankliche Anschlussmöglichkeiten für ein breit interessiertes Publikum, sondern bietet auch hilfreiche Werkzeuge für das weitere Studium der Philosophie. Die textbasierten Diskussionen zu Lektürethemen wie Tod, der (allfälligen) Absurdität des Lebens, Sexueller Perversion, Gleichheit oder Krieg finden in einem geschützten Seminarrahmen statt. Wir lesen die Deutsche Übersetzung. Hörer sind willkommen.

ECTS: 6

Notes:
Studierende der Philosophie, die eine Seminararbeit verfassen wollen, buchen nach Absprache mit der Dozentin oder dem Dozenten ein entsprechendes Wahlpflichtmodul ohne Veranstaltung, in dessen Rahmen die Arbeit verfasst wird (vergl. programmspezifische Wegleitung): «Allgemeine Ethik».

Seminararbeitsbuchungen ohne vorherige Absprachemit der Dozentin werden zurückgewiesen.

Seminararbeiten, die mit Hilfe von ChatGPT verfasst werden, erhalten die Note 1.

Fähigkeit zur konstruktiven und textbezogenen Diskussion. Fähigkeit des Teilens eigener Gedanken in einem geschützten Raum mit anderen Studierenden und der Dozentin. Mentaler Mut. Geistige Offenheit.

Languages of Instruction:
Siehe Sprache der Lehrveranstaltung(en)

Merkmale:

Deiner Frage bereit hast. Jede Sitzung wähle ich einige Diskussionsfragen zur Besprechung im Plenum aus.

Module Invisible Archives
06SM480o002 / Module

Description:

General description:
In diesem Seminar beschäftigen wir uns mit den Staatssicherheitsarchiven bzw. Geheimdienstarchiven in Osteuropa zwischen 1945 und 1990. Diese Archive waren unsichtbar und sie dienten der Unsichtbarmachung, der «Liquidierung» und «Zersetzung», von kritischen Bürger:innen im Inland und dem Klassenfeind im Ausland. Was können wir heute aus diesen Archiven über die Diktaturen in Osteuropa, über Desinformation und «aktive Massnahmen» gegen Künstler:innen und kritische Intellektuelle erfahren? Wie funktionierten diese Archive und wie kann man heute in ihnen forschen? Wir verwenden Quellen-Material aus Staatssicherheitsarchiven in Tschechien, Polen, Ungarn, der DDR und Bulgarien, Quellenmaterial aus KGB-Archiven der 1930er Jahre und Fichen aus dem Bundesarchiv in Bern. Das Seminar wird abgeschlossen mit einer Exkursion in ein Archiv.

Module Historical-Comparative Linguistics
06SM480o011 / Module

Description:

General description:
Dieses Modul ist der Geschichte der slavischen Sprachen gewidmet. Inhalte können sowohl den Sprachwandel (phonologischer Wandel, morphologischer Wandel, syntaktischer Wandel etc.) selbst, als auch die äusseren Faktoren, die die Entwicklung einer Sprache beeinflussen können, betreffen. Module Introduction to Ukrainian Studies: History, Culture and Media (Hybrid Course with Kyiv and Odesa)
06SM480o009 / Module

Description:

General description:
Ukraine's staunch resistance to the full-scale Russian invasion in 2022, after eight years of limited war, has impressed the world and left many wondering about the sources of this resilience and national unity. This testifies to the dominance of Russo-centric narratives in the academy and higher education and arrogant negligence towards Russia's former colonies. Such "epistemic injustice" (as defined by the recent ASEEES President Vitaly Chernetsky) needs to be addressed, decentering and decolonizing our knowledge about Eastern Europe. This shapes the aim of the course in "Introduction to Ukrainian Studies: History, Culture and Media", a unique interdisciplinary course developed in collaboration with the National Taras Shevchenko University of Kyiv and the National Illya Mechnykov University of Odesa, and taught by several leading scholars based in Zurich, Kyiv and Odesa. Combining onsite and virtual sessions in a blended, hybrid format, it offers a comprehensive overview of Ukraine's historical development, cultural traditions, and media landscape. Designed for students from diverse academic backgrounds, the course traces Ukraine's journey from early state formations through to the emergence of modern national identity, with particular attention to the 20th and 21st centuries. Cultural modules explore literature, visual arts, music, and popular culture, highlighting Ukraine's dynamism and vibrant, experimental trends. The course also examines Ukraine's evolving media environment, from Soviet-era censorship to contemporary journalism, digital activism, and the role of media in shaping public opinion during times of crisis. Through lectures, readings, discussions, and multimedia resources, students gain analytical tools to understand Ukraine's complex past and dynamic present. By the end, participants will have a nuanced appreciation of Ukraine's historical resilience, cultural creativity, and media-driven transformations.

ECTS: 6

Notes:
The course offers a combination of onsite and virtual sessions, held in collaboration with the National Taras Shevchenko University of Kyiv and the National Illya Mechnykov University of Odesa.

Learning Outcome:
Upon completing the course, the students will be able to:
- Orient themselves in the main problems and complexities of East European history, culture and media landscapes;
- Competently discuss, in writing and oral debate, the current situation in Eastern Europe;
- Use their expertise to explain the sources of Ukraine's resilience in crisis and apply its lessons in other contexts;
- Analyse and discuss relevant cases from Ukraine and the Russo-Ukrainian War in a global framework;
- Apply theoretical concepts from the disciplines of history, cultural and media studies, as well as other relevant disciplines, to analyse and discuss Ukrainian cases;
- Synthesise their own interpretations and on the basis of regional and interdisciplinary expertise.

Module SWRW BA-Seminar: Introduction to the Psychology of Religion
01SM55SS025 / Seminar

Description:

General description:
Die Studierenden setzen sich interaktiv mit einem grundlegenden Thema der sozialwissenschaftlichen Religionswissenschaft auseinander, das anhand von aktuellen Beispielen bearbeitet und diskutiert wird. Sie lernen, konkrete Fallbeispiele mit sozialwissenschaftlichen Fragen zu bearbeiten und entsprechende theoretische Ansätze zu reflektieren.
Religion wird im Kontext sozialer Zusammenhänge diskutiert, gesellschaftlich relevante Fragen werden bearbeitet.

ECTS: 3

Learning Outcome:
Die Studierenden können im Hinblick auf eine bestimmte Thematik konstruktiv und mit sachlichen Argumenten diskutieren. Sie können einen theoretischen Ansatz auf ein empirisches Fallbeispiel anwenden und sich selbst von dem betreffenden Gegenstand distanzieren. Sie können Quellen- und Sekundärliteratur in ihrer Argumentation verstehen und kritisch diskutieren. Sie können eine gesellschaftlich relevante religionsbezogene Thematik sachlich und differenziert behandeln. Die Studierenden können religiöse Gemeinschaften, Praktiken, Vorstellungen etc. als sozial und kulturell bedingte Grössen einordnen. Sie können religiöse Positionen von religionswissenschaftlichen unterscheiden.
